The Gray Ball Bearing Co.

Limited

686 St. Clarens Ave., Toronto

A Convenient 2½ lb. Package

Isn't it better to sell customers just the amount of goods they want and so win their satisfaction and confidence than to force on them more than they need—which will lead to waste?

Mix in Hot or Cold Water

Alabastine

Avoid imitations. There is only one Alabastine.

is put up in a special 2½-lb. carton as well as in the 5-lb. packages. Those who have small jobs get just the quantity they want. There is no waste. The cost to the customer is kept at the lowest possible mark. Your profit is 50 cents per case more and your customers feel they are getting a square deal.

The retail price is 40 cents per package.

Use Alabastine not only as a profit-maker but as a builder of good-will—of a larger list of satisfied customers and of larger business.

The Alabastine Company, Paris Limited

Paris, Ont. **Winnipeg, Man.**

Are You Getting Owl Roofing Business ? ? ?

IT'S YOURS IF YOU WANT IT

The fastest selling, best made roofing on the market. Manufactured in a very modern factory with improved equipment. All the materials that go into the preparation of Owl Roofing must pass a rigid test for high quality. The raw materials are the finest money can buy. Owl Roofing is having tremendous success because it gives satisfaction to the user, also brings satisfaction to the dealer and to us. Suppose you get in touch with us when the cream of the business is yours for the going after.

WE'LL SEND YOU SAMPLES AND PRICES RIGHT GLADLY

Owl Roofing

Water tight, wind-proof and weather resisting. A strong, tough, durable roofing. 32 inches wide, 108 sq. feet. Easy to lay.

Owl Strip Slates

Asphalt slates make an artistic, permanent, fadeless, weather tight, fire-resisting roof. Made individual and 4 in 1 type. They will not curl or crack.

Owl Slate Surfaced Roofing

Provides an excellent covering where the highest type of roll roofing is desired.

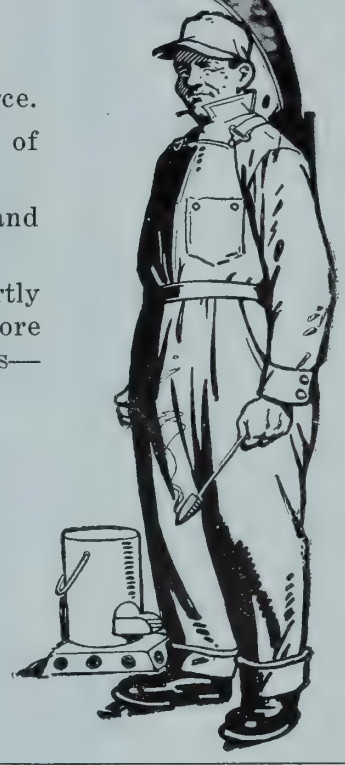
TINKER TOM'S TALKS.

No. 357



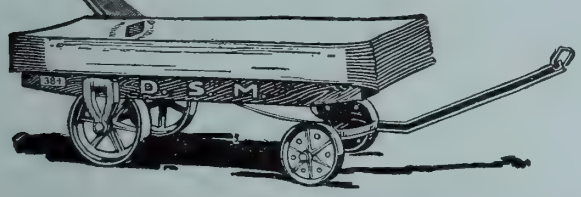
Slowly but surely the momentum of business is gaining force.

Every one of these sunny spring days thaws out a bunch of orders.

Basic conditions remain good. Canadian credit is high and exchange rate low.

Railway rates are still high, but when they come down shortly it will make good times better. Better get on board before it's too late. Good crops, normal production, fair prices—steady work—that's what we want, and it's coming fast!

TINKER TOM.



MADE IN PREMIER CANADA

Better Business Is Coming

Be Wise In Time

LIGHTNING GEM BLIZZARD

Better business is coming to the merchant who has the goods on his shelves, ready to hand out to the customer when he (or she) is in a humor to buy.

Don't get caught, be wise in time. Avoid the painful necessity of passing up good business to your competitor.

The time to order our Freezers is NOW. They are always in demand. They sell on a reputation established by more than 30 years of high-class service, and their future performance keeps them sold. So there you are—quick sales and permanent net profits.

Hadn't you better get busy with your jobber at once? We are all ready to serve you. Let's get together.

4 TOOLS IN ONE

Get a Supply from your jobber without delay.

Four tools for the price of one—hatchet, hammer, box chisel and nail puller combined. The Tomahawk Box Tool is one of the most practical and useful tools for store, warehouse, office, factory and home. There are many prospective purchasers in every locality. Display this tool in your show windows and cases.

Made in one piece, of high carbon drop-forged steel with two pieces of hardwood securely rivetted to it, forming a smooth perfect gripping handle.

TRADE MARK Red Devil Tools

The line of "Red Devil" Slip Joint Pliers

An Attraction to your store

An attractive display of this popular line of pliers cannot fail to interest every electrician, mechanic, motorist or householder and bring him to your store.

"Red Devil" Slip Joint Pliers represent the most advanced design in tools. Extra wide handles are scientifically shaped to fit the hand and increase the leverage. The dentyne knurling assures a firm grip without pinching the hand.

Made in a variety of styles and sizes to suit every taste. Forged of tool steel, beautifully nickel plated and of excellent workmanship throughout.

Send for literature and trade prices.

SMITH & HEMENWAY CO., Inc.
Manufacturers of "Red Devil" Tools
89 Coit Street, Irvington, N. J.

TANKS

Gasoline Tanks
For Underground Storage

Made of the finest copper steel procurable, welded and then painted on the outside with Anti-Rust, Acid-Proof black paint, these tanks are practically rust and corrosion proof. For handling gasoline only the very best is safe. The thorough test all our tanks undergo before leaving our factory is a guarantee of their reliability. The prices are most reasonable.

Oil and Gasoline Tanks

Here's a tank made of copper-steel with handy screw cap opening at top for filling and faucet in side near bottom for drawing off contents. Another reliable tank at a moderate price. These tanks have been giving satisfactory service wherever sold.

Your Money Back if not satisfied

Write us for prices and send us addresses of possible customers to whom we can send literature direct for you. We also manufacture baths, dairy equipment, sanitary closets, etc.

The Steel Trough & Machine Co., Ltd.
TWEED, ONTARIO, CANADA

Holes in the pans,
Leaks in the still,
Mendets on the counter
Means cash in the till.

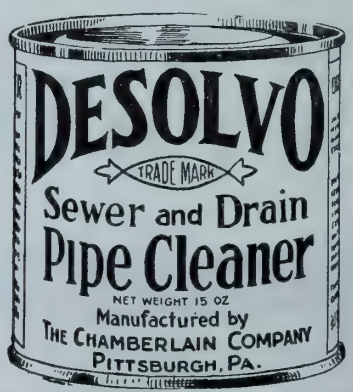
They occupy small space and are continually moving out with the customers to make room for more.

Display Mendets and they sell themselves.

From your Jobber or direct.

Collette Mfg. Company
Collingwood, Ontario

Your Jobber has them



Desolvo

A Time and Money-Saver

If you do plumbing in addition to your hardware business, it will pay you to keep Desolvo on hand. It will shorten your time on jobs and will make profitable sales to customers.

Desolvo just has to be mixed with cold water; it generates heat that quickly removes any stoppage from pipes. It saves tearing up floors, lawns, etc.

Order from your jobber.

The Chamberlain Desolvo Co., Ltd.
109 Church St., Toronto

WHEN you sell a RUBBERSET BRUSH—you know, beyond question, that it will prove satisfactory. That customer will think better of your store because you sold him an article of merit.

No matter what kind of a Brush he wants, RUBBERSET make it—for fine finishing; rough work; for manufacturers; for toilet uses and shaving—RUBBERSET make 'em all—and RUBBERSET guarantee them all.

If you find a bigger demand for Brushes than you anticipated—remember we can ship from stock on short notice.

If your jobber does not handle RUBBERSET BRUSHES, will you write us direct?

RUBBERSET CO., LIMITED

Factories: Toronto and Gravenhurst

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

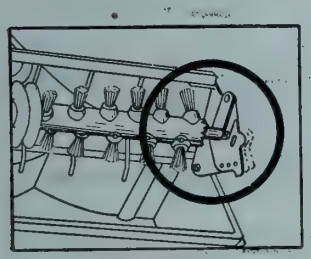
Many hundred thousands of Hoover advertisements are circulated each month through leading periodicals that cover Canada

Let the "Housecleaning Backaches" of Spring Help You to Greater Profits



The Brush May Be Easily Adjusted

(Another Patented Hoover Feature)

THE soft bristles of the Hoover brush, carefully selected to produce the best carpet cleaning results, will gradually wear, just as all brushes do. Eventually any brush must be lowered or become useless until replaced. The adjustment of the Hoover Beating-Sweeping Brush is simple. No tools are required; a woman can easily disconnect the belt, pull out the brush guard, and lower or raise the brush. Thus The Hoover may be kept at highest cleaning efficiency; the user is also saved the cost of new brushes. Covered by Hoover patents granted December 9, 1919, and January 20, 1920. Over fifty other patents protect the salient features of electric cleaner construction. Other applications for patents pending.

Now, while men keenly recall the bare floors at home occasioned by sending out the rugs for cleaning—

Now, while women's backs still ache from moving heavy furniture and from performing old-fashioned dusting and cleaning—

Make your start as an Authorized Hoover Dealer!

Let us put one of our trained Hoover salesmen at work in your locality at this psychological time.

He will go into homes where rugs have just been cleaned by the usual methods—and prove by a Hoover demonstration that those supposedly clean rugs are in reality *not* clean!

Women will welcome him—they will be glad to hear how The Hoover can relieve them forever of such housecleaning drudgery as they have so recently been forced to endure.

Your co-operation will bring you the same splendid profits that Authorized Hoover Dealers everywhere are enjoying.

Join forces with us now—our years of experience are at your command, ready to help you start off on the right foot and continue to sell Hoovers in profitable number the year around.

A small space in your store, a small investment in Hoovers—*on a guaranteed sale basis*, twelve profits a year through monthly turnovers of your stock—that is our proposition, if you will give us your hearty co-operation.

Investigation does not obligate you in any manner. Send today for a Hoover representative.

Barrett Roofings, Cements Industrial Paints etc.

THIS will be a big year for Barrett Roof-Repair Specialties. For most people are trying to save money. They're not going to buy new roofing if they can patch the old roofs and make them last another year.

That's one reason why the two Barrett products described below are going to be such fast sellers—they're the greatest materials on the market for making old roofs last longer.

Another reason they're going to sell fast is because our advertising campaign will remind them of Barrett products when they are thinking of repairing their roofs.

Everlastic Liquid Roofing Cement

One coat of Everlastic Liquid Roofing Cement makes old prepared and "rubber" roofings almost as good as new. It forms a smooth, tough, durable surface that adds years of extra service.

Mention this to your customers. They'll thank you for the money-saving suggestion. Everlastic Liquid Roofing Cement is easy to apply and comes all ready for use in packages ranging from 1-pint tins to 40-gallon barrels and steel drums containing 43 gallons.

Anyone can apply it

Plastic Elastigum Patching Cement

No wonder this famous Barrett product is called "the plastic cement of a thousand uses!" Patching leaks and holes in all kinds of roofs, repairing flashings, relining gutters and cisterns—these are a few of the uses for which it is unequalled. It's easy to apply and sticks to either a wet or dry surface. Don't be without a stock.

Relining a gutter with Plastic Elastigum

Sold in 1 lb. tins (24 to the case), 5-lb. packages (12 to the case), 25-lb. and 100-lb. packages, half barrels (about 300 lbs.) and barrels (about 600 lbs.)

Preferred By Buyers

BUTTERFIELD TOOLS

There is a marked advantage to the hardware merchant in handling Butterfield's Tools. Their prestige and popularity makes them easy to sell with only reasonable effort on your part.

Their speed, accuracy, and reliability has made them liked and respected by capable machinists everywhere.

This undoubted leadership in their field has made them come first to mind with buyers and purchasing agents. It will pay you to get in touch with all who purchase for the large plants, shops and factories near you.

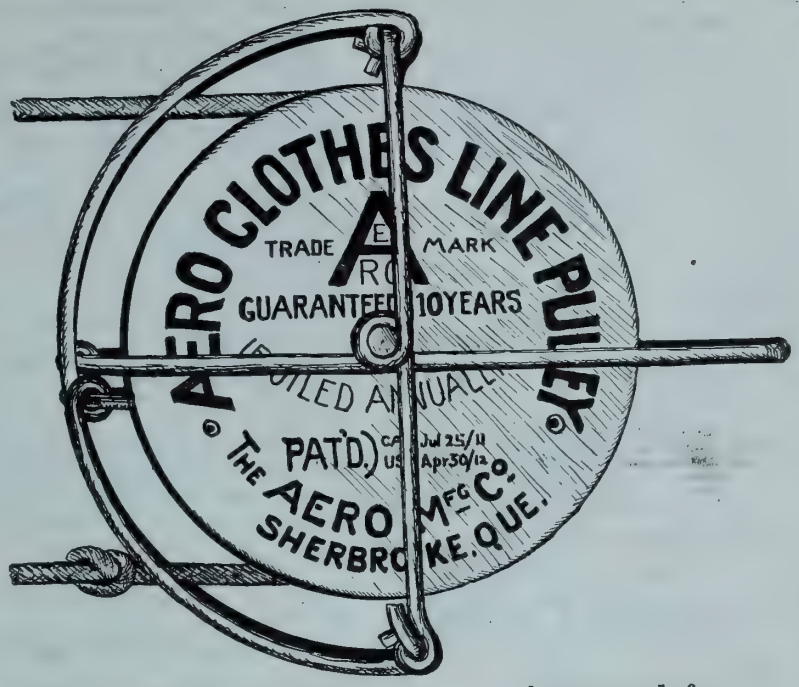
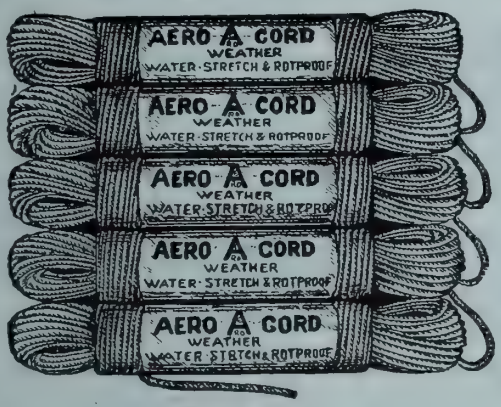
Aero Pulleys



These are the most effective clothes line pulleys known. The Aero Clothes Line Pulley has a deep V-shaped friction groove which will accommodate itself to various diameters of clothes line. The space between groove and guard is sufficient to allow passage of knots. The weather-proofing treatment repels moisture; hence, no freezing. Pulley being of wood, weather-proofed, lubricates itself at bearings, rendering it noiseless and smooth working. The use of wood does away with all troubles from rust. The large axle and bearings render the Aero Clothes Line Pulley capable of carrying heavier loads than others used for a like purpose. The diameter (6″) insures easy working for long drives. The wire guard guides the rope to its proper place on pulleys no matter at what angle the pulley may be swayed by the wind. The price is lower than for others of similar diameter. The Aero Junior (2 3-4″) is for general domestic use.



Aero Cord

The only truly weather-proof, rot and stretch-proofed cordage made. It is superior in tensile strength and durability. Aero Cord is made by covering a special, twisted, fibre core with braided, multiple plies of cotton under high tension. It is also weather-proofed. Aero Cord is unexcelled for Sash Cord, Clothes Line, Trolley Cord, Bell Cord, Signal Cord, Tent Rope and Tiller Rope, Awning Cord, Whistle Cord, Log Lines, Tow Lines.

Put up attractively in hanks and coils.

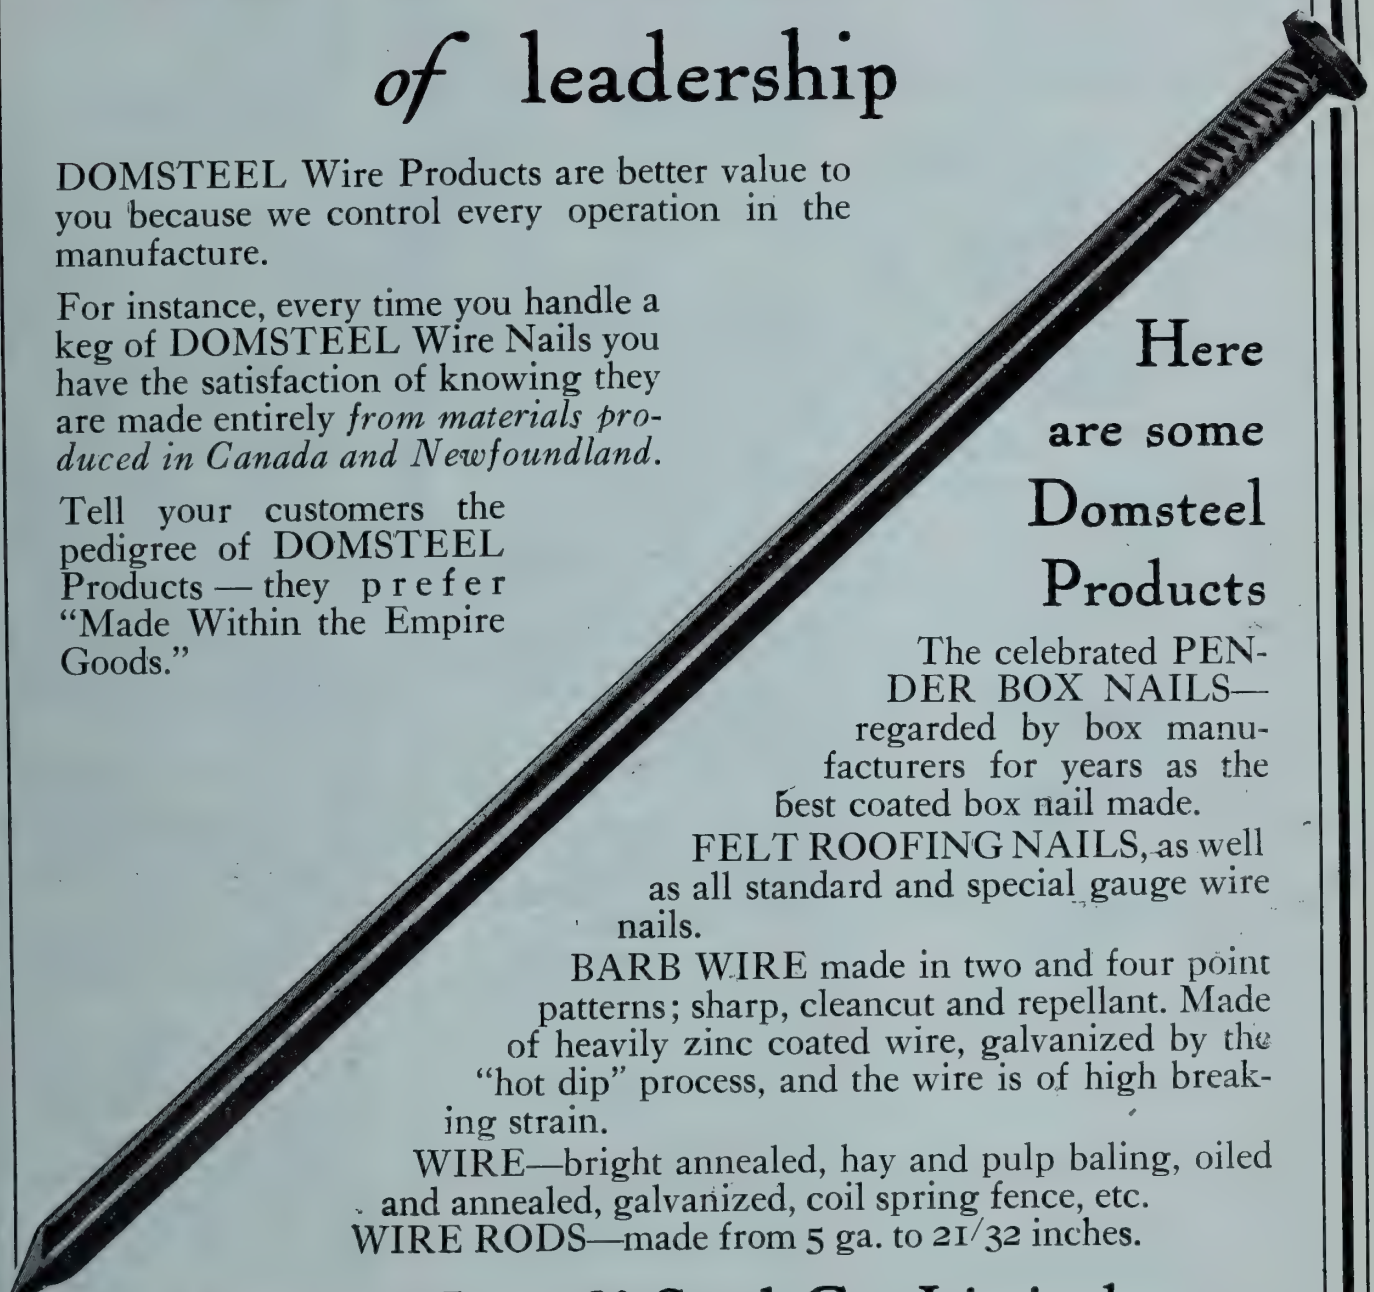
The EVIDENCE *of* leadership

DOMSTEEL Wire Products are better value to you because we control every operation in the manufacture.

For instance, every time you handle a keg of DOMSTEEL Wire Nails you have the satisfaction of knowing they are made entirely *from materials produced in Canada and Newfoundland.*

Tell your customers the pedigree of DOMSTEEL Products — they prefer "Made Within the Empire Goods."



Here are some Domsteel Products

The celebrated PENDER BOX NAILS—regarded by box manufacturers for years as the best coated box nail made.

FELT ROOFING NAILS, as well as all standard and special gauge wire nails.

BARB WIRE made in two and four point patterns; sharp, cleancut and repellant. Made of heavily zinc coated wire, galvanized by the "hot dip" process, and the wire is of high breaking strain.

WIRE—bright annealed, hay and pulp baling, oiled and annealed, galvanized, coil spring fence, etc.

WIRE RODS—made from 5 ga. to 21/32 inches.

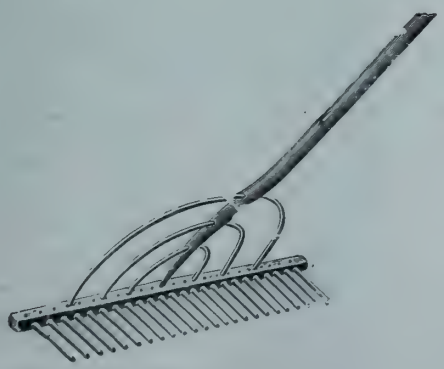
RUGG-BALL well known tubular steel bow HAY & LAWN RAKES



The very best rake for EXPORT as they can be easily set up without breaking the bows. Wire and wood bow rakes also.

These rakes are made from the best White Ash and Maple stock. The teeth have no shoulder, each tooth being pinned by machine.

Note the improved double bend which gives a much better hanging rake.

The steel tube bows are warranted never to break, being made from ¼" cold rolled steel tubing bent the same shape and fastened the same way as the wood bows, at the same time adding nothing to the weight.

A trial shipment will convince you that these Patented steel tube bows are a wonderful improvement over the wood and wire bow.

Packed K.D. 10 dozen in case for EXPORT.

All information re EXPORT shipment gladly given and catalogues, etc., mailed on request.

"ACME"

Shears With Specially Hardened Sharp Edges

Your customers want Shears and Scissors for just one purpose—to cut. "Acme" Shears are famous all over the world for one thing in particular—their specially hardened, sharp cutting edges. Next after that, perhaps, comes their well-known low price for the quality.

To the merchant, "Acme" Shears, Scissors and Tinners' Snips offer an exceptionally advantageous line to sell in conjunction with a high-priced line. "Acme" Shears are wanted and sell; 35,000 pairs are produced daily. Ask for Catalogue No. 6. "An Encyclopaedia of Scissors."

LOWER PRICES ON "ACME" LINES IN EFFECT MAY 1st

The Acme Shear Company

2262 Half Page Sporting Goods Dealer—May ★

The Iver Johnson bicycle sells fast and stays sold

For more than thirty-five years, the Iver Johnson has been a famous fast-selling bicycle. This is due partly to the continual national advertising, and partly to the fact that the Iver Johnson is such a good bicycle that one sale almost always leads to others in the same neighborhood.

From their fathers and mothers, the young folks of today learn of the reputation that the Iver Johnson has had for years, and so the average bicycle prospect is already half-sold on the Iver Johnson before he enters the dealer's store.

Whether or not you are going to get a good share of the 1922 Iver Johnson bicycle business, rests with you. Some excellent territories are still without adequate dealer representation.

Stock Iver Johnson revolvers—22, 32, 32 special and 38 calibres. Hammer and Hammerless models with Regular, Perfect Rubber and Western Walnut grips.

Why not stock Iver Johnson Champion Single and Hammerless Double Barrel Shotguns? Accurate, dependable, moderately priced.

FREE! Three interesting booklets, also complete dealer information. Send at once for one or all of these booklets.

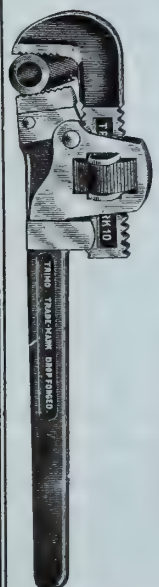
TRIMO

THE WORD TRIMO



Stands for good tools made by the Trimont Mfg. Co., which are the following:—

The Trimo Pipe Wrench
The Trimo Chain Pipe-Wrench
The Trimo Nut Wrench
The Trimo Pipe Cutter (Hand)

The four good points that make **Trimo Pipe Wrenches** superior are the **Spiral Spring** always in place—**Steel Frames** that will not break—**Nut Guards** that protect adjustment nut—and the **Inserted Jaw** in handle that can be replaced when worn.

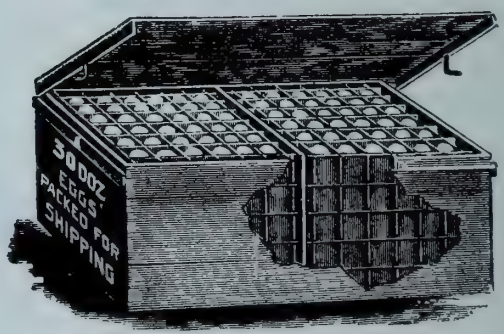
MANUFACTURERS



Why do eggs deteriorate?

One reason is some shippers use same fillers repeatedly — absolutely against the ethics of hygiene.

Even new-laid eggs will give off an odor that is absorbed by the filler. Each time the same filler is used the odor becomes intensified. Egg shells are porous, and the eggs will become tainted from this odor and spoil.

It pays your customers to use fresh fillers for each shipment—and incidentally it increases your business.

Spramotor
It isn't a SPRAMOTOR unless we made it

Do the Farmers in Your District "Spray The Spramotor Way?"

If they don't you should see to it that they do. There is good agents' profit in handling the Spramotor—the sprayer that sprays everywhere a plant-destroying insect can get.

The farmer knows of the Spramotor—it has been advertised in his farm papers for years. Our advertising, and the good word of satisfied farm users, have done most of the selling for you. Putting the Spramotor before the farmer, and telling him you are our agent is your work.

Durable Three-ply Veneer Seats

These splendid, three-ply veneer seats are made in a pleasing variety of patterns, carefully shaped, corners rounded, edges smoothed and sand papered, and fastened with genuine water-proof cement. They will not warp, curl, crack or come apart. Even the severest weather will not cause these excellent seats to come apart.

There is no better line that you can handle than these Perforated Three-Ply Veneer Chair Seats. The extraordinary care and attention we give to their manufacture is producing results in increased sales for Dealers everywhere. They are a continual source of revenue in money, good-will and business held and gained.

A Few Words About Hardware & Metal

HARDWARE AND METAL is the only weekly hardware paper in Canada.

* * * *

HARDWARE AND METAL is the only hardware paper in Canada with membership in the Audit Bureau of Circulations.

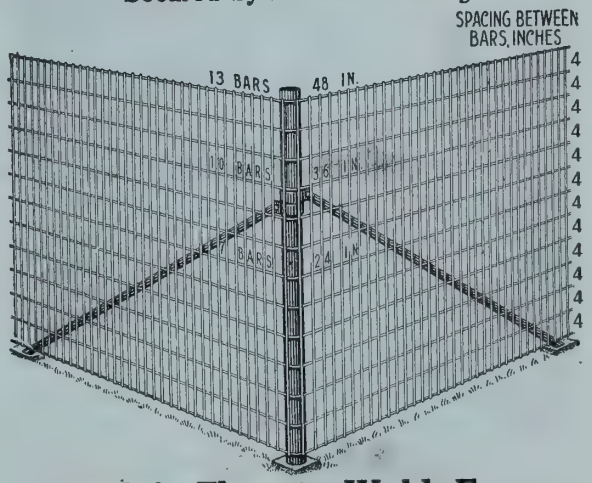
* * * *

HARDWARE AND METAL is one of the sixteen papers published by the MacLean Publishing Company, the largest business of its kind in the British Empire.

* * * *

HARDWARE AND METAL has been published every Saturday for the past 33 years, and is subscribed to by every wholesale hardware firm, and practically every worth-while retail hardware buyer in Canada, as well as by purchasing agents of many of our largest railways, mines, Government purchasing depts., and industrial concerns.

Joints Permanently Rigidly
Secured by Electric Welding



Lundy's Electric Weld Fence

Made with a weld that is definitely guaranteed to hold and not permit wires to separate. The mesh is close and uniform, the welding absolutely firm and secure and the fence firm and strong. Sells for stall guards (replacing wood), gardens, orchards, grape arbors, tree and window guards, tennis courts, etc. Unexcelled for partitions in stock rooms, factories and warehouses.

Write for prices and terms to merchants.

A. R. LUNDY
257 King St., West Toronto, Ont.

Sell the Apprentice

The hardware dealer who sells a Starrett Tool Set to the apprentice machinist gains an immediate profit and builds for future sales.

A Starrett Tool Set earns the apprentice the approval of older machinists — and earns a loyal customer for the dealer who sold it.

Full details of Starrett Sets of Tools for students and apprentices are included in the Starrett Catalog No. 22 "MA." Copy free on request.

Here's a Money-Making Line for You!

Progressive Hardware Dealers thru'-out the country are stocking REED ROOFING CEMENTS—"Plastic" and "Liquid."

WHY?

BECAUSE there is a good profit to be made handling a commodity for which there is a steady, all year 'round demand. Roofs *must* be kept storm-tight summer and winter.

BECAUSE *they know* that REED ROOFING CEMENTS will give their customers the maximum service and satisfaction a good Roofing Cement Should.

REED ROOFING CEMENTS are built on a heavy bituminous base, impregnated with long asbestos fiber and other fire resisting ingredients. They are tough, waterproof, elastic and are absolutely unaffected by climatic changes. Put up in one, and ten pound tins and in 100 lb. kegs, half barrels and barrels. HAVE YOU PLACED YOUR ORDER YET?

Write for our 1922 Prices

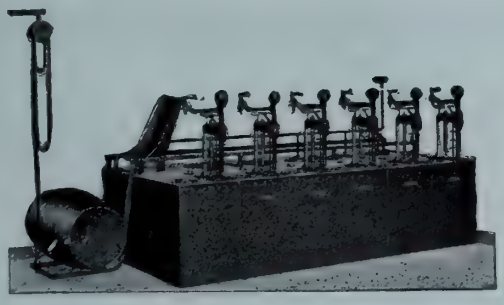
Absolute Safety in Handling Paint Oils

Dealers are assured of a minimum fire hazard when they handle their paint and lubricating oils with Bowser Equipment.

Bowser Equipment has never started or contributed to a fire.

Bowser also combines Great Economy with this Safety. The all-metal, evaporation-proof Tanks prevent leakage and gumming. The Piston-Type Measuring Pumps deliver exactly the amount of oil required directly into the container.

There can be no waste—and the oil is kept *clean*.



These same Bowser Features also enable you to give better service. This increases your patronage and profits.

Bowser Equipment is MADE IN CANADA by

Handle Specialists

The making of good handles is a trade requiring skill, not only in the making of the handle, but also in the selection of the proper materials.

Still's Handles

are sold in Canada from coast to coast because of their superior quality, design and finish. It is our business to see that our goods meet the expectation of our customers. We specialize in a complete line of Axe, Pick, Sledge, Hammer, Cant Hook and Peavie Handles.

Our name is stamped on all handles. Sell "Still's" Handles and your rewards are profits and repeat business.

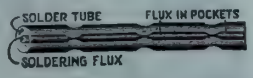
KESTER ACID CORE WIRE SOLDER

FLUX IN POCKETS

— a self-fluxing solder for automotive and general work. Flux and solder are applied in one operation, because the flux is contained inside the hollow wire of genuine tin-and-lead solder. In great demand by all solder users because it saves two-thirds of the workman's time and gives a strong bond the first time. Comes in convenient packages and spools that are easily stocked. Write for free sample—investigate this easy-to-sell, easy-to-use, easy-to-stock solder.



Sectional view. Note flux in pockets.

Kester Rosin-Core Wire Solder is also manufactured for delicate electrical work.

WE SHIP PROMPTLY

Selling Twice —and Easily

Second sales are the natural result of first sales, when you stock one of the five brands of files named below.

The name sells them in the first place—because they are known by file users as the standard files.

The fact that you have them brings people back for second and subsequent purchases—makes them steady customers.

Our large reserves enable your jobber to supply you promptly—you do not need to carry large stocks.

Specify one of these brands:

FILES—RASPS

Made in Canada by

Nicholson File Company

PORT HOPE ONTARIO

"JARDINE"

Horseshoeing Foot Vise and Boltheader

Made in Canada

The Foot Vise has tempered, crucible steel anvil, bevelled at one end, square at the other, for square and bevelled calks. The back jaw is self-adjusting to the back of shoe. Jaw 6" wide.

For Bolt Heading

Pressure on the treadle operates a short, stiff arm (not shown in illustration) opposite the pivot of the swinging side of machine. This closes the dies of Bolt Header as firmly as a vise. When pressure is removed from treadle the bolt is free to be taken out to square the head while hot.

We make a full line of Blacksmith's Tools. Why not send for catalogue No. 18.

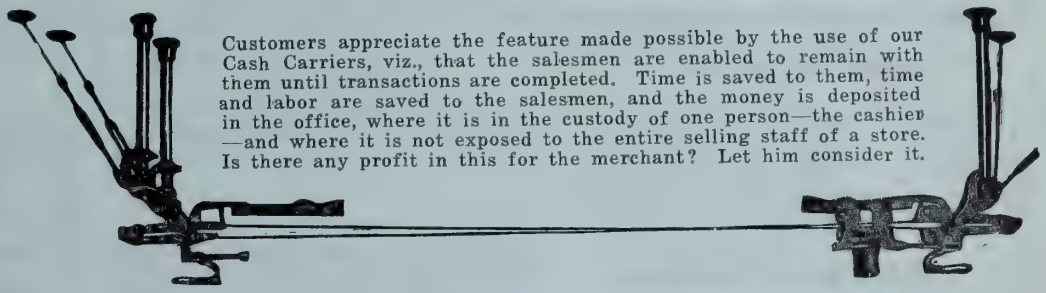
FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

Why have those unnecessary delays? All kinds of Cash and Parcel Carriers and Pneumatic Tubes.

Gipe-Hazard Store Service Co., Limited
113 Sumach St., Toronto, Ont.



Customers appreciate the feature made possible by the use of our Cash Carriers, viz., that the salesmen are enabled to remain with them until transactions are completed. Time is saved to them, time and labor are saved to the salesmen, and the money is deposited in the office, where it is in the custody of one person—the cashier—and where it is not exposed to the entire selling staff of a store. Is there any profit in this for the merchant? Let him consider it.

CARTER'S

Every Paint Buyer Knows Carter's Genuine Dry Red Lead

Carter's is a quality Lead. Made from the very best grade of Canadian Pig Lead, it is highly Oxidized and ground very fine and when mixed with pure linseed oil it possesses unusual covering capacity.

Your paint customers will appreciate Carter's Genuine Dry Red Lead because of its unchanging uniformity of film.

Get prices on this and on the other Carter lines—Genuine Dry White Lead, Genuine Orange Lead and Litharge.

The Carter White Lead Co. of Canada, Limited, 91 Delorimier Ave., Montreal

IF YOUR MESSAGE TO THE TRADE

is advertised in Hardware and Metal it goes by paid subscription to every wholesale hardware buyer in Canada and over 90% of the retailers. An examination of hardware-store displays, or inquiries in the stores, will convince you that these men invariably prefer to buy goods made familiar in the advertising pages of Canada's only weekly hardware trade paper.

HARDWARE and METAL

"Canada's National Hardware Weekly"

143-153 University Avenue - Toronto, Canada

Montreal Branch, Southam Bldg. Winnipeg Branch, Union Trust Bldg.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

BROWN & SHARPE TOOLS

They Add Sales and Permanent Satisfied Customers

The Traditions of 72 years fortify the craftsmanship that excels in these fine tools. (Brown & Sharpe Tools were the first precision tools in America—Mr. Brown invented the Vernier Caliper and introduced the Micrometer).

The REPUTATION of their high accuracy, excellency, and steadfast reliability lives in every mechanic's mind. It is an invisible argument that is a real living recommendation to all users of Machinists' Tools.

The SUPERIORITY finds itself in the accurately fitted parts, the distinguishing finish, the clean cut graduations, the world known accuracy, and long life.

THEY ARE THE CHOICE OF MECHANICS EVERYWHERE. THEY BRING PERMANENT CUSTOMERS TO THE DEALER WHO SELLS THEM. CATALOG ON REQUEST.

EVEREADY UNIT CELLS

The battery is the power house of the flashlight. It's easy to keep your flashlight always in working order with bright-burning, long-lived Eveready Unit Cells. They fit and improve all tubular flashlights.

Are You Getting Your Share of the Flashlight Business?

The increase in sales of Flashlights in the last few years is the best evidence that flashlights are a profitable line for the dealer to sell.

There are dealers in Canada, with comparatively small stores, who are turning over thousands of dollars in Flashlight and Flashlight Battery Sales every year. Why? Because Eveready Flashlights are the most convenient, dependable, and economical form of portable light made and the public—your customers—know it.

Eveready advertising has made every man, woman and child familiar with the Eveready Flashlight. The sturdy construction of Eveready Flashlights and the long life of Eveready Batteries bring safety and comfort wherever a light is needed for temporary use at night.

You should have a share of this profitable business. Write to us for details and prices—or ask your jobber's salesmen.

Cashing-in on Bride Time

This is a great time of year! Everybody getting married! Stag parties for the lucky bridegrooms and showers for the beautiful brides-to-be.

And, incidentally, it's a great time of year for *business.* It's a time when hundreds of merchants handling Diamond Ware or Pearl Ware do a rattling fine business.

Make up a set of the Diamond Ware or Pearl Ware utensils a bride will want in her new home, display it in your window as such, and offer it at a special price.

Urge women of your locality to give brides *Diamond* Ware or *Pearl* Ware showers instead of kitchen showers. Appeal to brides in every way at your command. Watch your local paper for engagements. Then drop the happy young ladies notes suggesting that Diamond Ware or Pearl Ware Enameled kitchen utensils would be ideal for their new kitchens. Tell them of the special price you've put on the set.

At some of her showers a bride may get say half a dozen Diamond or Pearl Ware utensils. She will want to fill up to make the set. That's where *you* come in once again.

And don't forget this point. She'll never be able to buy Diamond Ware or Pearl Ware to fill her set from any wandering peddler. She must buy from the merchant—right over the counter!

Watch for our special Bride Ad. In this we advise women to see the nearest hardware merchant before giving any showers.

Always buy Goods bearing this label

ENAMELEDWARE

The CLEAN *Ware*

"MARATHON"	"PREMIER"	"COLONIAL"
Chocolate and White	**Blue and White**	**All Grey**

THE Davidson "Seal of Durability" on any article of Enameledware is the equivalent of the sterling hallmark on silverware.

It denotes a quality and a workmanship which is recognised everywhere as the best.

The dealer who sells Davidson Enameledware has absolute confidence in it, because of his past experiences.

The housewife who has used it knows that for its wearing qualities alone, it is the most satisfactory Kitchen Ware she has ever used.

So it always pays to carry a full stock of these brands, because they create a steady demand and are, moreover, very profitable lines.

If you are not as yet on our books let us send you a sample order.

The Best Corner in Your Store and the Best Thing in the Corner

From the occasional sale of a straight bladed razor that your customer took "for better or worse" for all time, has grown your Shaving Corner—a department that takes up little of your floor space, but looms large in your statement of profits—

a department that not only turns over its stock frequently at a satisfactory profit, but builds permanent customers for your store.

When you sell a Gillette Safety Razor, you make a sale and a permanent customer at the same time—a customer not only for blades, but for everything in the shaving corner and everything in your store.

"Around the British Empire with the New Improved Gillette"

Tie up with the big Empire Day advertisement appearing all over Canada on May 23rd. Clip this advertisement from your daily paper of the 23rd. Put it up in your window May 24th and for the rest of the week. It will be good advertising for you and for the Gillette Razor.

MADE IN CANADA — TRADE Gillette MARK — KNOWN THE WORLD OVER

Cleveland Grindstones
Are the Biggest Sellers

THE grindstone easiest to sell is the grindstone that offers the dealer the greatest profit-making opportunity. More sales are made and each sale is made more quickly.

This is why most dealers carry Cleveland Grindstones. They are the best known among the trade and among users.

Cleveland Grindstones are equipped with the famous Genuine Berea or Lake Huron Stones produced only in the Berea and Lake Huron Quarries owned by the Cleveland Stone Company.

The frames are constructed in our own factory and are sturdy, compact and durable. Long wear is built into every frame and mounted with Cleveland Grindstones the entire outfits give full and lasting satisfaction to users.

And you can greatly increase your grindstone business this year if you will bring your grindstones up toward the front of the store for a time during the selling season.

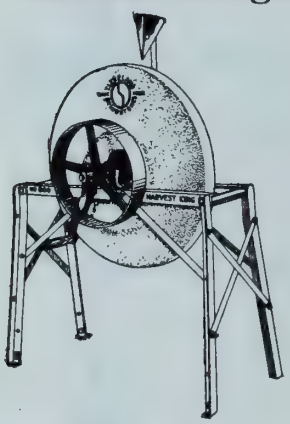
Right now, farmers are most likely to buy a grindstone if they are reminded of it. And the easiest and best way to be sure they **are** reminded of it is to display your grindstones where your customers can see them.

The little time and effort required to do this will pay handsome profits in the shape of extra sales. Try it now, for **now** is the time when the effort will pay the biggest profits.

THE CLEVELAND STONE CO.

814 UNION BUILDING, - CLEVELAND, OHIO

Harvest King

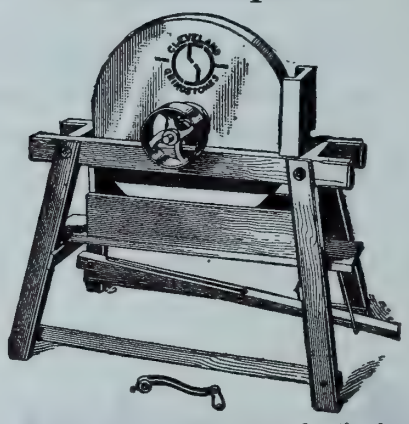


Here is one of the fastest sellers among power grindstones and is carried by nearly all hardware dealers. It is substantial, sturdy and will last a life time, yet is low priced.

The frame, constructed in our own factory, is of heavy angle steel 1¼″ x ¼″ x ⅛″ and is strongly braced.

The stone is our standard high grade selected Cleveland grindstone 24″ x 2″. Has a ⅝″ shaft, 12 x 2⅜″ pulley and heavy steel roller bearings, hand crank and drip cup. The frame is folded complete, stone crated separately to save freight. Be sure to carry a good stock of Harvest Kings—they sell rapidly.

Farmer's Special



A high grade power grindstone for the farm at a popular price. Sturdy modern frame, wooden frame constructed of a high grade of hardwood in our own factory.

Equipped with high grade Cleveland Grindstone, steel shaft, 12-inch pulley and hardened steel annular ball bearings. And in addition we supply a foot treadle with ball bearings on the crank and a hand crank, either to be used in case of emergency.

You should carry a few Farmer's Specials to complete your stock.

Sterling

The Sterling is the most substantial and the lightest running grindstone ever made. It is mounted on a heavy steel tubing, braced with heavy material.

All bolts and rods are threaded; there are no cotter pins, no loose parts. Fitted on crank and shaft with encased ball bearings which are case hardened, electro galvanized and positively will not rust. All castings of heavy malleable iron.

Mounted with genuine Berea or Lake Huron Stone—beyond question the best grit in the world. The Sterling and the Harvest King are the best known and most widely used of all grindstones. You cannot be mistaken in stocking these two styles.

The Fast Selling—Best Shooting!

.22 CALIBER REPEATING RIFLES (3 MODELS)

Because of the great popularity of the .22 rim-fire repeater, we designed for Marlin shooters three (3) fine styles of .22 repeaters, each the best firearm in its particular class.

Model No. 20 has the fast-handling slide action, with visible hammer, for the shooters who prefer a visible hammer rifle, and has a full magazine that gives 25 shots at one loading.

Model No. 38 is the wonderful new slide action Marlin repeater, hammerless, with instantaneous take-down—the cleanest and sweetest little rifle ever made. When you see this Marlin you cannot possibly purchase any other hammerless .22 repeater.

Model No. 39, made with lever action, is the choice of expert and professional shooters and all others who like to use the lever action in a small game and target rifle as well as in their big game hunting rifles.

All Marlin .22 repeaters use in the same rifle, .22 short, .22 long and .22 long-rifle cartridges. These are year-'round sellers—sold at right prices. Stock these three Marlin .22's at all times—order to-day from your jobber.

If interested tear out this page and place with letters to be answered

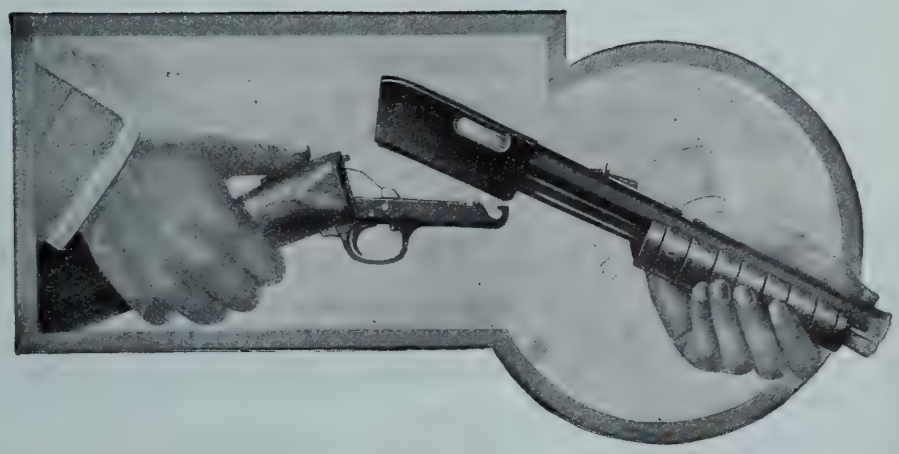
Marlin

Model No. 38 Repeating Rifle, .22 Caliber, Rim-Fire, Take-Down, Pistol Grip, Hammerless, 24-inch Round or Octagon Barrel, Half Magazine, 15 Shots, Weight about 5½ pounds.

The handsomest and handiest .22 Rifle ever invented. It's a hammerless—built right. It has Slide Action; Side Ejection; Solid-Top, Closed-In Frame; Ivory Bead Front and Flat Top Rocky Mountain Rear Sights, **the best set of sights ever furnished on any .22 Repeater;** Barrel and Receiver, Blued Finish; Genuine Hard Rubber Buttplate, which adds to its pleasing appearance.

Handles without change or adjustment all .22 short, .22 long and .22 long-rifle cartridges, black or smokeless powder loads.

Instantaneous take-down—simply draw back take-down latch button; tip forward barrel portion; disconnect.



Accuracy—because of the deep Ballard target rifling, the rifle is remarkably accurate. The best gun made for target shooting and for woodchucks, crows, hawks, gophers, squirrels and rabbits.

No other .22 Repeater is so easy to keep clean! Just take rifle apart and lift out breechbolt (containing operating parts); you can then insert cleaning rod at one end and draw entirely through the barrel.

If you sell guns, order from your jobber, but write us to put your name on our list for prices, catalogues, advertising matter and other "helps" in selling Marlin guns.

How the Dealer Stands

in the scheme of

LACO SELLING

Every Dealer who handles Laco Lamps is considered by this company as a worthy part of the machinery of distribution to users.

His efforts are appreciated, and no methods or means are adopted by the company to lessen or to avoid the Dealer Profits.

These points have a direct bearing on the splendid business relations existing between this company and the many Dealers throughout Canada now selling Laco Lamps.

The Laco Dealer is Protected and Supported in Many Ways

1. Laco Lamp sales and profits are based on a sliding quantity basis—a worth-while profit remuneration for worth-while sales efforts.
2. Laco Lamps assure full margin of profit, as full retail price is protected.
3. Laco prices to Dealers are such that Dealers can handle, at a profit, business of the largest factories in their districts.
4. Only minimum stocks need be carried as there are available at all times the stocks of the Laco Jobbers and Laco Warehouses.

CANADIAN LACO LAMPS, LIMITED

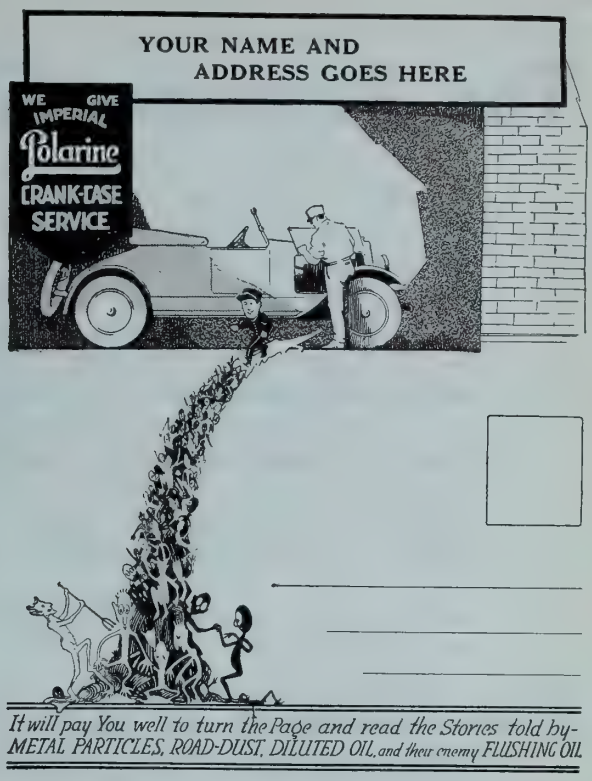
This attractive folder which has been prepared for the use of our Crank Case Service dealers is printed in two colors in postcard style (actual size 5½" wide by 3¼" deep, folded twice). Quantities up to 300 imprinted with your name will be supplied *free* for mailing out to your customers. Place your order with the Imperial Oil salesman or agent at once and the folders will be promptly supplied.



Crank Case Cleaning Builds Up Other Business

Increased sales of hardware, accessories, oil and many other lines which you handle result directly from Crank Case cleaning jobs. After all, it is only natural that car and truck owners should show their appreciation of such worthwhile service by exclusive patronage of the dealer who is equipped to offer them its many advantages.

The Crank Case Service idea has been accepted by motorists everywhere. A campaign of education conducted by engine manufacturers through their instruction books; by good dealers in their daily contact with customers; and by automotive engineers, through magazine and newspaper pages, has produced far reaching results.

Be the first in your field. Establish a Crank Case Cleaning Department now and advertise the fact to your customers. An advertising campaign to be launched during the summer months will back up your efforts and help sell the idea to your customers.

Ask the Imperial Oil salesman for the details regarding advertising folders, electrotypes for postcard, handbill and newspaper advertising, and other helpful *free* material which we are prepared to furnish you.

There is Lots of Fence Business Right in Your Town

Everybody likes to have their property neatly and attractively fenced. It is something they can take pride in and it adds to their home's value. That is why Peerless Lawn Fence is in demand these spring days when people are fixing up. Every home owner is a prospect. If front yards don't need fencing back yards may. The illustration shows how Peerless Lawn Fence can make back yards just as attractive as the front. Lots of light, air and room for flowers too. You can sell this idea to everyone in the block. A handsome store display showing actual samples of Peerless Lawn Fence and Steel posts sent at your request.

Attracting Tourist Trade

Ten million automobile owners are hearing the call of the tourist trail. Hundreds, perhaps thousands who answer the call will pass your door this summer.

They are out for pleasure. They have money to spend. They are in a buying mood.

Can you get them to stop? Can you sell your goods to them? Can you attract tourist trade?

Yes,—if you have a Wayne Honest Measure Gasoline Pump on the curb in front of your store. Tourists all need gas, and a pump, standing ready to serve them, will bring their trade to your door.

But be sure your pump is a Wayne Honest Measure Pump, for automobilists everywhere, desiring honest measures of filtered, water-free gasoline, prefer Wayne Pumps.

And the confidence which motorists have in Wayne Pumps will extend also to you and to the merchandise which you sell.

Let us tell you more about this way of stopping business at your door. When you write, ask for Bulletin 276-HM.

The Perfect Grip

An ordinary hammer will slice the head off a nail, because it gets a grip on the head and not on the nail. With the head off, it's all off.

Williams' perfectly balanced Hammers will grip the **body** of a nail and pull it, head and all, clear through a plank. All nails are trailers to Williams' hammers.

Heads on or heads off, for drive or pull, Williams' Superior Drop-Forged Hammers are the bosses in the nail world. Good workmen want them because they fit the hand, are perfectly balanced and are good all through.

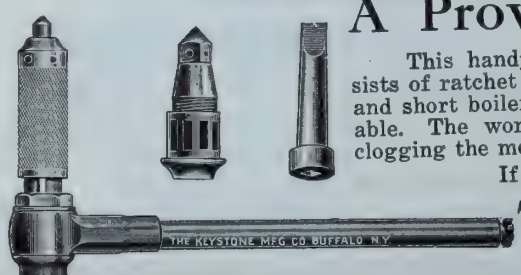
Keystone Reversible Ratchet

Combination No. 200

A Proven Record For Good Sales



This handy combination is well made of first-class materials. It consists of ratchet for taper shank, twist drills, sleeve for square shank drills, and short boiler socket for square shank drills. The sockets are interchangeable. The working parts are all enclosed, preventing dust and grit from clogging the mechanism.

If your jobber cannot supply the demand, write us.

Coal Strike Holds Up Export of Steel

Stimulation of Steel Mill Bookings and Indefiniteness of Coal Supply in Future Compels Mills to Withdraw From Export Orders to Protect Domestic Requirements—European Mills Need Their Own Production Too Much to be Serious Competitor in This Country

Based on interview of Hardware and Metal with W. BEVERLEY ROBINSON, President B. & S. H. Thompson & Co., Montreal

Editor's Note.—The price and supply of hardware is so dependent upon conditions in the primary branches of the iron and steel industry that the present developments in that industry are of much interest to hardware merchants. There is talk of competition in this country of European iron and steel, prices on many products have recently been advancing, export markets have been exerting a stronger influence and a serious coal strike is on our hands. These affairs are ably dealt with by one who has made a close study of conditions as affecting this industry, and who has recently returned from a visit to certain foreign markets.

THE IMMEDIATE situation, and factors which should play an important part in the steel markets in the near future, were outlined by W. Beverley Robinson, president of B. & S. H. Thompson & Co., importers of steel products, in an interview with Hardware and Metal. The upward tendency now evident in the market of practically all lines of iron and steel presents an interesting study for all engaged in the industry, from the producer to the consumer. Basing the opinions on reports received from their principals in the United States, Mr. Robinson stated that viewing the situation from a world-wide standpoint, the improvement which is now being evidenced is due to the cry for supplies from a world which has been starved of steel during the past few years.

Improvement Most General

This improvement has been generally noted, most foreign markets reporting more favorable conditions. Their principals in the United States tell of heavy increases in bookings, and much better business than they have enjoyed for almost a couple of years. That a world-wide shortage of iron and steel still exists is felt among producers, and with anything like normal conditions in the coming months, demand will exceed the present available manufacturing capacity of the world. Stocks everywhere are below the requirements of normal trade, and in some markets practically non-existent. This is abundantly evidenced by the fact that almost all orders received for a considerable time past call for promptest possible delivery, in fact, are evidently for the filling of hand-to-mouth requirements. So long as buyers generally believed that the downward movement must continue, their commitments were naturally restricted to urgent requirements for prompt consumption, but, it was pointed out, once the fear of a declining market is removed from their minds there can be no doubt that demand for even moderate replenishment of stocks and for construction work held up pending stabilization of costs, will tax the productive capacity of sources of supply.

Europe's Position

Dealing with the industry in Europe, and the possibilities of imports from overseas mills, Mr. Beverley Robinson stated that countries in Central Europe were badly in need of most of their own productive capacity, but unfortunately they were not in a position to pay for their requirements. "But for the present inability of a very large part of Europe to pay for more than a small proportion of the immense tonnage of iron and steel products which would be necessary to restore the war stricken areas to anything like their pre-war condition, it is doubtful if the continental European manufacturers would have any important quantity of iron and steel available for export to overseas markets. The requirements of Russia alone, were she in a position to pay for them by means of exports, would go a long way toward absorbing the export capacity in iron and steel of Central Europe," he said.

Foreign Competition

While the competition of both Belgium and Germany is still very much in evidence in some of the principal export markets in the case of some lines of steel products, it has practically disappeared in many other important lines. This is particularly the case with wire products. The continued heavy output of uncovered paper currency in Germany is having the inevitable effect of increasing German costs and prices. According to information recently cabled to their principals from Germany, prices, in marks, of pig iron and rolled steel products were increased about 35 per cent. and freight rates advanced by 40 per cent. on April 1. Unless, and until the mark can be stabilized in its relation to gold, further heavy increases in the cost of German production, and particularly of such raw or semi-finished material as must be imported, are obviously inevitable. When the reduction in Germany's pre-war supplies of ore and coal, and her steel manufacturing capacity, as well as the impairment of the pre-war efficiency of German labor, are given due consideration, it was said to be evident that the competition of German steel in overseas markets is not likely to assume the importance it had before the war for a long time to come, if ever.

Belgian costs were, until quite recently, so high that foreign material could be imported into Belgium at less than it

could be produced in that country, with the result that important quantities of British semi-finished steel were sold for shipment to Belgium during recent months. It is understood that wage reductions of from 15 to 20 per cent. to be applied probably in instalments of 5 per cent. were to begin on April 1. But even if Belgium prices were to be maintained at a competitive level and the entire Belgium steel making capacity operated, (at present a large part of the blast furnaces and rolling mill capacity is idle), it would not amount to more than a comparatively small part of the world's requirements, (the approximate total of Belgium's exports of iron and steel during the first nine months of 1921 was only 762,000 tons), and once the buying movement sets in in earnest it will be readily absorbed.

French competition will doubtless grow in importance, but at the present time the tonnage of French exports of iron and steel is only approximately 1,000,000 tons per annum more than it was in 1913, and even this tonnage largely consists of semi-finished material shipped into nearby manufacturing countries, for the reason that the French finishing capacity is not equal to utilizing the semi-finished production of the territory retroceded by Germany.

South America Also Improves

Mr. Beverley Robinson has just returned from South America where he spent three months in Brazil, Uruguay, the Argentine and Chili. All these countries, like ourselves, have been suffering from commercial depression, but everywhere the situation is improving. Their principals have a very extensive organization for the sale of their steel throughout South America, and all their offices reported greatly increased business since last autumn. There is a very large market for steel in South America, and an improved condition there should help in reviving the steel trade throughout the world.

The Coal Strike

"Much interest is now being taken by all engaged in the steel industry in the coal strike, and its possible effects on deliveries. It is true that a considerable percentage of the production of coal drawn from non-union mines has stopped, and no guarantee that deliveries will not suffer can be given. In view of the great increase in bookings within the past two months, which has been sufficient to operate most mills to their full capacity based on present supplies of raw materials, it can be readily seen that the problem of obtaining prompt deliveries in the future is serious. The effect of this situation has already been seen in the practical withdrawal of several mills from the export market, and the increase in all steel prices. If the strike continues, further advances in prices may be expected together with greatly prolonged deliveries," concluded Mr. Beverley Robinson.

DATE FOR BUDGET SET FOR MAY 23

After much indefiniteness Hon. W. S. Fielding, Minister of Finance has announced that the Budget of the federal government will be announced on May 23. Preliminary advices are to the effect that considerable change may be made in taxation and the tariff. These changes will be outlined fully in the next issue of Hardware and Metal from the standpoint of the hardware trade and as many merchants suffered much hardship and in some cases prosecution last year for not following out the instructions in detail, it will pay to study the matter fully as outlined in next week's issue of Hardware and Metal.

SEEK FRESH MARKETS FOR DOMESTIC NICKEL OUTPUT

The recent reduction in prices on nickel and nickel specialties has served to draw marked attention to the fact that a slightly more encouraging outlook now faces the domestic nickel industry. The current demand, although still of small proportions, is stated to be increasing slowly, and present indications point to the fact that this year will yield a better volume of business than last season. This in spite of the fact that those in close touch with the situation state that a real recovery in the industry cannot come much before another year. Increased activity in the automobile industry is largely responsible for the recent increase in demand for nickel. But increase in this direction, while worthy of note, has hardly been as large as it might be expected and the opinion seems to be generally held in the nickel industry that many of the automobile and steel manufacturers still have large supplies of nickel on hand. Real recovery must wait until this surplus is absorbed.

The nickel companies are still striving to find new uses for nickel. The cessation of naval building as a result of the recent Disarmament Conference has for at least five years closed one of the chief outlets of the nickel industry. The automobile and steel industries now form the bulk of the present market for the metal this industry produces. It is hardly likely, however, that either of these industries will develop greatly enough in the next five years to enable them to replace the market removed by the closing of the battleship market. Other uses, therefore, are being diligently sought.

Range of Binder Twine Prices Over 33 Years

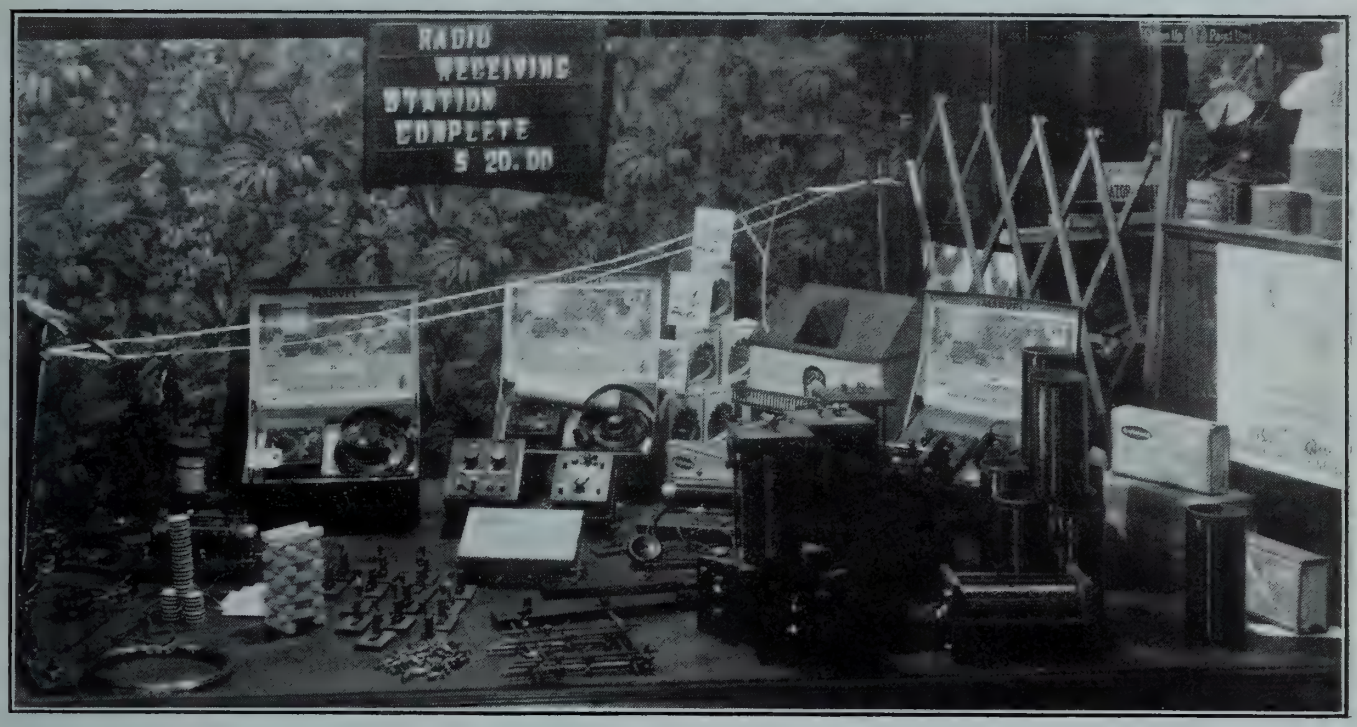
HAVING received a number of requests from newspapers, members of parliament and others for information concerning the trend of prices on binder twine for some years past, Hardware and Metal enumerates herewith the price on pure manila binder twine 650 feet per pound, from 1889 to 1922 inclusive. This is the price which has prevailed during that period in the town of Beeton, Ont., according to information courteously supplied by W. J. Bell, hardware merchant. It will be noted that from 1888 to 1898 prices ranged quite low as compared with later prices. In 1898 the duty was removed from binder twine. These prices range as follows.

1889—16 cents per lb.
1890—14½ " " "
1891—14 " " "
1892—10½ " " "
1893—10 " " "
1894—08 " " "
1895— 7½ " " "
1896—08 " " "
1897—07½ " " "
*1898—08 to 15 cents per lb.
1899—10½ cents per lb.
1900—13½ " " "
1901—11 " " "
1902—14½ " " "
1903—13½ " " "
1904—13½ " " "
1905—13 " " "
1906—13½ " " "
1907—14½ " " "
1908—13½ cents per lb.
1909—10½ " " "
1910—09½ " " "
1911—09¼ " " "
1912—09½ " " "
1913—12½ " " "
1914—13½ " " "
1915—13½ " " "
1916—13¾ " " "
1917—19 " " "
1918—29 " " "
1919—26½ " " "
1920—20½ " " "
1921—21¼ " " "
1922—14 " " " (about)

*15 cents is the highest price asked for twine by Mr. Bell in 1898, although it was sold up to $20.00 per cwt. both in Canada and the United States.

Capitalizes Radio "Fans" Enthusiasm

Technical Knowledge of Radio-Telephony Not Entirely Necessary to Successful Merchandising of Sets and Equipment—Ingram Hardware, Toronto, Institute Radio Department With Good Results in Short Time



Some indication of the aggressive manner in which this hardware merchant is developing business in radio supplies is seen by this attractive window display showing complete sets and parts most in demand, with a model aerial and house to give it a realistic touch.

AN EXAMPLE of the merchandising element applied to radio equipment is presented in the case of Ingram Bros., Hardware, 439 Danforth avenue, Toronto, where a radio department for the sale of small sets, parts and accessories has recently been instituted with a gratifying degree of success. That there are extensive possibilities contained in the sale of radiophone equipment for hardware merchants in general, was expressed to Hardware and Metal by A. E. Ingram, when discussing the features of radio-telephony from the retail merchants' viewpoint. Mr. Ingram reported that the innovation of this new department has been quite a success, several small sets, as well as a large number of parts, having been sold within the space of a few days, and many inquiries having been received regarding larger sets. By far the greater field for future business lay in parts and accessories, according to Mr. Ingram, as the majority of "fans" are amateurs—from boys to adults—who are considering the assembling and erection of their own sets, and merely require specific accessories, which cannot be very well dispensed with from an economy standpoint.

With regard to technical knowledge being required by the merchant placing a stock of radio equipment in his store, it was pointed out that while most of it was "new stuff" from a commercial sense and sounded complicated to some extent, yet no very extensive knowledge was required in order to market same, as the various details were soon picked up. During the few days the equipment had been in the store, the many customers and interested passers-by served to demonstrate the future possibilities for wireless equipment of this nature as a permanent and regular sphere of retail hardware merchandising.

"In some respects, however," said Mr. Ingram, "radio-telephony is similar to the automobile field. The smaller set represents the lighter make of car which satisfies for a while, but which usually leads to bigger and better things. The average person's original intention is to hear the city concerts, which are sent out from the broadcasting stations, and this can be accomplished with a medium-priced set. Having had their curiosity satisfied to a certain degree, the resultant idea is to "listen in" on other cities, and this naturally creates a desire for a more efficient set, comprising powerful receiving apparatus to cover longer distances with reliability and precision."

Radio Enthusiasm Expands

In this connection, the enthusiasm of the radio devotee continues to expand, and does not die away with the initial small receiving outfit. This is a factor which merchants can capitalize to good advantage, for according to Mr. Ingram, there is apparently no fading away of their interest, but on the contrary the possession of radio equipment and the facilities for "listening-in" serves to recreate the desire of the average enthusiast.

The Ingram Hardware have not yet considered the merchandising of larger and more expensive sets, although many inquiries have already been received regarding prices, radius, installation, etc. Mr. Ingram is particularly favored in respect to answering the average inquiry, as he possesses a receiving set at his home, and has been able to experiment more or less for some time past. With the extensive demand for radio parts has come a big difference in the cost prices, this factor being illustrated by Mr. Ingram, who drew attention to the prevailing prices, and com-

pared same with quotations prevailing last fall, before the Radio Bug migrated to Canada.

Some of the parts for which Mr. Ingram has experienced a brisk movement include copper wire, tuning coils, crystal detectors, inductance coils, porcelain insulators, binding posts, antennae and ground switches, receiver panels, and headpiece telephone receivers, both single and double. For the outlay of a sum varying from two to three hundred dollars, Mr. Ingram suggested that a fairly representative stock can be secured. The chief difficulty lay in procuring the required style of popular accessories from the manufacturers, and in this connection many enthusiasts had turned to the purchasing of a complete set, as these frequently contain the necessary parts required, such as detectors and receivers. Accessories have been secured from various sources, wherever supplies are available. The present intense demand renders producers unable to cope with the call for both outfits and parts, and this demand is spreading rather than decreasing.

The installation of moderate priced sets for a nominal extra charge, was an element considered quite feasible by the Ingram Hardware, although the majority of enthusiasts wished to experiment more or less with their own sets. The wiring and general installing were fairly simple, this having been rendered considerably easier by the complete chart and printed directions supplied with each set. The reliability of the outfits were referred to, and it was stated that each individual set is tested before leaving the factory, although no direct guarantee is furnished with same. If the antennae are erected according to the manufacturers' instructions, there was no reason why satisfactory results should not be obtained. No special methods of advertising had been adopted by Mr. Ingram, outside of the regular channels of local distribution, combined with effective window display and suitable posters. It was pointed out that the interest of the public is there and does not have to be aroused. To make known the fact where supplies could be secured, was the principal reason for advertising.

Entering the mythical realm of ancestral voices has become a universal and fascinating indoor pastime, and has usurped the interest and enthusiasm of practically all classes because of its uniform adaptability to commercial, entertainment and scientific purposes. Noting this factor regarding the extensive growth and increasing popularity surrounding radio-telephony, a number of retail merchants have generally taken advantage of the opportune field thus provided for catering to radio fans, with a typical enterprising spirit and commercial zest applying particularly to the progressive merchant.

Groups Seasonable Electrical Goods

Each Electrical Appliance Has a Strong "Seasonable" Appeal in Which Most Prospects Are Interested—Housecleaning Time, Approach of Warm Weather and June Weddings Offer Splendid Opportunities Right Now—Hardware Store Known as "Gift" Shop Makes a Fortune for One Merchant

"WITH seventy-five per cent. of Canadian homes wired for electricity and only a small percentage of these homes boasting the ownership of such necessary appliances as toasters, washing machines, fans, vacuum cleaners, ranges, etc., it must be quite evident that the possibilities for the sale of these lines have only been slightly developed" said an Ontario hardware merchant in discussing the sale of electrical goods.

"When we entered the sale of electrical supplies we took into consideration the fact that not only were many wired homes barren of the useful appliances available, but that as time went on there would be a considerable renewal business among purchasers of such equipment," he continued.

"We have found electrical goods lend themselves admirably to special selling effort because of the fact that they can be arranged in such effective displays and they make such a strong appeal to the prospect. Each appliance has a definite purpose and it is a useful article and not a luxury. Every wired home needs the various appliances provided for use in the home and the housewife who does not employ an electric washer, vacuum cleaner, iron, heater, range, etc is losing something in comfort and convenience. Then, too, these appliances lend themselves well to the application of group selling ideas which are important at this time. The sale of one appliance offers an opportunity for suggesting others. In a small centre such as this where every housewife knows the other the element of pride in the home and spirit of emulation can be developed considerably for no housewife wants another to get something which will relieve the burden of housekeeping and she herself be denied this privilege of modern times."

Grouping of Stock

One of the important elements in the successful sale of electrical lines in this store has been the grouping of the stock according to seasonable needs. Thus at this time of year electric ranges have a strong appeal from the standpoint of cooking effectively with less heat in the kitchen for the summer weather, electric heaters of the portable variety are useful in the cool evenings now that furnace fires have been let go out. Fires in apartments are generally extinguished about the 15th of May and oftentimes cool weather follows. Electric washers and vacuum cleaners are required most at housecleaning time which is now under way and at this season many new electric lighting fixtures are put up by people moving to new premises and by the discarding of old fixtures in connection with housecleaning. An electric iron will greatly aid in finishing up after the big spring washes and in the spring and summer the light clothes which are worn require more washing and ironing than the heavy dark clothes of winter. Electric toasters, grills, percolators and other table appliances are especially desirable in the preparation of light lunches and cold suppers which in the summertime supplant the hot meals of winter. Thus it is seen that the majority of electrical appliances have a very real appeal at this time of year. It is by linking up the seasonable need and effectively displaying the goods that this store has worked up an enviable trade in electrical appliances.

June Weddings

The approach of the month of June heralds an opportunity for stimulating sales of electrical goods as gifts to brides either as wedding presents or for showers. It is not infrequent to hear the remark made by those who have given gifts to a bride that they had completely overlooked electrical appliances. For so long cut glass and silverware has been the choice for wedding gifts that it takes some action on the merchants' part to swing popular opinion to the favor of electrical goods. This is not hard, however, for most buyers of wedding gifts will appreciate the suggestion knowing that electrical appliances present a pleasing appearance and are a distinct contribution to the household requirements.

Hardware merchants have come to regard May and June as splendid months for the sale of electrical goods not only because of this being the most popular wedding season of the year but because of the other needs for electrical appliances which develop at this season. Some merchants size up their local community and get an approximate idea of how

much money will be spent on bridal gifts and then make plans to get their share of it. Watching the society columns for information on engagement and wedding notices, etc. has provided many merchants with an excellent list of prospects to whom letters are written.

The advantage of this is that not only can bridal gifts be sold in this manner but the bride herself can be made a customer for household hardware requirements after settling down in the new home.

Strong Arguments

There is an air of luxury about an electrical appliance that makes it a particularly desirable wedding gift, and yet satisfies the modern desire to give something of utilitarian value. To-day, when the bride so often has received her preliminary course in efficiency in a business office the appeal of labor-saving equipment is strong. With the prevailing high costs and dearth of servants she must look forward to doing a large part of the housework herself, and she will not relish doing this work unless provided with electrical apparatus which lightens the load. Then, too, many couples being married intend that both husband and wife will continue going to business to tide things over until they are able to set up housekeeping in the good old-fashioned way. Such couples would find it impossible to carry on without an electric washing machine, iron and table cooking utensils.

In order to stir up this business the newspaper ads must be used to good advantage and it would not be amiss to institute a week's campaign whereby your store would be definitely associated with the buying of suitable gift lines. Remember that such publicity helps busi-

(Continued on page 56)

SEVENTY-FIVE PER CENT. CANADIAN HOMES ARE WIRED FOR ELECTRICITY

A survey of 250 Canadian towns shows 74.9 per cent. of the houses wired. The electric iron is used in 45.7 per cent. of the homes, the electric toaster in 18.2 per cent., washing machines in 5.9 per cent., the electric fan in 5.4 per cent., vacuum cleaners in 5 per cent., electric ranges in 3.7 per cent.

Featuring Electric Heaters, Ranges, Cleaners, Etc.

A number of electrical appliances are specially designed for use during the Spring weather and still others come into play in the summer months which follow. These recent ads of hardware merchants show that electrical lines are being featured. Electric ranges are shown by Turnbull and Cutcliffe Ltd., Brantford, and Orillia Hardware Co., Orillia, Ont., the latter advocating cooking by electricity as safer, cleaner and giving better results in baking than any other fuel. Washers, vacuum cleaners, irons, toaster, percolators, etc., are also mentioned. Electric fixtures are well illustrated in the ad by Perry Hardware Co., Estevan, Sask., and electric cleaners and washers are featured by Ingram and Davey St. Thomas, and G. A. McMurtry, St. Thomas. In another ad portable heaters are shown as needed in the cool evenings now that the furnace has been let out for the winter.

A Situation Worth Studying

THE IRON and steel markets of both America and Europe present an interesting study at present and developments in this industry have such an important bearing on the price and supply of hardware that the situation is well worth the attention of hardware merchants. Steel producers throughout the world have for the past two years been proceeding on a conservative basis with fairly low scale rates of operation, everyone keeping a close watch for favorable signs. A change has come and more activity is noted throughout this industry in all parts of the world. Nearly every country has been starved for steel, particularly those parts of Europe which need rebuilding after the war and the race is now on for what business offers. Metal dealers in Canada and in other countries have been keeping a close watch on foreign competition and many interesting rumors are being circulated from time to time. Under these circumstances a complete and authoritative understanding of the situation is desirable, and to this end there appears in this issue an article based on information supplied by an authority on the subject dealing with the steel situation.

That improvement has taken place in this industry in Canada and the United States is indicated by the increasing rates of production of mills, the increased bookings of business, the extension of delivery dates and the increasing desirability of steel company investments. The fear of further decline in steel seems to have been pretty well dissipated by now and a slight upturn has been noted in some prices. As to the dangers of competition in Canada of European producers, it is noted that British iron interests have recently been actively seeking business on this continent. This is probably more due to the likelihood of a shortage due to the coal strike than an attempt at competition with American producers. Probably British producers would have more success in Canada in view of the recent business in tinplate for British Columbia which went to Welsh mills. Several enquiries from Canadian firms for quotations on British iron and steel have also been made recently. However, taking the situation as a whole, it is thought that Europe is so badly in need of most of its own productive capacity that little attention will be given to competition on this continent. If it were not for the fact that many European countries which require iron and steel are unable to pay for their requirements, it is doubtful if there would be any surplus for export to this side of the Atlantic. German steel is unlikely to be an important factor in future competition due to further depreciation of money values, increase in freight rates and further reported deficiency of labor. Belgium shows signs of improvement but its total production is a small factor in the world's supply of iron and steel. French competition is steadily growing in importance.

Again returning to the question of markets, it is gratifying to note not only improvement in domestic requirements but that certain export markets are opening up rapidly. The only danger that threatens at present is that the exigencies of the coal strike situation will be such as to necessitate the scaling down of export shipments to safeguard domestic business. The basic conditions reflect improvement and greater stability in this industry and some price increases on certain products in the near future would not be altogether unexpected.

What is the Answer?

ONE OF THE questions which is being asked to-day is why rural life, which for years has been looked upon as healthier than city life, really shows less favorably in actual statistics. With an abundance of fresh air, fresh food, quietness and plenty of outdoor activity rural life should certainly far exceed the average city life from the standpoint of encouraging health. But the facts show that those in the cities and larger towns are more healthy than those in the rural districts and the big reason lies at the door of advanced methods which have been readily taken up by those in the cities and larger towns while those in the rural districts have been slower to change their methods.

A Western Red Cross nurse has created somewhat of a sensation by declaring that country life is far from as healthy as is usually supposed. She points out that a large percentage of children and adults on farms have some physical defects due to unsanitary conditions and lack of average conveniences in the home. An inspection of 3,632 persons showed 2,317 to have physical defects and a large number were much under weight. The nurse in a review says: "Too little attention is paid by the average farmer to the surroundings of the house, the equipment of the home and the use of modern sanitary and other facilities. Bath tubs are coming in but are too scarce and too many farm women still carry water from an outside well."

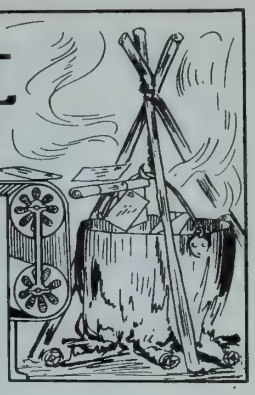
There is a field for the sale of electrical goods, water supply systems and other hardware lines in the farming districts of Canada which cannot be surpassed for possibilities, and in supplying these needs the hardware merchant is not only creating business but he is providing a distinct contribution to the country in protecting the health of the present and future generations. The fact that seventy-five per cent. of Canadian homes are wired for electricity yet there are less than ten per cent. of that number with the average electrical appliances designed to facilitate work and lighten the irksome labor of housekeeping, is sufficient indication of the neglect to fully develop business possibilities which has existed in this country for some time.

IN THIS issue appears a letter from a Toronto hardware merchant telling of the stimulation which resulted in his business from adopting a principle outlined in a recent article in Hardware and Metal. This is but further confirmation of the fact that the specially selected sales ideas which are outlined in each issue can be made very productive if studied and applied. Each issue should be looked through thoroughly because some idea which applies particularly to the reader's business might be contained in some small item.

NOW THAT the marking of imports regulations in Canada have been temporarily shelved it is interesting to note that the United States is preparing a bill which provides for even more rigid enforcement of regulations governing stamping of imports to protect the domestic market against the dumping of foreign goods due to depreciation in exchange. Canadian business men will have a chance to see how these regulations work out across the border before the question will again be revived in Canada.

The Melting-Pot

Keep the Pot Boiling



Hardware and Metal welcomes letters from all persons engaged in the hardware business whether retailer, wholesaler, manufacturer or manufacturers' agent, in regard to subjects of interest to the retail hardware trade. The names of those writing letters will be published whenever possible, but will be withheld from publication in special cases when requested, the letters to be kept on file in Hardware and Metal office for private reference if required.

FAULT LIES WITH IMPORTERS

H. Southall, Hardware and Metal,
Toronto.

Dear Sir:

Personally I have a strong objection to German goods. We have had razors, cutlery of different kinds, and other German products offered us, but up to the present time have stuck to my convictions not to handle them; but the tide is flowing in such a way, that I am afraid should I stick to this resolution it will make seriously impaired business. The fault of the introduction of these goods into Canada seems to me to lie with the importing jobbers, and those companies that are sufficiently large to do their own importing, the latter class I believe have been one of the largest factors in causing the importation of German goods. They are loking for the cheapest price without permitting sentiment or patriotism to have any bearing on the subject whatever. These people have imported these goods causing a big fall in prices. The jobbers from their customers have had calls for cheaper goods to meet this competition, and these goods could only be obtained from the same source, and the insistent cry of our papers for lower prices, and the demand of the public along similar lines, is forcing the dealers to this. Am sorry to say that if you put an article of apparent equal quality before nine-tenths of our buyers, though with considerable disparity of price in favor of the German made goods, that their patriotism will be relegated to the back ground, and the German goods taken.

It seems too bad that our men should have gone to the fields of France and Flanders to fight these men in their wild thirst for world conquest, and after the war is over have to come back on their own soil and have to fight them there commercially, with many things in favor of the Germans.

Then there is another point of view we can take of this. After the war was over it seems that the Germans when they found they could not conquer the world by force of arms set their faces resolutely to conquer it commercially, and with that end in view worked not only eight hours a day, but ten and twelve, and often much longer, while our labor was looking for shorter hours, bigger pay, and then permitting their commercial opponents to obtain a foot-hold from which it will be difficult to dislodge them.

It seems to me that golden opportunities have been lost by Canada in not fully appreciating how important it was to obtain commercial supremacy after the termination of the war. Canada has not gazed into the future with the same prophetic vision of Japan or Germany.

Ontario Hardware Merchant.

WE ARE NOT PAYING GERMANY'S DEBTS

The President of an Ottawa wholesale hardware firm writes as follows in regard to the sale of German hardware in Canada:

"The question of German made goods is a big one and one that will be coming more before the merchant as time advances.

"The pangs of war (which was the fault of Germany) are still very keenly and deeply imbedded in the hearts of those who lost loved ones, and it is only natural that they should still have a very bitter feeling toward Germany and its products.

"On the other hand, there are those who did not lose their dear ones and are not particular as to the quality of goods they buy, and are only too little interested in the past to think of anything other than the saving of a few cents in their purchases.

"After the start of the war, my company as wholesalers, could not persuade a retailer to purchase German goods, even at a discount, for he said that his customers would have nothing whatever to do with German goods. As a consequence, my company practically gave away what German goods they had; and up to this day, have not and don't intend to purchase any more until forced to, which condition, I regret, has arrived; but notwithstanding this, and on account of same they are losing sales, have not, as above stated, yet acceded to the growing demand.

"Looking at this serious condition from another angle and by the example set us by our Mother country, how is Germany to pay the allies what she owes them if they do not purchase from her.

"I say in answer, let her take longer to pay, and isolate her from the rest of the world where she belongs, for she has no principle and does not deserve any respect from the world at large.

"My company carries on a strictly wholesale business, so do not come in contact with the user of tools, etc., in a manner in which their retail friends do, so I cannot speak intelligently of the demand; but should our salesmen be asked for German goods, they reply that their company do not handle German goods."

NO USE ARGUING WITH LABOR LEADERS

The Sales Manager of a large Western hardware firm writes to Hardware and Metal in regard to the sale of German hardware in Canada, as follows:

"The writer has had considerable experience with both Labor Leaders and the Labor Press and in his opinion nothing is to be gained by entering into a discussion with them on this question. 'Hardware and Metal' will be well advised to entirely ignore the cartoon.

"As far as we are concerned we would rather not handle German goods and are not buying any more of them than the trade demands, in fact, our policy ever since the close of the war has been to discourage wherever possible the importation of German goods. or materials of any kind. As you are no doubt aware some years ago the Department of the Interior, through their immigration policy brought into the prairie provinces a large number of Germans and people from middle Europe. These people are segrated into colonies. They stick closely to their old country habits and ways and in some cases are rather insistent on being supplied with German lines, whereas the British and Canadian sections of the country take the opposite view and buy almost exclusively British, Canadian or American lines.

How a Merchant Used an Article in Hardware and Metal to Good Advantage

Editor, Hardware and Metal, —

When your representative called a short time ago he mentioned that you were always pleased to hear of anything beneficial to the trade.

We feel that you should know how one of the articles which appeared in Hardware and Metal a few issues ago has benefited us. The article was on Salesmanship and the main point was: Are you a parcel wrapper or an "Ask them to Buy" salesman?

After reading the article I started to joke about it with my son, who is in the store with me, but much to our surprise when we began to test ourselves we found that we did just what the article said: viz., wrap up what was asked for and finish the transaction. We made a resolution not to let one single customer leave the store without "asking them to buy" by suggesting other articles and we have had wonderful results.

(Signed) N. Medhurst, Medhurst Hardware,
1144 Davenport Road, Toronto.

Sporting Goods Trade Active at the Coast

More Seasonable Weather Sees Active Movement of Seasonable Hardware — Retailers Meeting Commitments Satisfactorily—Number of Special Sales is Decreased

VANCOUVER, B. C.—Conditions this week in the hardware trade of the Pacific Coast are slightly improved over a week ago according to the opinions of distributors and retailers obtained by Hardware and Metal. Probably the main reason has been a moderation in temperature which has had the effect of creating an improved demand for seasonable tools and garden rakes, hoes, spades, lawnmowers, hose, etc. It is stated on very good authority that retailers are meeting their commitments fairly satisfactorily and that there is no immediate danger of liquidation by any of the trade. Special sales, in evidence a month or so ago, are not nearly as numerous and it is believed business has settled down to a normal trade and will continue so unless something, at present unforeseen, occurs.

One sale of the present week is perhaps worthy of especial notice but it concerns only lines that are being closed out by one of the most prominent retailers, who, to induce movement, is announcing sensational reductions. For instance iron smoothing planes are offered at $4.18 instead of $5.50; iron jointer planes at $9.24 instead of $12; double plane cabinet scrapers at $5.98 instead of $8; carpenters' braces at $5.42 instead of $7.50 and hand saws at $3.48 instead of $4.50. The same firm is moving cooking utensils and household supplies at prices closely approximating cost.

In garden and lawn tools three-ply rubber hose in standard fifty foot lengths is marked down to $5.38 against the regular retail price of $6.50 and the best hoes are moving at $1.12 compared with $1.35. Builders' hardware is similarly reduced. Paints, oils and varnishes are down in the same category. Certain floor varnish in gallon cans is offered at $5.49 while the regular price is $7.50; another brand by the half gallon is $2.98 a reduction of 62 cents and quart cans of black auto enamel are being cleared at $1.88 instead of $2.20.

In sporting goods lines there has been a heavier spring sale than usual. This has not been on account of the lower prices in some lines but to greater activity in several of the local organizations. Retailers have had a good early spring trade in fishing tackle and kindred lines although weather conditions have not been any too favorable.

Wholesale distributors are reasonably optimistic as to the summer business. Retailers are just about down to rock bottom in stocks and improved buying is anticipated.

HARDWAREMEN TAKE PART IN WESTERN CAMPAIGN

Winnipeg.—Inculcation of a feeling of civic pride was the primary object of the Winnipeg clean-up campaign, Col. W. J. Simpson, the manager, emphasized in an address to the hardware section of the Retail Merchants' Association, in which he dealt upon how the members could link up with the effort which means a cleaner and brighter city. He had been preceded by John Drewe, past president of the Winnipeg Paint Club, and president of the Retail Salesmen's Association of Manitoba, who spoke on how the hardware men could solve troubles that arose in the conduct of their business.

"The day is gone by when men can hug their ideas," said Mr. Drewe, in his talk which he stated was to salesmen, not clerks. "This is a day for the exchange of ideas; for business men getting together; and as a result the public gets better service." That a salesman should know his goods, was one of his bits of advice, and he added that if they were to live up to their obligations as salesmen they ought to wrap up five dollars' worth of information with every package.

WESTERN CANADA NOTES

Willow Brook, Sask.—A. P. Swallow has commenced hardware business here.

Greenberg Bros. hardware merchants Willowbrook, Alta., have dissolved partnership.

D. A. McDonald has returned from a business trip calling on the principal wholesale trade in western cities. He reports business conditions as much brighter and although buying is restricted to small quantities buyers are purchasing more frequently and are requiring immediate delivery.

W. Trenholm has purchased the hardware business of Nicolls & Co., at Shellbrook, Sask.

A. Gould of the Marshall Wells Co., Edmonton, has been on a business trip to the firm's head office at Winnipeg and renewed acquaintance with a number of manufacturers' agents.

Messrs. Stephenson & Russell, manufacturers and importers of Winnipeg, Man., have recently instituted a radio department in order to handle the increasing trade in radio-phone outfits and accessories.

Recent visitors to J. H. Ashdown Hardware Co., Winnipeg, include J. B. Stallwood, hardware merchant of Maryfield, Saskatchewan; B. Dees, of Leboldus Dees, retail hardware merchants of Vibank, Sask.; Adam Huck, of Vibank, Sask.

H. S. Cove, manager of the iron and steel department of Balfour-Guthrie of Vancouver, returned on the Empress of Russia this week after an extended tour of the Far East. Mr. and Mrs. Cove who were making their visit to the Orient left Pekin just two days before the armies of Gens. Chang and Wu met in combat. They report conditions in Java as deplorable due to the bad state of the tea, rubber and coffee markets which has accounted for the failure of many plantations.

WINNERS IN SAVE THE SURFACE CONTEST

Prizes of $1,000 were given to the U. S. Save the Surface Campaign Committee for a title to the Norman Rockwell picture of a boy painting a model house and his dog watching it. The first prize of $250 was won with a title "Memories that time will not efface," the second prize of $100 was "Life's Priceless Hours," and the 3rd prize of $50 was "Every Man's Yesterday." The fourth prize was won by a Canadian, Wm. Chennells, of Wawots, Saskatchewan, with the title "America's greatest assets —youth, loyalty and thrift." Seventy-five prizes in all were given. Titles were submitted by 24,403 individuals from every section of the United States, Canada, France, England, Germany, China, Japan, India, Africa, Mexico and South America. The stories submitted with the titles told of many and varied uses to which paint and varnish have been put.

WESTERN CANADA NOTES

R. M. "Bob" Millar of Millar and Co., retail chinaware and crockeryware dealers, was elected president of the Rotary Club by acclamation.

The Utility Pulley Company of Canada was incorporated this week with capital of $150,000. The head office is to be in Vancouver.

Shipments of lead from Vancouver to the ports of Japan since the first of the year amount to 57,000 pigs, or 8,500 tons. There is a suggestion that the lead is to be utilized for war purposes but in view of the fact that the shipments have been small, though large in the aggregate, shipping men are firm in the belief that it is for commercial purposes only. For the last six months of last year the movement to Japanese ports was around 25,000 tons which reflects the smaller shipments of 1922.

P. C. Fenwick, a manufacturer of antimony and lead in London, England, was in Vancouver this week after making a trip through the Orient. He intimated in an interview that the Japanese are great protectionists as illustrated in the case of copper. Foreign factories in that land have been buying raw materials in the cheapest markets. Copper for instance could be laid down in Japan for about half the price of the Japanese article, Mr. Fenwick intimated, but the Japanese Government raised the duty about sixty per cent. in an effort to force the use of home produced copper. The visitor stated that it was treatment such as this that had been the reason for the closing down of many foreign controlled establishments.

Program of Annual Convention of Saskatchewan Branch R.M.A.

to be held in City Hall Auditorium, Regina, on JUNE 6, 7 and 8

Opening Session

TUESDAY MORNING, JUNE 6TH

9.00 a.m.—Registrations of delegates.

10.00 a.m.—Regina time (Daylight Saving). Invocation. Address of welcome, His Worship the Mayor. James Grassick, President Regina Chamber of Commerce. President's Address. Treasurer's Report. Secretary's Report. Appointment of Nomination Committee.

TUESDAY AFTERNOON, JUNE 6TH

Trade Section Meetings.

The following Trade Sections are arranged for (See Programme pages):

Grocers, butchers, boots and shoes clothiers, druggists, hardware, harness, music dealers, implement dealers, automobile dealers, confectioners, photographers.

The place where each sectional meeting is held will be announced from the platform Tuesday morning.

TUESDAY AFTERNOON, JUNE 6TH

Grocers' Trade Section Meeting

2.00 p.m.—Report of Dominion Committee. Report concerning joint meeting of wholesale and retail grocers. Correspondence re wholesalers selling hotels, restaurants, etc. Hawkers' and Peddlers' Act. Resolutions, questions and new business. Election of Trade Section Executive.

8.00 p.m.—Egg marketing film, followed by a discussion of the Egg Marketing Act led by J. F. Booth and participated in by retailers, wholesalers and transportation company representatives.

TUESDAY AFTERNOON, JUNE 6TH

Druggists' Trade Section Meeting

2.00 p.m.—Report on resolutions passed at last convention. Discussion on Saskatchewan Temperance Act, Narcotics Drug Act. Resolutions. Questions and new business. Election of Trade Section Executive.

8.00 p.m.—Continuation of business session, if necessary.

Hardware Trade Section Meeting

2.00 p.m.—Report on resolutions passed at last convention. Discussion on sale of cylinder oils to farmers by oil companies. Marketing conditions, led by George Morrison. Resolutions, questions and new business. Election of Trade Section Executive.

8.00 p.m.—Continuation of business session, if necessary.

Music Dealers' Trade Section Meeting

2.00 p.m.—Report re Hawkers' and Peddlers' Act. Discussion on questions of list of repossessions, etc. Sale of small instruments. Open territory as affected by Hawkers' and Peddlers' Act. Resolutions, questions and new business. Election of Trade Section Executive.

8.00 p.m.—Continuation of business session.

Butchers' Trade Section Meeting.

2.00 p.m.—Report on resolutions passed at last convention. Discussion re Hawkers' and Peddlers' Act. Discussion of Bureau of Public Health Regulations, led by E. A. Mounteer. Discussion re meat inspection, led by A. H. Presswood. Resolutions, questions, new business. Election of Trade Section Executive.

8.00 p.m.—Joint meeting with grocers.

Boot and Shoe Trade Section Meeting

2.00 p.m.—Reports on resolutions passed at last convention. Discussions on salesmanship, led by A. A. Causgrove; window display, led by Mr. Anderson (Moose Jaw); advertising, led by Regina Trading Co., Man. Resolutions, questions, new business. Election of officers.

8.00 p.m.—Marketing conditions, led by Mr. Garfield Wray.

Clothiers' Trade Section Meeting

2.00 p.m.—Discussions on salesmanship, led by Mr. Ralph Miller; window display, led by Mr. .....; advertising, led by Mr. H. D. McPherson; resolutions, questions and new business. Election of Trade Section Executive.

8.00 p.m.—Marketing conditions, led by Mr. Jack Wood.

Implement Trade Section Meeting

2.00 p.m.—Margins. Uniform contracts. Contracts, wholesale versus consignment. Blanket insurance. Wider tread for sleighs. Resolutions, questions and new business. Election of Trade Section Executive.

8.00 p.m.—Address.

Automotive Trade Section Meeting

2.00 p.m.—Refund of Luxury Tax. Mechanics Lien Act. Used car situation. Tire distribution and discounts. Wider tread for sleighs. Resolutions, questions and new business. Election of Trade Section Executive.

8.00 p.m.—Address.

WEDNESDAY MORNING, JUNE 7TH

9.30 a.m.—Address by J. A. Banfield, President Dominion Board, subject, "The Work of the Dominion Board." Resolutions. Announcements.

WEDNESDAY AFTERNOON, JUNE 7TH

2.00 p.m.—Address by Prof. W. W. Swanson of the University of Saskatchewan. Resolutions. Announcements.

WEDNESDAY EVENING, JUNE 7TH

8.00 p.m.—Address by Dean Rutherford of the University of Saskatchewan, subject, "The Retail Merchants Place in Agricultural Development." Address by Howard Seabury of the Northwestern Mutual Fire Association, subject, "Co-operation — What it Means." Followed by a "Free For All"—Taking Stock of Ourselves. Question box. Announcements.

THURSDAY MORNING, JUNE 8TH

9.30 a.m.—Address by P. McAra, subject, "Income Tax Regulations.' Resolutions. Announcements.

THURSDAY AFTERNOON, JUNE 8TH

2.00 p.m.—Address by Hon. S. J. Latta, subject, "Good Roads." Resolutions. New business. Election of officers.

THURSDAY EVENING, JUNE 8TH

6.30 p.m.—Banquet. Songfest. Address, by Hon. C. A. Dunning, Premier of Saskatchewan. Entertainment. Address by J. A. Banfield, Dominion President, Retail Merchants, Association. Entertainment. Adjournment.

Events in the Trade

OBITUARY

J. R. Simmonds of James Simmonds, Ltd., wholesale and retail hardware, Halifax, N. S., is dead.

FIRE LOSS

Fairville, N. B.—Boyle Bros., tinsmith and hardware, suffered loss through smoke and water, due to a recent fire, covered by insurance.

In a fire which spread to several business establishments in Elmira, Ont., the store of Klinck Bros., hardware, suffered damage.

MOVE MONTREAL OFFICE

The Montreal office of Gurney-Massey Co., has been moved from 169 St. Paul St. W. to the Canada Cement Bldg., Phillips Square.

SHELL OIL COMPANY MAY OPEN IN WINDSOR

Windsor, Ont.—The Shell Oil Company is to establish in Windsor, according to official announcement made by F. Sclanders, industrial commissioner, Border Chamber of Commerce.

The company, it is understood, has already filed application with the city clerk for permission to erect huge oil tanks on Caron avenue south of Elliott street.

FORMER STOVE PLANT WILL MAKE FURNACES ONLY

Grimsby, Ont.—The property and plant of The Canadian Stoves Limited, at Grimsby, has been sold by the Town Council to four Hamilton men, who will commence operations there immediately. They will pay the interest and other indebtedness owed to the town in full and will assume the town's mortgage for $7,500.

It is the intention of the new owners to run the moulding shop on a large scale for custom work, and to manufacture furnaces only.

ANTI-COMBINE BILL NOT TO BE PUSHED THIS SESSION

Hardware and Metal has received advice that the proposed Anti-Combines Act, introduced by Hon. W. E. Raney, Attorney General in the Ontario Legislature, and as recently outlined fully in Hardware and Metal, is not to be pressed this session, but will be referred to a special committee which is to sit during the recess. The object of the bill is to have declared illegal any agreement looking to the maintenance of a fixed re-sale price.

LEAVES FOR LONG TRIP ABROAD

Major D. M. Mathieson, M.C., has sailed on a year's trip to the East with the aim of opening up new fields for Canadian goods. The firms he represents are Goldie & McCulloch, Ltd., of Galt; Sawyer-Massey, of Hamilton; International Business Machines, of Toronto; R. McDougall Co., of Galt; Dennis Wire & Iron Works, of London, Ont.; and W. D. Beath & Son, of Toronto, accessories for lubricating oils.

Major Mathieson's itinerary will include the following ports of call: London, England; Yokohama and Kobe, Japan; Tientsin, Shanghai and Hong Kong, China; Singapore, Straits Settlement; Batavia, Java; Bangkok, Siam; Colombo, Ceylon; Madras, Calcutta and Bombay, India. His intention is to sound out the trade possibilities in these various districts for the different lines he represents, and, if prospects warrant, to introduce permanent Canadian agents in these different centres.

INSIGHT INTO HARDWARE CHANGES IN WOODSTOCK

Woodstock, Ont.—Within the past two months two hardware businesses have changed ownership in the city of Woodstock, as formerly outlined in Hardware and Metal, they both being businesses which have been established for a number of years. Early in March Howell Brothers, of Copetown, purchased the business of Gardner & Co., and on May 8th the St. Marys Hardware Co. took possession of J. Y. Smiley & Son's store. Both transactions were done on short notice.

The hardware line is a new one to Messrs. Howell, although both brothers have had retail as well as wholesale experience. The new firm is aggressively after business and they are adapting themselves to their new venture.

The Smiley store will in future be known as the Woodstock Hardware and be under the management of W. R. Carr of St. Marys, a man with many years of hardware experience.

Hardware sales have been quite brisk in Woodstock and Ingersoll for the past two months, and all retailers report business on the increase. Paint is moving quite rapidly, garden tools, roofing and builders' hardware is in greater demand than last season. Sporting goods have been a great help for the majority of stores as they have gone after the sporting organizations for their business where formerly they have dealt with jobbers or sporting goods stores.

INCORPORATION

Noel & Laferriere, Ltd., have obtained provincial charter to carry on a hardware business in Jonquieres, Quebec.

Moore, Broadbent Co., Ltd., head office, Montrea , Capital $50,000 to manufacture and deal in pa nts, pigments, polishes, stains, linseed oils, white lead, varnishes, chemicals, etc.

Champlain Tire & Rubber Co., head office Ottawa, Capital $2,000,000.

Success Electric Products Co , Ltd., head office Ottawa, capital $50,000 to manufacture electrica appliances.

SCOTTISH FIRM OPENS BRANCH IN CANADA

The firm of Kelvin, Bottomley & Baird, Ltd., of Glasgow, Scotland, which was founded about fifty years ago by the late Lord Kelvin, for the manufacture and sale of navigational instruments, has just established a branch company in Montreal under the name of Kelvin, Bottomley & Baird, (Canada) Ltd. The Montreal company will keep a large stock of instruments, and they have secured as manager Captain Alexander Andrew, who is an expert compass adjuster and navigator. The firm of Drummond, McCall & Co., Limited, have up till now acted as agents for Kelvin, Bottomley & Baird, and they will continue to be intimately connected with the new company. J. T. McCall will be president and associated with him are M. B. Field of the Glasgow company, and Wilfred O. White. of Boston.

PLANS UNDER WAY FOR ST. THOMAS EXHIBIT

Forty-two of the 77 stalls planned in connection with the "made-in-St. Thomas" exhibition to be staged in the Granite Curling Rink from June 10 to 17 have been sold, J. R. Harmer, managing secretary of the Chamber of Commerce, reports, and success for the undertaking is practically assured. So far every stall has been taken by a manufacturer of the city, many of whom are planning elaborate decorations of their booths in displaying their products. Efforts will be made to have the manufacturers of the city one hundred per cent. represented, and if there are any stalls remaining after that, the retail business men of the city will be given the opportunity of displaying their special lines.

D. H. Howden & Company, Ltd., Enter Toronto Wholesale Hardware Field

Purchase of Kennedy Hardware Co.—Toronto Branch Under Management of Roy Craig—Head Office to Remain in London for Present

ONE of the most important and interesting of recent events in Ontario wholesale hardware circles is recorded with the purchase this week by D. H. Howden and Company, Ltd., London, Ont., of the Kennedy Hardware Company, Toronto. The purchase dates from May 16 and includes the taking over of stock and premises of the latter company on Colborne Street, Toronto, by the purchasers. Mr. Kennedy, under whose guidance the business has been developed during the past twenty years

S. R. KENNEDY

Kennedy Hardware Co., Toronto, who has sold his business to D. H. Howden and Co., Ltd., and retired from active business.

is retiring from active business and is at present arranging to take a well earned rest.

Discussing the details of the new arrangement with Norman Howden, president, Hardware and Metal was advised that this firm has for some time been considering active participation in the business available in the city of Toronto and suburbs as well as in northern and eastern Ontario. It was pointed out that this business could not be handled advantageously from the head office in London as from Toronto and when it was found that the Kennedy Hardware Co. was being offered for sale negotiations were immediately commenced. The connection which has now been established through the purchase of the business of the Kennedy Hardware Co. will, it is expected, form the basis of a field of operations in Toronto and other parts of Ontario not formerly developed by this firm.

Mr. Howden explained that plans are under way for the gradual increasing of staff and premises with the stimulation of business which is expected to result. Additions will be made to the sales staff and later to the office staff when required. For the present the personnel of the office staff is said to be sufficiently complete to handle a larger volume of business.

The head office of the company will remain in London, Ont., and the Toronto office will be conducted as a branch, under the management of Roy Craig who has been assistant to the manager of the head office and who has had considerable experience in various branches of the hardware trade.

In confirming the change as outlined Mr. Howden gave it as his opinion that conditions in the hardware trade were gradually improving, that the need for many staple hardware lines is acute and that very soon the stocks of retailers and wholesalers will have to be considerably increased in order to give service to customers. His firm have consummated the present purchase with the idea of becoming established in this new territory at a time when business is commencing to improve, so as to be in position to take care of increasing requirements in future.

D. H. Howden & Co., Ltd., were established in London, Ont., in 1900, about the same time as the firm which they have purchased was commencing in Toronto. About four years later the business of the John Bowman Hardware and Lumber Company was taken over following an assignment in October, 1904. Gradual growth has marked the development of D. H. Howden & Co., Ltd., since that time until to-day it is a prominent factor in the hardware trade of Western Ontario. Mr. Howden stated to Hardware and Metal that the present plans provide for greatly enlarging the scope of business throughout Ontario.

Oppose Free Trade in British Empire

Annual Meetings of Ontario and Toronto Divisions C.M.A. in Toronto Go on Record as Favoring Preferential Tariff Within the Empire—Many Hardware Manufacturers in Attendance

THE ANNUAL meetings of the Ontario and Toronto branches of the Canadian Manufacturers' Association were held in Toronto this week, and a number of the members made it plain that the recent declaration of Lloyd Harris in favor of free trade within the British Empire was not the opinion of the association. In order to let Ottawa know the viewpoint of the association, especially now that the Budget is being given its final touches, a resolution was passed in favor of system of preferential tariff within the Empire, but that further preference than is now given would be unfair to Canadian firms. T. F. Monypenny, Imperial Varnish and Color Co., stated that Mr. Harris' expression had been personal opinion, and not intended to represent the views of the association. The resolution was sponsored by C. A. Birge.

The gathering went on record as favoring the lowering of freight rates to the same extent that farmers and others have reduced their operating costs. A reduction in freight rates to approximately the rates which were in effect before the 40% increase in 1920 was favored, and the rates on grain products established by the Crow's Nest Pass agreement should be restored as encouragement to farmers.

The membership of the association has increased by 207 members during the year and optimism was expressed with the outlook for business in 1922. The executive council include the following: Chairman Ontario Division, Col. Arthur F. Hatch, Canada Steel Goods Co., Hamilton; vice-chairman George Brigden, Toronto; Toronto branch, Chairman, R. H. Easson; vice-chairman, M. F. White.

COL. ARTHUR F. HATCH

Canada Steel Goods Co., Hamilton, Ont., who was elected chairman of the Ontario Division, Canadian Manufacturers' Association at the annual meeting.

Hardware Letter Box

Information on trade topics will be gladly supplied to subscribers through this department.

HEALTHOMETER BATHROOM SCALE

D. A. Sands, Yorkton, Sask.—Would you kindly give me the address of the Canadian agency for the manufacturers of the Healthometer bathroom scale.

Answer—This scale is manufactured by the Continental Scale Works, Chicago, Ill. The distributing agents in Western Canada are the Chandler & Fisher Co., and the B. C. Stevens Co., both in Vancouver.

GRIMM SAP SPOUTS.

J. W. Rork, General Hardware, Norwood, Ont.—Will you kindly send me the name and address of the firm who makes the Grimm sap spouts.

Answer—The Grimm Mfg. Co., of Montreal.

EAST LAKE STEEL SHINGLES

Wm. G. Cunningham, Canterbury Station, Ont.—Will you please advise where I can get East Lake steel shingles.

Answer—The Metallic Roofing Company, No. 1194 King St., W., Toronto.

TILE MOULDS.

Clayton Farley, Kincardine, Ont.—We wish to know where we can procure iron casings for making cement tiles.

Answer—The Ideal Concrete Machinery Co., Windsor, Ont., and Wettlaufer Bros., Ltd., Toronto.

PHONOGRAPH NEEDLES

Messrs. Wood Vallance Limited, Regina, Sask.—Can you supply us with the addresses of some manufacturers of phonograph needles.

Answer—The D. & H. Fibre Mfg. Co., Ill.; W. H. Bagshaw, Lowell, Mass.; The Victor Talking Machine Co., Camden, N. J.; The T. H. Gary Company, New York City; The Tusko Mfg. Co., Chicago, Ill.

SURPRISE COOK STOVE

Thomas F. Fendall, Rose Lynn, Alberta—Please tell me where I can get repairs for the Surprise cook stove.

Answer—The Canadian Stoves Limited, of Grimsby, Ont.

HAND FIRE GONG.

The Morgan Hardware Co., Norwich, Ont.—Will you please advise where we can procure a hand fire gong for a school.

Answer—The James Morrison Brass Mfg. Co., Toronto; G. O. Clark, Montreal, Que.; The Garth Company, Montreal.

SMART BAG MFG. CO.

H. A. West, Annapolis Royal, N. S.—Can you furnish us with the address of the Smart Bag Manufacturing Co.

Answer—This is now the Woods Mfg. Co., Ottawa, Can.

BABY CARRIAGES.

Owen W. Evans, Hardware Merchant, Chester, N. S.—Can you give me the names and addresses of manufacturers of baby carriages.

Answer—The Gendron Mfg. Co., Toronto, Ont.; The Canada Furniture Manufacturers Limited, Woodstock, Ont; The Giddings Limited, Granby, Que.

ELECTRIC WAXING BRUSHES

J. G. Tweedle, Fergus, Ont.—Would you kindly advise who manufactures electric brushes for waxing hardware floors.

Answer—The A. D. Fisher Mfg. Co., Toronto; The Canadian Floor Waxer & Polisher Ltd., 666a Yonge St., Toronto; The Garton Mfg. Co., 62 Dundas St. E., Toronto.

SEAT SPRINGS

P. A. Gouin, Hardware Merchant, Three Rivers, Que.—Will you please let me know where I can get seat springs.

Answer—The Wallace Barnes Co., Hamilton; The B. Greening Wire Co., Hamilton.

Trade Enquiries

Names and addresses of enquiries can be obtained only by those interested in such lines upon application to Department of Trade and Commerce, Ottawa, Canada. Please quote reference number when requiring addresses.

4507. **Plumbers' supplies**—A Norwegian metal merchant wants to import wrought iron tubing 3-8 inch to 4 or 5 inches, steel tubing 1 inch to 10 inches, malleable fittings, valves, pipe taps, etc.

4508. **Wire fencing**—A Norwegian concern is desirous of receiving quotations for wire fencing.

4509. **Ironmongery**—A Swedish concern is desirous of representing a Canadian firm.

4510. **Black sheets**—Packed in crates of about 200 kg. when ½ mm. to 1 mm.; from 1 mm. to 20 mm. can be shipped loose, are required by a Swedish concern.

4511. **Nails (square)**—Are required by a Stockholm firm.

4512. **Radiators and boilers**—A firm in Sweden is desirous of representing a good Canadian firm.

4513. **Hoop iron, etc.**—A firm in Sweden would like to import hoop iron, 1 mm. thick and 30 mm. wide, wire ropes and wire rods with 5 mm. diameter.

4514. **Steel tubes and flanges**—A Goteborg concern wants to import steel tubes and flanges from 32 mm. to 269 mm. outside diameter. They also require bolts, nuts, screws, small cocks and valves.

4515. **Metals**—A Stockholm firm is interested in the importation of wrought iron tubing, cast iron tubes, iron and steel bars, galvanized sheets, pig iron.

4516. **Metals**—Christiania concern wishes to import brass tubes, sheets, rods and wire, also wire and cables (not insulated) for electrical purposes, steel sheets and corrugated sheets.

4517. **Metals**—A firm in Sweden desires to import brass and copper sheets, rods and ingots, nickel cubes, pig lead, galvanized sheets, wrought iron tubing, steel tubing, reinforcing steel, black sheets, shipbuilding sheets, wire rods.

4518. **Metals**—A Swedish firm desires quotations for different kinds of metals, as copper plates, bars and wire; tinplates, galvanized sheets (plain and corrugated); brass sheets and bars, pig lead and in sheets.

4522. **Pig Lead**—Is desired by a Swedish firm, also sheet lead for woodpulp industry.

Catalogues and Booklets

Those interested in any of the catalogues described below can procure a copy of the same by writing direct to these firms. Mention that you noticed this in Hardware and Metal

MILLERS-FALLS CATALOG

Millers-Falls Co. are now issuing to the trade their new catalog showing their entire line of tools. Apart from lines previously catalogued, all lines that were formerly manufactured by the West Haven Mfg. Co., are now incorporated. Another feature is the new method of pricing. A system has been adopted whereby tools are priced by the unit rather than by the dozen, as formerly.

MUELLER FLUSH VALVES

Catalog No. 4A illustrating flush valves, has recently been issued by the H. Mueller Manufacturing Co., of Sarnia, Ont. The introduction to this booklet describes two of the principal uses of a flush valve, these being to render the closet tank unnecessary, and to deliver just sufficient water to flush the bowl satisfactorily. The makers claim that the flush valve is therefore very economical. It operates with either a push button or a turn of the handle. The catalog also contains a number of illustrations showing the flush valve in practical installation. Full details of the various styles are included, which, together with drawings and illustrations, present complete information on this line of products.

GREENFIELD CODE

The Greenfield Tap and Die Corporation of Greenfield, Mass., have announced the recent issuing of a telegraph and cable code for the use of all customers, both foreign and domestic. The object of the code is to reduce the cost of telegraphic expense and cable expense, when ordering goods by wire. It is a five letter code, and while it can be combined with the majority of standard commercial codes, the technical nature of the G. T. D. Corporation products is described as of such a large range that it is almost impossible to economically describe them by any standard code. The new code therefore, covers every item of manufacture and is included in the new catalog, No. 46A recently issued by the G. T. D. Corporation.

Twenty Years Ago

Following items are reproduced from Hardware and Metal of May 17, 1902.

The Retail Hardware Merchants' Association of Ontario held their first annual meeting in Bathurst Street Hall, Toronto. The election of officers resulted as follows: President, Edwin R. Rogers, Toronto junction; 1st vice-president, J. E. Hawkins, Oshawa; 2nd vice-president, Geo. Pearsall, Toronto; secretary, S. J. Greer, Toronto; treasurer, John Caslor, Toronto; executive committee, A. Welch, Toronto, Mr. Hunter of R. F. Fletcher & Son, Toronto, M. W. Shephard of The Shephard Hardware Co., Toronto, George Munn, Toronto. The membership is between 80 and 100 of which about 50 belong to Toronto.

London, Ont. Board of Trade at its annual meeting elected the following officers: President, C. B. Hunt; vice-president, J. R. Minhinnick; secretary, J. Nelles; council, John Bowman, W. M. Gartshore, J. Mattinson, J. McClary, P. Broderick, A. Greer, J. Little, R. D. McDonald, G. de C. O'Grady, W. J. Reid and T. H. Smallman.

W. H. Ennis, representing The Murphy Varnish Co., Boston, was in Toronto in the interests of his firm which has decided to push business in Canada and are establishing agencies throughout the country.

The Metallic Roofing Co. of Canada has opened a branch in Winnipeg.

The Canada Paint Co. are contemplating the advisability of installing the aerial telegraphic system to maintain communication between their several factories and branches.

Brandon Hardware Co., Ltd., Brandon, Man., has been incorporated and takes over the business of The Jas. Robertson Co.

Thos. Birkett & Son, Ltd., Ottawa, has disposed of their Rideau St. branch to Thomas Shore.

E. R. Rogers, hardware, Toronto junction was damaged by fire and water.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

LINSEED oil, cant hooks and peavies, the Maydole line of hammers, hay fork pulleys, Trimo wrenches, window rubbers, fuse plugs, certain asbestos products such as boiler and pipe coverings, and Carll wrenches are included among the various hardware commodities recording easier price levels this week. In addition, boilers and radiators appear with new discounts, an extra 7½ per cent. having been added to the present quotation on radiators and ten per cent. to boilers. This condition, however, is described by distributors to be purely of a temporary nature. Eastern centres record a slight revision in the base price on wire nails, this being ten cents per keg lower. A revision in the distributing points for both wire and wire nails is also announced. It is stated that malleable fittings are due to be quoted under a new price list with discounts effective June 1. Bar iron and steel products remain at recent price levels, with galvanized sheet quotations being also nominally unchanged, although the firmer tone still prevails, with slightly higher quotations appearing in different quarters. The gradual improved condition in scrap metal markets is maintained, with a somewhat heavier demand for certain lines reported in outside markets owing to the coal strike. The progress being made in construction work stimulates sales in many commodities, and jobbing houses report activity in builders' hardware and other supplies required for this work. A brisk demand is now evident for all Spring and Summer lines. The quiet tone again generally prevails in the ingot metal markets. An additional increase in linseed oil reflects the upward swing of flaxseed prices, coupled with seasonal increased demand. Turpentine prices are firm and this product is still somewhat scarce, domestic distributors being unable to secure further large shipments from southern producing points at this period, which would offset this condition in the face of restricted output in production areas and increasing consuming requirements.

Montreal Markets

MONTREAL, May 18.—Price reductions feature the hardware markets this week, the upward trend in prices recorded in recent weeks having slackened, for the present at least. The local base price on wire nails is reduced ten cents, but this revision is said to be made in the hope of stabilizing the market, as the undertone of nails and other wire products is undoubtedly firmer at the present time. Another important price change is announced on water and steam boilers and radiation. An extra discount of seven and one-half per cent. is added to radiator quotations, while boilers have an extra ten per cent. added. Manufacturers in making this announcement state that it is only a temporary quotation, and effective only until May 31st. Mrs. Potts sad irons are reduced, both in polished and nickel-plated, and asbestos products, including asbestos pipe coverings, boiler covering and sheathing, have new lower quotations.

LOWER PRICES RECORDED ON MRS. POTTS IRONS

Montreal

Quotations on Mrs. Potts sad irons have been reduced, and nickel-plated are now quoted at $1.75 per set, polished at $1.70.

BOILERS AND RADIATORS HAVE NEW DISCOUNTS

Montreal.

Revised quotations are announced by manufacturers of hot water and steam boilers and radiation. An extra 7½ per cent. is added to the present discount on radiators, and boilers show an extra 10 per cent. In making this announcement it is stated that in all probability a further change will be made in the near future, and present revision is only effective until May 31st.

Keen competition has been experienced for some time past, and while increased building activity has recently stimulated sales of these lines, the market has not been on an altogether settled basis. It is pointed out that the undertone of the market is firm, the recent advance in pig iron strengthening the situation considerably. Just what further action will be forthcoming is in doubt, but one manufacturer described the present price change as a forerunner of higher levels in the near future.

SLIGHT REVISION IN WIRE NAIL PRICES

Montreal

A slight revision is made in local quotations on wire nails, the base price being reduced from $3. 75 to $3. 65. The undertone of the nail market continues firm, but owing to unsettled conditions locally the strength has not reflected to the same extent as perhaps it would otherwise have done. With current prices now at a lower level, a more stabilized market is looked for.

BUILDING STIMULATES METAL LATH SALES

Montreal

The movement of metal lath has become much more active in recent weeks owing to activity in building construction. There is no change in prices, and following are prevailing quotations:

METAL LATH—
Painted—

	per sq. yd.
26 gauge	23c.
24 gauge	28c.
23 gauge	32c.

Galvanized, 10c. per sq. yd. extra.

BAR PRODUCTS REMAIN AT HIGHER LEVELS

Montreal.

With current quotations on bar iron and steel revised to higher levels, as recorded last week, there is little change in fundamental conditions, the firm attitude in the industry still prevailing. A quotation ten cents in advance, which

would bring bar iron and steel to $3.00 base, is given in some quarters, but $2.90 is more generally quoted. Local distributors anticipate a continued improvement in the movement of steel, the betterment in the past few weeks offering encouragement in this direction. Increased activity in the south is also pointed out as an indication that a better buying movement may be expected in the following months. The coal strike is still looked upon by some as a factor that must be seriously reckoned with in the near future, while others are satisfied to allow the present situation to take its own course, believing that any great obstacle relative to the strike will be overcome in due time. Following are local quotations:

IRON AND STEEL—

Common bar iron, 100 lbs.	....	2 90
Refined iron	....	4 40
Irish finish machinery steel	....	2 95
Mild steel	....	2 90
Single reeled machinery steel	....	5 00
Band steel	....	3 25
Spring steel	....	4 50
Sleighshoe steel	....	2 90
Tire steel	....	3 10
Harrow tooth steel, per lb.	....	3 05
Mining tool steel, per lb.	....	0 20½
Black Diamond tool and cast steel, per lb.	....	0 20½
Toe caulk steel		3 80

NOTE—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

LITTLE CHANGE IN RANGE BOILER MARKET

Montreal

With a little better buying movement in range boilers during the past few weeks, when dealers' purchases have been of somewhat better quantities, there is said to be room for greater improvement considering the season of the year. Building construction usually calls for heavier supplies at this time, but only a moderate demand has yet been in evidence in this direction. No change has been made in quotations both list prices with discount and net quotations being given by various distributors. Following are list prices and discount:

RANGE BOILERS—

Size	List Price
5 gallon	$13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 50 per cent.
Extra heavy, 40 per cent.

STEADY TONE IN LEAD AND ZINC PRODUCTS

Montreal

A fairly steady market is recorded on lead and zinc products. While metals on primary markets do not show the same strength as was apparent a few weeks ago, still the tone of these markets is also steady. Tin, which re-acted last week, has again stiffened considerably, and with a strong tendency in copper and lead, solder quotations are firm. Manufacturers and dealers in these lines describe present activity as seasonable, recent week bringing an improvement, especially in goods used by the plumbers in building construction. Following are unchanged quotations:

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 00
Lead waste, per 100 lbs.	13 00

Note—Lead pipe is subject to a discount of 10 per cent.

Lead traps and bends	17½%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10
Lead sheets, 3 to 3½ lbs., sq. ft., lb.	0 09¾
Do., 4 to 8 lbs., sq. ft.	0 09

Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.

Solder, guaranteed, lb.	0 25½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 20½
Do., wiping, lb.	0 21½
Do., wire, lb.	0 34
Zinc sheets, casks	0 11
Do., broken lots	0 11½

EASIER PRICES RECORDED ON ASBESTOS PRODUCTS

Montreal

An easier tendency is again evident in the market for asbestos products, pipe and boiler coverings are increased approximately 5 per cent., boiler covering slightly reduced to $1.90 per bag, and sheathing is reduced from $8.00 to $7.75 per 100 lbs. Business in these products is stated to be somewhat improved in recent weeks, building operations now demanding supplies. Folowing are revised quotations;

ASBESTOS PRODUCTS—

	Off list prices
2 ply pipe covering	67½%
3 ply pipe covering	65%
4 ply pipe covering	45%
85% magnesia covering	45%
Boiler covering	$1.90 per bag
Asbestos sheathing	7.75 per 100 lbs.

NO FURTHER CHANGE IN WASTE MATERIAL MARKETS

Montreal

Price levels on the various lines of waste materials are nominally unchanged since the revision of last week when copper and brass scrap, also heavy melting steel; recorded advanced quotations. Dealers report that the firmer tendency is still apparent in practically all lines. The coal strike, and its effect on the steel industry is said to be causing a heavier consumption of ferrous metals in outside markets, and the slight improvement in yellow and red metals is generally maintained. Business locally is still of a moderate nature at following nominal quotations:

WASTE MATERIALS—

Automobile tires		0 50
Rubber shoes		0 02¾
Yellow brass		0 05½
Red brass		0 08½
Light brass		0 04
Scrap zinc		0 03¼
Lead, heavy		0 04
Lead, tea		0 02
Light copper		0 08½
Heavy copper		0 10½
Wrought iron, R. Rd., No. 1 per gr. ton		9 00
Malleable scrap (ton)	....	8 00
Pipe scrap (ton)	....	6 50
Heavy melting steel	8 50	9 00
No. 2 bushelling,	....	8 00
Boiler plate		7 00
No. 1 machinery cast		20 00

GALVANIZED AND BLUE ANNEALED SHEETS ACTIVE

Montreal

Activity in galvanized sheets continues on the local market, and added to this is a heavier buying movement in black and blue annealed sheets. This reflects the trend of the market in recent weeks when a gradual improvement has been noted. Distributors of these lines also state that delivery is becoming a more important factor in the situation, and with an increased demand, the firmer tendency will in all probability be more pronounced in the coming weeks. If so, an improvement locally is also expected, insofar as local quotations are concerned. For some time past there has been a distinct variation in quotations among distributors, and a narrowing of this range would doubtless be to the advantage of all concerned. Although many distributors have already slightly advanced their quotations, prevailing levels are covered by following range:

BLACK SHEETS

10 gauge	4 00	4 50
12 gauge	4 10	4
14 gauge	4 40	4 70
16 gauge	4 50	4 80
18-20 gauge	4 55	5 05
22-24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

GALVANIZED SHEETS

U. S. Standard.

10¾ oz.	6 65	7 10
28 gauge	6 25	6 70
26 gauge	5 95	6 35
22-24 gauge	5 80	6 10
20 gauge	5 65	5 95
18 gauge	5 65	5 85
16 gauge	5 50	5 80
14 gauge	5 35	5 75
12 gauge	5 20	5 75
10 gauge	5 10	5 75

English Standard—	Queen's Head	Fleur-de-lis
28 gauge	7 25	7 00
26 gauge	7 00	6 75
24 gauge	6 10	6 35
22 gauge	6 05	5 90
18-20 gauge	5 35	5 75

CURRENT TRADE IN PIPE FITTINGS IMPROVES

Montreal

Quotations on pipe fittings remain at former discounts with current business described as on a gradual increase. During recent weeks the movement of the various kinds has been stimulated by supplies required for building activities, and a continuation of this betterment is

ANNOUNCING THE WINNERS

of the "O-Cedar Trade Paper Heading" Contest

The Winner of the $25 Prize

J. ROY McDONALD

Representing

THE SIMPSON COMPANY,
Guelph, Ontario

Heading Submitted: "Tell Its Uses—Boost Your Sales."

In an effort to secure the opinions of the wholesale trades sales force on our trade paper advertising, we recently offered $50.00 in prizes to those submitting the best headings for an O-Cedar trade paper advertisement, which appeared in a selected list of trade journals.

We offer sincere congratulations to the winning contestants in the O-Cedar Polish Trade Paper Heading Contest. The winning headings and those receiving honorable mention displayed keen thought and excellent judgment. Out of the hundreds of headings submitted, many were well worthy of honorable mention, but the lack of space prohibits our mentioning them all.

We take this opportunity to thank all who entered this contest for their interest in O-Cedar Products.

Honorable Mention

J. H. NEELAND
Representing
L. T. MEWBURN & CO., LIMITED
Calgary, Alta.

Submitted: "Brighter Prospects for Spring, Mr. Retailer—30% Increase in Your Business of Selling O-Cedar Polish."

J. A. FREDERICK
Representing
KENNEDY HARDWARE CO., LTD.
Toronto, Ont.

Submitted: "Merchants of Canada—a Better Knowledge of O-Cedar Uses Will Increase Your Sales."

Honorable Mention

EDWARD C. JOSEPH
Representing
JOSEPH & COMPANY
Quebec, P. Q.

Submitted: "Business Bad? Wanting a Leader? Study this Ad.—Feature O-Cedar."

J. SNELGROVE
Representing
WESTERN GROCERS LIMITED
Vancouver, B. C.

Submitted: "Who Wouldn't Want a 30% Increase in Sales?"

SECOND PRIZE, $15.00
Won by

E. FLEDDERJOHN,
Representing
WESTERN GROCERS, LIMITED
Regina, Sask.

Heading Submitted: "Increased Use—Increased Sale—Increased Profit."

FOURTH PRIZE, $5.00
Won by

W. H. J. McMILLAN
Representing
WESTERN GROCERS, LIMITED
Vancouver, B.C.

Heading Submitted: "Tell Her How—She'll Buy More."

THIRD PRIZE, $5.00
Won by

E. HIBERT
Representing
N. C. POLSON & COMPANY, LTD.
Montreal

Heading Submitted: "The Argument that Multiplies by Two the Sale of O-Cedar Polish."

CHANNELL LIMITED, TORONTO

If interested tear out this page and place with letters to be answered

Just 7 words made a big

increase in Sales of—

O-Cedar Polish

A prominent Hardware Dealer in Toronto—The North Toronto Hardware—has discovered very profitable possibilities in 7 small words.

In a recent O-Cedar Polish Trade Paper advertisement he read the details of an investigation, made among O-Cedar Polish users which revealed the fact that only 40 per cent. of those who knew of O-Cedar's merits were actually using it on their *furniture.*

This dealer also noticed the new O-Cedar slogan—and decided to put it to work. He makes use of it with every purchaser of O-Cedar Polish by asking, do you—

Use it on your piano with water?

Naturally a woman realizes that a Polish that is good enough for a piano is the correct polish to use on all fine furniture. So O-Cedar becomes the permanent brightener of all the furniture in the home, as well as the woodwork and linoleum.

Try these 7 profit increasing words for a month—and note the jump in O-Cedar Polish sales.

RETAIL PRICES:

O-Cedar Polish in Bottles 30c and 60c. In Tins $1.50, $2.50 and $3.50. O-Cedar Polish Mop, large size, triangular shape, $2.00. O-Cedar Dusting Mop, large size, triangular shape, $2.00. O-Cedar Polish Mop, small size, triangular shape, $1.25.

TROUGH AND PIPE IN BRISKER DEMAND

Montreal

With the season for eavestrough and conductor pipe now at hand, these products register an improved movement, and continued activity is anticipated for the following months. The undertone of the market is little changed, being much firmer since the stronger tendency in galvanized sheets became apparent. Following are unchanged list prices and discounts:

EAVESTROUGH—

O. G. round and half-round, per 100 ft.

8 inch	10 inch	12 inch	15 inch	18 inch
$16 90	$18 70	$22 20	$29 80	$37 80

6 inch	29 00

Discount 60 per cent.

PIPE IS UNCHANGED: PRICES REMAIN FIRM

Montreal

List No. 54 remains the selling basis for wrought iron and steel piping, with the undertone of the market still described as firm. Although a revision to higher levels was thought likely, even before this date, manufacturers state that no change is in sight at present. Current business is said to be progressing along satisfactory lines, and comparing favorably with last year for this period. List No. 54 will be found on current market pages.

TONE OF METAL MARKETS CONTINUES FAIRLY FIRM

Montreal

The ingot metal markets do not show very much change during the past week, and prices generally are steady. The volume of business has slackened somewhat, but the tone of the markets remains firm, and the situation is regarded as fairly satisfactory.

TIN.—This metal has receded to below £150 in London, and it would appear that holders in the Straits have abandoned the idea of holding out for higher prices. Consumption in the U. S. A. has fallen off slightly, and buyers appear to be only interested in lower prices. The local market is quiet at 34 cents.

COPPER.—Copper shows some strength both in London and New York, and the market is somewhat firmer. Electro is now quoted at 13⅜ to 13½ cents delivered, and demand is quite good. From present indications a further slight advance seems likely, although dealers are of the opinion that it would not be allowed to go too high. Quotations are unchanged at 17 cents for electro, 16½ cents for casting.

SPELTER.—Spelter is stronger at East St. Louis for May and June shipments, no doubt chiefly owing to the coal strike. Some smelters are reported to have closed down, and others are refusing to quote. London is steady around £27, but the advance in the U. S. A. makes export business difficult. Quotation is unchanged at 7¾ cents.

LEAD.—As far as the U. S. A. is concerned the market is firm in tone, and while buying has not been quite so heavy recently, this is said to be due to requirements having been previously covered. London is also firm owing to scarcity of spot lead, and opinions differ as to the future of this metal. Locally prices are steady at 6¾ cents.

ANTIMONY.—This metal remains steady with consumption fairly good. There is no change in local quotations, and Chinese is quoted at 6¾ cents, high grade English at 7½ cents.

ALUMINUM.—With the undertone of the market for aluminum showing little change, locally this metal is quiet with quotation remaining at 24 cents.

Toronto Markets

TORONTO, May 18.—A downward revision in quotations on hay fork pulleys, lower prices on cant hooks and peavies, easier price levels on the Maydole line of hammers, and a slight reduction in Trimo wrench prices, comprise some of the current hardware market developments. Certain extra discounts also appear on radiators and boilers, in addition to the customary levels, and while distributors claim that this situation is merely of a temporary nature, it is noticeable that these additional discounts are practically general. A revision in the distributing points for wire nails has been announced, while effective June 1, malleable fittings are scheduled to be quoted under new list prices with discounts. Uniform price levels on galvanized sheets are apparently difficult to secure, but the recent higher quotations are now generally adopted with the situation being described as firm, thus reflecting the strength of the steel industry in general. While bar iron and steel product prices are exceptionally firm, with increases having been recorded in certain quarters, keen competition is cited as the obstacle to a revision in local quotations, up to the present. A slight improvement has been recorded in scrap materials, higher price levels having been noted on several items. A quiet tone generally prevails in the ingot metal markets.

FIRMER TREND NOTED IN CORRUGATED MARKETS

Toronto

The recent increase in the quotations on flat galvanized sheets, has reflected in the firmer tone now evident on corrugated sheets. These products are reported to be experiencing an improved demand, and conditions generally are on a much stronger basis than during the earlier months of the year, when prices on the heavier gauges were purely nominal. The advent of warmer weather has provided increased opportunities for structural activity, and distributors state that a uniform demand for corrugated throughout the ensuing season is generally anticipated. Following are the average levels prevailing on the local markets:

CORRUGATED SHEETS—	Per 100 Sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 26 U. S. gauge	8 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.
Lighter than 24 gauge and wider than 27 ins. 75 cents per sq. extra.

STEADY TONE FOR LEAD AND ZINC PRODUCTS

Toronto.

Manufacturers of lead and zinc products describe the market as continuing steady to firm since the recent revision. Metals in primary circles still contribute a fair amount of strength to the tone of finished products, particularly solders, but little change is thought likely in the immediate future unless strength of a more marked nature is shown. Demand steadily improves with increased activity in building operations, and following are unchanged quotations:

LEAD AND ZINC GOODS—		
Lead pipe, list, per lb.		0 12
Lead waste pipe, list, per lb.		0 13
Do., over 8 in., list, per lb.		0 14
Lead pipe is subjected to a discount of		10%
Lead traps and bends		17½%
Lead sheets 4 to 6 lbs. sq. ft in rolls, lb.		0 09
Cut sheets, ½c. to ¾c. lb. extra and cut sheets to size 1c. lb. extra.		
Solder, wire, per lb.		0 30
Do., strictly, lb.		0 22½
Do., wiping, lb.		0 21
Do., guaranteed, lb.		0 24
Do., commercial, lb.		0 21
Zinc sheets, per lb.	0 09	0 10
sheets to size 1c lb. extra.		

MALLEABLE FITTINGS TO BE QUOTED UNDER LIST

Toronto.

At a recent meeting representative of the plumbing and heating jobbers of Ontario and also Montreal, it was decided to adopt a new piece list on malleable fittings, effective June 1. Booklets covering this new list are being prepared, and it is understood that the basis will be approximately four times the prevailing net price, with proportionate discounts of 70 and 5 per cent off. Quotations on these products, therefore, will be practically unchanged, only the method of listing being varied. Current demand for pipe fittings is stated to be slightly improving, with no other developments having been announced. Following are prevailing quotations:

PIPE FITTINGS—

Cast iron fittings		30%
Plugs, cast iron		30%
Do. solid		30%
Do., countersink		30%
Bushings, small		32%
Bushings, cast		32%
Unions, ¼ in. to 2 in.		47%
Unions, ⅛ in., 2½ to 4 in.		47%
Flanged unions		30%
Flanged fittings		30%
Dart Unions, blk., ¼ to 2 in.		33½%
Do., ⅛ in., 2½ in. and larger		23%
Do., galv., add to black		30%
Nipples, blk., and galvd. ⅛ to 4 in., close and short		60%
Do., 4½ in. and larger		50%
Do., long, ⅛ in. to 4 in.		65%
Do., 4½ inch and larger		55%

Couplings, 4 in. and under		30%
Do., 4½ in. and larger		10%
	Black.	Galvd.
Class A	0 54	0 67
Class B	0 20	0 28
Class C	0 13	0 20

COMPETITION OBSTACLE TO REVISED IRON PRICE

Toronto.

Whlie it was generally expected that some higher prices on bar iron and bar steel products would most likely have developed on the local market, no changes had been announced up to the present. It is noticeable in this connection that Montreal quotations are on a higher level, but local distributors state that producers are evidently waiting until all lower prices have been exhausted on the southern primary centres. This generally leaves the situation at the prices quoted last week, with the notation that the trend of all iron and steel items is described as exceptionally strong and getting firmer each day. Current business is described as fairly good, and generally up to expectations. The feeling is noticeable, however, that keen competition is one of the chief obstacles towards higher quotations on a uniformly-maintained level:

IRON AND STEEL—

Mild steel bars, base	2 75
Mild steel bands, 3-16 in. base	3 25
Bar iron, base	2 75
Angle iron, base	2 85
Horseshoe iron	3 60
Tire steel	3 00
Spring steel	6 00
Sleigh shoe steel	2 85
Hoop steel	3 00
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	28 00
Mining drill steel	18 50
Cast tool steel, high grade	30 00
Cast tool steel, medium	18 00

GENERAL IMPROVEMENT IN SCRAP MATERIALS

Toronto.

The outlook for scrap copper is now reported brighter than it has been for some time. Quite a number of sales have been in evidence and the general trend of prices is in an upward direction. With the single exception of composition, there is a general advance all round. Heavy copper and wire is now being more freely purchased.

Heavy melting steel also has improved. Borings and turnings have shown a 50c a ton advance. Stove plate is scarce and hard to get and the price, therefore, is nominal. The cast iron market is active and firm. Following are the averages of dealers' buying prices for large quantities:

SCRAP MATERIALS—

Scrap Iron		
Heavy melting steel (Hamilton)	$12 50	$13 00
Borings and turnings	2 50	3 50
Rerolling rails	10 50	11 50
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	7 00	7 50
Agricultural malleable	11 00	12 00
Railroad malleable	12 00	13 00
Net tons—		
No. 1 cast	18 00	19 00
Stove plate	12 00	13 00
Grate bars	11 00	12 00
Standard car wheels	14 50	15 50
Scrap Metals		
Heavy copper and wire	10 25	11 25
Light copper	8 25	9 25
No. 1 composition	9 00	10 00
No. 1 comp. turnings	6 00	7 00
Light brass	3 00	3 50
Heavy yellow brass	5 00	6 00
Heavy lead	4 50	5 00
Tea lead	2 25	2 75
Scrap zinc	4 25	4 75
Scrap Rubber		
Boots and shoes	2 25	2 50
Lumbermen's rubber boots	1 50	1 75
Auto tires	0 50	0 60
Solid tires	0 75	1 25

SOME EXTRA DISCOUNTS APPEAR ON RADIATORS

Toronto

A somewhat unexpected situation has now developed in radiators and boilers, extra discounts being quoted in various quarters on these products, in addition to the regular discounts off the nominal list prices. This change has not been generally announced, but it is stated to be the result of keen competition.

Distributors generally look upon these conditions as more or less temporary, believing a settlement to be imminent. However, the fact that these extra discounts are practically general, places quotations on radiators at an additional 7½ per cent. off, and on boilers at an extra ten per cent., although the previous list prices and discounts also remain. In view of the improvement anticipated in radiation trade, coupled with more confidence regarding the future strength in these markets, the unsettlement referred to is described as unusual and of a transitory nature.

UNIFORM PRICE LEVEL ON SHEETS DIFFICULT

Toronto

As stated in last week's issue of Hardware and Metal, the base price of $5.35 on galvanized sheets is stil apparent on the local market in certain instances, but the general advance of twenty-five cents on this level has now been generally adopted, and the new quotation is stated to be quite firm, reflecting the strength of the steel industry in general. While keen competition exists locally on practically all steel items, the many wild allegations appearing on the market, some of which particularly referred to black sheets having been imported from Europe at a price below the current domestic level, have been found to have no real foundation in fact. The maintenance of a uniform price is described as a difficult objective, as it is evident that any attractive order will cause certain distributors to shade quotations in the hope of securing more business. However, it is stated that the following represent the average local prices on sheets and plates:

BLUE ANNEALED—		
10 gauge, base	3 50	4 25
12 gauge	3 55	4 30
13 gauge	3 60	4 35
16 gauge	3 65	4 40
BLACK—		
18-20 gauge	4 05	4 80
22-24 gauge	4 10	4 85
26 gauge	4 15	4 90
28 gauge	**4 25**	**5 00**

Charge of from 25c. per 100 lbs. is made for less than case lots. An extra 10c. per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—

	Queen's Head	Fleur-de-lis.
28 gauge	7 50	7 00
26 gauge	7 25	6 75
24 gauge	6 85	6 35
22 gauge	6 40	5 90
18 and 20 gauge	6 25	5 75
	Premier and	Apollo
10¾ oz.	6 00	6 50
U. S. 28 base	5 60	6 10
U.S. 26 gauge	5 30	5 80
22 and 24	5 15	5 65
18 and 20	5 00	5 50
16	4 85	5 35
12 and 14	4 70	5 20

An extra 40c. per 100 lbs. is charged for Keystone and Premier bands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c. per 100 pounds.

PLATES, CANADA—

REVISE DISTRIBUTING POINTS FOR WIRE NAILS

Toronto

It is announced by local jobbers that Peterborough, Kingston and Ottawa are not now f. o. b., points for wire and wire nails, price for these points on wire nails now being $3.65 per keg. f. o. b. factory.

EASIER PRICE LEVELS ON MAYDOLE HAMMERS

Toronto.

Revised lower prices are quoted this week on the Maydole line of hammers. These products have the following new quotations locally:

MAYDOLE HAMMERS:—

Per dozen:—

No. 1 $18.25 per dozen. No. 1½ $16.80. No. 11, $18.25. No .11½, $16.80. No. 12, $15.75. No. 13 $14.00. No. 23, $12.75.

DOWNWARD REVISION ON HAY FORK PULLEYS

Toronto.

Hay fork pulleys now show a downward revision in prices, these products being quoted at the following new levels:

HAY FORK PULLEYS—
Per dozen:—
No. 114, $7.20. No. 112, $7.20. No. 118, $8.40. No. 210, $6.60.

PRICES LOWER ON CANT HOOKS AND PEAVIES

Toronto.

A reduction has also been recorded this week in quotations on peavies and cant hooks. The revised price levels on these products follow:

PEAVIES—Per dozen:—
3 x 5 ft. $33.00. 5 x 5 ft. $35.40. 6 x 5½ ft. $36.00.
CANT HOOKS—
50 x 4 ft., $27.60 per dozen.
51 x 4½ ft., $28.20.

SLIGHT REDUCTION IN TRIMO WRENCH PRICES

Toronto

A slight reduction has been announced in quotations on Trimo wrenches. Following are the revised prices on these products:

TRIMO WRENCHES:—
Per dozen.
Size 8 in., $12.85; 10 in., $14.00; 14 in., $20.00; 18 in., $29.40; 24 in., $42.00.

TRADE IN COPPER AND BRASS GOODS MODERATE

Toronto.

Current business in copper and brass goods, such as sheets, tubing and rods, is described by distributors as keeping up fairly well. The improvement noticeable a few weeks ago, however, has failed to continue expanding, the current volume consisting of numerous small purchases. On the whole, the situation is stated to be an improvement over that of last season, and because of this factor a brighter tone is noticeable. Some fluctuations of copper on primary metal centers have failed to reflect on the finished products, the changes referred to being of a minor character only. However, ingot copper is a little firmer owing to some expansion in consumer interest. Following are prevailing unchanged quotations on brass and copper goods:

BRASS	
Sheets, base, per lb.	0 21
Tubing, base, per lb.	0 28
Rods, base, per lb.	0 19
COPPER	
Rods, base, per lb.	0 27
Soft sheets, plain, 16 oz. and heavier, lb.	0 28
Do., plain tinned 16 oz. and heavier, per lb.	0 35
Do., polished and tinned 16 oz. and heavier, lb.	0 40
Tubing	0 27

GRADUAL PROGRESS IN RANGE BOILER MARKET

Toronto

Buying according to current requirements still appears to be the general rule in the range boiler market. Some improvement in demand for these products, however, due to recent activity in building circles, has given a little better tone to the situation, but current conditions are described by certain manufacturers and distributors, as leaving plenty of room for improvement. This is expected to develop as the season advances, and with the more or less general adoption by the trade of the list prices and discounts, the tone of this market can be designated as advancing in the right direction. Following is the current unchanged list and discounts on standard and extra-heavy boilers:

RANGE BOILERS—

Size	List Price
5 gallon	$ 13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 50 per cent.; Extra heavy, 40 per cent.

QUIET TONE PREVAILS IN INGOT METALS

Toronto

There is little snap or volume to the domestic metal markets, prices generally remaining at the recently revised levels, with the exception of tin, which eased off another half cent. After the recent slight encouragement, metals are dragging a little, and both spelter and lead which were previously developing a firmer tone now show an easier trend. In antimony or aluminum there is very little movement to record. The report that additional copper mines intend to resume operations in the near future, has a decided tendency to dampen enthusiasm in this metal.

COPPER.—More active buying of copper for export is reported from southern primary markets, while moderate sales are reported on the domestic account. The tone of the copper market is said to be steadily strengthening, but little improvement can be noted in the local situation. Fluctuations are at present slightly on the up grade, but how long the present movement will continue it is impossible to state. Local prices are unchanged and quiet at 16½ cents.

TIN.—This market is very quiet with domestic prices having eased off another half cent, this change bringing the average quotation locally to 33½ cents. Primary centres also record slight declines, recent heavy Strait shipments being described as a drag on the markets, while tin is only moving in small quantities.

LEAD.—From the firm tendency which was recorded in lead both on domestic and southern centres, this metal has now developed a quieter market. Demand is in lighter volume, and producers report that slight price shading has resulted. Generally speaking, however, quotations are off a little, the local price being 6⅝, compared with the recent higher level of 6¾ recorded last week.

SPELTER.—This market is described as steady but quiet. Large consumers of spelter for galvanizing are said to be fairly well supplied at present, but with the brisk demand for such sheet products, renewed activity in spelter is looked for. The foreign markets continue firm, while local quotations remain at the level of $6.85.

ANTIMONY.—This metal is also quiet, but steady, there being very little movement on either domestic or primary centres. There has been little development recorded during the past week which would test this market. Local prices are unchanged at the previous range of 6 and 7 cents.

ALUMINUM.—Trade in aluminum is as quiet as ever, with little variation in the general undertone. The recent improvement has almost died away, and conditions are just moderate. Local prices still hover between the lower levels of 20 and 21 cents.

London Markets

LONDON, May 18.—Current price developments include a five cent advance in quotations covering both turpentine and linseed oil. This change reflects the firm tone in both markets, produced in linseed oil by increased demand coupled with higher flax seed prices, while scarcity of local stocks and seasonal buying are cited as the principal factors in the turpentine advance. On the other hand, changes to easier price levels are noted on the Potts line of sad irons, window rubbers and fuse plugs. Hardware business in this district continues good, with many merchants reporting a decided improvement in sales during the past week or two.

FAIR TRADE REPORTED IN WINDOW GLASS

London, Ont.

There is a fair movement of window glass continuing at present, with prices holding unchanged. The spurt of activity in building circles is naturally expected to reflect in the latent sales of glass. Following are unchanged price levels:

WINDOW GLASS—
Single Diamond, net list.
Double Diamond, net list.
Cut Lights, 75 per cent. off light list.

ROPE AND CORDAGE ON GRADUAL INCREASE

London, Ont.

Prices on rope remain unchanged, with the gradual improvement in these markets being continued. The seasonal call for rope and cordage is slightly expanding and following are the prevailing price levels:

ROPE—	lb. base
Pure Manilla	23c.
Beaver Manilla	20c.
New Zealand Hemp	20c.
Sisal	18c.

RECORD BRISK SALE FOR POULTRY NETTING

London, Ont.

Dealers indicate that a brisk sale continues for poultry netting, this product being among the seasonal lines recording a steady movement. Quotations remain unchanged, the one and two inch mesh being quoted at list les 12½ per cent.

BUYING COMMENCES IN ARSENATE OF LEAD

London

Dry arsenate of lead is now registering a fair movement, sales in this line having been more noticeable of late. Following are the current season's quotations:

DRY ARSENATE OF LEAD—

	Per lb.
½ lb. pkgs.	0 37
1 lb. pkgs.	0 35
5 lb. tins	0 32
10 lb. tins	0 31
25 lb. drums	0 27
50 lb. drums	0 25
100 lb. drums	0 23

FIVE CENT ADVANCE IN LINSEED OIL

London, Ont.

With a brisk sale for linseed oil now being recorded, and with prices on the flax seed market advancing, a similar increase has been announced on oil. The extent of the advance is five cents per gallon this being the average current quotations to the following levels:

LINSEED OIL—	Raw.	Boiled.
1 to 2 bbls., per gal.	1 15	1 18
3 to 5 bbls., per gal.	1 14	1 17
6 to 9 bbls., per gal.	1 12	1 15

Less barrels, add 15 cents gal.

FURTHER INCREASE IN TURPENTINE QUOTATIONS

London, Ont.

The current sales of turpentine are more brisk, and there is reported a scarcity of this product locally. Prices have been advanced another five cents per gallon, this change bringing the prevailing quotation to the following level:

TURPENTINE—	Imp. Gal.
1 bbl. lots	1 35
2 to 4 bbl. lots	1 34
5 gal. lots	1 50

POTTS SAD IRONS ON EASIER PRICE LEVEL

London, Ont.

Easier price levels are now in effect on the Mrs. Potts line of nickel-plated sad irons, No. 50. These are now quoted at $1.75 per set, while the plain No. 55, are priced at $1.65 per set.

PARIS GREEN SALES NOW ON INCREASE

London, Ont.

The sales of paris green are now on the increase, with a better movement in this direction naturally being looked for in the near future. Price remains at the revised levels recently announced.

PARIS GREEN—	cents per lb.
½-lb. Papers	37
1 lb. papers	35
25-lb. Drums	33
50 lb. Drums	31
100 lb. Drums	31
250 lb. Kegs	29½
600 lb. Barrels	29

SEASONAL SALE FOR FLOWER BED GUARD

London, Ont.

Flower bed guard is now included among the brisk selling seasonal lines, there being a noticeable demand reported for both the galvanized and painted green products. Price prevail as follows:

FLOWER BED GUARD—
12" galvanized, $7.20 per 100 ft. 18" galvanized, $8.00 per 100 ft. 12" painted green, $7.75; 18" painted green, $8.50.

REFRIGERATOR SEASON IS NOW APPROACHING

London, Ont.

Refrigerators are now moving in seasonal volume, the warmer weather having stimulated the trade in these products. Household refrigerators of the Sanderson-Harold make, are quoted at list less forty per cent., while grocers and butchers refrigerators are at list less 35 per cent.

WINDOW RUBBERS ON EASIER PRICE LEVELS

London, Ont.

A reduction of approximately ten per cent. has been announced in quotations on window rubbers or cleaners. These products are now priced at the following levels:

WINDOW RUBBERS—
XLCR—Metal Frame—12" $3.60 doz. 14" $4.00 doz. 16" $4.75.

Winnipeg Markets

WINNIPEG, May 18.—Price reductions on the current hardware markets include easier quotations on platform and household scales, awning cord and Carll wrenches. Linseed oil is now quoted higher, the extent of the advance being five cents per gallon. Both galvanized sheets and turpentine record a firmer tone, due to increased demand for these lines, coupled with price developments on certain primary markets. Range boilers are now included among those products recently showing more activity, which is attributed to general progress in construction work.

LOWER PRICES ON PLATFORM AND HOUSEHOLD SCALES

Winnipeg.

Through a change in both list prices and discounts, household and platform scales show a reduction in prices. List prices have been reduced to lower levels, while the discount in some cases is changed, but for the most part remains the same. Following are new lists and discounts:

SCALES—
4 lb, list $5.30; 10 lb., list $6.60, 240 lb., list $11.50, 600 lb., list $30.00; 1200 lb., $35.60; 2000 lb., $51.60; 2000 lb., drop lever, $55.70.
Less 5 per cent.

FIVE CENTS ADVANCE IN LINSEED OIL PRICE

Winnipeg.

An increase of five cents per gallon in the price of linseed oil has developed on the local markets, this change being attributed to the firmer position of flax seed combined with an improved demand for oil. Following are the revised prices:

LINSEED OIL—
Raw, $1.20 per gal.; Boiled $1.23 per gal., in barrel lots.

STRONGER TONE IN TURPENTINE MARKETS

Winnipeg.

Although local turpentine prices are as yet unchanged, quotations have firmed up considerably in the last few days, due to the stiffening in southern primary markets. The future trend of turpentine is faced on the one hand with the arrival of the new crop with consequent increased supplies available, while current improvement in demand coupled with larger domestic and foreign consumption is expected to become apparent. In the meantime, producing centers have shown a somewhat sudden rise in prices but local levels recorded the following quotation. In barrel lots $1.45 per gallon.

REDUCED PRICES NOTED ON AWNING CORDS

Winnipeg.

A reduction in prices on awning cords is announced this week. Following are the new quotations:

AWNING CORD—
White, No. 4, $3.25 per doz. hanks; No. 5, $12.00 per doz. hanks.
Drab, No. 4, $3.90 per doz. hanks. No. 5, $15.00 per doz. hanks.

CARLL WRENCHES NOW HAVE EASIER PRICES

Winnipeg

A reduction in prices on Carll wrenches is recorded and following are the latest quotations:

CARLL WRENCHES—
No. 60, $10.40 per doz. No. 80, $13.50 per doz. No. 100, $15.75 per doz.

PRICES ON GALVANIZED SHOW FIRM TENDENCY

Winnipeg.

Although local price levels on galvanized sheets remain unchanged, higher quotations are recorded in other market centers. While the advance is not generally quoted up to the present, there are indications that further revisions will be announced in the near future. Following are the unchanged prices

SHEET IRON—(Galvanized)—
Gauge 16, $6.45 per 100 lbs. 18, $6.50; 20, $6.60, 22, $6.75, 24, $6.75; 26, $6.90; 28x30, $7.20; 28x36 $7.50; 10¾ oz. x 30, $7.60; 10¾ oz. x 36 $7.90.

SHEET STEEL—(Black)—
10, $5.35; 12, $5.40; 14, $5.45; 16, $5.50; 18, $5.90; 20, $5.90; 22, $6.00; 24, $6.00; 26, $6.10.

MORE ACTIVITY NOTED IN RANGE BOILERS

Winnipeg.

Range boilers are still selling at unchanged quotations, with little variation recorded in the market situation. Current trade in these products shows a gradual improvement, and buyers are now ordering in somewhat better quantities than during the past few months.

Cultivating Small Buyers of Paint

Active Prospect List Is Kept by Use of Various Report Cards and Intelligent Suggestions Made For Increasing Paint Sales — A Tactful Letter Follows Up Prospects—Noting Real Estate Transfers For Prospects—Small Buyer Can be Developed

Editor's Note:—A survey of a number of hardware stores in Western Ontario this week has impressed upon Hardware and Metal the importance of suggesting various "other" articles in which the customer may be interested. This policy of suggesting various kindred lines to those being purchased has produced remarkable results for certain merchants as outlined elsewhere in this issue. It will work wonders in the paint department as outlined in this article.

REALIZING that any man who stocks a selection of paints and opens his doors to the public will get some business, a certain Ontario retailer decided recently that he was classing himself as a "merchant" and decided to do justice to this name instead of belonging to the first named category. He realized that going after paint business was the way to get a steady growth in this department.

Suppose a customer comes into the store, chooses a half pint can of varnish stain for a piece of furniture and casually drops the remark he "ought to" paint the house this season. In too many stores the remark dies in the same breath it is born. In an aggressive store which has adopted many worthy principles in paint selling this is what happens:

The paint salesman makes an active effort to interest the prospect in the brand of paint carried, extolling its merits and driving home the financial and enjoyment features of a newly, nicely painted home. If he fails to make the sale he does not let the matter drop. He makes out a prospect card on which are blank spaces for the following:—Salesman's number, date, name of prospect, address, what interested in, information from, remarks. A space at the bottom of the card is for promotion effort leaving space for date of letter sent, whom to notify, transferred and filed by, and date.

Letter Follows

The next day's mail brings a letter from the firm soliciting the paint business of the prospect. This is followed by a second and third letter if necessary.

A ten-day campaign is carried on by mail, developing the principal points of a "protect the surface and you protect all" theory. Each letter is accompanied by literature dealing with the paint in which the prospect is interested. If this effort fails, one of the store's best salesmen makes a call at his office or home to help land an order. The letter sent should be specific, not general. It should deal with the particular problem in hand and give evidence supporting the claims made. The testimonial idea is a powerful one in selling paint and remarks made by other satisfied customers should be incorporated in the letter. If a prospect's neighbor has used your goods and is pleased, tell the man. The good word of that neighbor is the best sales argument ever prepared.

The letters should be cleverly multigraphed. They should look like a personally dictated letter, and these two gigantically important characteristics should be observed: (1) Sincerity and (2) Simplicity. Mean what you say and be simple, straightforward and right to the point.

A Clever Device

Here is a little device to be used with good effect in all advertising letters: In the body of the letter, and at the start of one of the subsequent paragraphs, leave a blank in which the man's name can be written, so your letter will say something like this:

"You know, Mr. Brown, we have sold 20 years;" or,

"Mr. Brown, your complete satisfaction is essential to our success."

Keeping track of real estate transfers is another prolific source of real prospects. When a house is bought, almost always some room, if not the whole house, needs a coat of paint, some wall decoration or refinished floors.

Appeal to the man's pride in his new home. Let him know his friends are going to scrutinize it closely, and help him to want to have it spic and span in every way.

And by no means overlook the fair feminine in your direct-by-mail campaign. Eighty-five per cent. of the things bought in stores are bought by women, or their purchase is influenced by women. Sometimes it pays to direct the whole campaign to them. And at any event, it pays to mention them in the letters and perhaps send them a special letter, urging them to encourage hubby's desire to beautify the place.

Local newspaper advertising is essential in building paint business. Space need not be large, but it should be simple and sincere. Regularity is of paramount importance. One of the successful paint dealers I know of used an exclusive paint advertisement every Monday night, except a few weeks during the year. He is after immediate business, and he is after the business that comes to a product that has built up a good-will following for it.

Don't Overlook Small Business

Many paint dealers make the mistake of not going after the small business, just because it is small. But it should be remembered if you can get a man to come to your store for his automobile paint and his wife to come for varnish for the baby's crib, they are very apt to come back when they want to spend $50 to paint the house.

The dealer who wants his paint business to grow will see that every package leaving the store contains a piece of dealers' helps. He won't think it undig-

They All Know

Muresco

For many years its reputation has been established as the best wall finish. Thousands of householders testify that it neither peels, cracks nor rubs off.

It is artistic in appearance, the wide range of tints and colors testify to that; its extensive use in hospitals testifies to its sanitary properties; the ease with which it can be applied by anyone, allowing more frequent interior redecorating—are factors that have established its enviable reputation with the user.

"Quality forever Moore"

Moore's dealers benefit by this popularity. For popularity means sales—sales mean profits.

The Brush Department

Price Tickets Sell Brushes On Display

Many Biggest Buyers of Brushes To-day Have Developed From Small Purchasers In Short Time Due To Appreciation of Display — Rapidly Increasing Sale for Floor Brooms Due to Popularity Of Hardwood

SUPPLEMENTING the information given in the last issue of Hardware and Metal concerning the sale and care of brushes, J. Billinghurst of the Boeckh Co., Ltd., provided the following data:

"Brushes should not be thrown together in a drawer or elsewhere any more than cutlery would be so handled. It is an easy matter to sample brushes and keep the stock in good shape. In my experience I have seen in the bottom of some dealers' brush drawers, some stock sold them at least ten years ago. In that time they have been churned over and over until they are scraped and too shop-worn to be put on sale."

Referring to the difficulties of preserving brushes against moths, Mr. Billinghurst pointed out that dust is bound to collect in the bristles but that a good soaking in oil takes out this dust. If not treated in this manner both the brush and the paint is blamed.

"In making my calls I hear some merchants say 'what is the cheapest brush you have?' I answer them that a stove pipe brush is the cheapest and this brush costs the manufacturer more than he gets for it. It is impossible to make a brush to sell at five cents today, and the merchant can in most cases sell a 1½in. or 2in. brush of good quality just as easily and make a larger profit. He can do this by pointing out to customers the economy of buying a good brush which can be preserved for other use than purchasing a cheap one which will soon be unfit for use. Even a brush which has been used with japan can be cleaned in the manner formerly outlined."

Whitewash Brushes

Referring to whitewash brushes Mr. Billinghurst pointed out that any manufacturer who sells the retailer a whitewash brush to sell at 25 cents is losing money or the brush is of very poor quality. "Some time ago we could buy tampico at reasonable prices but since the Mexican revolution we have been buying in bales instead of carloads and it is hard to get first-class material. South Africa produces a fibre which is used for stable brooms, dandy brushes, etc. This used to be set in pitch but today is fastened with wire staples to eliminate troubles due to pitch melting when exposed to the sun."

There was said to be a large and increasing use for floor brooms, these being more popular than the corn brooms due to the increasing use of hardwood for flooring. Mr. Billinghurst pointed out that it was easy to sell a floor broom by appealing to the prospect's pride in the home. Large quantities of floor brooms were being sold to-day at as much as $84 per doz.

"Too few hardwaremen expose brushes and brooms sufficiently," continued Mr. Billinghurst, who confirmed the importance of display by stating that many of his best customers to-day were formerly very small but developed due to carrying out effective display. The best way to sell brushes to-day was said to be by putting on a plain price ticket and showing the goods.

Preventing Moths

Asked as to the prevention of moths in brush stock, Mr. Billinghurst pointed out that the brush combers use a whiting to make the bristles slip through the combs easily. The brushes appear dusty from this whiting and the thing to do is to take benzine (not gasoline because of the odor) and dip the tip of the brushes into the benzine in a pan. This destroys the moth egg. Half an inch of benzine is enough in the pan and after dipping the brushes should not be shaken out. It was stated that if the brushes are kept in their original paper wrappings they are unlikely to be affected by moths or if they are kept unwrapped in the light they are not likely to be touched.

Asked regarding the effect of certain chemicals upon brushes, Mr. Billinghurst stated that certain paint removers were hard on brushes, particularly those set in cement but that rubber set brushes suffered little from this cause. Some chemicals in paint removers and certain mineral paints were hard on bristles, in many cases a brush has been considerably eaten away with such minerals.

CULTIVATING SMALL BUYERS OF PAINT

(Continued from page 54)

nified to make a house-to-house distribution of these helps once in a while.

And the dealer who has arrived, or wants to, will not be slow in making his store display attractive. He will have his shelves filled. He will have them neatly arranged, every can in line, and he will use signs, counter cut-outs, hangers, samples of painted articles, etc. In other words, he will make his paint department or store look like paint.

His windows will be changed frequently. They will be kept alive. He will show old pieces of furniture partly painted, not forgetting that contrast is one of the mightiest of all sales arguments. He will show locally-made pictures, those that show residences, stores, buildings, painted with the paint he sells.

And "lastly but not leastly"—as the colored clergyman said—he will know and he will know that his salesmen know what they are talking about.

Solomon must have been the original salesman when he said "Knowledge is power." One can never know too much about his goods. How they are made, of what they are made and for what they are used, are of paramount importance. And the right way to use each article—do not, by all means do not, forget that. Many a product has gotten a black eye because it was not used properly. I am almost convinced that it would pay every paint store and every store selling paints to have a practical, experienced paint man in charge. One who knows. Knowledge is a mighty valuable thing, and when the customer feels there is a certain store that supplies knowledge with a package of paint or a paint brush, that's the store that is going to sell the package or the brush.

The sales force will be toned up, the competitor will respect you more, and business will boom if, instead of a policy of "letting them come after it," the paint dealer will go after the customer.

GROUPS SEASONABLE GOODS

(Continued from page 37)

ness at other seasons of the year as well for it helps to educate the public to a realization that cut glass, chinaware, silverware, cutlery, electrical goods, etc., can be purchased at the hardware store. An idea which one merchant has worked out is to change ad daily, dealing with a certain electrical appliance and heading each one in suitable style such as "A gift from brother," "A gift from mother," "A gift from the girls," etc., applying to club, church, friends, office, employees, etc. Groups of friends will often decide on giving some one of the suggested lines if suitable.

In dressing a window for June bride gifts, there should be some sprigs of white flowers, a few yards of white satin ribbon, a white card and a number of polished electrical appliances. A more elaborate display would be to show a wax form dressed suitably holding in her hand a dozen white streamers, to the ends of which were attached various electrical gifts. Another dealer used two tiny dolls dressed as bride and groom and surrounded them with electrical gifts.

Weekly Paint Markets

Montreal

MONTREAL, May 18.—Another advance of three cents per gallon in linseed oil quotations offers the chief attraction in the paint market this week. This product has been in a strong position during recent weeks, with flax seed prices also on an upward trend. Seed quotations have now reached a new high point, with every indication of a firm tone remaining in this market. Turpentine quotations are unchanged with the undertone of this product also reported as firm. Stocks in the South are comparatively low for this season, and much reduced from this period last year. Weather conditions are more favorable for the new crop, but demand has increased considerably in recent weeks, the European market being more active in the past week. The undertone of shellac at primary centres is a little easier owing to recent shipments from India, but locally the market is still said to be fairly firm. Average quotations are unchanged, with a range still existing among the various dealers. Business in paint manufacturing circles is described as seasonably active, the open weather in recent weeks stimulating the movement of these products considerably. The paint market is fairly firm owing to the steady tone in raw materials.

FURTHER INCREASE IN LINSEED OIL QUOTATIONS

Montreal.

Linseed oil quotations are again increased three cents on the local market, bringing the present price of $1.08 for raw material in one barrel lots. The market has continued strong all week with demand now said to be seasonably satisfactory. Flax seed also remains in a steady position, with an upward tendency to prices both locally and in outside markets. A new high price on seed was reached this week, and from reports there is said to be every indication of a firm tone remaining in the market. Demand generally has increased to proportions usual in the active season, with little change from earlier estimates on seed supplies, and with this situation continuing during the next two months, there would seem to be every likelihood of a steady to firm linseed oil market unless some unforeseen development arises. Prevailing quotations are as follows:

LINSEED OIL—	Raw.	Boiled.
8 to 5 barrel lots, per gal.....	1 06	1 08
1 to 2 barrel lots, per gal....	1 08	1 10

Less barrels, add 10 cents per gallon.

INCREASED DEMAND ASSISTS TURPENTINE MARKET

Montreal.

There is no change in local turpentine quotations from last week, the current price still being $1.22 in most quarters. A quotation two cents lower is given with the statement that a revision upward is altogether within the next few days when present stocks are depleted. The movement in turpentine is now seasonably active with the undertone described as fairly firm. Notwithstanding more favorable weather in the South, stocks are reported as comparatively low for this season, and much reduced from this period last year. European demand is a little more active, this market no doubt greatly assisting in maintaining the present strong tendency. Following are unchanged local quotations:

TURPENTINE—	Imp. gal.
1 barrel lots	1 22
2 to 4 barrel lots, per gal.	1 21
Broken lots	1 32

PRIMARY SHELLAC MARKETS REPORT EASIER TONE

Montreal.

With current quotations on shellac remaining practically unchanged, the recent strength in the undertone of the market, due to unsettled conditions in India, has eased up a little, and some relief has been found in the recent arrival of shipments from this source. The market locally, however, according to dealers, is by no means easy, and when present stocks are depleted, there is a possibility of firmer prices in some quarters. The movement of this product is again more active, and while a slight improvement is noted in primary markets, this betterment is not sufficiently important to effect the local situation up to the present. Average local quotations are as follows:

SHELLAC—	
Orange shellac, in barrels	4 60
Do., in one gal. jugs	4 90
White ,in 5 gal. jugs	5 10
Do., in one gal. jugs.	5 40

ACTIVE MOVEMENT NOTED IN INSECTICIDES

Montreal.

Recent weeks have brought an active demand for insecticides, especially for those used for earlier spraying purposes. The appearance of leaf buds, and blossoms in some sections, has called for arsenate of lead, lime sulphur, arsenate of lime, etc. Although a little early for the extensive use of Paris Green on plants and shrubs, there is also a good quantity of this product now selling. Quotations on all lines remain unchanged at revision earlier in the year.

PAINT PRODUCTS ARE IN ACTIVE SEASONAL DEMAND

Montreal.

General activity is reported in paint manufacturing circles, the weather in the past few weeks being ideal for painting purposes. "Generally satisfactory," and "working to capacity" are expressions given by manufacturers in describing present business. Mail and other rush orders are forming a good part of the present trade, such as was the case during the active period last year. The undertone of paint and white lead is fairly firm owing to both lead and oil being on a strong market, and raw materials in the manufacture of other lines are all said to be on a steady basis at the present time. There is still a certain amount of unsettlement of white lead in oil, but present activity is said to be offsetting any great effect this might have on the market for this product.

Toronto

TORONTO, May 18—The advance of five cents per gallon in local quotations on linseed oil provides the feature attraction in the current paint markets. This development, however, merely reflects the upward swing sonal increase in the movement of oil. sonal increase in the movement of oil. Turpentine prices continue at the higher level recorded last week, the undertone in this product showing no signs of immediate weakening, either on the domestic or primary centres. Locally, turpentine is still very scarce, and distributors have been unable to secure additional large shipments which would tend to offset this condition in the face of a restricted southern output with increasing demands. Until fresh receipts are on a larger scale, it is intimated that the present strength will likely hold. The movement of paints and varnishes is described as improving week by week, with added stimulus being given to this seasonal activity by the general adoption of the Clean Up, and Paint Up slogan in various districts. Although the season is yet early, an active trade is reported in distributing circles for insecticides, especially those required for earlier purposes.

UPWARD PRICE SWING CONTINUES IN LINSEED

Toronto

An advance of five cents per gallon is announced in the local prices on linseed oil, this change being a reflection

TORONTO MARKETS

(Continued from page 58)

of the firmer trend recently apparent in linseed markets. The present strong position of oil is attributed to the increased current demand coupled with the fact that flax seed prices are still on an upward trend. Altogether therefore, the linseed oil market is described as strong, with the movement at present being of a more satisfactory volume. Under the prevailing influence of the flax seed markets, indications point towards the present firm tone in oil being maintained. This upward swing in linseed quotations is primarily in sympathy with the advances in seed prices, supported by brighter seasonal trade relations. Following are the revised levels:

LINSEED OIL—	Per gallon Raw	Boiled
1 to 2 barrel lots	1 15	1 18
3 to 4 barrel lots	1 14	1 71
6 to 9 barrel lots	1 12	1 15

Less barrels, add 15 cents per gallon.

FIRM UNDERTONE STILL NOTED IN TURPENTINE

Toronto.

While local turpentine prices remain at the revision recorded last week, the firmer trend in these markets is generally continuing with present indications showing no signs of weakening. On practically all centres, turpentine is now reported as seasonably active, with the European market greatly assisting in developing the present firm undertone owing to heavier demands. Recent advices from the southern producing points are to the effect that considerable export business in this product is now apparent, and this element, coupled with the fact that the fresh receipts are very limited in quantity, contributing toward the evident scarcity. Local stocks are described by distributors as exceptionally low, and these conditions culminate in the prevailing situation, which it is stated, can hardly be relieved until new arrivals appear and a more extensive scale at both primary and local centres. Current prices follow:

TURPENTINE—	Imp. gal.
1 barrel lots	1 35
2 to 4 barrel lots	1 34
5 gallon lots	1 50

Less than 1 barrel lots—15 cents per gallon extra.

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

WHITE LEAD REFLECTS PRIMARY METAL TREND

Toronto

While no price developments have been announced on either dry lead or white lead in oil, the firmer tendency in the primary metal has undoubtedly stiffened the prevailing quotations on these lines. It is noted that dry lead prices are slightly advanced on southern markets, but domestic centres have not reflected this trend, other than in the general firmness previously noted. White lead in oil has experienced an improved demand during recent weeks, and with brisk activity in the paint industry, a seasonal demand is looked for throughout the summer months.

In 5-ton lots	12 45
In 1-ton lots	13 20
Less quantities	13 55

GROUPS SEASONABLE GOODS

(Continued from page 56)

Still other displays have centered about a wedding bell, bridal bouquet or "hope chest." In the store interior it is well to have such gift suggestions arranged together and decorated with white flowers. Plan to have the store known as the "gift shop" during the season for buying of presents, have the stock well polished, grouped and plainly price-marked with a wide range of selection. One store made a fortune by following this plan.

Hamilton Markets

HAMILTON, May 18.—The stronger tone in the steel industry, and firmer prices in other outside markets are now reflected locally when practically all lines of bar iron and steel are advanced in price.

Higher prices on these products at this time are not surprising as the stronger tendency in the market has been apparent for some weeks past and there is still a firm tone evident. Local producers and distributors state that the general better feeling continues in an encouraging way, and while steel consumption had only shown a moderate improvement up to the present, there is reason to believe that a gradual betterment in this direction will be in evidence during the ensuing months. Most recent reports from southern producing centres are to the effect that the industry is on a generally advanced scale of prices, with certain progress made in overcoming the coal strike. This factor is still discussed by local dealers, and while the outlook is a little brighter for the immediate future, if prolonged it may have a very direct bearing on the situation in the future.

Producer's Firm Position

The price of $5.60 base on galvanized sheets has now become generally adopted, due to the increased demand and tardy shipments of new supplies. This reflects the trend of the steel market, as referred to in the recent weeks, and also indicates the present firm position of producers, which is directly opposite to governing conditions some three or four months ago.

In southern quarters the steel market presents an appearance of great strength, with some anxious consumers importuning mills to accept orders, while the mills are accepting orders cautiously. A few of the independents have announced advanced prices.

The change in the steel market is due to psychological rather than physical influences. Buyers are alarmed, rather than short of steel. Fear that there will be a shortage of steel owing to the coal strike does not seem reasonable, for the iron and steel industry is fairly well stocked, and if there were a general and serious shortage of coal, this would interfere with the consumption of steel.

Pittsburg Markets

PITTSBURG, May 18.—On account of the possible effect of the coal strike upon the steel industry, the April report of the American Iron and Steel Institute, giving the output of steel ingots by the 30 companies that make monthly returns, was awaited with unusual interest. From the report it may now be computed that in April the production by the whole industry was at the rate of about 35,500,000 gross tons of ingots a year. March showed an average rate of 32,500,000 tons, the rate probably being about 30,000,000 tons at the beginning and 35,000,000 tons at the end of the month.

Thus, on the whole, production has increased since the coal strike began, even though the previous rate was a very high one, considering the general industrial and commercial situation, and that production in 1921 was only about 19,500,000 tons.

In the last analysis, however, the low production in 1921 is probably the best explanation of the high rate now. Buyers were liquidating stocks in 1921, while of late they have been replenishing stocks. It is hardly to be supposed that they are accumulating abnormally high or speculative stocks, but merely replenishing stocks, or bringing them up to normal working level. Even this would require quite a lot of steel. Production of steel decreased a trifle in certain districts in April, this being made up, with a margin to spare, by heavier production elsewhere.

The probability is that the rate has run between 36,000,000 and 37,000,000 tons a year right along since April 1. The present prospect is that production will increase somewhat in the next few weeks, although it usually falls off somewhat in July and August. Whether this year will furnish an exception remains to be seen.

Making Steel.—It is not easy for some of the companies to make steel just now, for with some of the usual sources of supply shut off by the strike, coal has to be moved unusual distances in some cases, and stocks are being drawn upon freely.

RAMSAY'S PAINTS
"THE RIGHT PAINT TO PAINT RIGHT"

A MOST satisfactory finish for either interior or exterior use, giving the surface to be finished a beautiful sheen and protecting it from decay.

It is durable, sanitary, easy to apply, and besides having splendid covering qualities it is a very economical paint to use.

Write for color cards and full particulars on our agency proposition.

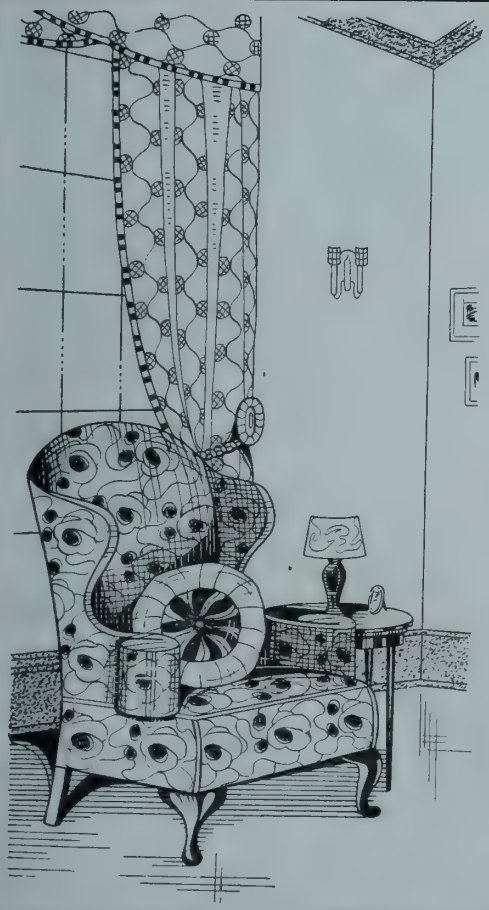
A Valuable Impression

A pleasing impression upon customers is of value. You can create one and at the same time save your goods from damage by spreading sheets of TANGLEFOOT in your show windows, especially over Sunday.

TANGLEFOOT will then be at work for you and will not only catch the flies, but attract the attention of people who pass your store to your efforts to keep your stock clean and fresh. For 1922 TANGLEFOOT has been considerably reduced in price.

Remember TANGLEFOOT *catches the germ as well as the fly, and that poisons, traps or powders cannot do it.*



Simply Mix With Water

There is no trouble—no difficult blending with Alabastine. Just mix the powder with hot or cold water and apply with a flat brush. One coat is sufficient to give a rich, soft tint. It dries quickly, leaves no brush marks and will not rub off.

Mix In Hot or Cold Water

Alabastine

Avoid imitations. There is only one Alabastine.

Each year Alabastine is used more and more. This year, 1922, is bigger than ever, partly because of our big advertising campaign and partly because of the new Opaline Effects that our salesman will tell you about.

Ask the Alabastine Salesman about color cards, window trims and other sales helps so you can get your share of 1922 business.

QUALITY OWL PRODUCTS

OWL ROOFING
REGISTERED TRADE MARK

Business is Booming

Just as we expected—Owl quality products are tremendously popular. Repeat orders are flowing in and not one complaint as yet recorded by customer or dealer. Owl quality products are dependable because the factory behind the product is modernly equipped and supervised by experts in this particular line of manufacture. If you have not ordered Owl quality products—do so now when big business is easy to get.

—The Quality and Value in Owl Roofing is Unsurpassed

Our Quality Roofings are waterproof and weatherproof. They are fire-resistant because no oils whatsoever are used to "thin out." The Asphalt Owl Roofing is made to suit Canadian climatic conditions and does not deteriorate in service. They give maximum service at minimum cost. Feature Owl quality products and you will be well repaid through increased business and assured satisfaction.

Write to-day for Samples and Prices

W. WALKER & SON, LIMITED

10-16 Alcorn Ave. TORONTO

Owl Roofing made in 1, 2, 3, 4, 5 ply. 108 sq. ft. to each roll. 32 in. wide. The fastest selling roofing on the market to-day.

—Owl Brand Asphalt Slates

Red or Green, size 9″x12¾″. Make an artistic, permanent, fadeless, weathertight, fire-resisting roof. **"They will not curl or crack."**

—Owl Brand "4 in 1"

Particularly economical — they require but one-quarter of the labor and only five nails to every eight used in laying individual slates. **"They will not curl or crack."** Surfaced in natural colors—red or green. No painting or staining required.

—Owl Brand Slate Surfaced Roofing

Slate surfaced in rolls 32x18″ wide. 108 sq. ft., 85-ft. roll. Nails, cement and instructions with each roll.

Now is the time to stock up with these easy-moving Barrett Specialties!

DON'T let these business-building products pass you by. Place your order *now* and begin at once to gather in the profits. If you haven't our latest Price List, a copy will be mailed on request.

These famous Barrett products are known all over the Dominion for their high quality and great economy. For years they have been the fastest selling specialties on the market.

This year we are continuing our aggressive advertising in leading farm publications and newspapers. The demand is bigger than ever.

These products will make money and build business for you, because they will save time and money for your customers. You can sell them with absolute confidence. They're made by Canada's oldest and largest manufacturer of roofings and industrial specialties.

For Roof Repairs

Plastic Elastigum Patching Cement. Has no equal for patching holes in all kinds of roofs, repairing leaky flashings, gutters, etc. Known as "The Plastic Cement of a Thousand Uses." Invaluable for general repair and waterproofing work. Sticks fast to either wet or dry surface. Easy to apply. Comes ready for use.

Liquid Elastigum. For coating all kinds of roofs. Gives new life to prepared and "rubber" roofings; protects metal roofing from rust and corrosion. A big money saver. An occasional coating adds years of service. Comes all ready to apply.

Everlastic Liquid Roofing Cement. Makes old prepared and "rubber" roofing almost as good as new. Seals up the small holes and gives a long-wearing new surface. Everlastic Roofing Cement has about the consistency of thick molasses—it is *not* a roof paint. Comes all ready for use. Dries quickly into a smooth jet black surface.

Protective Paint

Everjet Elastic Carbon Paint. A high quality, inexpensive protective paint for all exposed metal and wood surfaces. Just the thing for farm implements. Waterproof, acid-proof, weatherproof. Wears stubbornly under all conditions.

Fly-Oil and Cow Spray

Creonoid. An effective, economical fly-oil, lice-destroyer and cow spray. A big favorite with Canadian farmers and dairymen because it is safe and easy to use, and gives unfailing results.

Had you sold this brush 18 years ago

you would have profited by the satisfied customer boosting for your store. You, however, can start to-day selling Meakins Brushes.

N.B.—This brush has been used daily by Mason & Risch and has been used on over 20,000 pianos in that time.

Meakins & Sons
Limited
Hamilton, Ontario

Branches:

Winnipeg London Toronto Montreal Vancouver
Pilkington Bros., Calgary, Alta.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

"EVERLASTING"

Veneer Toilet Seat—Strong, Clean, Hygienic

7- and 9-ply, air-seasoned wood veneer, held together by our special wood cement. This cement is proof against heat, cold or dampness. The veneering is distributed according to the strain and wear required of the different parts. The Everlasting Seat will never crack, warp or split.
We also manufacture five staple lines of Veneer Chair Seats, round-cornered, and durably finished in coach varnish.

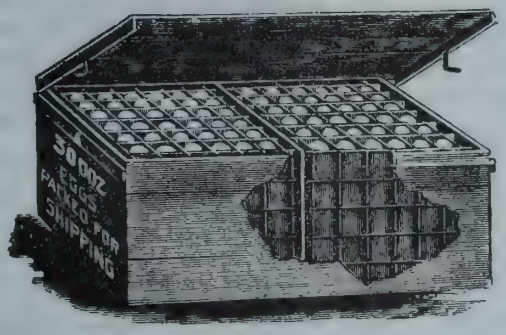
Egg Shells are Porous



And unless the fillers are fresh and clean the eggs will invariably become tainted before they reach the market.

Fillers absorb the odors from eggs and fresh fillers should be used.

Recommend fresh fillers for each shipment—it will more than pay your customers.

The Audit Bureau of Circulations has helped build a reputation for

Hardware and Metal.

It is reported that a few years ago half the money expended on advertising was wasted.
Six years ago space was bought by guesswork. Now it is bought with a definite knowledge of circulation—how many copies are printed, how they are distributed, how many paid for and how many given away.
The advertiser who does not protect himself by asking to see the A.B.C. reports of the publications he uses is reactionary and invites a return to the wasteful methods of former years.
Be on the safe side. HARDWARE AND METAL is a member of the A.B.C. Its advertisers are fully protected.

MANUFACTURING PLANT FOR SALE

Grand opportunity for successful enterprise and ready sale for output. Self-contained plant including Machine Shop, Foundry and Wood-working. Well equipped for manufacturing, light and medium weight machinery. Building for employees and about ninety acres of land. Rail and water connections. First class connections already made for sale of good line of Machinery and Tools, which plant is well equipped to turn out. A good supply of partially manufactured stock on hand. Further information will be supplied by application to Thomas Bell, Pugsley Bldg., Saint John N. B., or the Thompson Machinery Co., Limited, Grand Bay, Kings County, N.B.

MISCELLANEOUS

NICKEL PLATING — ORDERS EXECUTED promptly. Prices on application. Communicate with F. W. Higginson, 173 William St., Montreal. Telephone Main 8144.

Look through these you may find what you want

Quick Results

If you want to buy or sell a business, dispose of overstocks, hire a clerk or manager, use the "Wanted" page of HARDWARE AND METAL. There is no other way in which you can get in touch, more quickly or thoroughly with the best prospects, than by using the "Wanted" page of HARDWARE AND METAL. Cost is only two cents per word, with 10c additional for Box Number.

Practically all big buyers of hardware in Canada are readers of HARDWARE AND METAL

HARDWARE & METAL is the only weekly hardware paper in Canada and is read by practically every worthwhile buyer, both wholesale and retail, in Canada. HARDWARE & METAL is the logical medium to use if you have a message for the Canadian hardware trade.

TRADE MARKS

Any trade-mark shown on this page, when stamped on an article of hardware, is the manufacturer's personal "O.K.," guaranteeing the quality of the product.

Metal Stamping and Press Work to Order

Also name plates, embossed trade checks, time checks, badges, steel stamps and stencils or anything in steel or brass lettered or embossed to order.

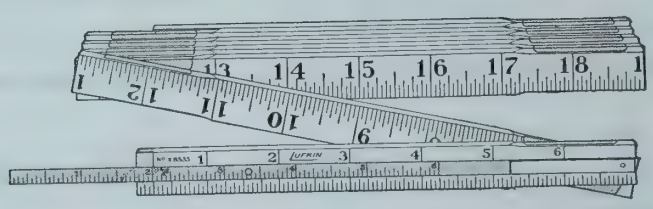
BEST RULE MADE FOR GENERAL MEASURING.

LUFKIN Boxwood Extension Rule
No. X.-8536-6 Ft.

More durable than ordinary spring-joint rules.
Longer than common boxwood rules.

Perfectly designed for taking inside measurements of door and window frames, boilers, etc., and such other measurements as are difficult to take with the ordinary folding rule. Just as convenient as a common rule for taking all other measurements.

Two Rules in One. Read the Pictures.



Has graduated brass slide, locked so it cannot fall out. Open rule to within 6 inches or less of distance, extend brass slide, and you have exact inside distance between points. Rule measures just like an ordinary Spring Joint, when slide is not extended. Made of extra heavy genuine boxwood. Firm yet smooth working spring joints. Extra legible markings.

Appeals to every mechanic, so should be stocked by every hardware

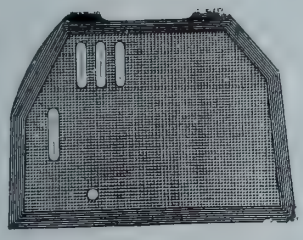
"GUTTA PERCHA" ACCESSORIES



Coupe Mat

Good displays of these useful mats quickly lead to paying sales. There is a real need for them, and, consequently, an active demand. Let motorists know you have them — the sales follow quickly.

Blow-out Patch

A smooth lining and feather-edged ends prevent chafing and pinching the tube. These two important selling points are among the many that close sales easily for hardwaremen everywhere with these reliable Blowout Patches. This handy appliance takes care of the "blow-out," "soft-spot" or "rim-cut" until time permits permanent repairs.

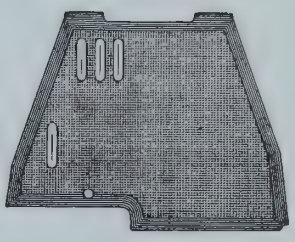
Windproof and Heatproof Mats for Ford Cars

You know well the great money-making value of auto accessories in the hardware business. We don't need to talk to you about that, but we do want you to realize the real merit in the Gutta Percha line of accessories. The most practical, convincing test we know of is to place a good order and learn how they sell by selling them. Your cash register will tell!

Gutta Percha & Rubber, Limited

Head Offices and Factories, Toronto

Branches in All Leading Cities of Canada



Sedan Mat

The Sedan Mat is shown here. These comfort-giving mats are supplied in designs for Ford Coupe, Sedan and Touring Car. They fit closely around the brake and clutch levers, preventing dust, heat and odors entering from below.

Sealtite Patch

Sealtite Patches in the car supply the motorist with confidence and eliminate the anxiety that so often spoils the pleasure of motoring. They are quick and easy to apply and require no tools but your two hands. Try them on your own tires and you will thereafter sell them with enthusiasm.

45 Salesmen

Such as these are bringing to merchants all over Canada the opportunity of increasing business and profits through

DAYTON SCALES

Space prohibits the inclusion of our full sales staff on this page, but those whose photographs are shown herewith are typical of our Dominion-wide organization.
We felt that merchants would be interested in our Salesman's Pledge, which is taken when he is allotted a territory. Here it is:

Our Salesman's Pledge

1. To tell the Truth, and nothing but the Truth.
2. To respect his competitors as he would be respected himself.
3. To sell the merchant what will best fit his requirements.
4. To treat all merchants in his territory exactly alike.
5. To see that each merchant has real service.
6. To respect the Government Inspector, his rulings and judgment.
7. To adhere to the Company's policy of one price to all.
8. To make an honest and equitable allowance for any machine exchanged.
9. To carry no other lines and represent no other company.
10. To have no understandings with the merchant except it be embodied in the order which the merchant signs.
11. To remit promptly to the Company all collections received.
12. To render the Company daily reports of each visit made.
13. To see that each customer in his territory gets a square deal.
14. To be clean mentally, morally, physically, commercially and socially, and to stay clean.

Canada's Favorite

"Save the surface and you save all" Paint & Varnish

CANADA PAINT
For Home and Country

The Paint for Canadians—the Paint Your Customers Know—the Paint that Sells.

Both beauty and durability are positively assured in every can of Canada Paint—the Paint of Merit.

The ingredients from which it is made, and the way it is made, guarantee that. The mere fact that "Elephant" Brand Genuine White Lead is the pigment basis is an assurance of paint quality. Add to this the exacting skill and the scientific care exercised in the manufacturing process, and it will readily be seen why Canada Paint is Canada's Favorite.

The six convenient factory and distributing points indicated on above map insure prompt service to our dealers at all times.

Our agency proposition will interest you. May we write you about it?

Those June Wedding-Bells Mean More Dollars for You

Those June wedding-bells hold mighty big opportunities for you, Mr. Hardware Merchant! Every bride needs kitchen ware. Among her gifts there are sure to be some pieces of Diamond Ware or Pearl Ware. To these she must add more and more utensils until her set is complete.

She cannot buy Diamond Ware or Pearl Ware from door-to-door peddlers—she must buy it over the counter.

Will she buy it over *your* counter? She will, if you tell her *you* sell Diamond Ware *or* Pearl Ware.

Follow up those local announcements of engagements and weddings with cards or circulars, window and counter displays. Advertise in your local paper, and tie up for all you're worth to our bride advertisements which are appearing in the best newspapers all over Canada.

Play up all the selling points of Diamond Ware or Pearl Ware when showing it to the bride, or the bride-to-be, and you will certainly win the opportunity of furnishing many new kitchens. Go after the bride season strong now, and follow it up just as hard in the months to come.

'RICE LEWIS' NEWS

Are you Getting the Golf Business?

If you are not, you are overlooking an opportunity that means many extra dollars for you. Enthusiasm in this sport is running high. New clubs are being opened up continually and you should lose no time in cultivating this trade. Why not get the clubs in your own vicinity to make your store, their headquarters for supplies.

Have the stock, display these winners prominently and you will attract golf business from all around you.

We have a very complete stock of everything you will need.

IN GOLF BALLS—We have a real leader in a good practice ball—**THE BOBEST** ball, made in Glasgow, @ $3.60 a dozen.

IN GOLF CLUBS—We have been fortunate in securing the output of an English factory of golf clubs at a price considerably below any price quoted in the past few years. We can supply this club in the driver, brassie, midiron, mashie and putter @ $2.60 each.

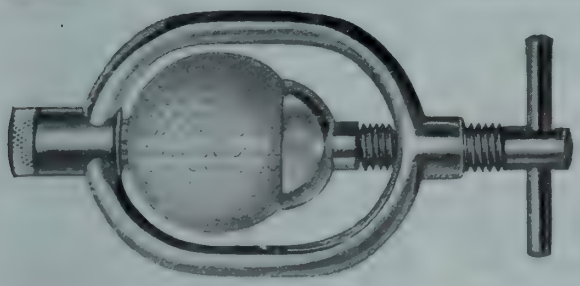
Write us for quotations on our high-class golf clubs. We carry the R. Forgan and J. P. Cochrane lines.

IN GOLF BAGS—Our Sunday bag is a 4″ bag, brown canvas, leatherette trimmed, iron ring with a good substantial canvas strap and a good size golf ball pocket @ $1.10 each.

OUR PANTASOTE SCOTCH GOLF BAG, 5″, leather trimmed, is exceptional value @ $2.35.

Our other bags run in prices up to $15.

In our golf department, you will find the Captive Golf Ball, the Thistledown (woollen) practice golf ball, golf shoes, shoe calks (both in rubber and steel), golf ball enamel, golf ball tees, golf stockings, game of clock golf, etc.



THE FISHER GOLF BALL MARKER answers the cry of the golfer for some way in which he can identify his own golf balls. Each marker is supplied with three initials. It has just been placed on the market and is going to be a real seller. Every golfer in Canada should have one of these @ $1.50 each.

Staple Engine Food

Why Gargoyle Mobiloil Brings Good Profits to Hardware Merchants

Hardware merchants carry at least three thousand separate items in stock. Many of these items sell slowly.

Gargoyle Mobiloil can be compared to staple grocery foods. *People need them continually.*

This explains why so many hardware merchants find Gargoyle Mobiloil a desirable addition to their stock.

Again, hardware merchants find that the Gargoyle flange sign outside their store, and cans of Gargoyle Mobiloil in their window bring them many dollars of profit from passing automobilists.

The most inexperienced clerk can sell Gargoyle Mobiloil efficiently by the Chart.

A man comes into your store to buy oil. You simply ask him the make of his machine, whether automobile, truck, tractor or motor-cycle, and run your finger down the Chart. It specifies exactly what grade of Gargoyle Mobiloil his machine requires to operate with greatest efficiency.

Are you using your flange sign and cans of Gargoyle Mobiloil in your window to catch passing trade?

Car owners know the advantage of Scientific Lubrication. They have faith in the Chart of Recommendations.

GARGOYLE

Mobiloil

Make the chart your guide

Is the Chart showing your customers that you are competent to sell "a grade for each type of motor?"

IMPERIAL OIL LIMITED

Manufacturers and Marketers of Imperial Polarine Motor Oils and Marketers in Canada of Gargoyle Mobiloil.

T-3179

Chart of Recommendations

(Abbreviated Edition)

THE correct grades of Gargoyle Mobiloil for engine lubrication of both passenger and commercial cars are specified in the Chart below.

How to Read the Chart: A means Gargoyle Mobiloil "A" · B means Gargoyle Mobiloil "B" · BB means Gargoyle Mobiloil "BB" · E means Gargoyle Mobiloil "E" · Arc means Gargoyle Mobiloil Arctic

Where different grades are recommended for summer and winter use, the winter recommendation should be followed during the entire period when freezing temperatures may be experienced.

This Chart of Recommendations is compiled by the Vacuum Oil Company's Board of Automotive Engineers, and represents our professional advice on correct automobile lubrication.

I-XL RAZORS

GEO. WOSTENHOLM & SON, LTD.

SHEFFIELD, ENGLAND

Makers of High Grade Cutlery Since 1694

No. 2000

PEERLESS

The Peerless is without doubt the finest razor on the market to-day. Covering every requirement of the man who shaves himself, as well as the professional barber.

No. 1000

CONQUEROR

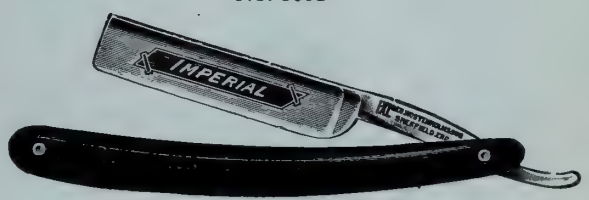
The Conqueror is a high grade razor, fully concaved blade, with gold etching, double shoulder and gimped tang.

No. 5000

CANUCK

The Canuck is a semi-hollow ground razor designed for the man who is not efficient in stropping.

No. 5001



IMPERIAL

The Imperial is possibly the best value in our assortment, being built for price rather than appearance.

A complete assortment of Wostenholm Cutlery may be had from any reliable wholesale house throughout Canada.

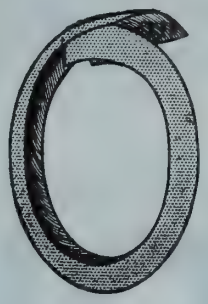
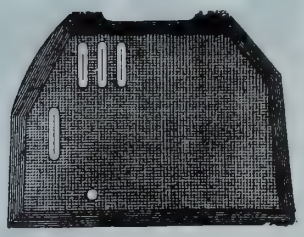
Motor Season Is Here!

"GUTTA PERCHA"

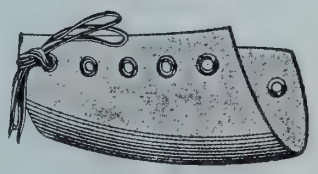
Accessories Will Boost Your Summer Sales



Reliners



Wind and Heatproof Mats for Fords



Lace-On Boots

Sealtite Patches

RELINERS. There are good, steady sales for these quickly applied trouble-savers. Show your customers how they get the last miles and dollars out of the casing. This effective reliner protects weak spots and postpones the evil of the blow-out.

WINDPROOF MATS. These effectively prevent dust, odors and heat from coming through from below. They fit tight around the clutch and brake levers and add much to the comfort of driving a Ford. They are made in shapes for Sedan, Coupe or Touring Car.

LACE-ON BOOTS. These appeal to the motorist because they fill the real need for "first-aid" to tires by preventing cuts or breaks from extending further before repairs can be made. Fitted with heavy brass grommets and a sturdy leather lace.

SEALTITE PATCHES. Here you sell the customer "insurance" against the anxiety that spoils the pleasure of driving. With Sealtite Patches "on board" the motorist is confident. He knows he can repair a puncture almost instantly, with no tools but his hands.

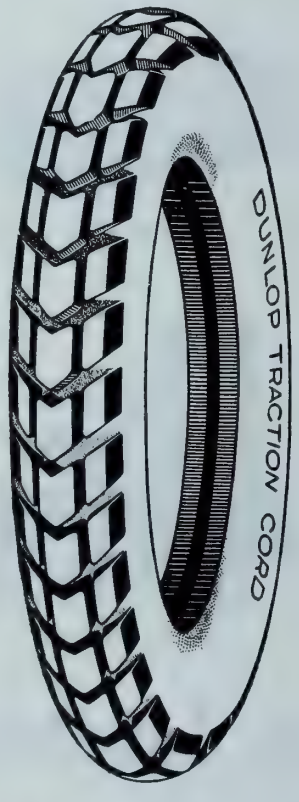
DUNLOP

CORD TIRES FABRIC

Dunlop Mile-age



"MILEAGE" is the magic word in Tiredom these days, and Dunlop Tires right across the continent are rolling up record after record.

To think about a 5,000-mile Tire is to live in the past; to talk about a 10,000-mile Tire is to be "just ordinary;" to dwell on a 15,000, 20,000, 25,000 mile Tire is to get into that rubber sphere where Dunlop is pre-eminently the leader.

Ask for Dunlop Cord and specify "Traction." Then you are on your way to a new experience.

Westinghouse

Trouble-Proof Washing Machine Motor

Washing Machines Driven by Westinghouse Trouble-Proof Motors are Easy to Sell

To-day you will find it easiest to sell washing machines driven by Westinghouse Trouble-Proof Motors. They supplement the good qualities of the machine.
The housewife now realizes that the success of an electric washing machine is measured by the reliability of the motor that operates it. Tell her it has a Westinghouse Trouble-Proof Motor and she is satisfied.
Remind her that she is buying not only for to-day, but for the future as well, for next year and the years to come. Sell her years of faithful service.

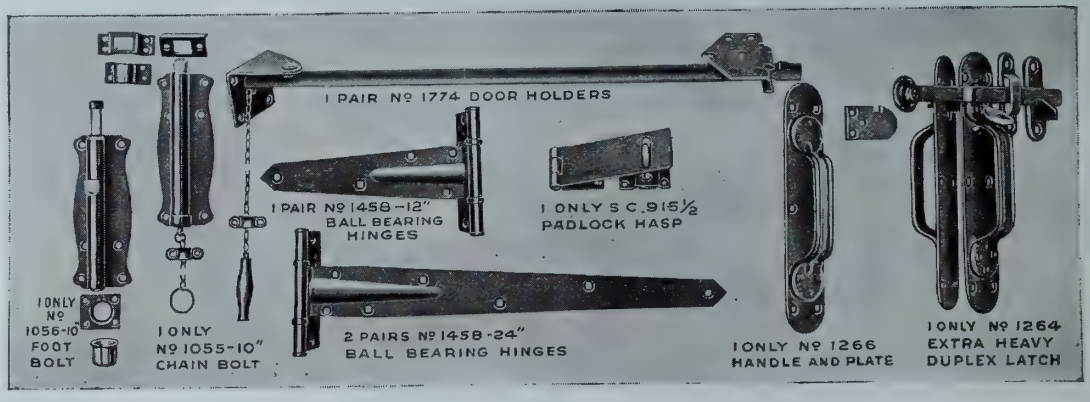
STANLEY

Garage Hardware

Set No. 1784



A set designed for either wood, stucco or brick garages. Extremely popular, embracing every article of hardware for complete garage equipment. No. 1774 Door Holder is included in this set, also foot and chain bolts. The new cushion type holder No. 1773 may be substituted at additional cost if desired.

Uniformly good hardware equipment is the finishing touch that makes a 100% garage. Stanley Garage Hardware **in sets** solves the problem of owner—or builder—and its sale is highly profitable to you.

The strength, lasting service and dignified appearance of Stanley Garage Hardware are talking points to capitalize. And its reputation is based upon over three-quarters of a century's experience of this Company as manufacturers of wrought steel hardware.

Write for handsome Garage Hardware cut-out, sales helps and Booklet R-11.

DOMSTEEL

NAIL KEGS

will stand abuse

Drop them–Bump them–

give them any kind of abuse you can think of. You will find that "Domsteel" Nail Kegs withstand the roughest kind of handling in transportation—in the warehouse or in the store. There is no danger of their breaking open and spilling the contents.

It's the steel cleat and rim that give "Domsteel" Nail Kegs their added strength. Just a little feature developed by "Domsteel" to improve the handling and stocking of nails—a feature which all hardware dealers will appreciate. Specify "Domsteel"—the perfect nails in the perfect kegs.

A Perfect Nail and a Perfect Keg

Stocked at Sydney, St. John, Montreal, and ready for immediate shipment.

"GOLD MEDAL" FOLDING FURNITURE

TRADE MARK REG. U.S. PAT. OFF.

Profits in Summer Comfort

Roadside and lake-shore camps; forest-locked or mountain-rimmed lodges; trim pleasure cruisers plying vacation-land waters and every summer home—every shady porch—each of these represents prospective sales of Gold Medal folding furniture. Folding easy chairs, lawn chairs, folding cots, wash basins—and the many other practical utility items in the Gold Medal line will appeal to every red-blooded man, woman and child who feels the urge of outdoors, and relishes comfort and cleanliness.

Now, as we stand in the forefront of summer, is the time to begin acquainting your customers with the merits and diversity of the Gold Medal line of folding furniture. If you are not already selling this well and favorably known line, get our catalog, which illustrates every article of our manufacture, and make up a Gold Medal selection to meet the demands of your summer trade. All inquiries from our national advertising are referred to our dealers. Send us your jobber's name.

A Quick Selling Item that needs no introduction

Hundreds of merchants have ordered this handsome, wooden display cabinet.

1. It is absolutely free.
2. You merely pay for the Blue Nose Oak Sole leather strips it contains—and buy refills.
3. They cut more economically and last longer than cut soles.
4. Blue Nose strips are cut from the best part of the finest packer steer hides.
5. Slow cured in the old-fashioned way.
6. Very profitable for dealers.

Remington

Speeds them up!

A SALES talk to a customer goes much better if you have something new to talk about—'specially if the cartridges you are selling really are a big improvement over the regular line.

You can make a hit with your sportsmen customers who own rifles caliber .25 Remington, .25-35, .30-30, or the .30 Springfield '06, by talking and selling the new Remington Hi-Speed loads. They will give him what he has always wanted—higher velocity, better killing power and greater range without changing the sight.

Cut out this table of ballistics and keep it handy so you can answer questions:

	Weight of Bullet	Velocity	Energy	Height of 200 yard trajectory
.25 Remington . . .	87 grs.	2800 ft. per sec.	1510 ft. lbs.	2.8 inches
.25-35 W. C. F. . . .	87 grs.	2650 ft. per sec.	1360 ft. lbs.	3.1 inches
.30-30 W. C. F. . . .	110 grs.	2600 ft. per sec.	1650 ft. lbs.	3.3 inches
.30 Springfield . . .	150 grs.	2900 ft. per sec.	2800 ft. lbs.	2.5 inches
(Bronze Point Expanding)				

Accuracy as good or better than the regular loads. Price the same. In ordering, specify Hi-speed loads.

SOUVENIR SUPERHEATER

THE MOST MARVELLOUS ACHIEVEMENT OF STOVE BUILDING IN THE LAST FIFTY YEARS

LOOKS LIKE A MAHOGANY CABINET BUT IT'S A REAL FURNACE--CAN BE PLACED IN BEST ROOM

WHO'S GOING TO HANDLE IT IN YOUR TOWN— YOU OR YOUR COMPETITOR?

We are only going to appoint one agent in each town—so if you are to be the lucky dealer you should waste no time. The SOUVENIR SUPERHEATER is the only thing of its kind in Canada. It's entirely new—the latest system of heating—it sells itself and affords real good profit.

There's no doubt about the rushing business that's going to be done by the dealer who handles the new SOUVENIR SUPERHEATER. And remember, there will only be one agent in your town. Some dealer in your town is going to get the agency and that someone is going to make a lot of money, too.

If you order one of these heaters now and display it in your store you will develop many prospects that will result in sales next fall. And we'll help you get the orders.

We will mail attractive, descriptive folders to your customers with your name and address imprinted on them. We shall be advertising the SOUVENIR SUPERHEATER extensively too.

If you want the agency in your town write us at once for prices and descriptive circular or ask us to send a representative to see you.

Rotary Ash Sifters

THE Davidson Rotary Sifter is easily the most satisfactory on the market today.

In addition to being very handy and easy to use it is very strongly made. The sifter, which can be sold separately if desired, is of heavy galvanized ware throughout. The Ash Can is reinforced top and bottom with heavy iron rings to add extra strength.

The complete Sifter and Ash Can makes a very useful and highly economical addition to the average household.

Mechanics Have Been Waiting For These Little Rules

No. 423 Set of Starrett Steel Rules with Holder. Consists of five spring tempered rules ¼, ⅜, ½, ¾ and 1-inch lengths, graduated to 32nds and 64ths.

Mounted in the holder, as shown in illustration, these little rules enable the machinist to readily and accurately measure recesses, grooves, short shoulders, etc., difficult or impossible to effectively reach with an ordinary rule.

These rules meet a definite need long felt by many classes of mechanics. In your windows or show cases they will quickly prove a profitable business getter.

TRADE FRAIM MARK

No. 1730 Carded Assortment.

Spring Buying

The householder is planning repairs, the farmer is mending his tools, the carpenter is figuring on new jobs—they all want new padlocks for the tool-house, the chicken-yard, the barn, the shop, the garage. Are you prepared to sell them what they want? Have you a padlock assortment that is complete, compact and up-to-date?

Fraim's Carded Assortments

give you quick, easy sales and good profits. There are a dozen locks on each card, and twenty-five different listed assortments. Any of our locks can be supplied on these cards at a slight additional cost.

Write for our No. 29 catalog, in which these carded assortments are illustrated, or our catalog No. 28, showing complete line of Fraim Padlocks and Night Latches.

Order through your jobber or direct from us, with your jobber's name.

REG. U.S. PAT. OFF.
GTD

WRENCH BEATS U. S. GOV'T TESTS BY 45.6%

ISN'T THAT THE SORT OF A PIPE WRENCH TO SELL?

The wrench you see here is the 14 in. size. Instead of a pressure of 2800 inch pounds, this wrench withstands 4077. Some Wrench!

Note how the reinforcement in jaw extends below bending point. The lower jaw and handle is one solid forging—no welding. The wood handle has a steel ferrule on the end to keep it from splitting. The nut rests on a shoulder of the lower jaw, so there is no undue strain on the pivot pin.

GTD wrenches are made by the makers of "Little Giant" Screw Plates.

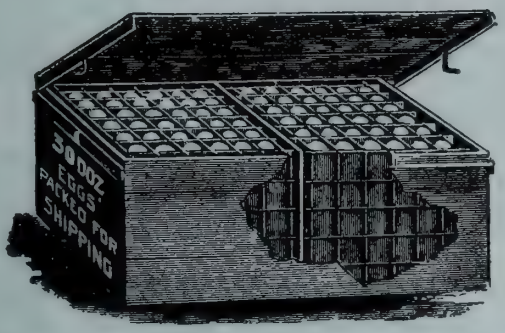
You Should Increase
Your Egg Filler Business



Always recommend fresh fillers be used for every shipment—it's the only way your customers can be sure the eggs will reach the market in proper condition.

Used fillers absorb the odor given off by new-laid eggs—and egg shells are porous, susceptible to surrounding odors. Eggs shipped in used fillers become tainted—can't help but be.

You owe it to your customers—and the public—to see that they use fresh fillers in every shipment.

ORDERS

IS the machinery you have been using for the past 3 or 4 years to get orders—is it getting rusty?

Are you satisfied you have the harmony in your organization that you should have?

Do you feel that your salesmen are fighting every inch of the way for business and as happy in their work as you would like to see them?

Is there the proper co-operative fighting spirit?

The Fault May be Yours?

Your salesmen, and wholesalers who help sell your goods, have a right to expect co-operation. They have a right to expect that the house they are selling for really believes that good business is to be secured. They have a right to question if the whole responsibility of selling should be placed on them. Advertising is the strongest co-operation you can give them to show that you believe in your business. Powerful copy consistently running in your dealers' specialized business paper, will stimulate dealers' interest in your goods; will encourage the salesman in his work; will help to make him a fighter, —and to sell more goods. And you know when you can get the influence of the progressive dealer behind your goods you have the biggest merchandising force in the country working for you.

Let HARDWARE AND METAL help you get the fighting spirit in your sales organization and help you line up 4,000 progressive merchants behind your goods.

THE PREMIER

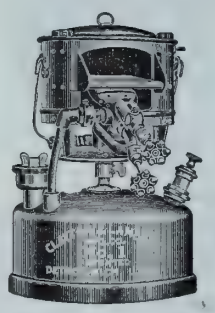
One of the famous "Maple Leaf" Saws.

The favorite in the Mills, the Factories and the workshops.

Made-in-Canada by

Shurly-Dietrich Co.,
LIMITED
GALT CANADA

When booking your order for saws with your wholesaler do not fail to include a good supply of Premier Maple Leaf Saws.



No. 1 Fire Pot, List Price, Each $27.20. Ask for Discount.

WHY BOTHER WITH SHARP NEEDLE BURNERS

Their life is short if the Needle is forced, enlarging the orifice, thus causing an imperfect gas mixture. Not so with C. & L. Double Needle Burners, used on the No. 1 Fire Pots, as **both Needles are blunt.** Upper Needle has wire tip that cleans orifice in Jet Block, lower Needle regulates the flame. The best general utility Fire Pot made, producing 300 degrees more heat. Burns gasoline or kerosene. Jobbers supply at factory prices. Catalogue mailed upon request.

Do You Know

That in case of loss you receive your dividend just the same?

In case of total loss we pay the full dividend immediately.

In case of partial loss the policy runs till expiration for the unused portion and the dividend is paid on the premium charged. A loss less than one half the face of the policy is construed as a partial loss.

In both cases you are purchasing your fire insurance from a strong company at one half the price of the Board Companies.

We know the hardware men appreciate the SAFETY and SAVING offered by the HARDWARE MUTUALS. Increased business is the indication. In the first five months of 1922 the premiums written exceeded the entire year of 1921.

Inspected risks—economical management—ample resources—maximum savings—low loss ratio—is the hand we hold. ARE YOU IN?

BUILDING IS BOOMING THROUGHOUT CANADA

Are you selling your share of Decorative Wall Burlaps?

Do not delay putting in a stock of Decorative Wall Burlaps. Buy half a dozen rolls. It will not take much capital, and display them in your regular Paint Department.

Hardware merchants are finding it most profitable to handle Decorative Wall Burlaps, for now that the prices have declined, Burlap is selling much more readily. Burlap, too, is easy to handle, for it does not take up much space and a large stock is not necessary, for it comes in 3 shades only. Burlaps, too, allow the merchant a good margin of profit.

Now that building is so active, the demand for Burlaps will automatically increase.

Write us for selling helps, complete information as to prices, etc.

Important Changes In Taxes and Tariff

Sales Tax Increased to Total of 4½% on Transaction From Manufacturer to Jobber to Retailer and 6% on Imported Goods —Tariff Reduced on Wrought Iron Tubing, Tools, Enamelled Ware, Gasoline, Harness, Certain Manila Rope, Clothes Wringers, etc.—Marking Imports Regulations Cancelled

A number of changes of importance to the retail hardware trade of Canada, are made in connection with taxation and the tariff as outlined in the Budget presented by the Minister of Finance late this week. These changes are briefly enumerated elsewhere.

One of the most important changes is that of increasing the sales tax by 50 per cent. Formerly the tax on the sale by the manufacturer selling to the jobber was 1½ per cent. and on the sale by the jobber to the retailer 1½ per cent. making a total of 3 per cent. The new total tax will be 4½ per cent. or 2¼ per cent. on each of the two transactions. Formerly the tax on the sale of imported goods by the manufacturer to the jobber was 2 per cent. and now it is 3 per cent. The same applies on the sale from the jobber to the retailer making a total of 6 per cent. sales tax collected on imported goods before they reach the retailer. Under last year's Sales Tax the amount of $72,000,000 was secured.

E. M. Trowern, secretary Dominion Board of the Retail Merchants' Association, states that the association has received the increase in the sales tax favorably as a means of giving the government needed revenue. If confined to legitimate wholesalers and manufacturers and retailers not considered as manufacturers or wholesalers there would be no objection to the tax. Under the new increase the retail price to the consumer would have to be increased but in some cases it might work some hardship on the trade who have found it necessary to absorb part of this tax.

Prefer Straight Tax of 5 Per Cent

Early comment on the sales tax changes indicates that some wholesalers object to the difficulty of figuring the odd percentage of tax, they preferring to have it a straight 5 per cent. than the 4½ per cent. which will now be collected. A number of retailers interviewed expressed satisfaction with the principle of the sales tax, and were pleased that there had been no revival of any form of the luxury tax.

Reviewing the Budget speech generally, it is evident that there are reductions in duties on 50 articles, these varying from 12½ per cent. to 2½ per cent. There is only one increase, that of tobacco products. One of the outstanding features is the increase in the British preferential tariff on many articles giving some advantage to

Tax and Tariff Changes Affecting Hardware Trade

TAXATION CHANGES

Sales tax increased by 50 per cent.

Passenger automobiles 5 per cent. up to $1,200; 10 per cent. above $1,200.

Cheques, 2 cents up to $50; 2 cents on each additional $50.

Insurance, 5 per cent. on premiums paid unlicensed companies.

Telegrams and cables increased from 1 cent to 5 cents.

TARIFF CHANGES

Wrought iron tubing four inches and under in diameter is reduced 5 per cent. under both preferential and general tariffs. Tubing over four inches and not over ten inches is reduced 5 per cent. under the preferential tariff.

Tools are reduced 5 per cent. under the preferential tariff.

Harness is reduced 2½ per cent. under preferential tariff.

Dairy tin hollow-ware and cans for milk and cream reduced 2½ per cent. under preferential tariff and 5 per cent. general tariff.

Porcelain parts of pumps reduced from 20 per cent. preferential and 30 per cent. general tariff to free under all tariffs.

Gasoline over .725 specific gravity and not exceeding .750 is reduced from 2½ cents per gallon to 1 cent under general tariff.

Manila rope not exceeding 1½ inches in circumference is free of duty to all fisheries (at present free to lobster fisheries only).

Enameled ware. Reduced 2½ per cent. under preferential tariff.

Clothes wringers. 2½ reduction under both tariffs.

EXEMPTIONS

Articles exempt from Sales Tax have been increased and include the following: Manila fibre for use in manufacture of rope not exceeding 1½ inches in circumference for the fisheries; boats, bona fide purchased by fishermen for personal use in fisheries; materials for manufacture of boats for fisheries; fibre for use in manufacture of binder twine; fish hooks, lines, marlins, etc., for fisheries industry not including hooks, lines or nets commonly used by sportsmen.

MARKING OF IMPORTS

Regulation of those dealing with depreciated currency and those dealing with valuation of goods for duty have been cancelled.

other parts of the British Empire on such articles as tools, wrought iron tubing, harness, enameled ware. There are reductions in the general tariff on 16 articles.

In cancelling the Marking Act, Valuation of Goods Act and the Depreciated Currency Act the Minister of Finance explained that there had been much deception under these, particularly that dealing with the depreciated currency and that they did not accomplish the purpose for which they were intended. He stated that much good Canadian money has found its way to Holland and other countries through which importation into Canada has been made of these articles which would have been chiefly affected by such legislation. Boards of trade have been urging for some time that the depreciated currency regulations should be abandoned. Critics point out that with the value of the German mark at one-third of one cent as against a pre-war value of 24 cents and no regulations other than a general tariff in the way, that Canada is open to a flood of German merchandise.

"The regulations have denied the Canadian merchant the opportunity of doing direct trade and in obliging him to pay tribute to somebody else," said Mr. Fielding in regard to the effect of the foregoing regulations.

What Stamp Tax Brings

In placing a tax of 5 per cent. on automobiles up to $1,200 and 10 per cent. over that amount the idea has been to collect this tax according to the buyer's ability to pay. Cheques will require a 2 cent stamp if for amounts up to $50 and an additional 2 cents taxation will be required on each additional $50. The total clearings of Canadian banks last year exceeded $16,000,000,000 on which basis the tax would be about $6,400,000. The majority of cheques are below $50 so that the new tax will fall chiefly on big business. In a deal involving a cheque of $10,000 for instance the stamp tax would be $14 under the new provision. Bankers express the opinion that the new tax will tend to discourage payment of bills by cheques. Telegrams and cables which have been paying tax of 1 cent will have to pay five cents, and a 5 per cent. tax on premiums paid on insurance to unlicensed companies will be collected.

Wrought Iron Tubing

Among the tariff changes of interest to the hardware trade is wrought iron tubing which, in sizes four inches and under in diameter is reduced 5 per cent. under both tariffs while tubing over four inches and not over ten inches is reduced 5 per cent. under the preferential tariff with Britain only. This latter means a reduction in the tariff with Britain on wrought iron tubing over four inches and under ten inches of from 20 per cent. to 15 per cent. As to the effect this may have on the source of Canada's trade may be judged by figures of imports for eleven months ending February 1922 which show trade in wrought iron tubing 4 inches or less in diameter with the United Kingdom of $2,252 while that of the United States was $195,414. Approximately the same proportions also existed in the other sizes of tubing.

Tools

Tools are reduced 5 per cent. under the British preferential tariff. In this connection it is noted that imports for eleven months ending February 1922 are as follows:—From United Kingdom, $49,984; from United States, $706,228; Germany, $8,685; Sweden, $6,359. Total imports $773,136. It is evident that the idea is to give British trade some little advantage in view of the big proportion of business in this line now being done with other countries.

Reduction in Gasoline

A reduction is made in the tariff on gasoline over .725 specific gravity and not exceeding .750 from 2½ cents per gallon to 1 cent per gallon under the general tariff. In the eleven months ending February 1922 Canada imported gasoline over .725 specific gravity to the extent of 13,476,950 gallons valued at $2,511,520 from the United States. Combined with imports from Mexico and Peru imports of this grade of gasoline, as affected by the regulations, totalled 20,586,826 gallons valued at $3,240,405. Imports of gasoline under .750 specific gravity and not affected by the change were valued at $4,506,495.

Manila Rope

Manila rope which formerly was free from duty for use in traps for the lobster fisheries is now made free in sizes not exceeding 1½ inches in circumference for use in all fisheries.

Enameled Ware

Enameled ware is reduced 2½ per cent. under the preferential tariff which brings the rate on British enamaled ware down to 20 per cent. compared with 35 per cent. general tariff. Total imports of enamelled products for the eleven months ending February were as follows:, From United Kingdom $63,744; from United States, $702,122. Total imports $778,512.

Clothes Wringers

Clothes wringers are reduced 2½ per cent. under both tariffs. Imports of clothes wringers for the eleven months ending February totalled $9,619 from the United States, this being the only country exporting these to Canada in that year.

Exempt Goods Made to Special Order

Concerning the much debated question of the status of such retailers as tinsmiths for taxation purposes the

(Continued on page 48)

WILL GIVE ANSWER IN NEXT ISSUE OF HARDWARE AND METAL

In the last issue of an electrical trade paper prominence is given editorial comment relative to the article which appeared in April 29 issue of Hardware and Metal entitled "Survival of Fittest in Sale of Electrical Goods." This contemporary has on several occasions within the past year made somewhat of an issue of the relations of hardware and electrical dealers to the sale of electrical appliances and the situation will be handled in detail in the next issue (June 3) of Hardware and Metal.

Lights on All Vehicles Make Business For Hardwaremen

DESPITE the fact that the Ontario Government recently declined to sanction legislation making it compulsory for all vehicles using the public highways to carry lighted lamps visible from both front and behind after dark, the movement is by no means dead. It is a live issue in many parts of the country and municipal action is being taken in some cases.

An announcement is made this week by the City of Toronto as follows: "Public notice is hereby given that the City Council of Toronto has passed a by-law requiring all vehicles using the public streets in Toronto after dusk and before dawn to carry lighted side lights plainly visible from in front of and behind such vehicles. This by-law to be in force on and after June 1, 1922.

The municipality of Riverside, Ont., and other municipalities in Ontario and other provinces have passed a similar by-law applying to buggies, wagons, bicycles, etc. The municipal councils of Windsor, Walkerville, Ford, Sandwich, Ojibway and others are now considering such action.

Here is a good chance for hardwaremen to develop business in lamps of various types applicable to the various vehicles which must carry them. By studying the regulations and

being able to give advice, as well as by urging local action to enforce such protective measures, the hardware merchant can play an important part in the matter.

Auto Accessories Find a Ready Sale

Display Case Facing Store Entrance Sells Many Automobile Accessories With Little Assistance From Salesmen—Arranging Office Where Proprietor Can Keep in Constant Visible Touch With Doings in the Store—New Fixtures Have Stimulated Business

"OUR STORE fixtures are now thoroughly modern — cabinet style cash register with a separate drawer for each clerk, automatic scales, natural oak wall fixtures, modern designed silent salesmen, telephone from offices to main floor and outside departments—and continued effort is put forth to keep thoroughly up-to-date with improved methods. Always with the idea of keeping overhead as low as possible, and efficiency as high as possible," said E. L. DeWolfe, president of the DeWolfe Hardware Co., St. Stephen, N. B., to Hardware and Metal.

At the time the company was incorporated, nineteen years ago, business was carried on in a small store a short distance from the present stand, but owing to expansion of business, larger premises were required. Nine years later the firm was able to purchase its present stand, which they then remodelled, making a retail store 30 feet x 60 feet, with a back warehouse 20 feet x 30 feet. It was at this time that many heavier lines were added to their stock, including lime, cement, hardwall plaster, building brick, fire brick, etc., and additional warehouse facilities were necessary. This was secured in separate buildings.

This accommodation carried the business through the next few years, but owing to continued growth it was found necessary two years ago to again add to the premises, and a two storey brick addition was built at the rear of the main store. A general remodelling of the retail store was also made at that time.

Elevated Office At Rear

In the changes made, the office was removed from the front of the store to an elevated position at the rear of the main floor. It now commands a view of the main store, as well as being closer connected with the warehouse section at the rear. Lighted on either side by large windows, further illumination is gained by the plate glass at the front of the store as only a glass partition separates store and office. With the intention of the firm to keep thoroughly up to date with improved methods, the store telephone system may be termed a feature of the office equipment. Sitting at his office desk, Mr. DeWolfe is at all times able to keep in almost personal touch with every transaction. For instance, if a customer enters he can see who it is, and what is asked for. If his personal appearance is necessary he can leave his office duties, but if the salesman can handle the situation with a little advice from the office, the telephone is brought into use.

Modern Show Cases and Fixtures

Tapered glass fronted silent salesmen occupy floor space from the front door down each side of the store. Cutlery, tools, auto accessories, flashlights and batteries, electrical appliances, etc., being displayed. Following on down the one side is the main counter backed by a wall fixture that extends the entire length of the front store. The usual line of shelf hardware, tools and house furnishings is shown in this department. "These show cases and wall fixtures seemed expensive at time of purchase. It seemed like too much money to expend for the sake of 'appearances.' However, we now realize that appearance was only one improvement made, and more efficient service is a more important factor. It was not long then until we added an automatic scale, and later followed by a cabinet style cash register," said Mr. DeWolfe, these changes being readily reflected in increased sales of auto accessories, etc.

Separate Departments Adorn Other Wall

On the other side of the store, immediately at the front, is the paint department, featuring also paint brushes.

(Continued on Page 42)

Realizing that many people need education to the fact that the hardware store can supply their requirements in auto accessories, the De Wolfe Hardware Co., St. Stephen, N. B., devote a showcase facing the entrance to accessories. Here are shown lamps, oils, tires, flashlights, tools, etc. Note the other special display racks devoted to seasonable lines.

Patterns For Y Pipe Branch

Written for Hardware and Metal by O. W. KOTHE, Principal St. Louis Technical Institute, St. Louis, Missouri.

TRADESMEN who follow the piping field meet with a multitude of irregular fittings.

In this case our branch is rectangle on the bottom and round at the top of bases, while it is flat on one side.

It can be arranged for a two way branch or a three way branch by merely adding another side branch similar to the one shown.

We first draw the elevation, making the base, and the diameters R and S to suit measurements.

Draw the half sections R and S and square lines to the base lines. Draw the lines from R to the corner B, and then build the lines from S to the miter A-11 as shown.

After this develop the half plan, making the half rectangle 3-C-B'-3' to suit measurements.

Strike section R' and develop the oval section S'.

From points in R' draw lines to the corners C and B'.

Then from each point in miter line of elevation as A-5-7-9-11 drop lines to intersect similar plan lines.

This enables drawing the miter line in plan and joining the lines from S' to it.

To develop the true section through miter pick the spaces as A-5-7-9-11 from elevation miter line and set at 3-11 on the run of M.

Drop lines and from each point in miter line of plan bring over lines to intersect ones of similar number.

This permits drawing the section M and N, which is the developed girth for developing the patterns.

The true lengths must now be developed. Observe branch S has several altitudinal heights.

So, from each point, as 1-2-3-4, 6-8-10 bring over horizontal lines to cross H-Y line.

In the same way bring over the lines from each rise in miter line as A-5-7-7-9-11.

With dividers pick the plan lines as C-1-2-3-4, also B-1-2'-3'-4', etc., and set from H-T.

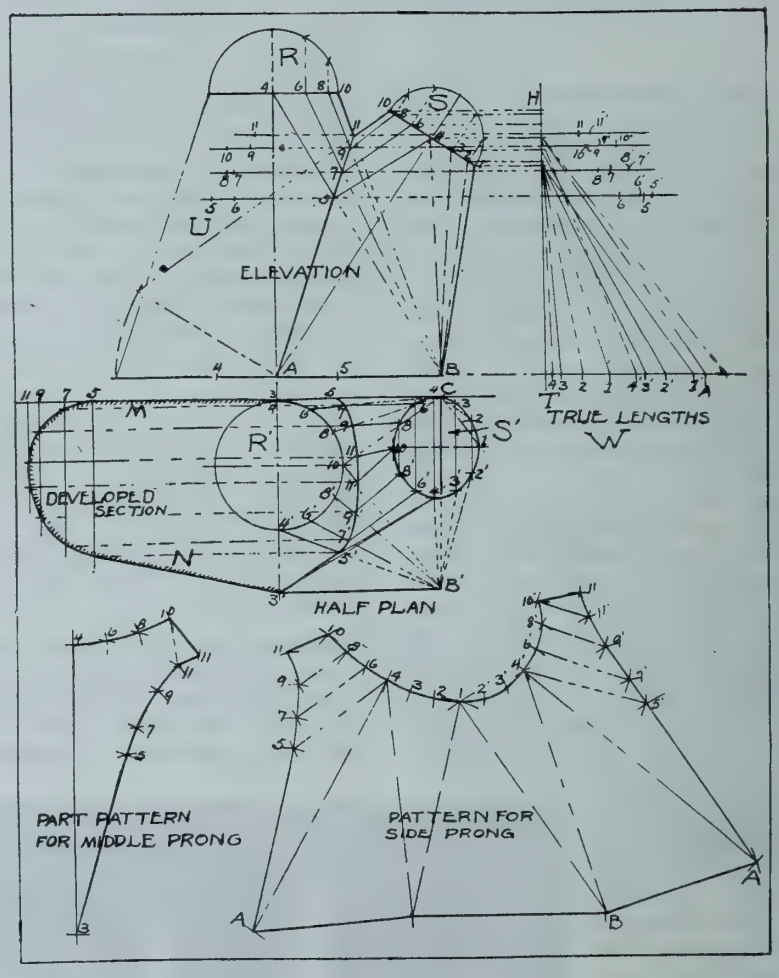
Then from these points draw lines to the altitudinal line which gives the true lengths.

The throat true lengths are developed in a similar way, and the true lengths for middle prong are set off the same as any ordinary fitting of this kind. These are shown at diagram U.

The patterns are set out by picking the girths for round bases from R or S, and the miter cut from M or N.

Each side is set out separately as each set of lines is different.

In fact, the plan lines and true length lines must be carefully watched so they are transferred into pattern exactly as they appear in plan. Laps must be allowed extra.



Patterns for Y Branch.

AUTO ACCESSORIES FIND A READY SALE

(Continued from Page 41)

A ledge about two feet wide extends along the front of these shelves, and this allows very fine display space for counter cards and other advertising material. It can also be utilized for goods when extra prominent display is desired. Below this ledge wider shelf room is offered for the larger sized paint cans in the paint department, and roomy quarters for surplus stock towards the rear of the store.

Auto Accessories Profitable

Adjoining the paint department, is the line of auto accessories, with a silent salesman placed immediately in front for further display purposes. This is a line which has been built up from a small beginning until it is now an extensive and profitable section. When asked for a reason for this steady growth, Mr. DeWolfe stated that he believed the appearance of the department was responsible for the larger part. Having these goods in a separate department, in full view from the front door, and every item well displayed, often made sales without much time necessary on the part of the salesman.

At the rear of this side, a line of kitchen utensils is shelved, including aluminumware, enameledware and tinware. Although at the rear, proper lighting is effected from the office windows besides from windows at the front. This, however, is assisted by white ceilings in the store throughout. When remodelling was under way, it was decided to use as much white paint as possible, and the bright cheery appearance can be readily seen in the accompanying photograph.

(Continued on Page 49)

Incubator In Window Hatches Chicks

Bunt's Hardware, Kingston, Ont., Employs Man With a Hobby for Chicken Raising to Give Expert Advice on Incubators and Brooders—Sumner Co., Moncton, Play on Slogan of Increased Production and Economy of the Times.

"A CHICK from every hatchable egg," is one of the slogans that are being used by Bunt's hardware, Kingston, Ont., in the sale of incubators, and judging by the amount of business that Mr. Bunt has been able to secure in the four years, he has been selling incubators he has certainly been able to "deliver the goods," to use a time-worn phrase.

There are many who claim that a hardware merchant cannot sell incubators. Mr. Bunt has the unique experience of being the only hardware man in Kingston to handle incubators, and in four years he has shown just what can be done. Interviewed by a representative of Hardware and Metal, Mr. Bunt reported business good, despite the hard times and so much unemployment.

Mr. Bunt pointed out, in a very interesting interview, that to make a success of the incubator business, one must be greatly interested in the work of the incubator itself. Special attention must be given to demonstrations and displays. Mr. Bunt is keen on the question of incubators, and he is fortunate in having on his staff a man who makes this kind of work his "hobby" and this enables the very best service possible.

A short time ago Mr. Bunt created much interest in a demonstration carried out in one of his shop windows, when he worked his incubator and hatched out the chicks there. It required a great deal of time and attention to put this "stunt" over, but it was carried out with great success and did much to stimulate business. It was a real novelty in the way of advertising and many were the favorable comments heard on all sides about it.

At the present time, Mr. Bunt has an incubator in one of his shop windows and he also carries good space in the local newspapers. He is a firm believer in printer's ink.

Sumner Co., Moncton, N. B., have been handling incubators for about six years.

"We have found the incubator business a very satisfactory one and our sales have increased from year to year. We only stock regularly two sizes, the No. 14, 65 egg and the No. 16, 110 egg, although at different times we have had special orders for larger ones. We also carry brooders in corresponding sizes, No. 20 which handles 60 and the No. 21 which handles 100 chicks, also the No. 18 brooder which has a capacity up to 500 chicks. We have never handled any accessories for the chicken raising business except chicken markers and poultry netting, and of course, the thermometers and other supplies for certain machines," said G. V. White of this firm.

"We have used no particular advertising for this except to feature incubators in the newspapers in the spring together with cuts of both and a general write-up on their hatching abilities. During war times we used the slogan of increased production to some extent. We have at different seasons put incubators in the windows and had the chickens hatched out there, but of recent years found it more satisfactory, on account of the changing temperature of the window, to set our incubators somewhere else and place brooders in our windows and remove the chickens to these as soon as they were hatched from the eggs. We generally make the balance of the display up with machines and window trim material furnished by the company. These we have found made a very attractive window especially around Easter."

Group of ads showing how various hardware firms are advertising incubators and brooders. Ads are by Sumner Co., Moncton, N. B., Morgan Hardware Co., Norwich, Ont., J. H. Millard, Melfort, Sask., Bunts Hardware, Kingston, Ont., and Dunn Hardware Co., Ingersoll, Ont.

The Budget

THE LONG awaited Budget of the Minister of Finance has just been presented at Ottawa and some reassurance is already felt by the fact that it is much less radical than the provisions of some other Budgets of recent years. The measures outlined in this year's Budget are simple in the extreme, in many respects being but an extension of principles which have been in use for some time and with which business men have become acquainted.

Perhaps the most important change with a direct bearing on the trade is the increasing of the sales tax fifty per cent. This impost has not worked out as smoothly as might be desired in some ways and action will be welcomed toward establishing a definite policy. In many cases it has been found necessary for retailers to absorb this tax, being unable to pass it on to the consumer in some lines, notably those carrying a more or less fixed re-sale price.

Then there are a number of interesting tariff revisions under which reductions are made either in the British preferential or general tariffs, or in both, on tools, wrought iron tubing, gasoline, enamelled ware, certain hollow ware, harness, clothes wringers, pump parts, etc. In practically each case the changes have been along the line of encouraging British trade, this being due to the fact that the great bulk of trade in such lines has been with other countries.

The cancellation of the Marking of Imports regulations, Depreciated Currency Regulations and Valuation of Goods Act, removes a source of much worry and trouble to impending investigation. While there was a distinct purpose for pending investigation. While thee was a distinct purpose for each of these regulations, practice has shown that they have not been adequate to cope with the situation. Merchandise which was expected to be barred out by such regulations has been coming through Holland and other countries and thus escaping the force of these regulations. Some better means will have to be found to meet this difficulty if it is desired to bar the import of such goods.

Farmers have been given a large measure of consideration under the regulations, and as result should be helped greatly to recovery; thus be in better position to meet their payments and be in position to procure their requirements. This in turn will help general business greatly.

There are many points to be smoothed out in the application of the regulations and if readers have opinions to be expressed after a study of the regulations elsewhere in this issue, the Editor will be pleased to hear of them.

Improving Prospects

THAT INDUSTRIAL conditions on this continent, even at the peak of the depression, were not as bad as was commonly thought, is the opinion now being set forth by certain students of economics. In this connection it is interesting to note that the average industrial production at the time of the depression was at the rate of seventy per cent., compared with normal, and is now about 95 per cent. Published statistics of industrial operations, unemployment, etc., have made the situation appear very bad because of the tendency to compare these conditions with those of the war-time boom when production of existing plants as well as that of new plants was greatly stimulated to meet requirements.

Thus a comparison of present industrial conditions with those of normal times would, it is claimed, show current conditions to be much more favorable than is generally supposed. Actual suffering due to unemployment has not been as aggravated recently as in former times of depression, and now that excess stocks of all kinds have been generally disposed of manufacturing output is being gradually increased. No outstanding improvement is anticipated until export markets develop and until the spending power of the individual has increased, but meanwhile there is a steady and increasing demand for necessities such as hardware, and the outlook in export markets is reported by a number of Canadian manufacturers who have recently returned from abroad to be greatly improving. This will no doubt encourage manufacturers to produce with assurance that any overloading of the domestic market which would ordinarily be experienced can be taken care of by export trade.

THE LIGHTS on all vehicles recommendations which the Ontario Government recently declined to sanction because of the alleged danger in barns of handling coal oil lamps, has been revived and enforced in certain municipalities in Ontario as well as in other provinces, and is being widely considered throughout the country by municipal councils. This is a most important measure for protection and as well it offers a field for business in various types of lamps suitable for various vehicles which hardware merchants can develop.

THAT THE anti-combine legislation which the Attorney General of Ontario endeavored to have passed at the present session is not considered acutely necessary by the legislators in the larger sphere at Ottawa is indicated by the answer given a member this week in the House of Commons when he enquired as to the number of prosecutions against trusts and combines in Canada from 1909 to 1922. The answer was that there were no prosecutions in that time under the Combines Investigation Act but that one investigation had been conducted by a board appointed by the Minister of Labor. The existing law is confined to the provisions of the Criminal Code.

THE STEADY improvement in the steel industry which has been outlined in recent issues of Hardware and Metal is confirmed by information secured this week from Robert Hobson, president of the Steel Company of Canada, who advises that not only is there a continuation of a better demand for small steel but that the building revival throughout the country is being reflected in orders for heavier products. The West is also said to be coming into the market for steel of all sorts indicating an improvement in buying conditions in that section of the country.

For the Man Behind the Counter

Customer is Master, Salesman is Servant

Studying the Art of Salesmanship is Interesting and Profitable—In Rapid Growth of Retail Distributors the Fine Points of Selling Have Been Frequently Neglected

ANY MAN who will, may become a good salesman. This is true, but it is not any easy thing to become a good salesman. Just how to make known what good salesmanship is would be a heavy task, but it may be taken for granted that a good salesman is among the "top-notchers."

Salesmanship is a profession. It can be learned just about as easily as law, medicine or any of the other professions, and it cannot be learned any easier. Like any other profession, it requires persistent and arduous application to master it, and to keep posted in its newest phases and developments.

These men are paid to be agreeable and polite; to dress in a manner befitting the establishment; to make friends for the store by their affability. The wares, or the prices placed upon them are expected to effect the sales.

Educated in Smaller Stores

On the other hand, many of the so-called salesmen are getting their education in the smaller stores under men who have no inclination or ability to instruct properly the apprentices under them.

The man who wants to become a good salesman must do so by his own efforts. If he is ambitious and willing to give the time to the study he may succeed in spite of all things that combine against his success. It all depends upon his own endeavors.

There are three things a man must know before he can become a good salesman. These are: Himself, his wares and his customers.

First of all, he must study himself. Very few men know themselves although most men think they do. They do not.

To become a successful salesman a man must be able to govern his thoughts and control his actions. He must have a good impression on his customer and he cannot do this if in any way his actions create in the mind of his customer the slightest degree of antagonism.

He must study his appearance and make it pleasing. He must study the very expressions of his face. He must be able to assume all the appearance of surprise, pain, joy, sympathy, respect and a host of other emotions.

He must be able to concentrate his thoughts upon the thing in hand. He must be able at will to exclude all other thoughts from his mind. If his thoughts are allowed to dwell upon outside subjects his magnetic force is divided and becomes greatly lessened in power if not negative in effect.

He must cultivate good taste and judgment. Good taste more especially in respect to his personal appearance and dress. A careworn face or one showing signs of dissipation has a marked negative effect upon his customers. So also has the appearance of lack of taste in his dress.

Personal Attributes

The pleasing man will have a cheerful countenance, a clear eye, a clean-shaven, well-groomed face and a neatness in dress that will at once place him, in the customer's opinion at least, among that class of men in whose company cultivated persons like to be seen.

He must cultivate good judgment in the choice of friends. Our likes and dislikes, if allowed to rule us without restraint, are sometimes prone to work evil for us. A salesman should never condescend to lower himself in his own estimation in choosing companions of a lower order of morality, culture or refinement. If he does he will eventually lower himself to their level in the sight of others, if not in reality.

The salesman must cultivate his voice. He must be able to modulate his tones to harmonize with his thoughts and with the feelings of his customers.

He must study correct modes of speech. He must study to put his thoughts into pleasing sentences. He must study to make his sentences produce logical arguments.

He must recognize the fact that he is the servant and that the customer is the master. He is at all times open to all sorts of senseless abuse, suspicion and discomfort at the hands of the public. He must learn to sink his feelings behind a stoical exterior and smile as pleasantly as if nothing had occurred to disturb his equanimity. It is in these situations that tactful control of himself will win a reward in the end.

The second proposition is important. He must study his wares. It is only the man who knows what he is selling that can reach above the average in sales.

The street vendor and itinerant peddler is usually a salesman of considerable ability. This is due in some measure to a knowledge of his wares. He knows the good points of the article he has for sale. He has learned by constant contact how to present these good points and to keep them to the front, to present them in such a way that they overshadow all the weak points.

Many men behind the counters not only fail to recognize the good points in the goods they have to sell, but see looming up largely before their mind the weaker points. A well-balanced mind would not allow this state of affairs.

Must Know His Customers

Lastly the salesman must know his customers. This is an easy task after he has mastered the story of himself. We are all human. All have, more or less, the same emotions and the same method of expressing them.

Psychological experts can read the human mind like an "open book," because they have learned to read the expressions of the face, the effects of the emotions on the face and physical form of man. The salesman must make almost as exhaustive a study of his customers as the professor of psychology does of mankind.

The art of control, which is recommended to the salesman, is practised by so few that he will have a chance to read the public with little effort. Once he knows the feelings of a customer towards his goods and himself he is in possession of the means of securing sales.

All this may seem formidable to the unpractised salesman, but rest assured that once this study is undertaken it will be continued for the fascinating disclosures that are being made every day. The study is both profitable and pleasing.

Salesmanship is a profession and requires persistent tudy.

"Order Takers" must now train themselves in salesmanship in order to make progress.

Some of the necessary personal attributes.

Study wares, line up sales arguments and learn to present them in the most forceful manner.

Events in the Trade

BUSINESS CHANGES

Toronto.—Frank Heyworth has sold his hardware business to J. A. Richardson.

Windsor.—Wall & Lefevre (Wyandotte Hardware) have sold out to Laird and Laird.

Goderich, Ont.—Chas. J. Harper has sold his hardware business to H. B. M. Tichborne.

Walkerton, Ont.—A. P. Johnston, hardware, has sold his business to A. J. Fehrenbock.

Clinton, Ont., The hardware and store business of Harland Bros. has been sold to Messrs. Ball, Atkinson and Zaphil, furniture dealers of this town. The new firm to be known as "The Clinton Hardware and Furniture Co."

C. H. Maybee has bought the hardware store, stock and dwelling from W. S. Gordon, at Sydenham, Ont. Mr. Maybee was with James & Reid of Perth for about seven years, having learned his trade with them. For the past three years he was in Bellevi le in the Divisional Offices of the Grand Trunk.

FIRE LOSS

Ottawa, Ont.—Gray Harvey Co. Ltd., wholesale and retail hardware, suffered fire loss.

OBITUARY

Brockville.—William A. Reid, a native and continuous resident of Brockville, died aged 78. The deceased was associated with his brother in the hardware business for many years.

W. G. Charleson, who was in the hardware business in Ottawa for many years and known to the craft throughout Ontario and Eastern Canada, died in Toronto, following an attack of pneumonia. Mr. Charleson's home was in Ottawa. A kindly, genial gentleman, ever willing to serve and help, with a reputation for unimpeachable integrity in all his undertakings, Mr. Charleson was a splendid type of business man. Born in Quebec in 1867, he accompanied his parents the late J. B. and Mrs. Charleson, when they moved to Ottawa thirty-five years ago. He engaged in the hardware business and opened a store on Rideau street. It was located in a two-storey stone building, which was one of the landmarks of Ottawa for many years, until torn down to make way for a new departmental store. Mr. Charleson disposed of his hardware business ten years ago, to the firm of Gray-Harvey, and entered the contracting business.

NEW FIRMS

The Cousin Hardware Co., will commence business at 185 Danforth Ave., Toronto, within a few days, having taken over spacious premises. A brief announcement was made of this in a recent issue of Hardware and Meal, but due to a lack of detail it was mentioned that this was an American firm, this being due to the fact that Mr. Cousin has been in the hardware business in Detroit. Mr. Cousin advises that he is a Canadian having been in business in Detroit only the past twelve years.

ONTARIO INCORPORATIONS

Barwich Radio Co. Ltd., head office Hamilton, capital $40,000 to deal wholesale in radio-telephone parts and sets.

National Radio-Home Service Corporation Ltd., head office Toronto, capital $100,000 to manufacture and deal in hardware and metals, electrical and mechanical appliances.

RADIO FIRMS AMONG INCORPORATORS

The issue of this week's Canada Gazette announces the incorporation of three new companies in the Border Cities.

The largest of these is the Dominion Radio Corporation with $70,000 capital stock, which company is authorized by its charter to sell, import and otherwise deal in wireless telephone receiving and sending apparatus and the machinery for manufacturing same.

The Canadian Batteries Containers Corporation, Limited of Windsor, with capital of $50,000 authorized, includes as directors of the concern, Arthur E. Thompson, of the Thompson Auto Company, Albert A. Little, builder and several Detroit men.

WRENCH FACTORY FOR FORT WILLIAM

Ft. William, Ont.—The York wrench corporation is the name of a new industry that is to be located in Fort Willima, devoted to the manufacture of the York wrench, the invention of Percy York, a Fort William boy. The head factory is in Duluth.

T. P. Kelly and H. Frawley, of this city, have taken over the manufacturing rights for Canada, and the Canadian headquarters will be established here.

The York wrench, which was invented by Percy York, in 1918, has a 16-inch handle which gets in behind those parts of machinery which are obstacles to ordinary wrenches. The wrench is especially suitable for automobile repairs

WELLAND TO HAVE CUTLERY FACTORY

Welland, Ont.—Welland is to have a cutlery factory. This week the deal was closed whereby the recently organized company known as "British Empire Cutlery Corporation, Limited," took over the plant of the Fulton Motors. The parent company is the Cling Cutlery corporation of New York City. They are financing the new concern.

The company hold world patents. The local plant, which will employ from 100 to 150 skilled mechanics will manufacture in the main scissors.

Four Welland men will be identified with the corporation. C. T. Grantham is Chairman of the Canadian Board of Directors and he will have with him Hon. Richard Harcourt and Col. L. C. Raymond, with another yet to be named.

NATHAN BRENNER IS FREED

Nathan Brenner, who on March 2nd was sentenced to two years, less one day, on four charges in connection with N. Brenner & Company, Limited, metal dealers, Toronto, has been released from the jail farm.

Nathan Brenner's son, Meyer Brenner, was sent to Kingston penitentiary for seven years on each of six counts, the terms to run concurrently.

Meyer Brenner is still at Kingston.

The sentences, while imposed on March 2nd, were directed to begin from Feb. 9, 1922. The release of Nathan Brenner is said to be due to ill health and advanced age. Full details of this case were outlined in Hardware and Metal.

GOV'T SETTLES STEEL COMPANY CLAIM

Montreal.—Judgment was rendered by Mr. Justice Audette in the Exchequer Court of Canada, confirming a settlement for $4,500,000 of the action instituted against the Federal Government by the Dominion Iron and Steel Company for $10,964,000.

The company's claim arose out of the huge war contract which the Government gave the company in 1919 for 250,000 tons of ship plates. When less than 50,000 tons of the plates had been rolled the armistice came and the Government had to cancel the balance of the contract, acknowledging its obligation.

The Government had paid $3,000,000 on account of the claim some time ago, and an Order-in-Council of May 20, authorized a complete settlement of the whole matter upon a further payment of $1,500,000.

TO RUN FIVE DAYS A WEEK

St. Catharines, Ont.— The Welland Vale Manufacturing Company gave notice to its employees that the plant would in future begin to operate five days a week. The company has been running only three days for some months past.

START PRODUCING BOLTS

The Montreal Bolt and Forging Co., expect to start operations this week. The company will produce all kinds of machine, carriage, and other rough finished bolts as well as lag screws, etc. By the end of May all departments will be in operation.

MUST INSTALL MIRRORS ON MOTOR TRUCKS

London, Ont.—Chief of Police Thomas Groves is issuing a warning to the drivers of motor trucks and all commercial vehicles that they must install mirrors to enable them to view the traffic behind. Some of the commercial vehicles in the city are not conforming with this regulation.

HARDWARE MERCHANTS EXHIBIT AT FAIR

Over thirty retailers including a number of hardware merchants had exhibits at the North Toronto Exhibition which was largely attended, under the direction of the North Toronto Business Men's Association. Next year it is planned to have a much larger exhibition owing to the glowing reports of increased sales by each merchant since the exhibition was commenced.

NEW MONTREAL INDUSTRY

The firm of Kelvin, Bottomley & Baird of Glasgow, Scotland, have just established a branch company in Montreal under the name of Kelvin, Bottomley & Baird (Canada), Ltd. They will manufacture their line of navigation instruments. Drummond, McCall & Co., who have up until now acted as agents for this firm, will continue to be intimately connected with the new company.

WILL ABOLISH 12-HOUR DAY IN U. S. STEEL INDUSTRY

Abolition of the 12-hour day in the U. S. steel industry was favored by 41 steel company executives from all parts of the country, who were guests at the White House, of President Harding, who broached the subject to them.

A committee of five steel men to be appointed by Elbert H. Gary, Chairman of the Board of the United States Steel Corporation, acting in the capacity of the President of the iron and steel industry, will undertake to form ways and means of meeting the Administration's request for doing away with long hours of labor that have been a subject of controversy between labor and management in this industry.

GOOD RESULTS FROM CASH SYSTEM

Picton, Ont.—An announcement this week in the local press is as follows:

"Last week was another great one for Carter Bros., and it is pleasing to chronicle that they waited on 431 more customers than on the corresponding week of a year ago and their sales were $471.13 greater. This proves how the public at large appreciate the lower prices that this firm's cash system give them."

LOOK FOR TRADE WITH NEW CHINA

Evincing an eagerness to establish their products in the steadily-growing markets of the Orient, several local manufacturers conferred with G. A. R. Emery, a Canadian trade commissioner who leaves for Shanghai, China, at an early date.

Local manufacturers who saw Mr. Emery showed a strong desire to broaden their export trade, and stated that they looked upon the Orient as one of the best world markets of the future. Manufacturers of steel goods, tinware, wire fencing, roofing material, farm implements, brushes etc., are especially interested in the Eastern export trade.

OBITUARY

Belleville, Ont.—John Wilson Walker, veteran hardware merchant of this city, is dead after a lingering illness. He was born here in 1846 and had spent his entire life in this city. In 1868 he entered the hardware business, and about two years ago retired from active participation in business. He leaves his wife and two sons, Major Harry W., of this city, who won distinction in the war, and Clifford C., who has been engaged with him in the business.

LATE JOHN W. WALKER

Hardware Merchant, of Belleville, Ont., for fifty-four years, whose death is announced. He retired from active business two years ago.

POST OFFICES TO ALSO ISSUE RADIO LICENSES

It is announced that after June 1, radio receiving licenses will be issued through the Post Office Department at Ottawa, as well as through the radio branch of the Naval Service department. Hitherto, all licenses were issued through the latter department, but as a convenience to the many new and prospective radio users throughout the country, arrangements are being made to have licenses issued through the post offices in the chief cities and towns throughout the country. The licenses will not be obtainable at the smaller post offices. An earlier report that the issuing of the licenses will be turned over to the Post Office department entirely, is incorrect.

It will still be possible to obtain licenses directly through the radio branch of the naval service. The fee will be the same as heretofore—one dollar annually.

WESTERN ONTARIO NEWS

W. R. Patterson of the Winchester Repeating Arms Co. called on the Montreal trade this week.

John A. Brownlee, London, Ont., has been awarded contract for sheet metal work in connection with remodelling buildings of the Institute of Musical Arts.

The funeral of John T. Harland held at Clinton, Ont., last Saturday was very largely attended, deceased being one of the oldest and most highly esteemed merchants of the district. He had been in the hardware business in Clinton since 1867. He was one of the oldest and most active members of the Lawn Bowling Club.

HARDWAREMEN ADDRESS SALESMEN

Hamilton, Ont.—Commercial salesmen of this city held a luncheon which was largely attended. R. M. Moncur was in the chair and addresses were given by A. L. Boyd of the Sheldon School of Salesmanship, Toronto; C. M. Canfield of Bird and Son, and Harry Allen of the Libbey Owens Glass Company, this city. Mr. Canfield spoke of the bright outlook for industry, especially for roofing, and Mr. Allen spoke on the methods of making window glass, and stated that his firm expected before long to be making plate glass. Mr. Boyd gave a thoughtful address on salesmanship, in which he emphasized the need of honest dealing and personality.

He stated that salesmen should remember, first of all, that service was the first essential and health was another great need, as a man could not give his best while in ill-health. Asking what "profit" was he stated that this could be neither greater nor smaller than the service rendered, and could not be measured in dollars and cents. Money was one of the ingredients, but honor and respect were others equally important.

News of Western Canada

For comment on Winnipeg hardware market tendencies see "WEEKLY HARDWARE MARKET REPORTS." For current prices see Winnipeg section of "CURRENT HARDWARE QUOTATIONS" in this issue.

Hardware Activity Well Maintained in B.C.

One Hardware Merchant Reports Turnover 6¼% Less Than Last Year But Prices Are 17½% Less —Good Movement of Seasonable Lines With Improved Deliveries From the East

VANCOUVER.—Decidedly warmer weather on the coast has had the effect of inducing the movement of seasonable lines of hardware. This includes refrigerators and ice-cream freezers which are selling at about ten per cent. less than last year at this time, as well as lawnmowers and garden tools of all kinds. Spring activities which have been delayed up to the present by backward weather are now in full swing and retailers are feeling the effect in somewhat better sales, although little better than a year ago. The building in the suburbs which is keeping up steadily, has meant a good market for building hardware and house furnishings. Deliveries are coming well from the east and there is not the trouble which was more or less experienced in 1921.

One prominent retailer discussing trade conditions with Hardware and Metal said that his business for April was only six and a quarter per cent. less than the same month of last year but he drew attention to the fact that prices on the whole, were approximately seventeen and a half per cent. less now. He further stated that in practically all lines, there was a good average sale and he expected it to remain so. City trade has shown an improvement during the last week and this is fairly general.

Business developing on Vancouver Island is not what it should be, say distributors and jobbers. They attribute the cause in part to less coal mining activity, the mines being reported to be working on a fifty per cent. time basis.

There has been a fair demand for camping equipment in view of the approach of the holiday season.

There is no perceptible improvement in trade in the Okanagan and wholesalers do not look for anything bordering on an increase until part of the coming crop is marketed. Fruit trees throughout the valley have come through the winter well and ranchers are fairly optimistic. It depends on the marketing to a large extent and on account of what is termed as the "debacle" of last year, there is still some misgiving as to the future.

Collections in some districts are gradually improving although this does not apply to the interior. A close watch is being kept on city accounts which are being fairly well met.

Price changes have been negligible and there have been no trade adjustments of any account. One of the department stores has been making a special of flatware. For instance coffee and tea spoons are on the market at $1.50 per half dozen instead of $2 the regular figure; dessert forks and spoons at $2.75 against $4; and butter knives at 65 cents instead of a dollar.

At a cost of $250,000 the Consolidated Mining and Smelting Company will instal a copper rod mill at Trail. This is said to be the first effort to further manufacture copper products of British Columbia although the production has ranked high for many years, in the total for the Dominion. Much importance is attached to the company's announcement as the results are expected to be far-reaching. It is believed here that the completion of the plant will enable companies manufacturing electrical equipment to compete and sell their products in the world's markets, including export across the Pacific.

WESTERN CANADA NOTES

D. S. McLachlan, retail hardwareman of Armstrong, B. C. has been succeeded by Manville and Sons.

Jas. Hossack, sales manager of the Lufkin Rule Co., has been in Vancouver this week making the rounds of the jobbing trade.

Another Oriental hardware concern has started up business in Vancouver in the name of the Ming Wo Hardware Co. Wong Chew Lip is one of the principals.

R. J. Douglas, director of the Canadian Industrial Alcohol Co. of Montreal has been on the B. C. coast this week. He also visited Victoria before returning east.

IMPORTANT CHANGES IN TAXES IN TARIFF

(Continued from page 40)

regulation says, "The excise taxes specified in this section shall not be payable on goods exported or on sales of goods made to the order of each individual customer by a business which sells exclusively by retail provided that the tax as specified in this section shall be payable on sales of goods manufactured for stock by merchants who sell exclusively by retail.

Rates of Duty Now Applicable

Under revised regulations the following rates of duty are applicable to certain hardware lines; Glass decanters, bottles, demijohns, flasks, phials, glass jars and glass balls, lamp chimneys, glass shades or globes, cut, pressed, molded or crystal glass tableware, decorated or not; blown glass tableware and other cut glass, British preferential tariff 20 per cent., intermediate tariff 30 per cent., general tariff 32½ per cent.

Dairy tin hollow-ware including cans for fresh milk or cream, kitchen tin hollow-ware, not painted, decorated or japanned, British pref. 12½ per cent., intermediate 17½ per cent., general tariff 20 per cent.

Enameled Ware

Enameled ware, agate, granite or enameled iron or steel ware, British pref. 20 per cent., intermediate tariff 27½ per cent., general tariff 35 per cent.

Tools

Under tools come, adzes, cleavers, hatchets, metal wedges, sledges, hammers, crowbars, cantdogs and track tools, picks, mattocks and eyes or poles for same, tools of all kinds n. o. p. British pref. 15 per cent., intermediate 27½ per cent., general tariff 30 per cent.

Harness

Harness and saddlery, British pref. 17½ per cent., intermediate 27½ per cent., general 30 per cent.

Hose

India-rubber clothing, rubber or gutta percha hose and cotton or linen hose lined with rubber, rubber mats or matting and rubber packing, British pref. 20 per cent., intermediate 30 per cent., general 35 per cent.

Clothes Wringers

Clothes wringers, British pref. 20 per cent., intermediate 30 per cent., general 32½ per cent.

Incubators, Etc.

Fruit or vegetable grading machines, incubator, brooders, pruning hooks, pruning shears, post hole diggers, and other agricultural implements, British pref. 10 per cent., intermediate 15 per cent., general 15 per cent.

Says Western Optimism is Justified

Hardwaremen on Trip Through Western Canada Say Coast Trade is Benefiting by Brisk Building—Edmonton District Benefits by Large Shipments to the North—"Hand to Mouth Buying May Continue Until About July."

WINNIPEG. — Taylor Webb, of Bissett & Webb, manufacturers' agents, has returned from a trip through the four western provinces, having made the trip with a view to getting first hand information on trade prospects and conditions. On this particular trip Mr. Webb met H. B. Greening, president of the B. Greening Wire Co., of Hamilton, also D. F. Griffith, general sales manager for the B. Greening Wire Co. Mr. Griffith and Mr. Webb met Mr. Greening at Seattle, Washington, and called on the general hardware jobbers at Vancouver and Victoria, Calgary, Edmonton, Saskatoon, and Regina. Trade conditions in Vancouver were said to be normal with an optimistic feeling with regard to the future. Vancouver is at present enjoying some very brisk building operations in the district known as Point Grey. Complaint, however, was made on account of the backward conditions of the season, the weather being unusually cold for the season, and therefore retarding growth. At Calgary similar weather conditions existed but the trade reported optimistically and favorably as to there being sufficient moisture throughout both northern and southern parts of Alberta.

On arrival at Edmonton a wet snowfall of five inches was found to be general. This augmented the optimism with regard to there being sufficient moisture to help seeding conditions. The wholesale hardware trade at Edmonton reported favorably on business conditions, largely the result of shipments to the extreme northern districts. Saskatoon and Regina reported a steady sorting business of a very satisfactory nature.

Hand to Mouth Buying

Summing up the entire situation, Mr. Webb is of the opinion that the "hand to mouth" policy of purchasing on the part of the trade in general is being very strictly adhered to. This condition not only applies to the retail trade but to the jobbing trade as well. The consensus of opinion on the part of both the retail and jobbing trade is that by July 1st or thereabouts, if general crop conditions are favorable, the resumption of activity in buying will take place. It must be taken into consideration that there is a great need on the part of the consumer for many lines of merchandise and the satisfying of these is being restricted on account of the consumers' diminished purchasing power. The majority of stocks in the hands of both the retailers and jobbers are far below the normal size.

Many eastern manufacturers, owing to the lack of bookings of anticipated requirements on the part of western jobbers, have largely restricted their output and have not felt justified in manufacturing any great surplus, if indeed they have any surplus.

May Be Congestion

In view of these circumstances it would appear that the accumulation of orders will later result in congested conditions at the factory, causing considerable delay in the filling of orders. It appears to Mr. Webb that in view of these circumstances it would be wisdom on the part of both the retail and wholesale trade, as soon as circumstances justify, for them to purchase their requirements so as to insure reasonably prompt shipment and to avoid the loss of business caused by not having the necessary merchandise on hand to take care of the business offering when the expected resumption of activities shall take place. On the whole the general feeling throughout the west is one of characteristic optimism, but this year conditions are said to be of such a nature as to warrant this optimism.

AN ODD COINCIDENCE

In a recent issue of Hardware and Metal in the column headed "Twenty Years Ago," a news item appeared as follows: "Taylor Webb, Toronto representative of Thomas Davidson Mfg. Co., Montreal, in Manitoba and the West, has just returned from a three months' trip over his territory." By an odd coincidence Mr. Webb twenty years later to the exact month has just returned from a special trip through the Western provinces and has again provided Hardware and Metal readers with a summary of Western conditions as a result of his observations.

COPPER ROD MILL STARTS AT TRAIL, B. C.

Among the outstanding enlargements of the industrial horizon of British Columbia is the installing of the copper-rod mill at Trail by the Consolidated Mining & Smelting Company at a cost of $250,000. This is the first effort to further manufacture of copper products in British Columbia, although the copper production of the Province has for years ranged high in the total of the Dominion.

"The ultimate results of this should be almost as far-reaching in the copper industries as the establishment of a steel-rolling mill would be in the steel industry," Major Martyn says.

"Wire and nail works could at any time commence manufacture of copper wire for local or export use. Further development in this line should produce immediate results, and make it possible for companies manufacturing electrical equipment in British Columbia to compete and sell their products in the world markets. It is a comparatively easy and inexpensive matter for electrical firms to put in the necessary insulating equipment for handling wire in the manufacture of electrical appliances."

RETAIL ORGANIZATION STRONG

Provincial President J. T. Crowder, of the Retail Merchants Association, was the main speaker at a dinner of the Automotive section of the R.M.A. in the Grosvenor Hotel. In the course of his remarks dealing with the activities of the larger organization, he said: "You are a strong enough organization to dictate even to the Standard Oil Company if you had a just grievance." Mr. Crowder told his hearers also that the R. M. A. did not believe in class government, instancing the case of the farmers' government in the Province of Alberta.

He said: "You might as well have a bakers' government at Victoria or a clothiers' government in the City of Vancouver."

AUTO ACCESSORIES READY SALE

(Continued from Page 42))

Warehouse and Basement Houses Heavier Lines

The added space afforded by the addition at the rear offers plenty of room for the heavier lines, such as all kinds of pipe fittings, piping, a full line of iron and steel, nails, roofings, traps, horseshoes, etc. By having these on the main floor, extra handling is unnecessary, whereas formerly many of these lines were stored in the basement. The basement is now used for such lines as oils, glass, rope, etc., six oil tanks being installed. On the second floor of the warehouse surplus stocks are carried, easy access being gained by a stairway from the rear of the main store.

Government Not Alarmed About Combines

Anti-Combine Legislation in Ontario Apparently Unnecessary Judging by Report Given to Member of Parliament

OTTAWA.—Evidently the government at Ottawa is not worrying its head over anti-combine laws. That it does not consider the land is alive with combinations in restraint of trade, and that it is not preparing to hold any investigations to determine whether or not the trade is doing the square thing with the public in regard to prices, was gleaned from the answers to a number of questions put in the House by T. L. Church, M.P., a few days ago.

Mr. Church asked: "What prosecutions have been made, and how many each year, against trusts and combines and combinations in restraint of trade in Canada, from 1909 to 1922."

Hon. Mr. Murdock, Minister of Labor, replied:

"As regards prosecutions under federal legislation, no prosecutions were held against trusts and combines and combinations in restraint of trade in Canada from 1909 to 1922, but under the Combines Investigation Act, which received the Royal assent on May 4, 1910, a Board of Investigation was established in February, 1911, by the Minister of Labor to inquire into an alleged combine on the part of the United Shoe Machinery Company of Canada, in the manufacture and sale of machinery used in the making of boots and shoes, and the report of the Board received by the Minister of Labor on October 21, 1912, declared the United Shoe Machinery Company to be a combine. No other investigations were ordered under the terms of the Combines Investigation Act, and the Statute itself was repealed by clause 15 of the Combines and Fair Prices Act, July 7, 1919. The existing law for dealing with trusts, combines and mergers in restraint of trade is confined to the provisions of the Criminal Code. The Government has no information as regards prosecutions under provincial laws."

The minister also stated that it was not the intention of the government to hold a fair price enquiry into the high cost of the necessities of life in Canada.

Good Opening for Hardware Export Trade

Preferential Tariff With Jamaica Enables Canadian Hardware to be Imported 25% Cheaper Than Other Countries Which Have Enjoyed Big Business

OTTAWA.—Canadian hardware and implement manufacturers can now look toward Jamaica with expectant eyes. The introduction of the preferential tariff now in effect permits exports originating in Canada and the United Kingdom to enter that country at an advantage over products of other parts of the British Empire or of foreign countries.

There is a distinct advantage to Canadian exporters of hardware and implements in what is known as the fourth schedule of the measure. This covers a range of articles formerly on the free list, which are now dutiable to the amount of five per cent. ad valorem when originating in countries other than Canada and the United Kingdom. Prominent items in this schedule are agricultural tools and implements, artisan's tools, sewing machines, and a wide range of power generating electrical and other machinery and their parts, if such are utilized in agricultural production in this colony. The operation of this schedule will materially improve British and Canadian opportunities in boilers, oil engines, pumps, sugar machinery, motors and electrical equipment, valves and castings, and general lines of manual implements.

Canadian manufacturers should now be able to secure a certain amount of the trade hitherto enjoyed by the United States. We make and use practically the same kind of hardware as made in the United States and sold to Jamaica. We are producing identically the same goods, and are now in a position to lay them down in Jamaica twenty-five per cent. cheaper than the United States.

The latest detailed statistics of the trade of Jamaica cover the year 1920. In the report for that year, some of the imports for comsumption of hardware by countries are as follows: United Kingdom, $465,295; Canada $26,620; United States, $913,120. Total, $1,428,593.

The foregoing figures do not include cutlery, implements and tools, machinery, pumps, galvanized iron, bar iron, pig iron, rails, pipe, wire, gas fixtures, wire netting, staples, steel sheets or general manufactures of brass, copper, lead, tin or zinc, the imports of which run into many thousands of dollars.

Canadian hardware exports to Jamaica fell off considerably in the fiscal year ending March 31, 1922, This decline, however, was in keeping with the general trade slump, and the feeling among manufacturers and exporters is that the end of the present fiscal year will show a wonderful improvement. In 1920 total Canadian hardware and cutlery exports to Jamaica amounted to $37,548, as compared with $57,728 in 1921 and $8,726 in 1922.

Twenty Years Ago

Following items reproduced from Hardware and Metal of May 24, 1902:

Johnston Bros. hardware, Arnprior, Ont., have sold out to J. G. While & Co.

The banquet of the Canadian Manufacturers' Association held at McConkey's, Toronto, on Thursday, was attended by over 100 members. The vice-president, C. Birge of Hamilton presided. Reference was made to Messrs. Munro and Stewart in terms of praise concerning their recent visit to the West Indies on behalf of the association. T. A. Russell, former secretary, was presented with a gold watch. J. F. Stewart stated that the objects of the association were strongly favored by importers in Bermuda and thought that much of the business done outside of Great Britain could be obtained by Canadian manufacturers.

The business of the Toronto Silver Plate Co., Ltd., has grown so extensively the last couple of years that they have found it necessary to make provision for space that will permit of their largely increasing staff. The back of the present premises is being converted into casting rooms for the manufacture of German silver, a new line they have taken up recently.

The Sherwin-Williams Co. are beginning the crushing of seed and making their own linseed oil. A large plant has just been completed for this purpose at Cleveland and it will not only supply all the oil used by the company in the manufacture of their products but will also place them in position to go into the general market with oil.

(This item is of interest in view of the fact that another party of Canadian manufacturers, representative of the C.M.A. have just returned from a business trip to the West Indies where they investigated trade opportunities.)

A. J. Moxham vice-president of The Dominion Iron and Steel Co., has resigned and has been succeeded by James Ross. Mr. Moxham's seat on the directorate has been taken by Hon. Senator L. J. Forget.

James Hunter, general merchant Durham, Ont., has removed his hardware stock into new premises and placed it in charge of Mr. Theobald, late of Scott & Murphy, Mt. Forest.

The Cyclone Woven Wire Fence Co., Toronto has been incorporated for the manufacture and sale of wire fence and fence machines.

WESTERN CANADA NOTES

J. J. Corbett, general manager of the Miller Morse Hardware Co., Ltd., Winnipeg, has recovered from his recent illness and has again resumed his duties.

H. S. Martin, special accessory salesman of Wood Vallance Ltd., Winnipeg, died at Fernie, B.C. Mr. Martin received his early hardware training in Ireland and was connected with Wood Vallance Ltd., until the time of his death. He was buried at Regina.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

THE hardware markets are unusually interesting this week, a variety of developments being recorded. Commencing with price reductions, easier levels are recorded for next season on game traps of various makes, showing a substantial change from last year's quotations. Downward revisions also appear on annealed hay wire and Kraft wrapping paper. The list of price advances includes such items as barbed wire, one make of compass saws and hand saws, while fuel oil is again slightly higher. Western centres record revised quotations on wire; a new discount on Nicholson files reducing these products between seven and eight per cent; a small decrease on pure manila rope; together with higher price levels on extension ladders, coal tar and pine tar. Turpentine attracts special attention, a further upward revision of five cents per gallon being announced on the domestic markets, this change being the culmination of increased demand combined with inadequate supplies. These conditions are described as temporary. Rosin prices are also slightly advanced in sympathy, a similar trend being apparent in these markets. Some unsettlement appears in window glass prices, eastern centres recording a discount on the prevailing box list, as well as similar easier levels on cut sheet sizes. On the other hand, further upward changes are announced in scrap materials, principally affecting brass and steel grades. Increased interest has developed in certain ingot metals such as copper, spelter and lead, but the strength of these movements may not be permanent. There is still some variation reported in prices on sheets and bar products, this situation being attributed to keen competition among distributors. Sheet bookings are well ahead of shipments, however, with a brisk demand generally evident. The opportunities for importing pig iron from Britain is attracting the attention of the domestic steel interests, in view of the coal strike restricting the southern output of this commodity. Reports that shipments of coal are on the way from England to the United States, are also of direct interest from this angle, although it is generally admitted that such coal supplies are not yet on a competitive basis with the American market. Wholesale hardware circles report moderate activity in view of the mid-week holiday, supported by the general tone of expectancy with which the budget announcements were keenly awaited, from the standpoint of the trade. Seasonal business notes a brisk movement in garden requisites such as lawn mowers, garden hose, sprinklers, fountains and hose fittings.

Montreal Markets

MONTREAL, May 25.—The new season's quotations on game traps are announced, showing a substantial reduction on all kinds from last year's prices. Kraft wrapping paper is reduced one and one-half cents per lb., while annealed hay wire is five cents per hundred lbs. lower on the various gauges. Revisions in an upward direction are given on barbed wire and most scrap metals. Barbed wire prices are increased five cents both in spools and catch weights. Both ferrous and non-ferrous scrap are again affected by the stronger tendency in the market. The firm tone, however, is more marked in iron and steel, these showing greater advances. The improvement in the waste material markets is more pronounced, and dealers anticipate more consumer interest in the following months. Keen competition is again evident in iron and steel, and there is still a variation in local quotations although a slight improvement in this direction was apparent in recent weeks. Other lines, such as galvanized sheets, corrugated sheets, wrought pipe, bolts and nuts, eavestrough and conductor pipe are reported as still firm, and lead products are strengthened by the advances being made in certain ingot metals.

METALS STIFFEN LEAD PRODUCTS MARKET

Montreal.

Metals in primary circles continue to strengthen the undertone of finished lead and zinc products. The market for these lines has remained fairly steady since the revision a few weeks ago; ingot metals having been much improved generally. During the past few weeks, however, there have been gains made, copper furnishing the feature in this regard at the present time. It is pointed out by manufacturers that this has a tendency to strengthen solders more than other lines, while other products are steady to firm owing to a better tone in the market in general. Trade is described as steadily improving with increased operations in building circles. Following are unchanged quotations:

LEAD AND ZINC PRODUCTS

Lead pipe, per 100 lbs.	12 00
Lead waste, per 100 lbs.	13 00
Note—Lead pipe is subject to a discount of 10 per cent.	
Lead traps and bends	17½%
Lead wool, lb.	0 13½
Lead sheets, 2½ lbs.	0 10
Lead sheets, 3 to 3½ lbs., sq. ft., lb.	0 09¾
Do., 4 to 8 lbs., sq. ft.	0 09
Cut sheets ¼c. lb. extra, and cut sheets to size, ¾c. lb. extra.	
Solder, guaranteed, lb.	0 25½
Do., strictly, lb.	0 23½
Do., commercial, lb.	0 20½
Do., wiping, lb.	0 21½
Do., wire, lb.	0 34
Zinc sheets, casks	0 11
Do., broken lots	0 11½

BARBED WIRE PRICES ARE SLIGHTLY INCREASED

Montreal.

An advance of five cents is announced on barbed wire quotations, both in 80 rod spools and catch weights. Following are new prices;

BARBED WIRE—

In 80 rod reels, per reel, 2 x 5, $3.50; 4 x 6, $3.75; 4 x 4, $4.05. Catch weights, $4.35 per 100 lbs.

REVISED DISCOUNTS ON SOIL PIPE AND FITTINGS

Montreal.

A revision has been announced in the discounts on soil pipe and fittings, these products being advanced through a lowering of five points on pipe discounts and the cancellation of the extra ten per cent. previously given on fittings. Following are the revised quotations, which bring discounts on these lines to a more uniform basis, a development which has been outlined in recent market reports appearing in Hardware and Meta':

SOIL PIPE—

2 and 3 inch	40%
4 inch	45%
5 and 6 inch	40%
Fittings—	
2 and 6 inch	50%

COPPER AND BRASS GOODS AGAIN FIRMER IN TONE

Montreal

Copper and brass rods, sheets and tubing are again reported as considerably firmer, the easier tendency, noticeable in other outside markets a few weeks ago, making little or no impression on domestic markets. Copper in primary circles shows continued strength both in the U.S. and London, and on the whole moderate improvement has been made. The current buying movement in the finished products is fair, sheets, both copper and brass, being somewhat more active than other lines. Following are unchanged prices:

BRASS—	Base.
Sheets, base	0 24
Rods, base ½ to 1 in., round	0 22
Tubing, seamless, base	0 30
F. o. b. Montreal.	
COPPER—	
Rods, ½ to 2 in.	0 29
Soft sheets, plain, 16 oz., and heavier	0 32
Plain tinned, 16 oz. and heavier	z0 36
Polished, and tinned, 16 oz. and heavier, lb.	0 41
Tubing, lb.	0 32

Above prices are full sheets and bars. Cut sheets and bars are 5c. per lb. higher.

EASIER PRICES ANNOUNCED ON GAME TRAPS

Montreal

New quotations on game traps for next season are announced, showing a substantial reduction from prices of last year. Following are revised prices:

GAME TRAPS—

No.	Victor	Jump	H.&N.	Newhouse
		Per dozen		
0	$1 90	$2 55	....	5 40
1	2 25	2 85	4 25	6 40
1½	3 45	4 15	6 50	9 60
2	4 70	6 40	9 10	14 40
3	8 00	8 60	11 60	19 20
4	9 70	10 25	14 40	22 40

1 Victor Giant, $2.75.

FIRMER TONE EVIDENT IN CORRUGATED SHEETS

Montreal

With the stronger tendency continuing on flat galvanized sheets, the undertone of corrugated continues firm. Manufacturers and dealers state that this tendency, coupled with an improved demand, places the market for corrugated sheets in a much stronger position from week to week. The buying movement has gradually improved with the opening of favorable building weather, and dealers look with a degree of optimism on trade during the following months. Following are list prices and discounts:

CORRUGATED SHEETS	Per 100 sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins., 75c a square extra.

FURTHER REVISION IN MOST SCRAP METALS

Montreal.

A general further advance is given on most lines of scrap metals, this being the second revision in an upward direction in recent weeks. The present changes affect both ferrous and non-ferrous metals, the latter however showing price increases of more marked proportions. Yellow and red brass are increased one-half cent per lb., light and heavy copper one-quarter cent. In iron and steel scrap, boiler plate, wrought iron, wrought pipe, heavy melting steel, malleable and No. 1 machinery cast are all advanced one dollar per ton.

The upward trend in prices is said to reflect the improvement in the market during recent weeks. What is most encouraging is the indication that foreign markets are opening, to an extent at least. Reports from overseas are to the effect that war material is dwindling and what remains is apparently being held pending higher market levels. On this side, there is an increased demand for iron and steel scrap, no doubt assisted by results of the coal strike. Whether the general improvement will continue during the summer months is considered by dealers as problematic, but from present indications the better feeling seems of a healthier nature than has been evident for some time past. Following are quotations at the revision:

WASTE MATERIALS—	
Automobile tires	0 50
Rubber shoes	0 02¾
Yellow brass	0 06
Red brass	0 08¾
Light brass	0 04
Scrap Zinc	0 03½
Lead, heavy	0 04
Lead, tea	0 02¼
Light copper	0 08½
Heavy copper	0 10¾
Wrought iron, R. rd., No. 1, per gr. ton	10 00
Malleable scrap (ton)	9 00
Pipe scrap (ton)	6 50
Heavy Melting steel	9 00 to 9 50
No. 2 busheling,	8 00
Boiler plate	8 00
No. 1 machinery cast	21 00

TROUGH AND PIPE IN GOOD DEMAND

Montreal

Each succeeding week now brings a noticeable improvement in sales of eavestrough, conductor pipe and sundry lines, dealers now describing the movement as quite satisfactory and comparing favourably with last year. This betterment has been particularly pronounced in the past two weeks, and a continued brisk trade is anticipated during the summer months. The undertone of the market is little changed, the firmer tendency still being apparent. List prices and discount are as follows:

EAVESTROUGH—

O. G. round and half-round, per 100 ft.

8 inch	10 inch	12 inch	15 inch	18 inch
$16 90	$18 70	$22 20	$29 80	$37 80

O. G. Square bead, per 100 ft.

8 inch	10 inch	12 inch	15 inch	18 inch
$15 90	$17 70	$21 20	28 80	$36 80

CONDUCTOR PIPE:—round, plain and corrugated, per 100 ft.

2 inch	3 inch	4 inch	5 inch	6 inch
$18 40	$22 30	$29 60	$40 00	$49 00

Discount 70/10 per cent.

CONDUCTOR ELBOWS—

3 inch	6 00
4 inch	10 50
Plain or corrugated.	dozen
2 inch	$ 5 25
5 inch	24 00
6 inch	29 00

Discount 60 per cent.

KEEN COMPETITION IN IRON AND STEEL

Montreal

Although current business in iron and steel is again described as fairly good, and a more optimistic outlook for future trade expressed, there is a more or less unsettled feeling again evident on the local market. The recent advance in quotations announced by local producers was adopted by most distributors who revised their base price from $2.65 to $2.90. At the time certain firms did not increase their price levels, but it was felt that the new quotation would be uniformly adopted in the immediate future as the undertone of the market was undoubtedly very firm. Keen competition, however, still exists, and there is a variation in prices ranging from $2.75 to $3.00 base. The lower quotation is by no means general, and according to one local dealer, is quoted for larger business. Fundamentally the market is still firm, with the following quotations most generally given:

IRON AND STEEL—	
Common bar iron, 100 lbs.	2 90
Refined iron	4 40
Irish finish machinery steel	2 95
Mild steel	2 90
Single reeled machinery steel	5 00
Band steel	3 25
Spring steel	4 50
Sleighshoe steel	2 90
Tire steel	3 10
Harrow tooth steel, per lb.	3 05
Mining tool steel, per lb.	0 20½
Black Diamond tool and cast steel, per lb.	0 20½
Toe caulk steel	3 80

NOTE—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

STILL VARIATION IN SHEET QUOTATIONS

Montreal.

With the undertone of the sheet markets, especially black and galvanized sheets, remaining in a firm position, there is still a variation in quotations among distributors. Many dealers have advanced galvanized prices in recent weeks because of the stronger tendency in the market, but a few distributors are maintaining former lower levels. As in bar iron and steel, there is keen competition, and nothwithstanding the strong undertone, prices are still shaded in certain quarters in an endeavour to secure more business. Stocks, however, are much lighter than they were during the quiet earlier weeks, and a continu-

ation of prolonged deliveries may bring about the required remedy for the present unsettlement. Importers of English sheets state that an active demand continues, with a marked improvement also noted in the tone of the market overseas. Following are average local prices on sheets:

BLACK SHEETS

10 gauge	4 00	4 50
12 gauge	4 10	4 60
14 gauge	4 40	4 70
16 gauge	4 50	4 80
18-20 gauge	4 55	5 05
22-24 gauge	4 60	5 20
26 gauge	4 65	5 25
28 gauge	4 75	5 35

Sheets 3 in. wide, 20 cents per 100 lbs. extra.

GALVANIZED SHEETS

U. S. Standard.

10¾ oz.	6 65	7 10
28 gauge	6 25	6 70
26 gauge	5 95	6 85
22-24 gauge	5 80	6 10
20 gauge	5 65	5 95
18 gauge	5 65	5 85
16 gauge	5 50	5 80
14 gauge	5 35	5 75
12 gauge	5 20	5 75
10 gauge	5 10	5 75

English Standard—	Queen's Head	Fleur-de-lis
28 gauge	7 25	7 00

FAIR DEMAND EVIDENT FOR PIPE FITTINGS

Montreal

There is little or no change in pipe fittings, current demand continuing in fair seasonable proportions, and prices remaining unchanged. Orders are now said to be slightly larger, dealers apparently experiencing a better demand from construction activities. Following are unchanged prices and discounts:

PIPE FITTINGS—

Cast iron fittings	30%
Bushings, cast	32%
Do., malleable	32%
Flanges	40%
Plugs	30%
Flange unions	30%
Malleable unions	47%
Dart Unions, black	33%
Do., galvanized	13%
Nipples, ⅛ to 4 in., close and short	60%
Do., long	65%
Do., 4½ to 8 in., close and short	50%
Do., long	55%
Couplings, 4 in. and under	30%
Do., 4 in., and longer	10%

POUND GOODS—	Black.	Galv.
Class A	0 54	0 67
Class B	0 20	0 28
Class C	0 13	0 20

ANNEALED HAY WIRE PRICES SLIGHTLY REDUCED

Montreal

A reduction of five cents per 100 lbs. is made on annealed hay wire, and following are new quotations on the three gauges:

HAY WIRE—

No. 13, $3.75; No. 14, $3.85; No. 15, $4.00 per 100 lbs.

EASIER QUOTATION ON KRAFT WRAPPING PAPER

Montreal

A lower price is announced on Kraft wrapping paper, this being now quoted at 10¼ cents. Former quotation was 11¾ cents.

FURTHER GAINS MADE IN SOME METALS

Montreal

Ingot metals have remained fairly firm with the exception of tin, which is still rather sluggish, with no apparent sign, as yet, of any reaction in the market in general. There has been a fair advance in certain metals in the past few weeks, and it is considered doubtful by some whether the present pace will continue. The sentiment, however, appears to be decidedly better.

TIN.—It would appear to be impossible for this metal to advance beyond the £150 mark in London, as it invariably recedes after a gain has been made. Until stocks are somewhat lessened, it is evident that no great advance in price is probable, consumption, especially in Europe, being still below normal. This metal is expected to improve but the time is evidently not yet to hand. Local price is unchanged at 34 cents.

COPPER.—There has been a steady advance on copper both in London and New York during the past ten days, and prices have now reached the highest level for some time past. London is firm owing to bullish reports from this side. Consumption in Canada is still much below normal, but the market is stiffer at 17¼ cents for electro and 16¾ for casting.

SPELTER.—The situation of spelter in the U. S. A. is firm, and it is said to be difficult to buy prompt shipment at $5.15 East St. Louis. Some smelters have declined to quote altogether, but the position is, in all probability, accentuated by the coal strike, which affects both production and consumption. London is steady, but the advance in the U. S. A. has shut off imports from this side. Consumption is somewhat better in Canada and the market is firm at 7¾ for shipment from stock.

LEAD.—Both East St. Louis and London have touched the highest point for some months, and the position of lead seems as strong as ever. There have, however, been quite lengthy advances in both markets which can hardly continue indefinitely, and a temporary set-back would not be surprising. At present there is said to be no sign of this, and the market is firm at 7 cents.

ANTIMONY.—There are no special features of interest in connection with this metal, which is quiet and rather dull with quotations unchanged at 6¾ cts. for Chinese, and 7½ cts. for high grade English.

ALUMINUM.—This metal also continues dull with quotations remaining at 24 cents.

Toronto Markets

TORONTO, May 25.—Hardware markets show little variation in price this week, a more steady tone having generally developed. The interest with which the budget was awaited on practically all sides, combined with the mid-week holiday, served to produce a more or less restricted attitude in wholesale hardware circles. The easier price levels now recorded on various makes of game traps, together with the firmer trend in bar iron and steel quotations, supply some of the current premier changes. Fuel oil has again been slightly advanced in price, this product experiencing a brisk demand. Domestic steel markets show unchanged prices, but is is noted that southern steel centres announce some additional advances. Sheet bookings are still reported to be well ahead of shipments, with a brisk demand in evidence. A firmer tendency has developed in wrought piping, while a slightly stronger tone has again been recorded on copper products, in view of the movements of the virgin metal. Moderate activity in brass compression goods is recorded, with more interest now appearing in scrap materials. An increase in current trade in certain ingot metals, such as copper, spelter and lead, attracts consumer attention, although these moderate developments are not yet generally apparent on the local markets.

FUEL OIL QUOTATIONS AGAIN REGISTER ADVANCE

Toronto.

Another slight advance has been recorded in fuel oil quotations, the change being four-tenths of a cent per gallon on all quantities. This development is attributed to the greater demand for fuel oil, with the recent firmer market tone on these products generally. In certain quarters, it is pointed out that the coal strike has created new opportunities in this field:

FUEL OIL—

In barrels	0.10.80
In tank wagons	0.09.80
In tank cars	0.08.80

RUMOR OF CHANGE IN WROUGHT WASHERS

Some price changes are rumored as likely to develop in the near future on wrought washers, but up to the time

of going to press, Hardware and Metal has received no further advice regarding the announcement of such a revision.

GAME TRAPS NOW ON EASIER PRICE LEVELS

Toronto

A reduction has been announced this week in the quotations on various makes of game traps. The revised price levels on the different lines follow:

SOUTHERN STEEL CENTRES RECORD HIGHER PRICES

Toronto.

While the local prices on bar iron and steel remain at the previous levels, the rising trend on southern primary centres is daily evident. Certain producers are now quoting advanced price levels, which in the ordinary course of events are naturally expected to be reflected on the domestic markets in the near future. Keen competition locally is described as the reason why the current quotations remain unchanged, although at the same time it is pointed out that these levels are very firm. Higher fuel costs are stated as assuming larger importance as a market factor, while the mills report that the costs of making steel have advanced further in proportion than the increased quotations to date. There are divergent views as to how long the present strength of the steel situation will last. Some domestic distributors expect a strong market throughout the year. Others express the opinion that much of the present strength depends on the southern coal strike, and therefore in the course of a few months the improvement in demand and firm market trend will gradually disappear. Such observers base their deductions on the principle that actual current consumption of steel is not as heavy as the prevailing ratio of production. At the time of going to press, the average local quotations remained as follows:

IRON AND STEEL—

Mild steel bars, base	2 75
Mild steel bands, 3-16 in. base	3 25
Bar iron, base	2 75
Angle iron, base	2 85
Horseshoe iron	3 60
Tire steel	3 00
Spring steel	6 00
Sleigh shoe steel	2 85
Hoop steel	3 00
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	28 00
Mining drill steel	18 50
Cast tool steel, high grade	30 00
Cast tool steel, medium	18 00

IMPROVEMENT RECORDED IN SALES OF SOIL PIPE

Toronto.

While there still remains some variation between eastern and western distributing centres in the discounts on soil pipe and fittings, yet this is attributed to the difference in local conditions. Local manufacturers and distributors state that they are not anticipating any price developments, and discounts remain at the recent levels. Current trade in soil pipe and fittings is reported as fairly brisk, with special improvement in this direction having been noted during the last few weeks. During the earlier months of the current year, stocks did not move so fast as anticipated, and manufacturers now report that they are considering some curtailment in the ratio of production, supplies now being plentiful to meet the prevailing demand.

8 inch fittings	net

CORDAGE MARKET ON WAY TO IMPROVEMENT

Toronto.

Rope and cordage markets are now on a slightly improved basis, with buying showing some signs of improvement as the season advances. Manufacturers and distributors of cordage report that there has been an increase in general activity during the last two or three weeks, which is more gratifying at this season of the year.

Conditions in the cotton cordage market have been described as a little more encouraging also, although the chief drawback remains in the uncertainty of the raw materials, cotton fluctuating more or less, being soft one week and recovering the next.

CONDITIONS IN BOILER TUBES REMAIN QUIET

Toronto

That distributors of boiler tubes have been out to secure the business even if each order taken involves a more or less direct loss of varying proportions, would be indicated by the shading in these products which has been recorded, thus rendering the current list of prices merely nominal. However, it is stated that the majority of prevailing business is being transacted at the levels given below, some variation being evident according to the size and specifications of the individual order. The liquidation of stocks of tubes has been a factor which all distributors have had to reckon with during the past season, and the fact that the movement has mainly been confined to the smaller sizes for repair work, is described as a prime element in the situation. Stocks of larger-sized tubes are stated to have been particularly embarrassing, in view of the small demand experienced for these lines. The stiffening recently recorded throughout the steel industry has not yet affected boiler tubes in some quarters to the same extent as on other steel products, due to the ratio of stocks on hand, which were secured when costs were high. However, with the brighter tone in steel production circles generally, some signs of improvement in the boiler tube market are looked for in the future, although it is admitted by certain distributors that another season may roll around before this can definitely be stated to have developed. Following is an average price list recorded locally:

BOILER TUBES—

	Seamless	Lapweld.
1 inch	$21 00	$.....
1¼ inch	21 50	.....
1½ inch	22 00	.....
1¾ inch	23 00	.....
2 inch	22 00	17 00
2¼ inch	26 00	18 00
2½ inch	30 00	20 00
3 inch	34 00	25 00
3¼ inch	43 00	27 00
3½ inch	47 00	28 00
4 inch	58 00	35 50

BRISK ACTIVITY IN TROUGH AND PIPE

Toronto

Eavestrough business is now generally on a brisk plane with seasonal improvement in the movement of these products having been recorded during the past few weeks. Conductor pipe and elbows are also in good demand, and both manufacturers and distributors look for a fairly active season. Prices on these lines are unchanged, list quotations and discounts being given below. While small orders generally predominate, yet it is stated that the aggregate constitutes a fair volume, and brisk trade is expected to continue as the season develops.

TROUGH (Eave)—

O. G. Square Bead and half round. Size in girth:	Per 100 ft.

STEADY MARKET NOTED IN COTTON WASTES

Toronto

Little variation is recorded in the market on cotton wastes, the current tone generally being described as quiet, but steady. Quotations remain unchanged, with the raw cotton centres still fluctuating more or less. On the whole, the situation is stated to be fairly satisfactory as compared with last season. Following are unchanged prices:

STOCKS OF GASOLINE NOT AFFECTING PRICES

Toronto.

In connection with the recent increase in gasoline price, it is interesting to note that the present stock of gasoline on this continent is described by reliable authorities to be almost twenty per cent. greater than the supply on hand this time last year. The consumption of gasoline is also stated to be on the increase, the first quarter of the present year recording a heavier consumption than the corresponding period in 1921, while last season recorded a similar advantage over the previous year.

SHEET BOOKINGS WELL AHEAD OF SHIPMENTS

Toronto

Developments in the sheet markets are running along on more settled lines, with the strength of the general situation and the steady improvement in demand, being factors now generally accepted. It is reported that current bookings keep well ahead of shipments, with one result being that importers of English galvanized sheets record exceptionally brisk trade. Despite the coal strike, producers have been increasing output, and on account of the coal strike, steel demand is described as insistent. That a sellers' market has replaced a buyers' market with unusual quickness even for steel products, has been an accepted fact for several weeks, but the question now remaining is how long this condition will be evident. It is noticeable that sheet producers claim that costs are higher, and such a contention is supported by rising prices on coal, coke, pig iron, scrap materials, etc. The building trade is responsible for a certain amount of business in galvanized sheets, this material being used for metallic roofings, eavestrough and similar purposes. The base price of $5.60 is now described as quite firm, with business during the month of May showing a decided advance over April. In the majority of cases this condition produces a brighter feeling in the trade. Current quotations follow:

BLUE ANNEALED—

10 gauge, base	3 50	4 25
12 gauge	3 55	4 30
13 gauge	3 60	4 35

FIRMER TONE EVIDENT IN WROUGHT PIPING

Toronto.

While list No. 54, continues to govern local pipe markets, the firm tendency recently noted in this direction has continued to develop and the future position of wrought piping is described as very strong. This change is attributed to the increasing gains in the steel industry generally, an improvement that has been more or less reflected in practically all steel products. There is also the incentive of an improved demand for piping, however, at this season of the year, distributors stating that present business is fairly brisk and up to expectations. At any rate, current trade is generally reported ahead of last year, with more cheerful prospects regarding future activity. The upward trend referred to has been particularly prominent in southern pipe markets, but it is stated that domestic pipe has developed a firmer attitude in conjunction with, and not because of outside tendencies.

STRONGER TONE AGAIN RECORDED IN COPPER

Toronto

Due to the recent developments in the primary copper markets where this metal has recorded a stronger tone and certain price gains, a firmer tendency is again recorded in the market for finished products, such as sheets, rods and tubing. The huge quantities of scrap brass which have been apparent on the markets for some time past, are now reported as gradually diminishing, this factor also tending to firm up the current market for brass and copper goods. With regard to domestic prices, however, local distributors state that southern developments have not been of a very marked nature and are not yet reflected on domestic centres, although as stated, a stronger trend is noted. Current demand for these products is described as moderately fair, with the following quotations at present in effect:

BRASS

Sheets, base, per lb.	0 21
Tubing, base, per lb.	0 23
Rods, base, per lb.	0 19

COPPER

Rods, base, per lb.	0 27

Do., plain tinned 16 oz. and heavier, per lb.	0 35
Do., polished and tinned 16 oz. and heavier, lb.	0 40
Tubing	0 27

MORE ACTIVITY IN SCRAP METAL MARKETS

Toronto.

The scrap material markets are described as firm, with the recent improved tone generally being maintained and prices holding at the higher revisions. This development is naturally attributed to the strength apparent in the virgin metal markets, this particularly referring to iron and steel scrap, as well as copper grades. Taken altogether, an increased degree of activity is noticeable, but although business is stated to be on the road to improvement, dealers report that consumers are not extensive purchasers at the advanced price levels. Scrap rubber is without change, remaining very quiet. Following are the usual averages of dealers' buying prices for fairly large quantities:

MODERATE ACTIVITY IN COMPRESSION PRODUCTS

Brass compression goods in general now record a better movement, but as one distributor described the situation to Hardware and Metal, there should be an improvement at this season of the year and the present degree of activity was not considered exceptionally startling. Quotations on these products hold at recently revised levels, the seasonal trade serving to slightly strengthen these markets, coupled with a minor recovery in virgin copper and other raw materials. Prevailing price levels, therefore, show no variation, the following discounts remaining in effect:

COMPRESSION GOODS—

Compression work, standard	45%
Fuller work, standard	30%
Bath cocks, compression	41%
do., Fuller	25%
Flat way stop and waste cocks, standard	54%
Brass steam cocks, standard ¼ in. to 2 in.	50%
Do., 2½ in. to 3 in.	43%
Globe angle and check valves, standard	25%
J. M. T.	20-10%
J. M. T. C.	25-10%
J. M. T. Gate Valves	25-10%
Jenkins gate or straightway	25-10%
Jenkins Globe	19-10%
Radiator valves, standard	58%
do., removable disc	58%
Emco check valves, standard	25%
Emco, J. D. rad. valves, screwed	33%
Emco swing check, ¾ in. and 1 in.	40%
Do., Do., Do., other sizes	33%
Webber gate valves	33%
No. 0 and 1, Fuller pattern	30%

London Markets

LONDON, May 25.—Present quotations on staple hardware lines are registering a more steady trend during recent weeks, only few changes being recorded on the current market reports. However, an improvement in general business conditions is also noticeable, orders being larger and more numerous. Lawn mowers, doors and windows, screen wire cloth, prepared paints, linseed oil, white lead, turpentine, wire fence and poultry netting are numbered among the best selling seasonal lines.

REVISED QUOTATIONS ON BRAIDED AWNING CORD

London, Ont.

Revised prices are now in effect on white braided awning cord, quotations on No. 3, and 3½ being slightly higher, while prices on No's 4 and 4½ are lower. This change is made through the issuing of a new list. The discount quotation remains unchanged. Following are revised net prices on this product:

AWNING CORD—	
No. 3, per doz.	$ 2 00
No. 3½, per doz.	2 50
No. 4, per doz.	3 20
No. 4½, per doz.	4 50

COMPASS SAWS ARE FIVE PER CENT. HIGHER

London, Ont.

An upward revision has appeared in quotations of the Shurley and District Post Boy compass saws, the change amounting to an approximate five per cent advance. Post boy hand saws are also increased in price. Following are the revised levels:

COMPASS SAWS—	Per Doz.
No. 108 x 12"	$ 6 85
14"	7 35
HAND SAWS—	
No. 1914 x 26"	$40 00

FIRM UNDERTONE STILL NOTED IN TURPENTINE

London, Ont.

While local turpentine prices remain at the revision recorded last week, the firmer trend in these markets is generally continuing with present indications showing no signs of weakening. On practically all centres, turpentine is now reported as seasonably active, with the following quotations prevailing locally:

TURPENTINE—	Imp. Gal.
1 bbl. lots	1 35
2 to 4 bbl. lots	1 34
5 gal. lots	1 50

SCREEN WIRE CLOTH IN POPULAR DEMAND

London, Ont.

With the advent of warmer weather, screen wire cloth sales are now reported in full swing. These products have generally enjoyed a good Spring demand, with the current movement being described as both brisk and satisfactory. Uncharge quotations are the following:

SCREEN WIRE CLOTH—

Painted Black $3.00 per 100 sq. feet.
Galvanized, $3.60 per 100 sq. ft.
Bronze $10.00 per 100 sq. ft.

UPWARD PRICE SWING APPARENT IN LINSEED

London, Ont.

The advance of five cents per gallon announced last week in the local prices on linseed oil, is still evident, this generally being considered a reflection of the firmer trend recently apparent in linseed markets. The present strong position of oil is attributed to the increased current demand coupled with the fact that flax seed prices are still on an upward trend.

LINSEED OIL—	Raw.	Boiled.
1 to 2 bbls., per gal.	1 15	1 18
3 to 5 bbls., per gal.	1 14	1 17
6 to 9 bbls., per gal.	1 12	1 15

Less barrels, add 15 cents gal.

PAINT PRODUCTS NOW SHOW BRISK ACIVITY

London, Ont.

An excellent sale has been recorded in most quarters for paint and paint products generally. This activity has been especially marked in ready-mixed paints, and kindred lines. Dealers report that alabastine has recorded a brisk seasonal movement. Quotations on this product remain as follows:

ALABASTINE—White and Colors	Per 11 lbs.
5 lb. Packages,	$ 9 60
2½ lb packages	10 00

SEASONAL SALES FOR WHITE LEAD IN OIL

London, Ont.

Brisk sales have been recorded this week for white lead in oil, the product having recently been much firmer due to the trend of the primary metal markets. Linseed oil prices have also been on the increase, both these factors contributing to the prevailing market tone of white lead. Following are unchanged price levels:

WHITE LEAD IN OIL—	Tons.	Less Tons.
Pure, per 100 lbs.	13 30	13 65
Elephant	13 80	14 15

IMPROVEMENT NOTED IN LAWN MOWER SALES

London, Ont.

The brighter spring weather has stimulated the sale of lawn mowers, and dealers generally report more activity in these products during the past few days. Following are list quotations and discount on the Taylor-Forbes line:

LAWN MOWERS—

Daisy—12 in. $8.65; 14 in. $9.00; 16 in. $9.20.
Star—12 in. $9.70; 14 in. $10.40; 16 in. $11.10.
Woodyatt—12 in. $11.25; 14 in. $12.00; 16 in. $12.75; 18 in. $13.50; 20 in. $14.25.
Empress—14 in. $14.70; 16 in. $15.50; 18 in. $16.20; 20 in., $16.90.
Less 20 per cent.

BRIGHTER DAYS BRING CALL FOR POLISHES

London, Ont.

Merchants generally report a brisk sale for furniture polish and kindred lines during recent weeks, the call for polish being the natural result of household cleaning, usually apparent with the coming of brighter days. Prevailing price levels follow:

FURNITURE POLISH—	Per Doz.
O-Cedar	
4 oz. bottles	2 40
12 oz. bottles	4 80
Quart cans	12 00
½ gallon cans	20 00
1 gallon cans	28 00
Liquid Veneer	
4 oz. bottles	2 40
12 oz. bottles	4 80
32 oz. bottles	10 00
	Each
64 oz. cans	1 34
128 oz. cans	2 34

FENCE STRETCHERS ALSO IN SEASONAL MOVEMENT

London, Ont.

Among other seasonal products, fence stretchers are reported as registering a noticeable movement. The following are current prices on these goods:

FENCE STRETCHERS	
McCloskey Grips, each	70
Richard Wilcox	Each
No. 440 x 2	$ 1 70
No. 340 x 1	1 50
No. 340 x 2	2 50

STILL RECORD CALL FOR HORSE CLIPPERS

London, Ont.

Merchants also record that power horse clippers and parts continue to sell well, the current quotations on the Stewart line remaining at list less 25 per cent.

FUSE PLUG QUOTATIONS TEN PER CENT. LOWER

London, Ont.

New prices on fuse plugs, representing a reduction of around ten per cent, have appeared on the local markets. The 10 to 30 amp. are now quoted at $4.75 per 100.

Winnipeg Markets

WINNIPEG, May 25.—Changes both of an upward and downward nature feature current hardware market reports. Lower quotations appear on the Nicholson line of files, while there is also a slight reduction on pure manila rope. On the other hand, increased prices are announced on extension ladders, coal tar and pine tar. A slight revision is also on coiled spring wire and galvanized wire quotations, some of the new levels being higher, and others a little lower.

BRISKER TRADE NOTED IN LINSEED OIL

Winnipeg.

The trend of linseed oil quotations continues to closely follow the current movements of the flaxseed market. There is also quite an improvement in the demand for this product. The re-

cent higher oil quotations continue in effect, as follows: Raw $1.20 per gal. and boiled $1.23 per gal., in barrel lots.

INCREASED QUOTATIONS ON EXTENSION LADDERS

Winnipeg.

Extension ladder quotations are now advanced a few cents per foot. Following are the revised prices:

EXTENSION LADDERS—

20 $6.10 each; 24 $7.30; 28 $8.50; 32 $9.75; 36 $12.05; 40 $13.40.

GARDEN REQUISITES IN BRISK SEASONAL TRADE

Winnipeg.

Lawn mowers and other lawn supplies such as sprinklers, fountains and hose fittings, etc., are reported as being active sellers. These articles were not booked very extensively in the spring, but the warmer weather has brought about a good demand. Following are the unchanged quotations on lawn mowers:

LAWN MOWERS—

Woodyatt.....14 in. $10.50, 16 in. $11.00.
Empress, ...14 in. $12.50. 16 in. $13.25.
Daisy .... 14 in. $7.75 16 in. $8.00.
Star ......14 in. $7.40 16 in. $7.85.

ADVANCED PRICES ON PINE AND COAL TAR

Winnipeg.

A slight increase in prices has been recorded in pine and coal tar. Following are the revised quotations:

PINE TAR—

Barrels, .80 gal. 5 gals. $1.25 gal. 1 ga. $1.35 ea.; ½ ga. .75 ea.; Quarts, $4.80 doz. Pints $2.90 doz. ½ pints, $1.80 doz.

COAL TAR—

Barrels, $11.00 bbl.; 5 gas., .70 gal.; 1 ga., .80 each; ½ ga., .47½ ea; Quarts $3.30 doz.; Pints $2.10 doz.; * Pints, $1.50 doz.

SLIGHT REVISION NOTED IN WIRE QUOTATIONS

Winnipeg.

Certain slight changes have been made in wire prices, some are lower and other are slightly higher. Following are the revised quotations:

COILED SPRING WIRE—

No. 9 Winnipeg, $4.75; No. 12 Winnipeg, $4.95.

PLAIN GALVANIZED WIRE—

No. 9 Winnipeg $4.70; Fort William, $4.10. No. 12, Winnipeg, $4.90; Fort William, $4.30.

WIRE IN COILS—

Galvanized, No. 8, $5.40; 9, $4.70; 10, $5.50; 11, $5.60; 12, $4.90; 13, $5.05; 14, $6.10; 15, $6.50; 16 $6.85.

REVISION IN DISCOUNT ON NICHOLSON FILES

Winnipeg.

Through a revision in the discount, Nicholsons' files are lower in price. These products are now quoted at 40 per cent. off list prices.

SLIGHT REDUCTION ON PURE MANILA ROPE

Winnipeg.

This week has brought about a slight revision in the price of rope and affects only the pure manila which is a half cent lower. Following are the present quotations:

ROPE—

Sisal—¼ and 5-16 .20½; ⅜ .20; 7-16, ½ and 9-16, .19½; ⅝ .19; ¾ and larger, .18½.
British Manila or African Hemp—¼ and 5-16, .22; ⅜, .219; 7-16, ½ and 9-16, .21; ⅝, 20½; ¾ and larger, .20.
Pure Manila—¼ and 5-16, .24; ⅜, .23½; 7-16, ½ and 9-16, .23; ⅝, .22½; ¾ and larger, .22.
Sisal Lariat—3 x 7-16, .23½; 4 x 7-16, .24½.
Manila Lariat—3 x 7-16, .27; 4 x 7-16, .28.
Extra for Transmission. Rope .05 per lb. over Pure Manila Base.
Extra for Drilling Cable .02 per lb. over Pure Manila Base.
Lath yarn, .18½.
Cotton Rope—3-16, .48; ¼ and up .46; Tarred Marlin .48.

Hamilton Markets

HAMILTON, May 25.—During the past few days summer weather has undoubtedly been somewhat backward, and this is cited as delaying, to some extent, the full movement of summer hardware lines. Recent reports from jobbing circles indicate that repeat orders have not yet come to hand in either the volume or numbers that warmer weather would probably have induced, but that a moderate proportion of activity is anticipated during the ensuing weeks, as improvement in this direction should now become apparent. Wholesale distributors are. therefore, reasonably optimistic regarding the volume of summer business, while retail merchants are diligently applying themserves to pushing the sale of seasonal products and supplying the needs of their generally responsive clientele.

As a result of existing abnormal industrial conditions in and about the city, there has been very little industrial or commercial building so far this spring, but there has been considerable activity in house building, more especially moderate priced homes. Building permits for the month of April amounted to $731,300, as against $430,200 for the same month last year.

That the housing situation promises to improve steadily is indicated by the fact that $396,500 was for dwellings.

Good Accessory Sales

There is also a better demand all along the line for automobile accessories. Many merchants report double the amount of business in these lines that was evident several weeks ago. All kinds of repair parts and tools are generally required together with the more novel type of accessory. This is attributed to the regular opening of the motorist season, which has been given much impetus through the improvement in provincial roads, coupled with the much larger number of automobiles in operation each succeeding year.

An improved demand continues for seasonable tools and garden rakes, hoes, spades, lawnmowers, hose, etc. It is stated on very good authority that retailers are meeting their commitments fairly satisfactorily and that there is no immediate danger of liquidation by any of the trade. Special sales, in evidence a month or so ago, are not nearly as numerous and it is believed business has settled down to a normal trade and will continue so unless something, at present unforeseen, occurs.

The iron and steel markets present an interesting study at present and developments in this industry have such an important bearing on the price and supply of hardware that the situation is considered well worth the attention of hardware merchants. The upward trend has been reflected in recent events on domestic centres, and a firm tone continues in evidence.

Reports from the southern fields indicate that the regular coal strike is thought likely to last for several months while the strikes in non-union districts, instead of playing out in a few weeks as was at first expected, may last nearly, if not quite as long. The operators are making no effort to force the situation, preferring to get coal where they can, and at whatever expenses is involved.

It is also pointed out that quite a few buyers are offering mills third and even fourth quarter contracts, and when producers have no regular quotations for those deliveries, buyers in some cases are willing to take the contracts and let the price be set later by the mills. In other words, the market has turned wholly in favor of sellers, whereas until quite recently it was a buyers' market.

Pittsburg Markets

PITTSBURG, May 25.—The present rate of railroad steel buying is as heavy as could be expected. It should be remembered, however, that freight cars cannot furnish as large an outlet for the steel industry as used to be the case, on account of steel making capacity having been so greatly increased. The present capacity is about 150 per cent. greater than that of 1904, and 50 per cent. above that of 1913, while no heavier freight car buying than in those years can be expected.

Structural steel lettings have been heavy since April 1, equalling approximately the fabricating shop capacity, which is 180,000 to 200,000 net tons a month. Lettings in the first three months of the year equalled 53 per cent. of capacity, while in 1921 it was 35 per cent. Automobile production is very heavy. Studebaker, Dodge, Maxwell, Ford and Chevrolet are producing more cars than ever in their history. Production in April, as reported by the Department of Commerce, with reports from a few small companies lacking, was 196,512 passenger cars, and 21,944 trucks, against 81,638 passenger cars, and 9,204 trucks, in January. Production this month is running a trifle heavier still.

These three important lines of consumption, extremely stagnant in 1921, are the largest outlets for steel at the present time. They represent at the present rate about 500,000 gross tons a month of finished rolled steel, apart from iron castings, etc., which is equal to a rate of 6,000,000 gross tons a year.

Follow Up Letters Bring Paint Business

Specific Cases Where Prospects Have Responded to Urgings to Buy Paint Many Months After Given by Merchant—A Specific Letter for Each Class of Paint Prospect Brings Best Results—Some Suggested Letters Which Have Pulled Results

HAVING a customer come to the department and ask for a brand of paint the name of which had been impressed upon him by the hardware merchant four months previous was the recent experience of the Mathewson Hardware Co., Toronto. This is not an unusual experience, it happens every day in many hardware stores. Still the importance of advertising, displaying and talking certain paints is not fully appreciated by all merchants.

The use of letters to live paint prospects is a good means of establishing intimate connections which generally are productive of business, but care should be taken in the preparation of lists and also of the letters. This latter should be altered to suit the particular needs of the prospect addressed. Some suggestions in this regard are outlined herewith, based on the experience of a merchant recently interviewed by Hardware and Metal.

There is a special letter which is mailed to the architects in the city and in the nearby towns. There is another letter designed to sell paint to the ranchers and farmers. Another letter reaches persons who have taken out building permits, and another letter is used to reach the builders listed on those permits. Painters and contractors receive another letter. Then the apartment house owners receive the attention of this aggressive firm. Even hotels are not overlooked in the fine combing of the territory for business.

Letter to Architects

A number of the company's sales letters are reproduced here. The first is addressed to architects. Notice how it is made personal through the exhibit which is mentioned. Architects will naturally be interested in the store.

An entirely new Architectural Exhibit is now on display at our store. It is a library of finishes showing varnished effects on woods of all kinds, also, the white and delicately tinted enamel panels. These panels are large and showy so that they may be placed alongside our drapes and wallpaper patterns and the desired effect seen at a glance.

We claim your co-operation because we are endeavoring to create in the minds of the public the desire to build and when building, to build well. The number of people, aside from our regular customers and friends, who call at our store during the day, is astonishing, and by having this exhibit placed so conveniently in the center of the shopping district its effectiveness is doubly increased. The only reward we ask is that you pay us a visit and see for yourself. If there are any additions to be made to this collection of panels, we would deem it a favor to receive your suggestions.

We promise you a surprise when you see this exhibit.

Yours very truly,

Letter to Farmers and Ranchers

The letter which follows was addressed to farmers and ranchers. The way in which it starts is unusual and makes the recipient believe that he is getting a letter on some business which is then under way. And the subject matter is calculated to get the favorable attention of the reader, for the rancher is probably more interested in pure paint than is any other class of paint user.

Dear Sir:

When you speak of "pure paint," you mean but one thing—a paint that is as chemically pure as the best materials on the market will allow. It means that no substitute is used in place of the real article, no camouflage to increase the weight or volume, in fact, a paint that will last for a period of years at the purpose for which it is intended.

Where the farm or ranch is concerned, the purest paint is none too good. Its purpose is to insure your buildings against deterioration, your roofs from leaks, your implements from rust, and eliminate the expense incurred through the necessity of repainting each year.

Our paints are 100 per cent chemically pure. They are made up to a standard—not down to a price. Years of manufacturing a product to withstand this climate, has proved these paints superior to any on the market.

Yours very truly,

To the Prospective Builder

When this store addresses the owner who takes out a permit to build, it makes its sales letter one which is almost certain to produce results. For the owner is just ready to talk about paint when the letter comes. But here is the letter for you to anaylze:

Dear Sir:

A building permit taken out in your name signifies that you will soon be in need of paint material.

Consider a chemically pure paint, made to withstand the climate of Canada. A paint that will protect your building from deterioration for years to come, and at the same time enhance the value of it by its beautifying effect.

We have the reputation of having sold a chemically-pure, analysis-on-every-can-of paint for many years.

Many of the most beautiful and prominent residences and business structures in this city and district stand to-day as tribute to the lasting quality and beautifying effect of our line of paint.

A card or phone call will bring our representative to you at your convenience.

May we have the pleasure of serving you?

Yours very truly,

To the Builder Himself

So that the builder working for the owner mentioned in the above letter is not able to switch buying places on the owner, the store sends him a sales letter also. This aims to sell the builder on the products secured from the store.

Dear Sir:

The buildings that you have in process of erection will stand, when finished, as a testimonial of your success. Therefore, you desire their appearance to be beyond criticism.

We manufacture a chemically-pure paint that will withstand the climate for a period of years where other materials fail. That's why the name (store) is insurance against poor material.

A card or phone call will bring our representative to you at your convenience.

May we have the pleasure of serving you?

Yours very truly,

To Apartment Owners

If the occupants of apartment houses in the city could read the letter which the store sends to the apartment house

(Continued on page 60)

SERVICE

CONFIDENCE

FAIR DEALING

RELATIVITY

Business growth is, and always will be, relative. It is limited or unlimited according to the confidence or distrust you create in your Community—thru your personal conduct and the articles you sell.

Take the average community. Apparently the scope of the Hardware Merchant serving it is very limited. It is and it is not! By this we mean: if the character of personal service and the performance of the articles sold is such as to cause annoyance, resentment, disappointment or expense—the more articles you sell the greater the limitation to the permanency of your trade and your "market possibilities." On the other hand, if your conduct and the articles you sell are such as to purchase the approval, good will and satisfaction of your patronage—then the more articles you sell the greater the scope for the permanency of your sales and the expansion of your market.

For instance: Two or three mornings ago we received a letter from a merchant in a town of 500 population asking for our Agency. The gentleman is a stranger to us. He was prompted to apply for the "High Standard" Agency by a resident who having used our products would use no other and who, because of her social prestige, exerted a tremendous influence on the rest of her community. So it is with *your* market. It grows or diminishes in proportion to the kind and quality of the service you render.

We are not speaking now of the hectic and temporary growth which seems to prosper on cheap, inefficient and therefore costly articles—sooner or later these appearances must give way to disintegration. We mean when we speak of growth, *the progress which is the result of well calculated, ethically sound and commercially practical principles and policies.*

The Brush Department

Brushes Dominate Special "Sanitary" Display

Hardwareman Has Numerous Lines Designed for the Sanitary Requirements of the Home Which Can be Grouped in an Effective Window Display Showing Importance of Sanitation

DISCUSSING brush sales with a Toronto hardware merchant this week Hardware and Metal was advised of the importance and effectiveness of the "sanitary" appeal in the sale of brushes. This merchant pointed out that much propaganda is being spread these days pointing to the high mortality which results from unsanitary conditions or failure to live up to the standards available by using modern utensils. Following out this idea he emphasizes the fact that the brush for the purpose is the only one which can produce the desired result. Thus only a radiator brush can properly clean the inside of a radiator and eliminate all the accumulation of dust which gathers here and is a prolific source of contamination if neglected. A banister brush is the only one which will properly clean the spaces between the spindles that is without a waste of time on the operation.

Then there is the closet bowl brush which facilitates the cleansing of this piece of bathroom equipment which if neglected becomes unsanitary. Clothes brushes, scrub brushes, shaving brushes, floor brushes, paint brushes, in fact all types of brushes can be sold as an implement to aid in bettering the sanitary condition of the home. The suggestion is made that hardware merchants arrange a series of displays at certain seasons of the year in which the underlying idea will be sanitation. In this display can be shown the various utensils necessary in keeping the home, outbuildings, back yards, etc., clean. In such a display brushes would of necessity form an important part for they are used in connection with almost every operation. The housewife is always attracted and interested by anything which tends to make the home clean and sanitary as she is anxious to safeguard the health of growing children. The same might be said of the husband, in fact everyone is interested in the question of sanitation because it is something of vital importance. It is such matters of importance which form the best basis for successful advertising of brushes and other hardware.

Makes Frames for Hot-Beds With Odd Sized Pieces of Left-Over Glass

"*LET'S GO BACK TO THE PRAIRIE. NO. IT'S BETTER WHERE WE ARE.*" This is a sample of the signs that the residents of the Grandview district watch for with amusement as they are posted on the windows of the Rowland Hardware and Paint Co. windows at 1130 Commercial Drive, Vancouver, B. C.

On the days when the snow was on the ground, and they were quite frequent last winter, the sign on the window would suggest a return to the prairies. This caught the eye of the whole district because the majority are from the prairie provinces and its just the thing they were jocularly saying to each other. "I thought we came here to escape the snow. Look at this," etc. Then the sun comes out and the grass is green, and the waters sparkle and the mountains stand out clear in their various shades of blue and every one says, "Well, this is pretty good after all, eh?" and the Rowland Hardware window says "Good-by Winter—Hello Spring."

Behind all this good humoured window drollery there is a steady business going on right now. The interior paints and varnishes and enamels are from the prairie provinces and it's just the thing they were jocularly house painting jobs and the renters are figuring on building hardware.

Mr. Rowland has found a good way to use up his odd ends of glass. He has a carpenter make up frames suited for hot-beds. The frames are made to take the odd sized panes. Then the hot-bed frames, complete with glass are sold.

There are many catchy signs, lettered by Mr. Rowland, displayed around the store. One is

AND REMEMBER
If you are not satisfied
in any way after buying
at this store—
YOUR MONEY IS WAITING.

FOLLOW UP LETTERS BRING PAINT BUSINESS

(Continued from page 58)

owners, that store would get the bulk of the retail paint business from apartment renters in the city. Here is what is said to apartment house owners to get their business.

Dear Sir:

The period for brightening up the interior and exterior of your building is almost at an end. New tenants will soon be coming in and they will be looking for attractive surroundings in which to live.

Are you prepared to receive them?

There is yet time to freshen up the floors and woodwork, retouch the enamel in kitchens and bathrooms and generally make things look like new.

The application of our cement coating on the exterior cement or stucco work will waterproof the walls through the rainy season, preventing damaging leaks.

If you have not already cleaned house we are at your service to supply the material and offer suggestions where they are needed. Have our representative call or phone us and your requirements will receive our immediate attention.

Yours very truly,

SAYS UNITED KINGDOM GOODS REGAINING POPULARITY

"Manufacturers in the Kitchener-Waterloo district are fairly busy, but do not expect the current year to be one of unusual activity," said F. W. Field, British Government Trade Commissioner in Ontario, on his return to Toronto after a ten-days' visit to industrial centres in that region. "I found a keen desire among manufacturers to develop export trade, and I was able to interest many of them in the desirability of purchasing their imports, as far as possible, in the United Kingdom or another part of the Empire.

"I gathered the impression that Wellington, Waterloo, and neighboring counties of Ontario are among the most thrifty, industrious and prosperous of the province. The Kitchener Electrical Exhibition was a great success, and considerable business was done there. I also visited the made-in-Guelph exhibition, which is being held all this week.

"I find that goods of United Kingdom manufacture are slowing regaining their pre-war ground in Ontario."

Boeckh's Brush News

Introducing

Boeckh's HI-GEN-IC BRUSH

ALUMINUM BACK — PURE BRISTLES RUBBER SET

For the Hands, Nails, Scalp and Bath

Our new Hi-Gen-Ic Hand and Bath Brush is a wonderful new line for the hardware merchant. It is a brush that is needed by the people who are already your customers. A brush that is in demand by all who want thorough cleanliness.

Formed to fit the hand, and built only of bristles of the finest grade, firmly embedded in vulcanized rubber, and this held in a vise-like grip by a case of highly polished aluminum, which forms the back of the brush—the Hi-Gen-Ic is attractive, light in weight, and of a size that can be conveniently carried in a coat pocket.

Hi-Gen-Ic has Strong Selling Points

It is practically indestructible. Its bristles can never come out. The hardest wear, and continuous sterilizing will not harm the Hi-Gen-Ic. It is absolutely sanitary. Dirt will not collect on it. Germs cannot breed in it. It cannot waterlog, foul or sour. And with every Hi-Gen-Ic Brush goes our money-back guarantee.

The Hi-Gen-Ic Brush

Note the Beautifully Polished Aluminum Back

Doctors have proved that many of the very worst diseases are carried by means of germ-laden hands. Constant use of the Hi-Gen-Ic keeps the hands healthy, smooth, absolutely clean, and free from germs.

An article having so many splendid selling points cannot fail to prove a profitable all-year-round seller for you.

Extensive Advertising Campaign

We are spending large sums of money advertising the new Hi-Gen-Ic Brush in papers throughout the country. Take advantage of this campaign, and reap its benefits. This you can do by beginning **right now** to sell Boeckh's Hi-Gen-Ic Hand and Bath Brushes.

To assist you further, we have a handsome plate glass display case which contains eight Hi-Gen-Ic Brushes. This case prominently placed in your store will prove a splendid salesman. Write for full particulars on this miniature show case.

Weekly Paint Markets

Montreal

MONTREAL, May 25.—The paint markets are featured this week by further price advances on turpentine and rosin, also lower quotations on window glass. Linseed oil prices are unchanged but the market continues firm with flax-seed remaining in a steady position. Oil demand is active and with comparatively low stocks of seed, a strong outlook is lent to the situation. Turpentine prices register a five cent advance, and an added feature to the local market is the low stocks on hand. With the movement becoming more active in recent weeks, dealers' supplies have been taxed to the extent that very little turpentine is now offered and certain distributors have withdrawn from the market. Apart from this firming tendency locally, the situation in the South is still strong. Stocks there remain of a light nature while demand, especially European, has become much more active. Rosin quotations show a corresponding increase, with much the same tendency apparent in this market as in turpentine.

As stated, easier prices are announced on window glass, a discount of fifteen per cent. being given on former net list. Cut sheet sizes also have an extra ten per cent. added to former discounts. The opening of navigation has caused an easier tendency in the market, and keen competition is stated to have been a determining factor in the present developments. Trade in paint, varnishes, and white lead continue seasonably active with little or no change to record, the markets remaining firm.

LOW TURPENTINE STOCKS ADVANCE IN QUOTATIONS

Montreal.

An increase of a marked nature is recorded on turpentine this week, the price level being advanced five cents to $1.27 per gallon in one barrel lots. Added to the firm tone in the market in the South is the stronger tendency locally owing to lessened stocks and a temporary shortage of supplies. Certain firms have now withdrawn quotations as a result, while others report only a limited stock for the increased demand. It is also noted that dealers who now have no turpentine to sell are those who in recent weeks were quoting a few cents below values with the statement that higher prices would be necessary when they were again forced to buy. Importers and distributors state that fresh shipments are expected within the next few days, but whether these will be ample to replenish all stocks, and thus fully relieve the situation is considered problematic. A heavier buying movement is also reported in the south, European demand especially showing a marked increase, and with stocks of a light nature in primary centres, there is a probability, according to one local importer, of a firm market for the ensuing weeks. However, the heaviest buying movement in turpentine is usually over within the next four or five weeks, and little fear is generally expressed of the present shortage reaching serious proportions. Revised quotations are as follows:

TURPENTINE—	Imp. gal.
1 barrel lots	1 27
2 to 4 barrel lots, per gal.	1 26
Broken lots	1 37

ADVANCED QUOTATIONS RECORDED ON ROSIN

Montreal.

Current quotations on rosin show a substantial advance on the local market, with the undertone, as in turpentine, described as firm. Recent reports from Naval Stores in the South, state that demand has shown an appreciable increase, European buyers showing considerably more interest. The stronger tendency is said to be more pronounced on the higher grades, with only moderate stocks available. Following are prevailing prices:

RESIN—

	bbls.	100-lb. kegs	Less quantities per 100 lbs.
G., medium grade	7 25	8 75	10 25
Water white	9 40	10 90	12 40

LINSEED OIL STILL IN A STRONG POSITION

Montreal.

Although current quotations on linseed oil remain at last week's figures, the undertone of the market is still strong. The flax market has continued firm during the week, and while slight fluctuations have occurred, there has been a further gain made in seed prices. The seed market is now on a comparatively higher plane, and according to those well informed there is every likelihood of the strength being maintained. Heavier shipments are being made from warehouses in the Canadian West, and available stocks, which have been lighter than in previous years, are dwindling. With American crushers still looking to this source, and consumption of oil continuing at its present ratio, there is reason to believe that earlier predictions of seed shortage holding the oil market in a strong position, are to be realized in the future. By-products, cake and meal, are again becoming a prominent factor, with higher price levels again reported this week. Local demand for oil continues in seasonable proportions, the increase in trade during recent weeks being well maintained, notwithstanding the higher market levels. Following are unchanged quotations:

LINSEED OIL—	Raw.	Boiled.
8 to 5 barrel lots, per gal.	1 08	1 10
1 to 2 barrel lots, per gal.	1 10	1 12

Less barrels, add 10 cents per gallon.

DISCOUNT ADDED TO WINDOW GLASS PRICES

Montreal

Through adding a discount to former net prices, a substantial reduction is made on window glass. Present quotations are net list less 15 per cent., with cut sheet sizes less 70 and 10 per cent., former discount being only 70 per cent. The recent opening of direct navigation to this port, with lower transportation costs on import, is stated to be the chief reason for announcing the reduction, while keen competition is admitted as playing no small part in the glass market for some time past. Prevailing list with discount will be found on current market pages.

Toronto

TORONTO, May 25.—Another increase of five cents per gallon in the local quotation on turpentine supplies a prominent factor in current paint market reports, this revision being attributed to the shortage of this product apparent in local quarters. Distributors in general have been awaiting the easing of prices at southern producing centres, before placing extensive commitments. The policy of securing supplies for immediate requirements has been followed throughout the earlier months with the result that an increase in consuming demand finds stocks depleted, this having the consequent development that holders of turpentine not only reflect the higher levels of the primary markets in their asking prices, but are conceded to be in a position where any advance is considered reasonable under the circumstances. Distributors also claim that shipments at present on the

TORONTO PAINT MARKET

(Continued from Page 62)

way are well booked ahead, and until fresh receipts in the south are on a more extensive scale and quotations consequently easier, the local market trend is expected to remain firm. Others state that these new higher levels are generally looked upon as more or less temporary.

No change is evident in linseed oil quotations, the recent firmness generally being maintained owing to the high flax seed prices. The shellac markets are slightly easier, with other products unchanged. Current trade in paints and varnishes is described as remarkably brisk, one manufacturer reporting to Hardware and Metal that they were now doing a very fine business. The arrival of more seasonal weather has been an added stimulant in this direction.

TURPENTINE INCREASE CAUSED BY SHORTAGE

Toronto

With turpentine stocks locally reported to be at a very low level, distributing interests are in a firm position as regards asking prices and another advance of five cents per gallon has been announced. This places the gallon price for one barrel lots at $1.40. Such a condition, however, is described as temporary, fresh shipments being on the way which are expected to relieve the situation. The demand this year is stated to be well ahead of the records of the previous season, and the increased consumption, coupled with restricted production in the south, has found local supplies inadequate to care for requirements until the new crop is evident in larger quantities.

Only a limited amount of business has been transacted in the turpentine markets due to the fact that stocks are still generally reported to be more or less at the point of exhaustion. Consumers have momentarily expected the primary southern centres to weaken, due to the larger volume of fresh receipts that should become apparent at this season. Up to the present, however, the increased demand for turpentine on both domestic and outside markets, has generally taken care of new stocks. A brisk demand is looked for by producers, as it is conceded that while current trading has improved, yet consumers have only been buying in small amounts for immediate requirements. Local stocks are still on the small side, recent arrivals having been booked up and shipments on the way also reported as well as taken care of. Following are revised local price levels:

TURPENTINE—	Imp. gal.
1 barrel lots	1 40
2 to 4 barrel lots	1 39
5 gallon lots	1 55

Less than 1 barrel lots—15 cents per gallon extra.

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

FAIRLY BRISK DEMAND FOR LINSEED OIL

Toronto.

Linseed oil continues to be in fairly brisk demand, although the total volume of business transacted was not so large as during previous weeks. Prices remain at the higher level recorded last week, with a large number of inquiries evident. Flax seed quotations remain firm at recent advances, and there is an all-round increase in the consumption of oil, supporting the current market trend. It is reported that linoleum manufacturers, as well as paint and varnish makers have recently been covering their forward requirements of linseed, and this development has aided in bringing about the prevailing quotations. A slightly irregular tone is recorded in some quarters owing to the fact that prices are being quoted a few cents lower than the average, but this is generally attributed to competition evident as a result of demand slowing up a little, since the higher levels were reached.

LINSEED OIL—	Per gallon Raw	Boiled
1 to 2 barrel lots	1 15	1 18
3 to 4 barrel lots	1 14	1 71
6 to 9 barrel lots	1 12	1 15

Less barrels, add 15 cents per gallon.

INCREASED TRADE IN PAINTS AND VARNISHES

Toronto

Both producers and distributors of paint and the allied products, generally report a marked increase in general buying activity during the past week or two. The seasonal movement of these goods is now assuming more normal proportions, with many repeat orders coming to hand which swell the volume of current business. The stimulus of spring clean-up and paint-up campaigns conducted in various city and country districts has reflected a beneficial effect in the call for paints and varnishes and many merchants record brisk activity in this department. While the full force of the movement was a little late in arriving, owing to delayed weather conditions, it is now considered apparent that the paint industry is entering upon a swing of enthusiasm and enlarged influence which will carry a marked degree of activity throughout the following months, in all phases of the trade.

SOME UNSETTLEMENT IN GLASS QUOTATIONS

Toronto.

While some indication of price cutting in window glass has been rumored in certain quarters, this condition is described as of a minor character and not locally apparent. New supplies of window glass are now arriving, but local stocks are stated to be moderate, with current sales activity of a satisfactory nature for this time of the year. Demand is described by glass distributors as fairly good, with the general market tone as firm. One importer stated to Hardware and Metal that they are not looking for any change in price, at present, but it is noticeable that eastern markets record a discount off the box list, as well as similar easier changes on the cut sheet sizes. Therefore, such new revised levels may also become effect locally. With the increased activity in building circles creating some improvement over the demand for glass recorded last year, a brighter outlook prevails in the industry, in spite of the fact that the full force of this development is not expected to be apparent in glass quarters until the latter part of the construction season.

PITTSBURG MARKETS

(Continued from Page 57)

Total capacity in finished rolled steel is about 40,000,000 gross tons, while the present rate of production is 28,000,000 to 29,000,000 tons, so that these three industries account for a trifle more than 20 per cent. of the present steel output.

Steel Market.—This market in general, outside of the three lines just mentioned, is decidedly less active than in March and April. The lessening in activity has not weakened the situation, because mills are well sold up for a couple of months or more and do not need to secure much of any additional business for nearby deliveries to enable them to maintain operations. General buyers are moderately well covered, but apparently a few would like to have more steel, this being evidenced by some anxious inquiry in the market, against which some of the mills, probably the great majority, are endeavoring to secure delivery premiums.

In other words, the steel market presents an appearance of great strength, yet there is some room for doubt whether this strength will really continue. The lines of consumption outside of freight car building, structural steel construction, automobile and truck manufacture, do not present the appearance of actually consuming 75 per cent. of the steel now being produced. It would look rather as though some buyers and distributors have been replenishing stocks and will not require as heavy deliveries later on unless the ultimate consumption increases further.

The buying thus far is readily explained, for stocks were at an extremely low ebb at the beginning of the year, and fears regarding the coal strike of April 1 caused buying before that date, while when the strike proved to be somewhat bigger than was expected, on account of some non-union regions striking in addition to the regular union fields, a further stimulus to steel buying was given.

Some of the steel companies, those largely dependent upon coal regions where there are strikes, have had difficulty in maintaining supplies, but they are succeeding. Coal and coke have been purchased in different fields, but an extra freight haul is involved, adding to the expense.

Barrett Roofings, Cements Industrial Paints etc.

First Sales *Easy*—Repeat Sales *Sure*

When you handle Barrett Products you are aided by two strong selling forces:

(1) Our big national advertising campaign in the leading newspapers, farm journals and technical magazines. This advertising is creating new business for Barrett Dealers in every city, town and village throughout the Dominion.

(2) The high quality of the products themselves. This *keeps* the business. The railroads, the large industrial concerns, and many thousands of individual users know from their own experience that the Barrett trade-mark stands for sure dependability and sound economy.

Are you carrying *all* these famous Barrett Products? If not place a trial order to-day.

Everlastic "Rubber" Roofing

Everlastic Multi-Shingles

Everlastic Liquid Roofing Cement

Plastic Elastigum Patching Cement

Liquid Elastigum

Everjet Carbon Paint

Velvex Creosote Shingle Stains

Creonoid (Fly Oil) Lice Destroyer and Cow Spray

The demand for these products far exceeds the demand for any similar products on the Canadian market. Their sale is increasing by leaps and bounds. Don't miss the opportunity to cash in on this big and growing demand.

The NORTHLAND Trade Mark SELLS THE SKIS

Experienced Skiing enthusiasts look for it. It signifies the best in workmanship, correct design and materials. Send us your order to-day for the coming season's supply of Northland Skis.

The World's Largest Ski Manufacturer

NORTHLAND SKI MFG. CO., 23 Merriam Park, St. Paul, Minn.

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U. S. A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTRE. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability.
Made for Brace-made Machines. Packed singly; packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Order through your jobber to-day.

HARDWARE DEALERS

The Banner Ash Sifter

is the Common Sense Ash Sifter (Your Friend.) The price is popular and you can recommend it.

No. 2 Convenient Height. Handy Ash Can

Better Than Ever **Sales Fast Increasing**

One of our best customers mentioned that the BANNER is worth its weight in gold and cannot see how people do without them.
The oblong shape and perfect balance on the stamped steel rockers allow the ashes to spread freely and sift quickly.
We have spent many years making ash sifters, including the rotary, and the verdict of the people is for the popular Banner Ash Sifter.

Order from your jobber

The Burrowes Manufacturing Co.

A Valuable Impression

A pleasing impression upon customers is of value. You can create one and at the same time save your goods from damage by spreading sheets of TANGLEFOOT in your show windows, especially over Sunday.

TANGLEFOOT will then be at work for you and will not only catch the flies, but attract the attention of people who pass your store to your efforts to keep your stock clean and fresh. For 1922 TANGLEFOOT has been considerably reduced in price.

Remember TANGLEFOOT *catches the germ as well as the fly, and that poisons, traps or powders cannot do it.*

Advertising in HARDWARE AND METAL is economical, because the advertiser reaches only a class of business men directly interested in his product. The readers of HARDWARE AND METAL are big buyers because they buy for business as well as for private consumption.

TINKER TOM'S TALKS.

No. 360

From "early morn till dewy eve" I see a steady stream of Galvanized Sheets being made and shipped—not a sheet going into stock—

Since early March we've been doing this at the rate of several hundred tons a week and still the orders flow in. It all goes to prove that low prices will stimulate a revival of trade. "Premier" Galvanized Sheets sold this year for less than half the price in early 1920. When the farmer gets only about half for his produce he buys accordingly, and while there's small hope of anything exciting in the way of a profit, yet it's fine to see the wheels turning twenty-four hours a day again.

Of course prices couldn't remain for long below cost—but if you took our "tips" you got your share, and if you're wise you'll buy now to cover any shortage for this season.

Here's ONE way
to sell more Paint and Varnish Brushes

Where confidence is behind a product, it produces sales.

Confidence tells the customer he'll be satisfied positively when he puts the product to use; it usually gives the swaying argument that clinches a doubtful sale.

Canada Paint and Varnish brushes have the backing of a confidence built up through years of honesty in brush making. This confidence is now a forceful selling agent for the Canada Brush dealer. Every brush bearing our name is backed by our guarantee.

Put this confidence to work in your store, if you are a Canada Brush dealer. And if you are not you'll find it worth while to investigate the why in "Once a Canada Brush dealer always a Canada Brush dealer."

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index, facing the inside back cover, after having secured advertisers' names from the directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

INTRODUCING:

Empire Brush Brass Enamel

For renewing Brass Beds, Brass Fixtures, Radiators, Doorknobs, Mouldings, Picture Frames, and all materials where a Brush Brass Finish is Desired.

Can be applied to painted or unpainted surfaces.

Imparts a Rich Lustrous Finish, A Hard Permanent Surface—Dries Quickly—Ready for Use—Stands Washing.

MADE IN CANADA

It will pay you to carry this line

Retail Price, $1.00 per 4 oz. Tin.

Write Your Jobber—or Manufacturers Direct.

Empire Brush Brass Enamel Co.

KINGSTON ONTARIO

FLY TERROR

Sells to Hunters

The Season is Here! Hunters, Campers, Prospectors, Lumbermen, Miners, Surveyors and all outdoor men want Fly Terror. Advertise it! Display it in your windows! The more people you let know that you have it the more sales you make and the more money you take in.

MADE IN CANADA

The Fly Terror Manufacturing Reg'd

7 Notre Dame Square, Quebec, Canada.

Our

Bale Ties

are as Tough as Hickory, being made of Special Steel.

Our

Galvanized Nails

are Heavily Wet Coated.

Our

Box Nails

are made for automatic machine work. Every Nail Right.

Straight Rods

made on Automatic Machines, are perfect. Any length or size.

Wire Hoops

for Barrels or Kegs.

Particular People Can Get Service with

THE GRAHAM NAIL WORKS

Operated by

THE CANADA METAL CO., LTD.

Toronto

The Audit Bureau of Circulations has helped build a reputation for

Hardware and Metal.

It is reported that a few years ago half the money expended on advertising was wasted.

Six years ago space was bought by guesswork. Now it is bought with a definite knowledge of circulation—how many copies are printed, how they are distributed, how many paid for and how many given away.

The advertiser who does not protect himself by asking to see the A.B.C. reports of the publications he uses is reactionary and invites a return to the wasteful methods of former years.

Be on the safe side. HARDWARE AND METAL is a member of the A.B.C. Its advertisers are fully protected.

Why Hardware Mailing Lists Are Not Complete

WE ARE frequently asked why many of the so-called complete hardware mailing lists are incomplete and miss many hundreds of the best hardware stores in Canada. There is a reason.

If you take a complete list of the hardware firms rated in Dun's and Bradstreet's as hardware firms, you will be short upwards of 900 of the best hardware firms in Canada. This is due to the fact that upwards of 900 of the leading hardware stores in Canada, are the hardware sections of department or general stores. There is nothing in the commercial rating books to indicate which of the many thousands of department or general stores have hardware sections. For instance, in one Western Canada town there are four general stores and one exclusive hardware store. One of the general stores has a strictly modern hardware section. The only way in which you can find out which one of the four stores has this department, is to visit the town and call on all stores. The same condition exists in hundreds of other places in Canada. The cost of doing this for one mailing list or one publication would be absolutely prohibitive. The MacLean Publishing Company, however, have fifteen publications, and send crews of salaried circulation men into every city, town and hamlet in the Dominion from Coast to Coast. Representing fifteen publications these men call on practically every business man in a town or city. The MacLean Publishing Company have been working on this plan for upwards of 30 years. The result is that to-day HARDWARE AND METAL has as paid subscribers, in addition to exclusive hardware stores, upwards of 900 of these strictly modern, up-to-date hardware sections and very few of these names are on mailing lists, with the exception of the list used to mail out our paper.

Another important point is that on our mailing list several hundred copies go addressed personally to the men in charge of the buying. Circulars sent from the average mailing lists merely go to a firm name along with a large quantity of other circular matter and is somewhat of a hit or miss proposition. With HARDWARE AND METAL there are hundreds of cases where the name of the buyer also appears along with the company address.

Subscribers to HARDWARE AND METAL buy our paper because they need it in their business and because they study it each week for news

of the trade, new goods, market information and for additional information regarding goods which the merchants are carrying in stock. Several hundred merchants prepare their advertising in their local papers, from information which they take out of the advertisements in HARDWARE AND METAL. Window trimmers in hardware stores study HARDWARE AND METAL for ideas on seasonable goods which they can display in the show windows. The men behind the counter are among the closest readers of HARDWARE AND METAL because in it they find a vast amount of information regarding goods which they are called upon to sell each day. Dozens of leading jobbers' salesmen carry copies of the current issue of HARDWARE AND METAL along with their catalogs and go through these issues with their customers. One of the leading wholesale buyers, (name on request), stated that he "much preferred to buy lines advertised in HARDWARE AND METAL because he found that these lines were the quickest sellers and were the lines in which the travellers took the greatest interest."

It is therefore of the utmost importance that any advertising matter you wish to place before the trade, should reach as many of these hardware men as possible. It is an easy matter to claim that you cover the whole hardware trade but HARDWARE AND METAL knows from thirty-three years' experience that it takes many years of honest, intelligent effort to get a complete list of the hardware buyers in Canada. A large staff is also required to keep lists up to date, record business changes, new firms, etc. We offer you the most complete list through the advertising pages of HARDWARE AND METAL.

The hardware trade is undergoing rapid changes. With each succeeding year come new developments. It is our business to keep in close touch with the trade. We have a vast amount of information on almost every imaginable phase of the hardware trade. You may think your line is one that cannot be advertised. We may think differently. It will cost you nothing to secure our views. Drop us a line and our representative will call, or if you prefer it, we will, after making an investigation of the possibilities of advertising your lines, submit our proposition in writing.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

HELP WANTED

A REAL OPPORTUNITY.

There is an opening in the advertising department of Hardware & Metal for an experienced hardwareman, preferably one who has had retail, wholesale and road experience. Must be a man with thorough knowledge of hardware merchandising. Must also be a man of good appearance, and personality, who can discuss hardware merchandising, intelligently with manufacturers and advertising agencies. This position will require a man with initiative, and one who will be willing to make an exhaustive study of the various phases of advertising and merchandising. The right man will be given every opportunity to make good. He will attend trade conventions in various parts of Canada. He will have opportunities to attend sales, advertising and editorial conferences on many of the 15 MacLean publications. A good salary will be paid to start, and future renumeration will keep pace with the man's capacity to earn more money. Apply by letter only, giving complete details regarding qualifications to Manager Hardware & Metal, 153 University Ave., Toronto, Canada.

WANTED

WANTED BY MANUFACTURER, MANUFACturer's agents or hardware travellers calling on retail hardware, garages and accessory stores to sell line of tools on commission basis. Exclusive territory and very liberal commission given right man. State full particulars relative experience, age, lines already handling, how often territory covered and if by car or train. Box 419 Hardware and Metal.

HARDWARE BUSINESS WANTED IN GOOD town. Must be well established, having good turnover. Give full particulars in first letter. Box 943 Hardware and Metal.

HARDWARE STORES WANTED, WOULD like to get in touch with parties in towns of three thousand and larger in Western Ontario, wishing to dispose of hardware business. Correspondence confidential. Prefer not to purchase buildings, but to lease on long term. Address J. W. Peart, St. Marys, Ont.

HARDWARE BUSINESS IN GOOD TOWN with clean stock. Well established, good turnover. Give full particulars first letter. Box, 27 Hardware & Metal.

FOR SALE

HARDWARE BUSINESS IN ONE OF THE best Eastern towns. Good dairying section. Stock and fixtures about $11,000. Good reason for selling. Box 624, Hardware and Metal.

MANUFACTURING PLANT FOR SALE

Grand opportunity for successful enterprise and ready sale for output. Self-contained plant including Machine Shop, Foundry and Wood-working. Well equipped for manufacturing, light and medium weight machinery. Building for employees and about ninety acres of land. Rail and water connections. First class connections already made for sale of good line of Machinery and Tools, which plant is well equipped to turn out. A good supply of partially manufactured stock on hand. Further information will be supplied by application to Thomas Bell, Pugsley Bldg., Saint John N. B., or the Thompson Machinery Co., Limited, Grand Bay, Kings County, N.B.

MISCELLANEOUS

NICKEL PLATING — ORDERS EXECUTED promptly. Prices on application. Communicate with F. W. Higginson, 173 William St., Montreal. Telephone Main 8144.

SITUATIONS WANTED

YOUNG MAN WITH OVER 10 YEARS GOOD sales record among Toronto hardware merchants and excellent hardware experience, desires position with real live firm. Box, 63 Hardware & Metal.

Look through these you may find what you want

Quick Results

If you want to buy or sell a business, dispose of overstocks, hire a clerk or manager, use the "Wanted" page of HARDWARE AND METAL. There is no other way in which you can get in touch, more quickly or thoroughly with the best prospects, than by using the "Wanted" page of HARDWARE AND METAL. Cost is only two cents per word, with 10c additional for Box Number.

Practically all big buyers of hardware in Canada are readers of HARDWARE AND METAL

HARDWARE & METAL is the only weekly hardware paper in Canada and is read by practically every worthwhile buyer, both wholesale and retail, in Canada. HARDWARE & METAL is the logical medium to use if you have a message for the Canadian hardware trade.

TRADE MARKS

Any trade-mark shown on this page, when stamped on an article of hardware, is the manufacturer's personal "O.K.," guaranteeing the quality of the product.

Metal Stamping and Press Work to Order

BEST RULE MADE FOR GENERAL MEASURING.

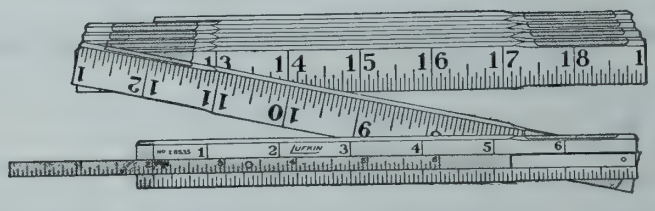
LUFKIN **Boxwood Extension Rule**

No. X.-8536-6 Ft.

More durable than ordinary spring-joint rules.
Longer than common boxwood rules.

Perfectly designed for taking inside measurements of door and window frames, boilers, etc., and such other measurements as are difficult to take with the ordinary folding rule. Just as convenient as a common rule for taking all other measurements.

Two Rules in One. Read the Pictures.



Has graduated brass slide, locked so it cannot fall out. Open rule to within 6 inches or less of distance, extend brass slide, and you have exact inside distance between points. Rule measures just like an ordinary Spring Joint, when slide is not extended. Made of extra heavy genuine boxwood. Firm yet smooth working spring joints. Extra legible markings.

Appeals to every mechanic, so should be stocked by every hardware

A highly developed modern plant is — behind this WHITE LEAD

THE TEST OF TIME

BRANDRAM'S GENUINE B. B. WHITE LEAD is manufactured on a formula used continuously since 1729. A product elaborated early in the 18th century is still in prime favor in the third decade of the 20th century. It enjoys a proud heritage, a supremacy maintained during 10 generations.

THE TEST OF ATTRIBUTE

BRANDRAM'S GENUINE B. B. WHITE LEAD has always been prized for its qualities, and the following represent some of the reasons for tributes paid us by satisfied users:—

Its Opacity and Exceptional Whiteness.
Its Uniformity of Fine, Amorphous, Non-Crystalline Pigment.
Its great Smoothness and Covering Capacity, giving Maximum Spreading Results.
Its Durability and Resistance to the erosive action of Wind, Dust and Rain, yielding a wonderful Paint for Permanent Protection.

To these superlative qualities may surely be attributed the constant growth of the demand for BRANDRAM'S GENUINE B.B. WHITE LEAD.

BRANDRAM'S GENUINE B.B. WHITE LEAD

The WORLD'S STANDARD WHITE 1729

Tested by Science's latest method, the Pfund Cryptometer, an instrument of mathematical precision—BRANDRAM'S GENUINE B.B. WHITE LEAD is proved to have greater hiding power than any other Brand on the market.

Make Columbias the Fastest Selling Dry Batteries in the World.

COLUMBIA "HOT SHOT"

THE MULTIPLE

The Columbia Hot Shot is a unit battery in an attractive moisture-proof case. Soldered copper strips connect the individually tested cells, which are entirely surrounded by a water-proof insulating compound. It is only necessary to connect two wires to the binding posts. The battery is then ready to operate. The Hot Shot is particularly useful for lighting and ignition where the variety of sizes makes it adaptable for motors of all sorts. It is very satisfactory for carriage lighting.

These batteries are made from specially selected cells arranged and connected to give various voltages and capacities and are specially adapted for motor boat lighting and ignition, or for use in wet or damp places. The cells are connected by means of heavy copper ribbon soldered to the terminals. Every cell is insulated from the case and from the other cells in such a way as to make a water-proof and practically damage-proof unit battery. The Columbia Multiple Battery is enclosed in an hermetically sealed metal case, with convenient handles for carrying.

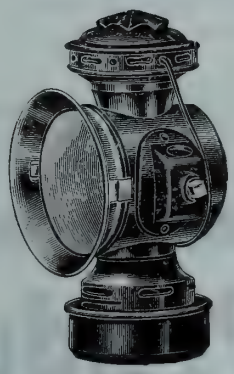
Driving and Parking Lantern



Dietz "Eureka" is a highly dependable small driving and parking lantern, ideal for any vehicle. It is made of cold rolled steel, with positive locking oil fount, and lawful ruby rear lens, its handy bail makes it a very convenient portable light in case of mishap on the road. It will meet the requirements of the City of Toronto by-law.

Height over all, 7¼ inches.
Size of wick, ⅝ inch.
Fount capacity, 10 hours.

Patented steel burner No. 561.
Size of door lens, 3⅛ inches.
Size of ruby lens, 2¼ inches.

Black enameled with nickeled door ring.

We are the Exclusive Agents in Ontario for Dietz Lanterns

A New Product with a Great Future

This new white enameled Roll Rim Sink fills a big gap in a big market. Such a sink has been needed for years. We introduce it now with the assurance that it is the perfect article—a product on which we have spent over seven years of study and hard work.

SMP *White Enameled* ROLL RIM SINKS

are almost **50 per cent.** cheaper in cost than other sinks! This saving amounts to a very big total where a man buys large quantities of sinks in a year. And it effects quite a saving for the individual householders too.

While immensely strong, an SMP Roll Rim Sink, packed complete for shipment, weighs only 58 lbs. Other sinks weigh from 120 to 150 lbs.! Think of the saving in freight and haulage.

They are made of 16-gauge rust-resisting Armco Iron with an everlasting covering of very special enamel—identical to that used on the finest ranges and kitchen table tops. The outside is given two coats of this super-enamel and the inside three coats. It is pure white, of course, and the surface is smooth as glass.

Each SMP Roll Rim Sink is packed separately, ready for the job, including nickel plated brass strainer, special adjustable brackets and couplings for iron and lead pipes. With each sink we supply connections for 1½ inch lead pipe and 1½ inch iron pipes.

The size of the sink is 18 inches by 30 inches, with a back 16 inches high, leaving openings for hot and cold water taps.

The introduction of this splendid, inexpensive sink is of great importance to hardware merchants, plumbers and supply houses. This line has a definitely big future and warrants your immediate interest.

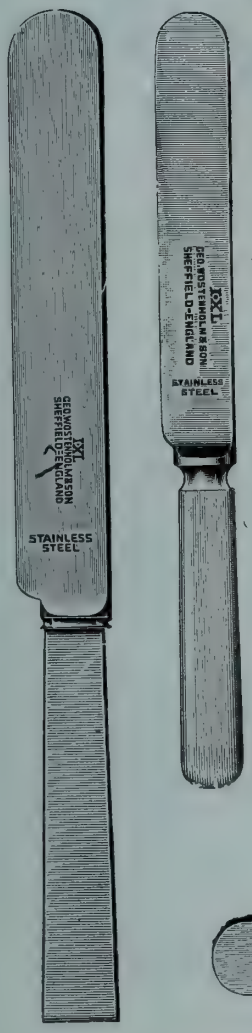
I-XL

Stainless Steel Knives



have now become so popular that no up-to-date merchant can afford to be without them.

We are now making substantial shipments to all the leading jobbers throughout the Dominion and would urge every retailer to see that his clerks have them to offer when required.

Stainless steel is a boon to the housewife as it absolutely does away with the knife board or cleaning machine, yet is always clean and bright for the table.

After extensive experiments we have finally overcome the many technical difficulties in tempering and are now combining all the virtues of stainless steel with a wonderful cutting edge.

Screen Doors and Barn Doors Hang 'Em!

WHERE there is the smell of good things cooking there are flies and where the grain is there are birds. Screen doors are indispensable on the home and 19-line farm doors are essential on the barn. Screen doors and bird-proof barn doors are going to be in demand this season, and hinges and hangers asked for. Get in line for the call you will have for Slater goods.

Demonstrate the 19-line hangers and tracks at every opportunity you get. Show them to the farmers' wives. They know what the screen door did to the flies, and will appreciate what the 19-line barn-door hangers will do to the birds.

Write us for any sales assistance you need.

Pumps Are Necessities

Necessities Sell

Necessities always sell; and to the 55 per cent. of Canada's population that dwells in rural districts, pumps are a necessity.

There are grades, even to necessities. Farmers buy 45 per cent. of all motor cars sold in Canada. Farmers' wives demand better household conveniences. Hence the popularity of McDougall's House Service Pumps—an electrically driven outfit. A timely talk on the convenience of running water will make sales—to your farmer customers, and these sales are profitable. Write us on this now. It will pay.

The Best Corner in Your Store

That was what we called the Shaving Corner in our last advertisement. The claim is big but not extravagant.

If you divide the floor space by profits returned, the answer per inch bears us out.

And we called the Gillette Safety Razor "The Best Thing in the Corner." We spoke of the permanent nature of the business—the return of your customer from time to time for blades, brushes, soaps, powders, &c.

Add to this the value of the clientele. Men who want the best razor and are willing to pay $5.00 or more for it are in a position to buy anything else in your store.

For your other classes of trade you have the Brownie Gillette—the razor that for twenty years served men faithfully and well—made daily shaving the custom of the world and was the father of the Shaving Corner.

The Easy Profitable Way To Sell Transmission Lubricants

The cut-out section of the above container shows the pump properly installed in position. Note the simplicity of the pump and its strong, compact appearance. Note also the big oversize truck with double front swivel wheels and the special locking device which keeps the handle in an upright position when not in use.

You can dispense grease or transmission oil quickly and at a good profit if you use the Imperial Polarine Transmission Oil and Grease Pump.

It is a simple matter to attach this pump to the new Imperial Polarine Transmission Oil or Grease drums which are furnished with a bolted friction head especially for this purpose. When drum is empty the pump can be easily and quickly transferred to another drum.

A nozzle and eight feet of rubber hose are regular equipment with this pump. A truck which is also supplied if desired enables you to haul the outfit right out to the customers' car.

Install one of these neat, compact outfits as part of your oil handling equipment and you will do yourself and your trade a real service.

Let the Imperial Oil salesman explain our special offer on this outfit, or write to 56 Church St., Toronto, for your copy of an illustrated folder giving complete details.

IMPERIAL OIL LIMITED

Manufacturers and Marketers of Imperial Polarine Motor Oils and Marketers in Canada of Gargoyle Mobiloil

Always recommend Imperial Polarine Transmission Oil for enclsoed gears. It is an all-oil transmission and differential lubricant which goes farther and gives better results than grease where leakage can be prevented. Your customers will like it.

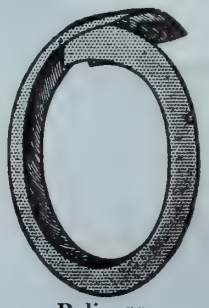
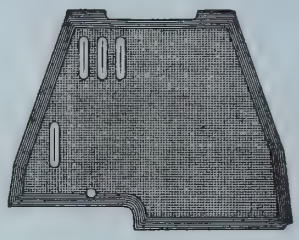
Cash in On Accessory Sales

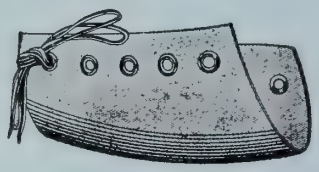
Through "GUTTA PERCHA" Accessories



Reliners



Windproof Mats (for Fords)



Lace-on Boots

Sealtite Patches

Reliners—Show these handy reliners. The well-defined need for them makes their sale largely a matter of letting motorists know you have them. They save the old casing when it's about to "blow." Never recommend for **new** casings—they're not meant for that.

Windproof Mats (for Fords)—These specially shaped mats suited to Ford Coupes, Sedans and Touring Cars, fit closely around the brake and clutch levers. They effectually prevent the entrance of heat, dust and disagreeable odors. Display them well and so increase your sales.

Lace-on Boots—This is a valued "first-aid" package for the motorist. When these are handy, there is no worry and anxiety when the "soft-spot" appears in the casing. They are very easy to slip on and effective in use.

Sealtite Patches—Long stops for punctures are saved by having Sealtite Patches in the car. With no other tools than the hands, a Sealtite Patch can be quickly applied and the tube immediately used. No wonder motorists come into the store so often for them!

GREENING'S RUSTLESS BRONZE

For Your Customers Who Demand The Best

Greening's Rustless Bronze Cloth is the best material made for screens. A broad statement perhaps, but absolutely based on facts. Here are the reasons why:

Greening's Rustless Bronze Cloth is practically indestructible. Screens can be left up the entire winter as it is impervious to ice and snow. It is only through handling that screens made with Greening's Rustless Bronze Cloth can be damaged. Your customers are saved the bother of removing and putting up screens each year.

Greening's Rustless Bronze Screening is 17% heavier than any other bronze screen on the Canadian market.

While heavy and strong, nothing interferes with the free passage of air. The mesh, 14 to the inch, is the most satisfactory for use in Canada.

As we absolutely guarantee that this product is rustless it is a screen that you can have no hesitancy in recommending.

These are real selling points that wi.l increase your screen business. Order through your jobber or write us.

Good Tools——— make Better Sales

YOUR customers will appreciate the good points of Williams' Superior Drop-forged Nail Hammers, for they mean efficient service.

Their heads are hard, dense and tough. The special split and pitch of the claws give a fast, powerful draw; nails can be drawn **point** first. The tapered eye and special wedges anchor the handle permanently. Its flared grip prevents all hand-slip. Their perfect balance assures increased striking power.

One good tool sells another and Williams' Hammers—made in Canada—will help to move other lines. All patterns and sizes. Catalog on request.

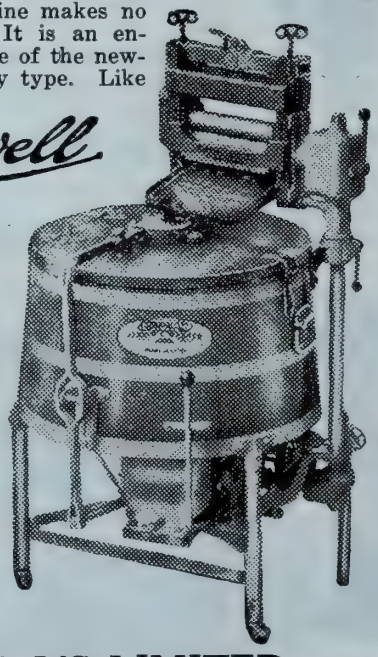
The dealer who stocks the "Minimax" Washing Machine makes no error in judgment. It is an entirely reliable machine of the newest wing design, dolly type. Like all

Maxwell



Products, it embodies the most approved modern features—quiet action, compactness, a swinging, reversible, quick-release wringer, and adjustable "4th" leg for uneven floors and draining. The sheerest and the weightiest fabrics are washed by the "Minimax" with equal success.

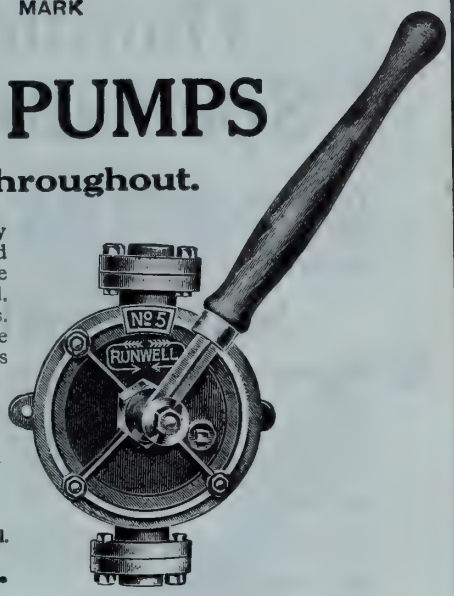
TRADE RUNWELL MARK

SEMI-ROTARY WING PUMPS

Are BRITISH MANUFACTURE Throughout.



The "Runwell" Semi-Rotary Wing Pumps are **British Manufacture,** and by reason of their general adaptability for a variety of circumstances, where a reliable and efficient pump is necessary, are becoming increasingly popular. The pumps are liberally designed to withstand rough usage and to give the full capacity specified. They are subjected to a rigid examination and are also tested under working conditions.

The "Runwell" Semi-Rotary is easy to manipulate and is designed to raise more water than any other type of hand-operated pump. All pumps have counter flanges fitted to branches, tapped Briggs standard thread

"STERLING"
Oil Stove Ovens

A THOROUGHLY reliable oven, and, on account of the Davidson quality, always a ready seller. This "Sterling" line is made of heavy gauge blued steel, strong and durable. For two burners and is protected by a heavy asbestos lining, which also prevents waste heat. Japanned with a rust-proof combination which adds to the life of the oven. Cold handles at side. Drop door has a heavy glass panel—also a knob which locks in three places. Illustration shows oven closed and open.

These ovens are also made for 1 burner.

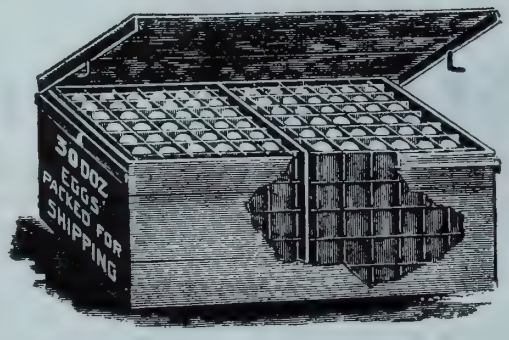
WENTWORTH MFG. CO., HAMILTON, Ont.



Why do eggs deteriorate?

One reason is some shippers use same fillers repeatedly — absolutely against the ethics of hygiene.

Even new-laid eggs will give off an odor that is absorbed by the filler. Each time the same filler is used the odor becomes intensified. Egg shells are porous, and the eggs will become tainted from this odor and spoil.

It pays your customers to use fresh fillers for each shipment—and incidentally it increases your business.

The Miller Bros. Co., Limited

CURTIS AIR COMPRESSOR and TANK OUTFITS

Note these Special Features of this Garage Equipment:

1—**Controlled-splash, self-oiling system. No excess oil in cylinder, no external leakage or waste of oil, no oil gets into the tires, enclosed crankcase keeps out dust.**
2—Uses about one-tenth of the oil used by any competing machine, saving in oil alone soon pays price of machine.
3—High and low level oil-filling gauge, so you can tell at a glance the amount of oil in the crank case.
4—Fan flywheel cools cylinder; increases capacity.
5—Inspectable valves, light weight, large area.
6—Valves cannot drop into cylinder and wreck machine.
7—Hand unloader permits starting compressor against full tank pressure without burning out motor, blowing fuses or burning or jumping of belt.
8—Drop forged crankshaft. Adjustable, renewable, non-cutting die-cast bearings.
9—Head removable without breaking or bending any pipe connection or pipe fittings; only one gasket.

Welded Steel Pressure Tanks

Basement Type Paint Oil Battery

Get More Profits From Paint Oils

Handle paint and lubricating oils in the new fashioned way—in tanks and with Bowser Pumps. That's the money-making way, because you avoid waste, check receipts and sales—and make profits a certainty.

Install a battery of Bowser tanks as illustrated—one tank for each oil. Line the Pumps up against the wall, neatly and compactly. Get your oils out where customers can see them, and they will be constantly reminded to buy more.

The Bowser piston-type measuring pumps deliver exactly the amount of oil required directly into the container, eliminating spillage. The evaporation-proof, all-metal construction eliminates leakage and gumming. Thus, Bowser equipment reduces costs, increases profits and insures against fire.

Write for illustrated booklet C-16 and find out how to make **more** money on oils.

Hexagon Rethreading Die Set

A Quick Seller to Every Garage

GTD Hexagon Rethreading Dies are really needed by every auto repair shop because they can be used in places where a regular die stock won't be able to reach. Sounds simple, doesn't it? It is simple.

In order to sell these sets all you need do is to display them prominently so the mechanic will not fail to see them. Once he's seen them you'll make the sale, because a mechanic will instantly appreciate the features of these dies.

They will go anywhere a nut will go, and can be operated in the **same way.** No expensive holders with bulky handles—just the die and a bit stock, nut wrench or anything else that's handy.

Use the coupon to ask for circular.

Jobber No Longer Absorbs Sales Tax

Toronto Wholesale Hardware Firm Says 2¼% Sales Tax Too Much for Them to Absorb and Prices to Retailers Being Revised Accordingly—Accounting Cost to One Manufacturer in Connection With Taxes is 25% of Amount Raised—Retailers Will Pass on Larger Tax

A NUMBER of interesting opinions are expressed by retailers, wholesalers and manufacturers herewith in regard to the Budget provisions concerning the tariff and taxation changes.

A manufacturer of enamelware stated to Hardware and Metal that the increase from 1½ per cent. to 2¼ per cent. on sales to jobbers and from 3 per cent to 4½ per cent on sales direct to retailers would greatly increase the amount of accounting work necessary, due to the fact that the new tax is an odd amount. In this firm the accounting department was said to have been trebled in size since 1914 and that the expense of accounting work in connection with governmental returns was said to be 25 per cent. of the amount raised. The increasing of the British preference on enamelled ware by 2½ per cent. would not have much effect on business in this country it was said, due to the fact that Canada's biggest import trade in such lines is now and was formerly with the United States even at a time when the British preference was greater than now. The present tariff protection given manufacturers of enamelled ware, etc., was said to encourage small businesses to enter upon the manufacture of such lines, but Canadian prices were much lower than those on similar U. S. lines laid down here, and these smaller firms could not compete with the prices which larger makers with lower unit overhead costs, could offer.

Retailer Doesn't Want to Collect It

"We believe in the sales tax provided they do not ask the retailers to collect it," declared J. A. Banfield, Dominion president of the Retail Merchants Association of Canada. "We don't want to be tax collectors," he added. "We are quite willing to assume our share of the burden, but we don't want to be placed in the position of having to sell a tax in addition to selling our merchandise. With the tax collected from the source, through the manufacturer or the importer, and passed on to the wholesaler, the retailer and the consumer, it will be all right."

Don't Anticipate Much Change In Price

From the standpoint of glass milk bottles, T. R. Dundas, divisional sales manager, Dominion Glass Co., Ltd., Toronto, states:

"Regarding the probable effect that the reduction of 5 per cent. in the general tariff on milk bottles will be likely to have, we hardly think that the reduction in the tariff will be likely to affect the price very materially. Our prices are based upon our costs and are not governed by the tariff.

"We might also add that at the present time we do not know what milk bottles of imperial measure would cost in the U. S. The bottles that are sold there are all wine measure. In view of the fact that there was no change in the tariff on any of our materials, our costs are not affected, and consequently we do not anticipate much change in prices."

Cutlery Factory May Have to Close

The failure of the new tariff to require that foreign currencies be valued at something near par may mean that the Eaton cutlery factory in Kingston, Ont., will close. The Drayton tariff established a fifty per cent. requirement, in view of the low value of the German and Austrian currency, the German mark being worth very little, and not likely to increase in value for some time. The Drayton requirement did not help the Kingston cutlery factory, however, as the German manufacturers simply shipped their goods through Great Britain, whose tariff does not require that foreign currencies shall be valued at any specified figure. The Fielding Tariff follows that of Great Britain in this regard. German cutlery, therefore, can come into Canada at the German value. For instance, Germany can lay down knives in Kingston at eight cents apiece which cost thirty-five cents to manufacture in Kingston, according to information supplied Hardware and Metal.

Increase Imports of Enamelled Ware

G. C. Crawford, vice-president Standard Sanitary Mfg. Co., Toronto, manufacturers of enamelled plumbing fixtures, etc., states:

"In regard to the reduction in preferential tariff on Canadian ware, while this tends to increase to some extent the importation of goods from abroad, still it is only a slight change in the low preferential tariff that has previously existed and it is not likely to cause any

BETTER FOR HARDWARE MERCHANTS

W. F. Macpherson, Secretary of the Ontario Retail Hardware Association stated to Hardware and Metal that the government's action in connection with taxation is quite in line with the recommendation made by the association, and that the retailers are pleased that nothing in the form of a luxury tax has been introduced. The increased sales tax would, he thought, work out more to the retailer's advantage than the smaller tax did because of the fact that when it was only 3% there was a tendency on the part of the retailer to absorb it in many cases whereas the 4½% tax would be a little too much to be absorbed and would more likely be passed on to the consumer.

ill effect in so far as the distribution of our product is concerned."

No Change Yet on Pipe

Concerning the change in tariff on wrought pipe, A. H. Hough, vice-president, Canadian Tube & Steel Products, Ltd., Montreal, states:

"While the tariff has been reduced from 35 per cent. to 30 per cent. on pipe the manufacturers have not yet made any change in the price of this commodity. As to the new sales tax, we are not prepared to make any statement as to how this will work out at the present time."

Slightly Increased Cost of Glass

Dealing with the effect on glass, S. J. Rutherford, president, Toronto Plate Glass Importing Co., states:

"There has been no change in the schedule of glass used in buildings, and the only difference will be the addition of 50 per cent. on the sales tax, which will slightly increase the cost."

W. J. Elliot, vice-president, J. H. Williams & Co., Ltd., St. Catharines, advises Hardware and Metal that there is little competition from Great Britain on tools as manufactured by this firm and the recent tariff reduction in the British preference on these tools will, therefore, have little effect.

Cannot Reduce Gasoline

An official of the British American Oil Co., Toronto, discussing the tariff changes on certain grades of gasoline, made the following statement to Hardware and Metal:

"As the refiners pointed out before the tariff commission a year and a half ago and since to Mr. Fielding that they had only taken advantage in part, and sometimes not at all, of the 2½c per gallon duty on gasoline of certain specifications, there cannot well be a reduction of price on account of tariff changes. Lighter gravity gasoline is already free under the tariff. The advantage of the 2½c per gallon duty, which is only 7 per cent. on the wholesale selling price, was that it gave the Canadian refiners the market. In view of the fact that the Canadian refiners have planted storage distributing stations, all over this country, many of them not a paying proposition but necessary in order to give proper distribution to the products and make them available to all consumers, it is felt that any outsiders who seek the Canadian market should not only pick off the cream of business in two or three large places but should contribute their proper share of distribution costs throughout the country.

"Gasoline, as you will infer from above, considering the difference in the size of the gallon, sales tax, additional freight, and other items, has been sold in Canada at figures which would compare favorably without the duty with the prices obtainable in the United States. By actual analysis the Canadian gasoline is of a much higher standard. Much of the gasoline that is sold in the United States is a mixture of natural gas gasoline and petroleum benzine. It is not a homogeneous product and evaporates rapidly so that it is not profitable to use. Occasionally Canadian jobbers import this product. There is, however, no natural gas gasoline produced in Canada.

"The increase of the Sales Tax makes up in part for the cut in duty. It is, of course, a little early yet to determine the exact operation of the changes."

Sales Tax Offsets Tariff Reductions

Cheque Tax Cited as Biggest Burden in Budget on Wholesalers and Manufacturers—Wrought Iron Tubing Prices Firm Despite Tariff Reductions—Canadian Market May be Disturbed by Quotations on European Iron and Steel

"WE AS hardware retailers view the tariff changes and increased sales tax quite favorably," said F. Max Hill, manager of the James Walker Hardware Co., Montreal. Taking the changes in the sales tax as the most important factor to the retailer, Mr. Hill said that passing it on to the consumer would mean slightly higher prices in most commodities but not sufficient to injure trade in any way. There were some lines on which the merchant would have to bear an extra burden, these being articles on which the retail price was marked by the manufacturer. This practice, however, was not as extensively carried out as in former years, and to-day there are few lines of hardware on which the dealer would suffer.

Dealing with the lower tariff on tools, and other lines which they stock, Mr. Hill said that the reductions would make little difference, as the higher sales tax would offset any chances of lower prices. There was criticism in connection with the repealing of the act limiting the depreciating of foreign currency and the effect this will have in allowing German goods upon the Canadian market. Mr. Hill thought this would have little material effect on the hardware trade, as goods from this source were even now being brought in at extremely low prices in many instances, and the sale of same had been limited. Formerly these lines were brought in through other countries and the mere fact that they would now be brought direct from Germany will make little or no difference.

Budget is Satisfactory

"On the whole, the Government Budget this year is, in our opinion, quite satisfactory to the retailer, considering the need of extra revenue, the burden of which all must share to an extent," concluded Mr. Hill.

W. F. MacPherson, secretary of the Ontario Retail Hardware Association, briefly stated that the increased sales tax would be favorably received by the Association. "The sales tax is what we want, and having petitioned the Government for continuation of same, it was only reasonable to expect an increase, considering the needed revenue. Whether the sales tax is 4½ per cent. or 10 per cent., it is up to the retailer not to absorb it, but to add it to the cost and pass it on to the consumer." There were dealers who formerly absorbed the tax but now this could not be done, and the lighter the tax, providing it is not sufficient to hinder trade, the less chance there is of retail merchants absorbing it.

IMPORTANT POINTS IN THIS ARTICLE

Higher prices to consumer due to increased sales tax unlikely to injure trade.

Higher sales tax offsets chances of pending lower prices on some hardware.

Retailers will be more inclined to pass on increased tax.

Cheque tax a severe handicap to manufacturers and wholesalers.

Firmness in wrought iron tubing will offset any change in price due to lower tariff until freight rates are decided.

German iron and steel producers have better access to Canadian market now.

Reducing tariff on dairy tin hollowware may affect prices in Western Canada.

Cheque Tax the Greatest Burden

The tax of two cents on cheques up to fifty dollars, and two cents on each additional fifty dollars will affect wholesalers and manufacturers to a greater extent than any other announcement in the budget changes, according to George Davis, manager Frothingham & Workman Ltd., Montreal. To the larger firms and corporations who paid bills by cheque, and in many cases wages, this

extra tax would amount to a surprising total at the end of the year.

The increased sales tax was more or less expected and he thought would be most favorably received as a means of acquiring the extra needed revenue. There were instances where the increase would not work out satisfactorily, such as where the manufacturer sets a resale price on certain lines, which would have to be rectified. On many lines the margin of profit was small, and the jobber could not absorb the higher amount of tax. However, with a few changes, the sales tax was, with little doubt, the best for all concerned.

Collecting the tax through the manufacturer was, he thought, a better method. He would add this to the price of his goods without an entry at the bottom of invoice. The wholesaler or jobber would do likewise to the retailer, thus eliminating any necessity of any part absorbing the whole or any part of the tax. The point might be raised that the government received extra revenue because with the present method of collecting they received tax on re-sale prices rather than the producers' prices, but this could be overcome by increasing from say 4½ per cent. to 5 per cent. at the source.

Wrought Iron Tubing

The tariff change on wrought iron tubing is under discussion by local mills, and Hardware and Metal was informed by one manufacturer that imports of piping had been comparatively small in recent years and it was his opinion that little increase would now be evident notwithstanding the Canadian market would be more favorable to export through the present lowering of duty charges. Figures for the past year reveal that the United States was the chief exporter to this market, and present conditions in America are such that deliveries cannot be guaranteed. The consumption of pipe in the United States, especially in the smaller sizes, has been on the increase from week to week and with this condition, it is considered questionable whether interests in the south would enter this market in any volume for some time to come. Unless Britain increases her trade with Canada, the tariff changes will not likely be so effective in the meantime.

While a reduction of 5 per cent. in tariff would naturally have a tendency to weaken the market, there are factors in the present position of wrought pipe which must now be considered. The undertone of the market for some weeks past has been very firm, as in many other iron and steel products. So strong has been the tendency that higher prices at any time within recent weeks would not have been surprising. This, according to this manufacturer, is sufficient to almost offset the easier tendency caused by the tariff reduction. The probable reduction of freight rates in July next was pointed out as another factor that must not be overlooked. Just what action domestic mills will take to meet the situation will be decided in

New Tax and Tariff Regulations As Applied to Hardware

THE PRESENT tariff applying to certain lines sold in the hardware trade, with the revisions made in the Budget just presented to Parliament, is as follows.

	British Pref.	Intermediate	General Tariff
Gasoline .725 specific gravity and heavier but heavier than .750 specific gravity at 60 degrees temperature, per gallon	½ cent	¾ cent	1 cent
Glass milk bottles (taken out of general classification of glassware)	15%	25%	27½%
Dairy tin hollow-ware including cans for fresh milk or cream; kitchen tin hollow-ware, not painted, decorated or japanned.	12½%	17½%	20%
Wrought or seamless iron or steel tubing, plain or galvanized, threaded and coupled or not, ten inches or less in diameter, n.o.p.	15%	27½%	30%
Agate, granite or enamelled iron or steel ware	20%	27½%	35%
Incubators, for hatching eggs, brooders, post hole diggers	10%	15%	15%
Adzes, cleavers, hatchets, metal wedges, sledges, hammers, crowbars, cantdogs and track tools, picks, mattocks, and eyes or poles for same; tools of all kinds, n.o.p.	15%	27½%	30%
Window shade or blind rollers	20%	30%	35%
Harness and saddlery	17½%	27½%	30%
India-rubber clothing, rubber or gutta percha hose and cotton or linen hose lined with rubber; rubber mats or matting and rubber packing	20%	30%	35%
Clothes wringers for domestic use and parts thereof	20%	30%	32½%

EXEMPTIONS FROM DUTY

Fish hooks for deep sea or lake fishing not smaller than number 2.0; bank, cod, pollock and mackerel fish lines; and mackerel, herring, salmon, seal, seine, mullet, net and trawl twine in hanks or coil barked or not, in variety of sizes and threads, including gilling thread in balls and head ropes for fishing nets, barked marline and net norsels of cotton, hemp or flax and fishing nets or seines and manila rope not exceeding one and one-half inches in circumference when used exclusively for the fisheries not to include hooks, lines, nets or rope commonly used for sportsmen's purposes.

THE SALES TAX

The official statement of the Minister of Finance dealing with the increased sales tax reads: "In addition to any duty or tax that may be payable under this section or any other statute or law there shall be imposed, levied and collected an excise tax of two and one-quarter per cent. on sales and deliveries by Canadian manufacturers or producers, and wholesalers or jobbers and a tax of three and three-quarters per cent. on the duty paid value of goods imported but in respect of sales by manufacturers or producers to retailers or consumers, the excise tax payable shall be four and one-half per cent. and on goods imported by retailers or consumers the excise tax payable shall be six per cent. on the duty paid value.

EXEMPTIONS

The foregoing taxes are not applicable to seeds in their natural state, oil cake, oil cake meal, ores of metals of all kinds; fuel of all kinds; gold and silver in ingots, blocks, bars, drops, sheets or plates unmanufactured; electricity, oil for illuminating or heating purposes; manila fibre for use only in manufacture of rope and not exceeding 1½ in. in circumference for the fisheries; boats bona fide purchased by individual fishermen for their own personal use in fisheries; articles and materials used in the manufacture of boats bona fide built for individual fishermen for their personal use in the fisheries; fibre for use only in manufacture of binder twine.

NOT APPLICABLE TO EXPORTS

The excise taxes outlined are not payable on such goods as are manufactured for export.

These regulations are in effect from the twenty-fourth day of May and apply from that date to all goods imported or taken out of warehouse for consumption and to have applied to goods previously imported for which no entry for consumption was made before that date.

the near future, but it was considered altogether likely that little if any change in prices would be made until it was ascertained what change in freight rates would be made next month.

Cancelling of Depreciated Currency Regulation

To the iron and steel industry, the repealing of the Act of last season regarding the limiting of depreciation on foreign exchange to 50 per cent. for duty value is also important. "The door is certainly open for German iron and steel and while shipments of actual material may be almost negligible for some time, the mere fact that a quotation from this source reaches Canada may have a tendency to upset the domestic market," was the statement made by a large Montreal dealer in iron and steel. Although other small wares have found their way out of Germany to Canada through other countries, no shipments of heavier iron and steel materials have so far been traced.

Reports from Europe state that Germany, with a loss of one of her rich fields, is now kept busy supplying the requirements of the devastated areas of Central Europe. However, there is the handicap of most of these countries not being able to pay for their needs, and it is only reasonable to believe that this is one of the reasons why Germany has secently sought, and entered, the African and South American markets to an extent.

While there was no cause for immediate alarm in allowing freer access to German iron and steel, this dealer stated that interests on this side will watch developments in the future.

J. A. Berube, sales manager of The McClary Mfg. Co., Montreal, stated that the reduction in preferential and general tariff on dairy tin hollow-ware and other dairy supplies, was the chief Budget change in their line, the reduction of 2½ per cent. under preferential tariff on enameled ware being of minor importance at present because of the extent of importations from Britain on these lines. The United States had previously exported dairy supplies more extensively to Western Canada than to the East and the effect would be felt in that section.

Germany and Austria had, before the war, been large exporters of enameled ware and allowing cheaper imports through repealing the Act in connection with depreciation of currency will have a greater effect at a future date than at present. These countries are now having difficulty in deliveries and the chances of immediate competition to any great extent was thought unlikely.

Says Travellers Should be Protected

In Discussion on Budget Sir Henry Drayton Says Commercial Travellers Don't Get Proper Allowance for Expenses—Rebates Have Serious Effect on Steel Industry—Says Currency Regulations Served as Check on Imports Last Year—Too Much Protection on Aluminumware

OPENING the discussion on the Budget, Sir Henry Drayton, former Minister of Finance, drew attention to the fact that the country came through the worst period of deflation with a drop of only $53,000,000 or 12.2 per cent. in national income. "I wonder how many business concerns can make anything like the same boast. While we dropped 12.2 per cent. our income nevertheless was no less than $32,000,000 greater than in the year 1920 and was $69,000,000 greater than in the year 1919. I think therefore that instead of being downcast at the present time recognizing as we ought to the difficulties not only of the situation here but the difficulties of the entire world, Canada has every right to be pleased and thankful with the condition things are in.

"Last year in a year of many business troubles and difficulties the enormous sum of $101,500,000 was raised by direct taxation yet the Budget provides for only $60,000,000 from income tax and other direct taxation this year.

Should Assist Travellers

"As the law stands to-day the commercial traveller cannot get and does not get a proper allowance for expenses. It is undoubtedly true that it costs the commercial traveller ever so much more to live in hotels when travelling than it does at home. I sincerely trust the Minister of Finance will take this case under consideration and deal with it favorably."

Dealing with rebates of duty particularly in connection with steel, Sir Henry Drayton pointed out that such drawbacks hurt steel production.

"Steel production now is pretty poor in Canada," he continued. "We have not very many blast furnaces running and these drawbacks hurt far more than to the extent of the drawback itself. Take the case of a sixteen marker Western drill with a single disc attachment. There are 450 pounds of bar iron which carries a duty of 35 cents per hundred pounds, making a duty charge of $1.58; sheet steel 65 pounds carrying a duty of 12½c or a charge of 22 cents; pig iron 656 pounds with a duty of $2.50 per net ton making a charge of 82 cents. Now those duties are already subject to a drawback of 30 per cent. for the domestic market. The present Budget increases that drawback to 40 cents. There is also an export drawback of 99 per cent. The net duty on that machine for domestic consumption amounts to $1.81 and for export article 3¼ cents. I put that drill in the western market say at Moose Jaw, the freight from Hamilton amounts to $16.82 as compared with the net duty of $1.81 on the material in the machines.

Valuation for Duty

Dealing with the cancellation of regulations regarding customs valuation on imports Sir Henry Drayton stated "the difficulties therein encountered are no greater than the difficulties encountered in determining what are bona fide sales in the local market. In this connection I should like to give an illustration of how this works out. Before that customs valuation provision was adopted we had a peculiar case submitted to us. "We were endeavouring to follow the movement and to see to it that to the fullest extent possible we had the minimum of unemployment. At the time I noticed some importation in a particular line that I could not understand. I had an investigation made, and this is what was revealed to us: The buyer of the firm showed us three articles, all of which looked to be exactly the same quality, prices $2.56, $2.50 and $1.50 respectively. In reply to his question if I could see any difference in the articles I said 'no.' There was none. The $1.50 one happened to be distress goods imported from the States, and the manu-

IMPORTANT POINTS IN BUDGET DISCUSSION

Canada negotiated worst period of depression with only 12.2% drop in national income.

Enormous sum of $105,000,000 raised last year by direct taxes.

Commercial travellers not allowed proper expenses in connection with taxable income.

Drawback affects steel industry considerably.

Valuation for duty regulations last year eliminated many evils which dumping regulations cannot touch.

Canada selling more to Germany in last couple of years than we buy.

Complaint made over admitting raw materials free of duty and charging on finished product.

facturer made that extra profit in his business. He could buy no more goods of that particular kind at that price because, being distress goods, the order could not be repeated. But at a time when our factories were not running, when we had people out of work and walking the streets, that order—and it was a large one—was put through without the buying public getting a single cent advantage. Being distress goods the price could not be repeated, and the merchant here could not very well change all his price lists in connection with that single order. At any rate the public, as I say, got no benefit out of the transaction, and further, the unemployment situation was aggravated.

Dumping Clause Doesn't Solve Trouble

"But that whole transaction was justified by evidence under the old dumping clause. It is so easy for the outsider to have three or four cash sales and send in evidence of them to the customs appraiser—very, very easy. That was the kind of thing we wanted to stop, and to a large extent we did stop it. Therefore I regret the change that my hon. friend is making. I believe he desires to enforce his dumping provisions in the interests of Canadian labor, but I am afraid he will find that the results of the proposed change will not be what he desires or expects.

"In the case of all laws, some method of evasion is discovered. We had the thought that with this provision fortified by the Marking Act, we would be able to police these importations, and we were doing it pretty well. My friend points out that it became a practice to ship through Holland instead of direct from Germany, or through some other country where the currency provision would not apply. Well, that was an evasion of the law, and it could have been provided against; the practice of indirect importation could have been made illegal, with the penalty of seizure of the goods, if it were persisted in. That would be the course to follow, if my hon. friend had the idea that we ought to protect our markets and our workingmen from the effects of German competition."

Canada's Trade with Germany

Mr. Robb, Minister of Trade and Commerce, in the discussion pointed out that Germany's export trade depends very largely on her ability to buy from other countries. He outlined briefly Canada's business with Germany as follows:

"In 1913 Canada imported from Germany, in round figures, $14,000,000 worth of goods, and in the year of the war, 1913, $14,500,000 worth. We sold to Germany in 1913 only $3,000,000 worth and in 1914, $4,000,000 worth. Coming to more recent years, we find that in 1921 we exported to Germany $8,000,000 worth of goods, as against $1,500,000 of imports, and in 1922, the last fiscal year, we imported from Germany $2,000,000 worth of goods and sold to her $4,500,000 worth. Let me just give a few of the articles that we export to Germany. The principal items are asbestos of which we exported in 1922, $537,000 worth; lard, $102,000; nickel, $399,000; oats, $210,000; rye, $531,000; wheat, $1,580,000; wheat flour, $319,000."

Too Much Protection on Aluminum Ware

Selecting certain articles in the tariff, Hon. R. J. Woods pointed out that he thought a general tariff on manufactured aluminum ware of 30 per cent. was too great when aluminum in ingots, blocks, bars, rods, etc. in raw form is admitted free. In connection with steel and steel wire he pointed out that these were admitted free yet nails are taxed from 50 to 60 cents per 100 pounds.

"We hear much about the necessity of building," said Mr. Woods. "Nails are something that go into building construction yet the raw material is permitted to come in free yet the nails that go into our houses are taxed."

Mr. Woods did not favor the drawback system on duties and thought that $13,000,000 returned to manufacturers last year by this plan should remain with the government.

Has Simple Way to Figure Sales Tax

Toronto Hardware Wholesaler Finds Much Time Saved in Figuring Sales Tax by Adding the Straight 2½% and Deducting 10% of the Result to Find What Tax at 2¼% Amounts to—Increased Sales Tax Now Applying on Metals—Wholesaler Re-Prices Stock

ANOTHER manufacturer of tin hollowware stated it was difficult to outline just what effect the recent tariff changes might have upon future prices of certain products, but it was generally considered to be of a minor character. Neither was any effect expected to be immediately apparent, and doubt was expressed that such developments would have any weakening tendency at all. On a normal market, such a tariff change might have the effect of slightly altering domestic quotations on these lines, but in view of the strong trend recently exhibited in certain raw materials used in the manufacture of such wares, it was thought that the budget revisions would merely tend to temporarily offset the strong upward market. It was pointed out that tinplate was recently firmer in price, owing to the coal strike, with mills no longer offering price concessions for attractive orders. It was further stated that no appreciable reductions have been established on other production costs, any move in this direction having been more or less anticipated when the last revisions in quotations were announced.

Pass on Tax on Metals

G. T. Pepall, director, Samuel & Benjamin, Ltd., Toronto, extensive dealers in metals and steel products, expressed the opinion that any reduction in the tariff was more or less offset in the increased sales tax. Advancing the sales tax by a flat fifty per cent. has brought double calculations in every instance, as well as a great deal of perplexing figuring on both sides. An even percentage of sales tax would have been more preferable from the viewpoint of the distributors. It was also stated that the increased sales tax is already on in several instances, such as in metals, especially where the purchasers are large quantities or carload lots, and the additional tax represents a considerable sum added to the cost.

Re-Pricing Stock

A Toronto hardware wholesaler outlined another interesting result of the new sales tax legislature in that it is now considered necessary to go over their entire stock and re-price same to take care of the advance in sales taxation, and also decreases in tariff. This movement will be continued until all lines have been revised. It was also pointed out that where the jobber in a great many cases was previously absorbing the one-and-a-half per cent. sales tax, it is now evident that they cannot be expected in justice to themselves to absorb the two-and-a-quarter per cent., so that re-adjustments of this nature will likely be in order as outlined above.

In calculating the new tax on sales, it was suggested that the easiest way was to add 2½ per cent. and then deduct ten per cent. of that, thus resulting in the desired 2¼ per cent. In figuring out the total sales tax of four-and-a-half per cent., the same principle can be utilized, only in this case it is necessary to add five per cent. and then strike off ten, to obtain the result of 2½ per cent.

The opinions of Ottawa merchants

Setting A Limit On Credit Extension

Retailers and Wholesalers Interviewed on Subject of Credit Agree That Credit Should be Limited to Half a Month's Earning Power of the Customer—Path of Least Resistance Leads to Ruin—Retailer With Loose Credit System a Poor Friend to Customer

Written for Hardware and Metal by ROY A. HUNTER

J. P. MORGAN is credited with a remark to the effect that "the man is 90% of the risk," by which he simply meant that, more important than the details, the causes, reasons, and the purposes, is the moral character of the borrower.

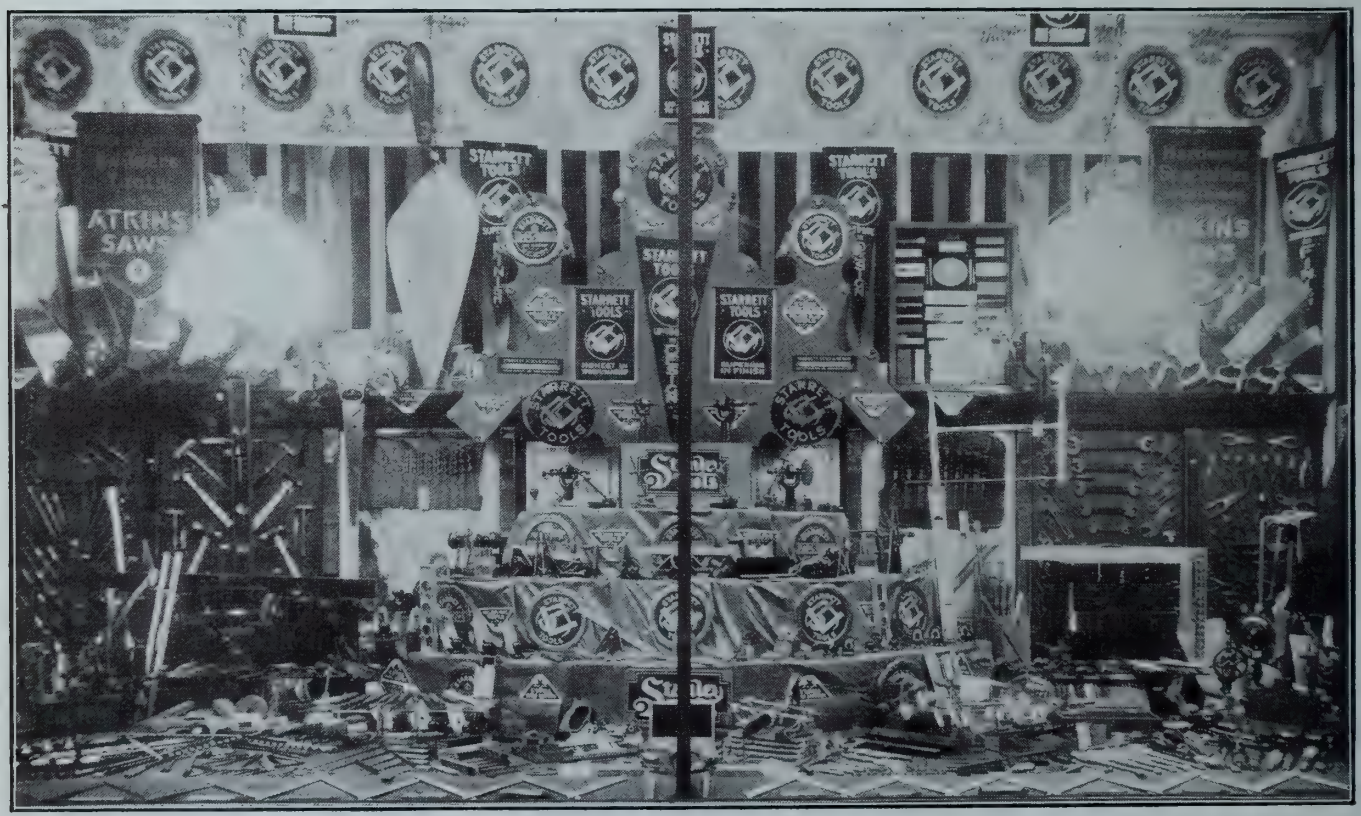
One credit manager of a wholesale house in Vancouver, in discussing the credit business as it affects retail merchants stated that while the appearance and personality and reputation of a prospective credit customer does and always will predispose a merchant to either give the applicant credit, or to refuse to do so, one vital piece of information should be obtained. That information is, WHAT ARE THE MAN'S ASSETS, WHAT HIS INCOME.

"This was forcibly brought to my attention recently in connection with a retail business in one British Columbia town, that went into liquidation. The book debts were far too large in proportion to the amount of business done—but the striking facts that a glance over the list of accounts disclosed were that laborers, school teachers, and others with comparatively small wages and salaries had been given credit amounting to two, three, and five hundred dollars. Is it not evident to any merchant that a wage earner, even if steadily employed, who probably brings home each Saturday thirty to forty dollars is not entitled to a hundred dollars credit. Nor a salaried person who draws twelve to fourteen hundred a year entitled to two hundred dollars credit—much less five hundred.

Setting a Limit on Credit

"It should readily occur that it is a suicidal business policy to extend more credit than half a month's earning power can clean up. I have one merchant in mind in the Fraser Valley who positively will not grant more than fifty dollars credit to a mill-hand earning $125 per month. When that point is reached, further credit stops till the amount is paid up.

"I have thought at times," continued this executive, "that if I were to commence in the retail business, with my experience behind me, I would conduct a strictly cash business; but as a matter of fact, I think I would conduct a credit business. The fault is not with the credit business, which has much to commend it. The fault, in all cases is that the dealer does not give credit as he knows he should, but follows the path of least resistance till brought up short. The wholesalers conduct a very large percentage of their business on a credit basis. That their credit losses are only a fraction of one per cent. in normal



The great amount of building which is being done through out Canada this Spring and the increasing tendency among property owners to do some fixing-up work themselves has led to a considerable trade in tools for those merchants who have gone aggressively after this business. The windows are being used to advantage by Omer de Serres, Montreal, to display tools for this trade. One of his recent tool windows, shown herewith, indicates much care spent on arrangement. The pyramid in the centre and tools arranged on panels along the back of the window help to present an effective appearance with a wide range to choose from yet no appearance of overcrowding. This window was very productive of business in tools.

Catering to the Spring Angler's Needs

A window devoted exclusively to the showing of lines required by the fisherman in the Spring season of the year is used to good advantage by McKinley and Northwood, Ottawa, Ont., as illustrated herewith. Experience has proved that the fisherman patronizes that store which appears to have a wide selection of equipment and the best way to show this is to use such a window display as this which reflects care given to the selection of stock and a wide range to choose from.

times is due solely to the fact that they have system. If the retailer would require from his customers, the information that his wholesalers require from him, he would not get tied up.

"The trouble is that many people are so optimistic that they mortgage the rosy future. On the expectations of a bumper harvest the farmer makes his immediate purchases. On the expectation of a bountiful fruit crop the grower runs up his charge accounts. If their hopes are materialized—the bills are paid and they are encouraged to do it again next year. If the proceeds do not come up to their expectations, they are forced to disappoint their creditors, and no matter how strong their intention to pay, it is a physical impossibility to pay out more than they receive, no matter how inadequate their receipts.

A Poor Friend to Customers

"In my humble opinion, the dealer who gives 'cheerful credit' and abets the customers in thus gambling on the future, and speculating on their unharvested crops, and unearned wages is really a poor friend to those consumers."

The credit manager of a large retail store, in speaking of a system of collection letters for which he had subscribed said to the writer, "If this system had not collected any accounts at all, and it has collected many, I would consider the money well spent that brought home to me the truth that the dealer should have more particulars about those with whom he is dealing and to whom he extends credit. How easy it is at first to find out a couple of friends' names—probably the one who introduced the customer. In case that person moves away with a balance unpaid, it is so helpful to ask Mr. Jones 'By the way, where is Fred Smith now, I often wondered where he had gone.' Chances are the information will be forthcoming and the merchant knows at least where the delinquent is. It is so easy to jot down this additional information on the new ledger sheet, and so hard to trace a customer after he is gone, if you have no lead at all."

Another credit manager states, "The greatest temptation that the merchant is up against, is to continue giving more credit to the delinquent on the assumption that the whole debt can be better collected in that way. Let every merchant consider the actual fact, substantiated by hundreds of actual cases, that the collectible portion of bad debts—ordinary bad debts—is around 25% if a bank or an assignee has to take them over."

"Any and every merchant is much better with the goods on his shelves than turned over to a customer who has proven that he cannot square up at the end of his thirty days."

Still another credit manager spoke about notes. One up country merchant asked Hardware and Metal if it is good policy to take notes from delinquent customers. As far as a banking proposition, this credit man said, "No," adding that even if the bank discounted them—if they were not paid on maturity the bank would require the merchant to make good. But it was desirable, he said, to close up all overdue accounts with notes for the reason that in this way the amount is acknowledged. If any kind of legal action is necessary, the note shows that the amount can be unquestioned. Only the signature needs to be proven genuine—whereas actions taken on open book accounts are always liable to all kinds of counter-claims and disputes that entail much more delay and expense. Probably the best collecting asset, however, is fear of publicity. This will make many pay who cannot be touched in any other way. Some of the most effective collection systems make use of the fact that book accounts may be publicly auctioned off!"

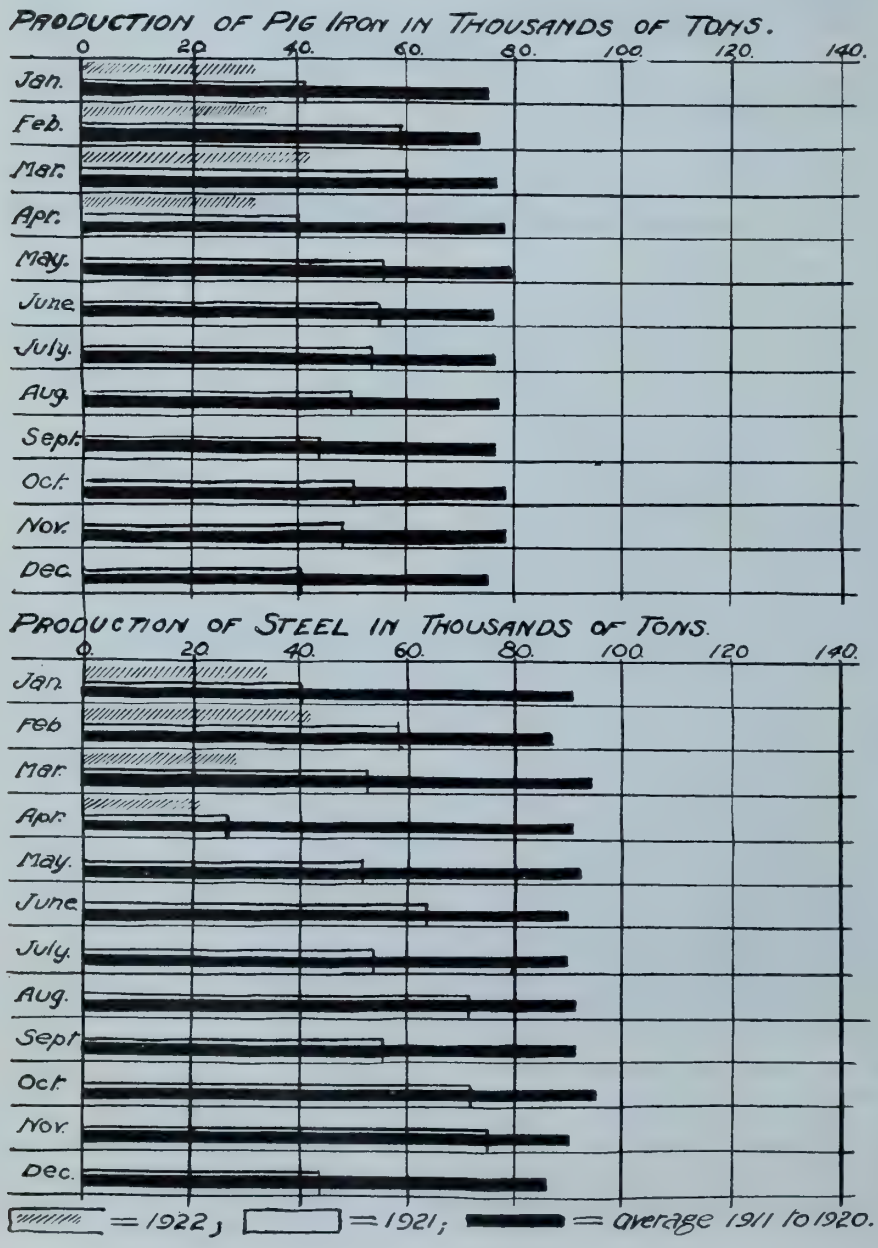
Production of Iron and Steel in Canada

April Pig Iron Production for Direct Sale Increased Over Previous Month—Steel Production Nearly All for Manufacturing Purposes According to Figures Recently Issued

GOVERNMENT figures now obtainable show that the production of pig iron in Canada during the month of April declined 9,000 tons from the output of the previous month, but an analysis of the output shows that 5,000 tons more iron was produced for direct sale than in March of this year. The total production amounted to 32,572 long tons comprising 12,142 tons of basic iron; 14,952 tons foundry and 5,478 tons of malleable. Of the basic iron all but 104 tons was produced for the use of the makers. Practically all of the foundry iron on the other hand was produced for sale. The production of malleable iron was slightly lower than in March and amounted to 5,478 tons, all of which was produced for direct sale. The number of furnaces in blast remained unchanged for the month.

In an analysis of the pig iron production in the United States, the report states that the output in April showed a gain of 3,395 tons per day over the March record and there was a net gain of seven furnaces in blast. "The production of iron in April was probably slightly less because of the coal strike, although it is stated that so far the effect of the coal strike has been very small."

The following charts allow quick comparisons between the ten-year average production in any month of pig iron and of steel ingots and castings with the actual output in the same month of 1921 and 1922.



SIMPLE WAY TO FIGURE TAX

(Continued from page 37)

and manufacturers on the budget are varied. One prominent manufacturer who has considerable knowledge of Canadian conditions, stated that the most serious proposal in the entire tariff was the one abolishing the regulation of the old government that in cases of countries with depreciated currency only a fifty per cent. depreciation would be allowed by Canada in figuring out the import duties. He stated that this will considerably reduce the duty on goods from other countries as Germany and Austria. Just what the final effect will be is not clear, but the manufacturer in question thinks it will make certain classes of goods sell considerably cheaper in Canada, although competing with Canadian manufacturers.

E. M. Trowern, secretary of the Dominion Board, Retail Merchants Association of Canada, expressed the opinion that the retailers as a whole would rereceive the increase in sales tax kindly. It would give more revenue to the government. The advantage he saw in the new regulations was that the tax would not come out of the pockets of the retailer as formerly. Under the new conditions the retail price to the consumer would have to be increased. Some lines of trade, he said, undoubtedly were going to suffer, but they would have to adjust themselves to the new condition.

Won't Affect Gasoline Prices

The reduction of the duty on gasoline from 2½ cents to one cent per gallon will not affect the retail price of gasoline in Canada, according to Major E. A. Olver, D. S. O., manager of the Ottawa branch of the Imperial Oil Company. Gasoline with a specific gravity of .725 has not been dutiable since 1907, and it is on the product with a specific gravity of from .725 to .750 that the reduction is made. This is ordinary petrol used to drive gas engines, while anything with a more dense S. P. G. gets into the oil class.

An Ottawa automobile agent stated in connection with the increased tax on motor cars: "This means that the price of all cars in Canada selling under $1,200 will increase about 6½ per cent. and all cars selling over that price by about 11½ per cent. It is my impression that the change will give a shade of advantage to the sellers of Canadian made cars. The increase on Canadian made cars will be on the actual price to the dealer, while I understand the increase on the American made cars will be their price to the dealer plus the duty."

An agent who handles Canadian made cars stated that so far as the increases in the sales tax was concerned his firm would absorb the increases. It was probable, however, that any increase in the internal taxes on Canadian made cars would be passed on in some degree at least, to the purchaser.

For comment on Winnipeg hardware market tendencies see "WEEKLY HARDWARE MARKET REPORTS." For current prices see Winnipeg section of "CURRENT HARDWARE QUOTATIONS" in this issue.

Lumbering Activity Helps Hardware Trade

Collections From Retailers Said to Be Improving —Better Trade for Logging Tools, Automobile Accessories, Paints, Builders' Hardware—Radio Telephone Sets and Parts Moving Actively

VANCOUVER, B. C.—Weather has played an important part in the hardware trade of the coast. The season being from two to three weeks late, has had the effect of slowing up the demand for all lines of early spring and summer goods. A week ago almost mid-summer weather obtained for several days with the result that there was an improved demand for camping outfits, oil stoves and other seasonable lines. This week the demand has eased on account of lower temperature which has put more or less of a damper on holiday talk.

The activity in radio phones on the coast has been a big help to some firms —at least those that have made a specialty of this kind of equipment. The three newspapers have large sending plants and countless amateurs have taken up the fad with varying success.

Building is keeping up which has created a good demand for household hardware of which there are good stocks in wholesalers' hands. There is a good demand for sash cords and weights but prices are holding about the same as usual. Screen doors have started to move. Jobbers report a fair output of barbed wire on the following basis, $4.65 a spool or cattle and $5.15 for hog. Auger bits are ten per cent. lower. Paints are selling actively, much house painting being attended to which has been neglected for a year or so in anticipation of a lower scale.

Collections are said to be on the mend, many retailers paying up a larger percentage of tardy accounts than has been the case for several weeks.

With a gradual improvement in lumbering conditions, there has been a better demand for logging tools, largely for replacement. In anticipation of better weather automobile owners are preparing for summer jaunts with the result that dealers in auto accessories report increasing trade.

WESTERN CANADA NOTES

D. B. McCoy who for the last three years has been coast representative of the Steel Company of Canada has been transferred to the Toronto office. He will be succeeded here by M. A. Irwin of Winnipeg.

T. H. Latimer of Latimer and Son, Main St. hardware retailers, Vancouver, left with a party this week for the Powell River district where a week's fishing holiday will be spent. The trade is anticipating some interesting tales on his return.

Announcement was made in Vancouver this week by District Manager Robert Walker of the Canada Wire and Cable Co. that his company would soon work on a large plant here for the manufacture of wire rope and electrical wire. The site will occupy about three acres and between two and three hundred men will be employed. The product will be marketed on the coast, Alberta, Saskatchewan and parts of Manitoba. General manager H. Horsfall of Toronto will be here in about three weeks to superintend building operations and make final choice of site.

WIRE PLANT FOR VANCOUVER

A plant is to be established in Vancouver by the Canada Wire & Cable Company. Between 300 and 400 men will be employed at the Vancouver plant. H. Horsman, General Manager, will leave for the Pacific Coast early next month to superintend the commencing of building operations. The B. C. plant will supply the company's market in the Western Provinces.

FEE FOR CARRYING OF FIRE ARMS

Montreal.—Upon recommendation from the Executive Committee, the city council at a recent meeting passed a resolution whereby: "Every person who has obtained from the chief of police of the city, under the statute of Canada 11-12, George V., chapter 25, article 2, a permit to carry a firearm, shall, in order that such permit be valid, pay to the city treasurer the sum of five dollars."

C. M. A. ANNUAL CONVENTION

Montreal.—Arrangements are being made by the Canadian Manufacturers' Association for their annual convention, which will be held at St. Andrews-by-the-Sea, N.B., on June 20, 21, 22 and 23rd. A special train is being arranged for, leaving Montreal on the morning of June 19th, arriving at its destination the following day.

A circular has been issued to members of the Quebec division pointing out that owing to business depression during the past year, it was possible that Western Ontario and the Western Provinces would not be strongly represented because of the long and expensive journey across the continent. The numerical success of the convention, therefore, rested to a considerable extent upon Eastern Ontario, Quebec and the Maritime Provinces.

ONTARIO INCORPORATIONS

Good Housekeeping Appliances, Ltd., head office Toronto, capital $100,000 to manufacture and deal in gas, electric, water and domestic appliances.

Radio Devices Ltd., head office Gananoque, capital $40,000 to manufacture and deal in radio and electrical supplies.

Non-Freeze Battery Mfg., Co., Ltd., head office Simcoe, Ont., capital $75,000 to manufacture storage batteries, electrical heating, cooking and lighting apparatus, etc.

DOMINION INCORPORATIONS

Sportsmen's Specialty Co. of Canada, Ltd., head office Montreal, capital $50,000 to manufacture, wholesale and retail sportsmen's equipment of all kinds.

Radio Equipment and Supplies Ltd., head office Toronto, capital $250,000 to manufacture and deal in radio equipment, automobile equipment, shelf and heavy hardware etc.

Roxton Tool and Mill Co. Ltd. has been changed to the corporate name of The Stanley Tool Co. of Canada, Ltd. to manufacture and deal in all kinds of hand tools, rules and measuring instruments.

S. & S. Higman Ltd., head office, Ottawa, capital $50,000, to manufacture and deal in paints, pigments, polishes, linseed oil, varnishes, glass, etc. S. Higman, H. S. Higman, A. J. Rudd, C. G. Armstrong and G. Thompson, incorporators.

D. S. McLachlan, retail hardwareman of Armstrong, B. C., has been succeeded by Manville and Sons.

Some Rough Edges to be Smoothed

NOW THAT the hardware trade has had a week to think over the effect of the new taxation and tariff changes as outlined in the budget as appearing in last week's issue of Hardware and Metal, some very interesting points have been raised, and it is understood that there is every likelihood of some further changes being made in the regulations in so far as the retail trade is concerned.

The increase in the Sales Tax to an odd percentage makes it a little difficult to figure though one firm has put into use a plan whereby tax is figured at 2½% and then a deduction of 10% of the amount is made giving the same result as 2¼% of the amount. The calculation of this tax requires increased accounting work and in the case of some manufacturers and jobbers this increases overhead costs. One manufacturer estimates his costs of accounting to take care of governmental requirements at 25% of the amount raised. His accounting department has trebled in size in three years with little increase in volume of business.

The sales tax will be passed on by both jobbers and retailers in future to a greater extent than in the past due to the fact that it is now too great to be profitably absorbed as was formerly the case on many lines. One Toronto jobber is revising prices immediately to take care of the increased sales tax where formerly it was absorbed. The natural increase in prices to the consumer is not calculated to be such as to seriously interfere with trade. In many cases the higher sales tax offsets any advantage from tariff reductions.

Both the British preferential and general tariffs have been reduced on certain hardware lines but hardly sufficient to make much difference. The reduction of 2½% in the British tariff on enamelware will have little effect as Canada's chief imports of enamelware are from United States and very little in the way of enamel household utensils is imported in any case. The general tariff reduction on dairy hollow-ware may have some effect on prices in Western Canada where there are considerable importations of U. S. lines.

The cancellation of Marking of Imports regulations and those dealing with valuation for duty rather opens the Canadian market to undesirable competition from certain European countries. True there has been importation into Canada of the product of such countries by evasion of the regulations through shipping goods via other countries. but the valuation for duty regulations in combination with the Marking of Imports regulations tended to discourage such practice and evasion could have been made an offense and thorough inspection conducted as to the source of imports.

Certain manufacturers of cutlery and iron and steel producers view with apprehension the removal of obstacles to European trading in Canada. German producers are admittedly busy looking after the needs of the devastated areas of Europe and may have difficulty giving delivery on this market but even the giving of quotations in Canada would tend to unsettle the market and the fact must not be overlooked that these European producers prefer to deal with those who can make prompt payment.

It is encouraging to note that the country is in comparatively good shape, revenue having fallen off only 12.2% during the depression and the large sum of $105,000,000 having been secured by direct taxation last year. This would seem to indicate a healthy basis on which to build bigger business this year.

Steel Industry Nearer Profitable Business

THE STEEL industry is reflecting improved conditions throughout and prices are showing considerable firmness with several increases, as forecast in recent issues of Hardware and Metal. Output is being well maintained and new buying while not so active in some lines is enough to maintain firm prices with some advances chiefly on early deliveries. Bar products, black sheets, blue annealed and galvanized sheets have undergone advances this week and it is significant of conditions in this industry in Canada that earliest delivery on bar products is from three to four weeks while on sheets it is about six weeks.

The ten per cent. reduction in freight rates in the United States is said to have been a disappointment to some steel producers but the opinion is held that too much of a reduction would also be bad for the industry in so far as it would impair the buying power of the railways. These reduced freight rates in the U. S. are not effective until July 1 and as might be expected there has already been some holding up of shipments until after that date. This particularly applies to ore rather than finished materials and a movement is on foot to have the reduction in rates on ore applicable from June 10. Considerable speculation is heard as to the prices to prevail in the third quarter, particularly on sheets, tin plates and wire products, but early advices from various authorities on the subject would indicate that no lower prices may be looked for even if freight rates are reduced because of the fact that mills have been producing these lines on small margins for some time past. In this connection Judge Gary of the U. S. Steel Corporation, made the following interesting statement this week: "Little need be said about the changed and changing business conditions for the better in the iron and steel industry. The facts and figures have been and are being published. The volume is large and increasing. The profits are not satisfactory but few, if any, ought to be doing business at a loss and we shall soon, I hope, settle down to a readjusted basis of prices and rates that is fair and reasonable and on a comparative parity. We seem nearer to big, even profitable business, than for some time past."

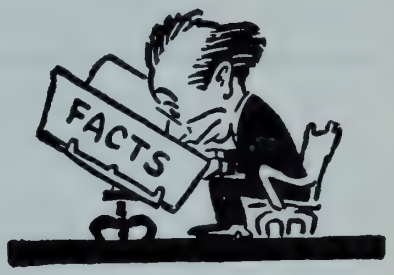
SALESMEN for manufacturers and wholesalers have found that the hardware merchant of to-day is not very gullible when it comes to buying merchandise. No, the demands of the times are too exacting to be lax in buying. But this is not an attribute of recent years for it was also characteristic of hardware merchants many years ago. J. Billinghurst of The Boeckh Company, tells an interesting story in proof of this. Many years ago he was working a hard territory in Eastern Ontario. He has just completed a particularly arduous trip on which he had been successful in disposing of a considerable stock of specialties which his firm was particularly anxious to clear out to make room for other lines, when in the midst of his enthusiasm he received a card from one hardware merchant whom he had sold, with the following brief and caustic remark: "Until now we were not aware that Noah had left anything at all out of the Ark."

The Facts Family

How Shaking the Apple Tree
Proves the Strongest Stems

or

The Story of What and Where
and the Important Children



YOU see in this cartoon a business man diligently taking a course in FACTS at Success University. He is a wise man, earnestly studying the most important part of the curriculum.

FACTS are vital to the man who would take a diploma in Success. They mean more than wealth, position or influence.

They are the difference between **know** and **blow.**

They are the substance you find in the solid ground of Ability and miss in the quicksands of Bluff.

They are the children of What and Where—the brothers of Who, When, How and Why.

Study FACTS if you want to succeed, KNOW—if you want to grow.

To-day, you hear businesses compared to apples.

"They are shaking the trees," say the students of business, watching many establishments fall.

But you'll observe too, that all the apples do not fall. Some hang on. Their stems are strong and hold tight. They will be hanging when the shaking ends.

Those are the apples whose stems are FACTS.

Those are the concerns who know as much or more than anyone else about their products or their methods, or merchandise—the men who know **how** to sell, **when** to buy, **where** to locate, **why** to advertise, **who** to see, **what** to do.

And you may be assured that knowing the FACTS about your business you too are as secure as the apple with the strong stem.

But do you know? Or is it high time that you enrolled in Success University and started a diligent study?

Only you can answer. Only you know what you know. Competitors can soon learn what you don't know.

And remember this—no one knows it all—no one can afford to stop learning. Therefore, cultivate the FACTS family always. Maintain a friendly, constant acquaintance with How, Why, What, Where, When and Who. They're **profitable** friends.

Events in the Trade

OBITUARY

Mr. Barker, general manager of Jones Bros., manufacturers of store equipment, Toronto, is dead.

The sudden death is announced of Frank A. Burgess, president Burgess-Norton Manufacturing Co., Geneva, Ill., U. S. A.

NEW FIRMS

A. Latremouille has opened a retail hardware store at 210 Bernard St., Montreal.

PERSONAL

W. F. Macpherson, Secretary Ontario Retail Hardware Association is spend- a few days among the hardware trade in Windsor, Walkerville and district.

R. M. Inglis, general sales-manager of the Ruberoid Co., Montreal, is visiting the company's plants in the United States and will be away until the end of the month.

H. B. Seybold of Starks-Seybold Ltd., Montreal, elected a city alderman of that city in January last, will take up the duties of acting mayor for the ensuing three months in the absence of Mayor Martin.

Congratulations are extended to Arthur L. Greenside, hardware merchant, Danforth Ave., Toronto, and formerly a member of the staff of Hardware and Metal on his marriage to Miss Rosamonde Kinney of Picton, Ont.

Percy Clarkson who at one time represented Meakins & Sons, Ltd., of Hamilton in Western Ontario, is now representing this firm in Northern Ontario. He has taken over this latter territory from Mr. Sugden who has been forced to relinquish his position due to ill health.

Major R. A. McAvity has been elected a director of T. McAvity & Sons, Ltd., St. John, N. B. Major McAvity has had a wide and varied experience with the above firm. Commencing as a clerk, he worked his way to manager and is now managing director of one of the company's plants.

F. R. Sumner, president of Sumner Co. Ltd., Moncton, N. B., has sailed from Montreal for England.

D. A. Patterson, general manager, and W. A. C. Hamilton, secretary Consumers' Cordage Co., who have been on a trip through the Western provinces to the coast are expected back in Montreal around the end of the month.

NEW FIRM WANTS CATALOGS

W. J. Henderson, who formerly managed the Maglader store at Englehart, Ont. is opening a hardware store on his own account there and desires catalogues of general hardware stoves, oil stoves, valves and fittings, heating and plumbing goods, sheet metal, auto accessories and sporting goods.

OWEN SOUND HARDWARE FIRM CHANGES HANDS

Owen Sound, Ont.:—The hardware stock of R. P. Butchart and Bro. has been purchased by Messrs. T. I. Thompson Ltd., who now occupy the Butchart store. The latter firm was much the oldest hardware firm in this city, and the Thompson firm has an Owen Sound history dating back to 1887 when the late T. I. Thompson came here from Port Elgin and bought out the hardware business of the late W. B. Stephens. The Thomson firm was later incorporated into a joint stock company and Mr. Leonard Ferguson and T. W. Thomson was taken into the firm. Since the death of the founder, the firm has carried on under the old name. The two stores will be kept going for several months, but it is understood that the old Thomson store will be vacated and the whole business will be conducted in the former Butchart store, which is a large and well equipped hardware premises.

The Butchart hardware store was first started by the late G. M. Butchart, over 70 years ago, and was successfully conducted by him for many years. On his retirement the store was taken over by R. P. Butchart and D. M. Butchart under the firm name of R. P. Butchart & Bro. Later R. P. Butchart assumed the management of the Owen Sound Cement Co.'s plant at Shallow Lake and D. M. Butchart took over the hardware business, but still continued the old firm name. For several years Reginald M. Butchart has been in charge of the business.

TO MAKE AUTOMOBILE TUBES

Aurora.—The Taylor Rubber Company of Toronto have purchesed a site of 4 acres, known as the Davey farm on north Yonge street, where a factory will be built for the manufacture of a patented inner tube for automobiles.

MOVE TO NEW PREMISES

Premier Tire and Rubber Company has moved into new premises at 116 Adelaide St. West, Toronto, where more convenient and larger premises are available.

IMPROVEMENT FORECAST BY INCREASED PRODUCTION

The McClary Manufacturing Company has this week commenced work in both its plants with a full staff of men and on full time. J. J. Foote, who made the announcement, states that times are slowly but steadily improving, and he looks for general prosperity in the not far distant future. McClary's has always been the barometer of conditions in London, and the announcement of the return of the plant to normal conditions of business is good news to the citizens.

BRIDGEPORT HARDWARE MFG., CO., APPOINT NEW REPRESENTATIVE IN QUEBEC

The Bridgeport Hardware Manufacturing Corporation of Bridgeport, Conn., U. S. A., have just appointed Hubert B. Johnston of Sherbrooke, P. Q., as their exclusive sales representative for the province of Quebec and the city of Ottawa in the province of Ontario.

Mr. Johnston spent a few days at the factory at Bridgeport, Conn., studying processes of manufacture of the Bridgeport Line of nail pullers, box openers, crate openers, pliers, screw drivers and the various automobile tools made by the Bridgeport people such as valve lifters, tire tools, slip joint pliers, etc. Mr. Johnston has been calling on the jobbers in the above territory since June 1st.

DELCO-LIGHT CO. STARTS IN CANADA

Oshawa, Ont.—Another large American industry has decided to locate in this country. The Delco-Light Company of Dayton, Ohio, a division of General Motors Corporation, has formed Delco-Light Company of Canada, Limitted, and has joined other General Motors Divisions at Oshawa, Ont.

R. H. Grant, President of the Delco-Light Company, who is in Oshawa to formally open the Canadian factory, said, "From the very beginning of our business we have considered Canada as a most important part of our market."

The new Canadian company will be under the management of R. L. Meyers.

Hardware Clerks Influence Hydro Question

St. John Association of Hardware Clerks Conduct Aggressive Campaign for Municipal Distribution of Electricity—Members of Organization Asked to Run for Municipal Honors

DEALING with activities of the St. John Hardware Clerks' Association, P. H. Butler, representative of Hardware and Metal in that city has written as follows:—

"The St. John Hardware Clerks' Association is conducting a very aggressive campaign for municipal distribution of the recent hydro-developed electricity, now offered to the city of St. John by the New Brunswick Electric Power Commission, composed of members of several organizations who have declared themselves as being favorable to the municipality taking over and distributing the power. These amalgamated organizations are known as "The United Organizations" and Roy Willet, president of the Hardware Clerks' Association was elected chairman, and myself elected secretary. One of our executives is an expert engineer, and in the early part of our campaign wrote a series of letters on the light and power situation in St. John, and these were published in pamphlet form by our association, and mailed to five thousand tax-payers in the city. We also have held several public meetings, and have stirred up such a strong feeling in the matter that members of our association have been urged to run in the coming civic elections for the city council, but so far we have not decided to run any of our members. However, we have forced the hydro question into civic politics, and last week called a public meeting in one of our large halls at which all candidates for office were present and declared their views on municipal distribution. So much interest was taken by the citizens in this meeting that the hall was packed long before the meeting opened, and hundreds of citizens had to be turned away. So successful has our campaign been that six out of the eight candidates declared themselves for municipal distribution of the power, and at each declaration the applause of the audience was tremendous. It might be well to state here that three months ago practically every citizen was opposed to municipal distribution, but owing to the propaganda put out by the Hardware Clerks' Association in nearly every issue of three of St. John's daily papers, public opinion has been reversed. Our association has secured data from every municipality in Ontario operating under municipal distribution of hydro-developed power, their installation costs, up-keep costs, capital charges, power and lighting rates, cost at which they buy, in fact all information that is necessary for an intelligent consideration of the matter. We have also been in communication several times with Sir Adam Beck, and have been supplied by him with much information. At the present time our association has on hand a petition signed by about five thousand voters asking the city council to take over and distribute the power. This number represents sufficient voters to demand a plebiscite, and will be used for this purpose, if necessary."

EXPLOSIVE COMPANY STARTS IN QUEBEC

Northern Explosive Limited, has commenced operations at Dragon, Quebec, on the old site of the Curtis and Harvey plant. The company at present employs approximately 100 men, and anticipated production for this year is about five million pounds of high explosives. The Atlas Powder Company of Wilmington, has acquired approximately 50 per cent. of the total stock.

The company expect a market for their products in this province and Ontario, particularly in the Sudbury mining district. A considerable market is also said to be assured in Nova Scotia.

Later on it is the intention of the company to branch out into the manufacture of important by-products which will include celluloid products and leather cloth, the latter a commodity largely used for the upholstering of automobiles.

The capital stock of the company is $15,000,000.

Motor Truck Owners Form Association

Following Recent Legislation in the Quebec Legislature, Action is Taken by Truck Owners and Montreal City Council

MONTREAL.—The recent legislation in the Quebec Legislature dealing with motor trucks, by which municipalities may limit the load carried by trucks through the city streets, and prohibiting motor vehicles traveling on rural roads with a capacity load of more than 5,000 lbs., and total weight of truck and load not over 24,000 lbs., has brought forth contemplated action by the city council and local truck owners. Immediately the Bill passed the legislature, local manufacturers, who use the larger size trucks on country roads for conveyance of goods to their customers within reasonable distance of Montreal, voiced their opposition to the amendment and preparations are now well under way to place their opposition before the Quebec House.

Motor Truck Owners' Association

At a recent meeting of those interested, the Motor Truck Owners' Association was formed, and the election of officers and arrangement of detailed work is set for a meeting at a later date. It is the intention to organize to a minimum membership of 1,000, and when formed, the members will be in a better position to remonstrate with the government. By furnishing all necessary data, and approaching the Government with sane and logical arguments, it is felt the law will be either repealed or amended to the satisfaction of all concerned.

City Proposes to Limit Loads

On the other hand, the city authorities are losing no time, and, taking advantage of the amendment whereby municipalities governed loads and speed within city or town limits, a committee of alderman is appointed to consider suggestions as may be submitted by those interested. That heavily loaded motor trucks are doing a lot of damage to city pavements is the opinion of the Public Works Department, for which reason, they say, such vehicles should not be tolerated on Montreal streets. The opinion at the City Hall is that the city should limit the loads of these trucks to ten tons, which would include both the load and the weight of the truck.

However, the appointed committee will give all interested a chance of submitting their views, and will then consult the City Engineer as to the limit of weight to be specified in the by-law which will be adopted.

LETTERS FROM ELECTRICAL MANUFACTURERS IN NEXT ISSUE

Announcement was made in last week's issue of Hardware and Metal that an answer to the editorial comment of an electrical contemporary concerning an editorial which appeared in April 29 issue of Hardware and Metal would appear this week. As we go to press letters have been received from practically all electrical manufacturers in Canada in response to the enquiry conducted by the Ontario Retail Hardware Association. These letters give enthusiastic and unanimous support of the hardware trade as an important channel of distribution of electrical equipment both for the present and the future, and as they have been received too late for publication in this issue they will be fully outlined next week.

New Hardware Goods

OFFERED TO CANADIAN HARDWAREMEN

DURO POTATO POT

Duro Aluminum Limited, of Hamilton, Ont., are introducing to the trade a new Duro potato pot, which the manufacturers state has a number of combined features of special value to the busy housewife.

It has a welded spout, with a strainer on both sides, and the lid will lock so that in draining potatoes or vegetables, the risk of scalding hands is eliminated; this new product is made in three sizes, four, six and eight quarter.

VIKO BRIDAL SET

The almost universal demand for a suitable gift for the bride at this season of the year, has been responsible for the Aluminum Goods Mfg. Company, Manitowoc, Wis., offering through the regular jobbing channels a special five-piece bridal gift set. This set covers five useful kitchen aluminum utensils, packed in an attractive carton. The set consists of a 5-quart tea kettle, 2-quart percolator, 1½-quarts double boiler, 3-quart saucepan and a 6-quart convex kettle. The makers point out that this is the regular Viko quality, with each set, in a special gift box which is suitable not only for wedding presents, but for kitchen showers for the bride elect, birthday gifts, and the regular trade. The manufacturers also point out that every piece in this special set is a staple article and can be put into open stock if desired.

ELECTRIC WATER HEATER

Imerso is the name given to a small electric water heater made by the Electro Heater Co., Inc., Washington, D. C. which is, however, distributed by the Imerso Distributors, Inc., 23 Duane St., New York City.

This device may be used for heating the water for shaving, bathing, boiling eggs, heating childrens' feed bottles in boiling water, for boiling water to cook vegetables and for heating water to be put in a hot water bottle. The lower end of the heater is placed in the water and the plug at the end of the wire placed in a convenient socket. Then turn on the electric current.

Other features pointed out by the producers are that the wire heating element may be replaced at nominal cost. The Imerso is also a useful travelling accessory.

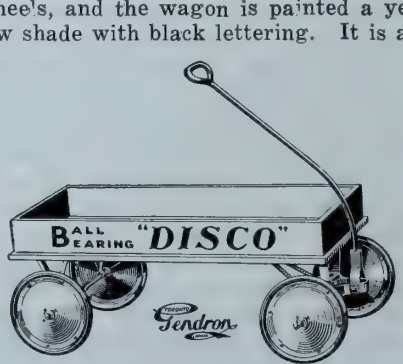
SLIP JOINT AUTO PLIER

A slip joint auto plier, with wire cutter, is being manufactured by the Wilde Drop Forge and Tool Co. of Kansas City, U. S. A. This is being produced in both plated and gun metal finish, and is described by the manufacturer as suitable for practically all kinds of work. It is

finished in full grip knurled handles, and is drop forged from high carbon steel. The long slim nose is described as a feature for making it possible to reach parts in autos and machines, which are often inaccessible to the shorter plier. Messrs. W. Bruce Morrow of Toronto, are the Canadian distributing agents for the Wilde slip joint plier.

DISCO COASTER WAGON

The Gendron Mfg. Co. Limited, of Toronto, are introducing to the trade a new ball-bearing disc coaster wagon. This new product is equipped with disc wheels, and the wagon is painted a yellow shade with black lettering. It is al-



so fitted with ball bearings. The wheels are riveted with double head rivets. The makers further point out that this is a strong and sturdy wagon, with an attractive appearance.

FEELER GAUGE

The Goodell-Pratt Co. of Greenfield, Mass., have recently added to their line of tools a new product which is described as a Feeler Gauge. Its purpose is to assist in setting valve tappets, spark plug and distributor points. The manu-

facturers state that this feeler gauge No. 569, is particularly adapted to the needs of motor car owners for the uses outlined above. It has six leaves gauge .002, .003, .004, .005, .010, and .015 inches thick, making possible in combination all thicknesses by thousandths from .002 to .039 (except .038.)

The leaves are 2¼ inches long by ½ inch wide. They are held together by a screw and nut, which are readily removable for inserting or replacing the leaves. There is no case, or sides for this gauge, the leaves when not in use forming the handle.

COLEMAN "CRAFT" WRENCH

The Craft pipe wrench is the product of the Coleman Railway Supply Co. of New York City. This product is a self-adjusting wrench, with a patented self locking double geared disc and saddle. To open the wrench, the saddle is pulled backwards as far as necessary. In operation, the wrench is placed so that the pipe is in the notch. The makers state that the spring will roll the disc forward, until it touches the pipe. Pressing downwards on the handle together with a slight pull, will enable the wrench to take hold. It is said that the harder the push, the tighter is the grip of the wrench. To remove, all that is required is to give an easy push forward. The special design of the "Craft" wrench, enables it to readily roll free. The manufacturers also point out that the three point contact, gives a torsional instead of a crushing grip, and prevents the wrench from spoiling the stock. It is made in six sizes. 6 inches to 24 inches. It is made from case-harde pressed steel, while the disc is a heat-treated drop forging.

Weekly Hardware Market Reports

STATEMENTS FROM BUYING CENTRES

Markets at a Glance

ANOTHER extensive and varied budget of market developments is apparent in current hardware circles. Price revisions, both upward and downward, attract special attention, with other elements of a special nature also recorded. Higher prices appear on brass and copper tubing, brass sheets, copper rods, galvanized sheets, blue annealed and black sheets, the Lunkenheimer line of valves and certain grades of scrap materials. Attributable to the increased sales tax are slightly advanced quotations on wire and wire products such as wire nails, fence staples both bright and galvanized, barbed wire, plain, galvanized, plain twist, coil spring and annealed hay wire, and also cut nails. Bar iron and bar steel prices are on a marked upward trend, increases of five to ten cents per 100 lbs. being already recorded in certain quarters. The shortage of turpentine on the domestic markets is again strongly emphasized with a further price advance.

Price reductions have been announced on American ammunition, this change affecting metallics and paper shot shells. Wool packings are on easier price levels, together with similar changes on heavy coil door springs, square tower bolts, hammock hooks, the Red Devil line of electrician bits, and certain steam and air cocks. Many of the Taylor-Forbes products appear with new prices ranging from five to twenty per cent lower, this list including such items as door pulls, drawer pulls, hat and coat hooks, door holders, harness hooks, chest handles, clothes line reels, saw sets and hog ringers. Western centres record downward revisions on the Sovereign line of stove pipe dampers, wood butter bowls, Globelite batteries and Thermos products, the latter change being due to a new arrangement with regard to freight charges on bulk shipments.

Malleable fittings are quoted under a new piece list, with discounts of 70 and 5 per cent., effective June 1. The steel industry as a whole has now gathered sufficient momentum to carry it through the proverbial dull summer months, with relatively improved prospects. The stronger tone in ingot metals is fairly well maintained, lead and spelter being quoted higher due to the firmness of primary centres, while tin and copper reflect increased interest. Certain grades of scrap materials are being strongly held by dealers with higher asking levels. Many price changes that have taken place are caused by manufacturers and jobbers going over their stocks and repricing same to take care of the advance in sales tax and other developments in tariff changes. It is stated that this movement will most likely be continued until entire stocks have been revised, but neither advances nor declines are expected to be of an extensive nature, particularly on foreign-made goods as the present exchange rate is considered as evening up tax changes. It is pointed out that on domestic products, where many wholesalers have been absorbing the sales tax in order to maintain uniform price levels, adjustments of this nature will be in order, as jobbers could not be expected to continue absorbing the additional rate of taxation.

Montreal Markets

MONTREAL, June 1.—The budget is now attracting attention in manufacturing and jobbing circles, and the effects are already being noted in the current hardware markets. As a direct result of the higher sales tax, increased quotations appear on all wire and many wire products. The base price on wire nails is increased five cents, also cut nails. Both bright and galvanized staple prices are advanced to the same extent; barbed wire, plain wire, galvanized wire, coil spring, plain twist and annealed hay wire recording a similar revision. Bar iron and steel is five cents per hundred lbs. higher in most quarters, while other jobbing houses have not yet advanced their quotations. Revisions in a downward direction are announced on American ammunition, both metallics and paper shot shells having new lower quotations. In the waste markets, all grades of wool packing are reduced, while in brass compression goods, steam and air cocks have revised discounts.

WIRE NAILS BASE PRICE INCREASED FIVE CENTS

Montreal.

Jobbing houses announce an increase of five cents on the base price of wire nails, resulting from the increase in sales tax. This brings present quotations to $3.70 base. Current trade in nails is said to be seasonable, and with an active building program throughout the summer months a brisk demand is anticipated. Cut nails are also increased from $4.35 to $4.40 base.

FENCE STAPLES ALSO ADVANCED IN PRICE

Montreal.

Both bright and galvanized fence staples are five cents per 100 lbs. higher in company with the slight general advance in wire and product quotations. Following are present prices:

FENCE STAPLES—

Bright in 100 lb. kegs	$ 4 20
Do., in 25 and 50 lb. boxes	5 20
Galvanized in 100 lb. kegs	5 20
Do., in 25 and 50 lb. boxes	6 20

EASIER PRICES RECORDED ON WOOL PACKINGS

Montreal.

In the waste markets, wool packing is featured by a reduction in prices. The

highest grade is reduced one cent per lb., and the medium and lowest grades quotations are reduced two cents per lb. All grades of cotton waste, and wipers, are unchanged in price, with raw cotton reported as somewhat firmer in the past week or so. Prevailing quotations are as follows:

COTTON WASTE—	Per lb.
Cream polishing	0 18
White, XXX extra	0 16
White XX grand	0 15
White XLCR	0 14
X Empire	0 13
X Press	0 11½
Colored—	
Fancy	0 13½
Lion	0 12
Popular	0 09
Keen	0 07½
Wool Packing—	
Arrow	0 24
Axle	0 20
Anvil	0 16
Dominion Wipers—	
White cotton	0 20
Colored cotton	0 14

PLAIN WIRE NOW SELLS FOR $3.65 BASE

Montreal.

A corresponding advance of five cents is made on the base price of plain wire, and this is now quoted at $3.65, with the usual extras for oiled, annealed and coppered.

BAR IRON PRICES ON UPWARD TREND

Montreal

The increased sales tax is now reflected on the local iron and steel market when prices on practically all lines are advanced five cents per 100 pounds. This revision is not yet announced by all distributors, but it is expected that it will be generally adopted within the very near future. The recent variation in local quotations among jobbing houses is much improved and present price levels are from $2.90 to $2.95, the advance of 15 cents being made where formerly $2.75 was quoted.

Increased quotations are again reported by certain producers in southern markets, independent mills apparently taking the lead in the upward trend. Higher production costs, through advanced prices on coal, coke, pig iron and scrap, have forced some of the smaller mills to announce higher price levels. Whether this development will be followed by a general adoption of higher prices, and whether it will reflect on domestic markets in the near future is yet considered problematic, but according to local distributors, it is another factor strengthening the situation. Following are price levels most generally quoted:

IRON AND STEEL—	
Common bar iron, 100 lbs.	2 95
Refined iron	4 45
Irish finish machinery steel	3 00
Mild steel	2 95
Single reeled machinery steel	5 05
Band steel	3 30
Spring steel	4 55
Sleighshoe steel	2 95
Tire steel	3 15
Harrow tooth steel, per lb.	3 10
Mining tool steel, per lb.	0 20½
Toe caulk steel	3 85
Black Diamond tool and cast steel, per lb.	0 20½

NOTE—Refined iron is approximately $1.50 per 100 pounds over base, but fluctuates owing to unsettled market.

Band steel in scroll bundles, 50c per 100 lbs. extra.

FURTHER SLIGHT ADVANCE IN BARBED WIRE PRICE

Montreal.

Following the advance of last week further higher quotations are given on barbed wire. Both spools and catch weights are increased five cents. Following are revised prices:

BARBED WIRE—

In 80 rod rels per reel, 2 x 5, $3.55; 4 x 4, $3.80; 4 x 4, $4.15.

Catch weights $4.40 per 100 lbs.

LOWER TARIFF ON WROUGHT IRON PIPING

Montreal

Wrought iron and steel pipe quotations remain at list No. 54, with a strong tendency still apparent in the undertone of the market. It will be noted however, that wrought piping is one of the lines listed in the Government budget as now having a lower tariff rate. Local manufacturers state that they have taken this reduction into consideration, and while it has undoubtedly a tendency to weaken the market, the firmer tone which has been evident for some weeks past is a factor which cannot be overlooked. While they are ready to meet outside competition, because of expected delays in deliveries from other markets it is probable that any action will be deferred until a later date.

SLIGHT REVISION IN PLAIN GALVANIZED WIRE

Montreal.

The slight advance recorded in quotations on other wires is also reflected on plain galvanized wire, and new higher prices are as follows:

GALVANIZED WIRE—

Per 100 lbs.—3 to 8, $4.60; 9, $3.95; 10, $4.70; 11, $4.75; 12, $4.10; 13, $4.25; 14, $5.10; 15, $5.70; 16, $5.85.

RANGE BOILER MARKET MAKES GRADUAL PROGRESS

Montreal.

Current trade in range boilers is reported as being on a gradual improvement, the past two weeks bringing faster movement. Business in boilers has, however, been more or less spasmodic since early spring, and on the whole has been a little disappointing up to the present. Quotations are nominally unchanged, and following are list prices and discount:

RANGE BOILERS— Size	List Price
5 gallon	$ 13 50
12 gallon	14 00
18 gallon	15 00
25 gallon	16 50
30 gallon	17 50
35 gallon	20 50
40 gallon	22 75
52 gallon	38 00
66 gallon	60 75
82 gallon	74 00
100 gallon	103 00
120 gallon	117 00
144 gallon	164 00
168 gallon	187 00
192 gallon	210 00

Discounts:—Standard weights, 50 per cent.: Extra heavy, 40 per cent.

PLAIN TWIST WIRE NOW $5.35 PER 100 LBS.

Montreal.

Quotations on galvanized plain twist have also been slightly increased to $5.35 per 100 lbs.

ANNEALED HAY WIRE PRICES AGAIN REVISED

Montreal.

A further reduction is made in annealed hay wire quotations, an advance of five cents per 100 lbs. being recorded. Following are new prices:

HAY WIRE—

No. 13, $3.85; No. 14, $3.95; No. 15, $4.05 per 100 lbs.

EASIER PRICES RECORDED ON AMERICAN AMMUNITION

Montreal.

Discounts on American ammunition, both metallics and paper shot shells, are revised and reduced quotations appear on all lines. Revised discounts will be found on current market page.

REVISED DISCOUNTS ON STEAM AND AIR COCKS

Montreal.

Through a change in discounts air, steam gauge and compression gauge cocks are reduced in price. Air cocks are now quoted less 60 per cent. steam gauge cocks less 55 per cent. and compression gauge cocks less 50 per cent. A fair volume of trade is now in evidence in the various lines of compression goods, building activities stimulating sales, especially in recent weeks. With continued progress in this direction, a steady volume of business is anticipated. Following are present discounts on the various lines:

COMPRESSSION GOODS—	
Compression work, standard	45%
Fuller work, standard	30%
Quick opening compression bibbs	43%
Bath cocks, compression	41%
Bath cocks, quick opening	41%
Basin cocks, compression	34%
Basin cocks, quick opening	46%
Flatway stop and waste cocks, standard	54%
Roundway stop and waste cocks, standard	46%
Brass steam cocks standard	50%
Radiator valves, standard	58%
Do., removable discs	58%
Globe, angle and check valves, standard	25%
Gate or straightway	25%
Emco globe valves	33%
Emco check valves	33%
Jenkins globe, angle, check and swing check	19%
Jenkins gate or straightway	25%
Jenkins iron body, globe and angle	15%
Jenkins iron body, gate	33%
N.P. "P" and "S" traps	40%

SEASONAL CALL FOR SOIL PIPE AND FITTINGS

Montreal.

With soil pipe and fittings selling at revised quotations of last week, current trade is said to be fairly brisk, an appreciable improvement having been felt in the past few weeks. The undertone of the market remains steady following the price advances, and with active building construction during the summer months, a fairly good demand is expected to continue. Prevailing discounts are the following:

SOIL PIPE—	
2 and 3 inch	40%
4 inch	45%
5 and 6 inch	40%
8 inch	20%
Fittings—	
2 and 6 inch	50%
8 inch	20%

SLIGHTLY ADVANCED PRICES ON COIL SPRING WIRE

Montreal.

The price advance is also recorded on galvanized coil spring wire, and No. 9 is now quoted at $4.00, No. 12 at $4.15 per 100 lbs.

SHEET STOCKS STILL COMPARATIVELY LOW

Montreal.

Little or no change is made in local sheet quotations, and low stocks are now said to be a feature in the market. Although distributors state that demand has slackened a little during the past week, the increased buying movement in galvanized sheets in previous weeks found warehouse stocks at a comparatively low level with the result that available material was taxed quite heavily. With delayed deliveries from southern primary markets, dealers have been looking more to English markets, and importers of these sheets are still finding an active demand for all arrivals. Prices locally are said to be almost entirely governed by quotations from overseas, and a further stiffening is considered altogether likely within the near future as conditions in England have also shown a great improvement during recent months.

LOWER STOCKS FEATURE WASTE MATERIAL MARKETS

Montreal.

Waste material quotations are nominally unchanged since the general revision of last week, with the improvement in the market being generally maintained. Consumption of practically all metals continues in somewhat heavier proportions, and also adding to the general stronger tone is a shortage in some lines commencing to be felt. For some time past dealers have been unwilling to allow large stocks to accumulate. With war materials gradually dwindling, and less scrap available because of inactivity in all circles, stocks were not in a position to take care of the heavier consumptive requirements. Taken altogether the market is now in a much improved condition, and dealers are hopeful that the betterment will be in evidence during the summer and Fall months. Current price levels are as follows:

WASTE MATERIALS—	
Automobile tires	0 50
Rubber shoes	0 02¾
Yellow brass	0 06
Red brass	0 08¾
Light brass	0 04
Scrap zinc	0 03½
Lead, heavy	0 04
Lead, tea	0 02½
Light copper	0 08½
Heavy copper	010¾
Wrought iron, R. rd., No. 1, per gr. ton.	10 00
Malleable scrap (ton)	9 00
Pipe scrap (ton)	6 50
Heavy melting steel	9 00 to 9 50
No. 2 busheling	3 00
Boiler plate	8 00
No. 1 machinery cast	21 00

GAINS IN INGOT METALS WELL MAINTAINED

Montreal.

Changes in the metal markets as compared with last week are not very great, but the general tone is still firm, especially in primary markets. Prices locally have recently advanced in sympathy, but this has not as yet caused any great increase in buying, which is still on a conservative basis. Present indications, however, point to a gradual improvement from now on.

TIN.—Tin continues to fluctuate within very narrow limits, and at the moment there is said to be no indication of any particular change from this trend. Statistics for May are expected to show an increase in stocks, which may have a depressing effect on the market. Locally this metal is quiet, but prices are slightly higher owing to the increased sales tax. Present quotation 35½ cents.

COPPER.—This metal continues firm both in London and New York, with the market perhaps not quite as firm as last week. There is said to be no weakness to the situation, but the advance could not be maintained at the pace that has been ruling recently. While demand in the U. S. A. is good, it cannot be said that there has been any great increase in consumption here. The market is again slightly advanced to 17½ cts. for electro and 17¼ cts. for casting.

SPELTER.—Spelter continues its upward climb both in London and Southern centres, and has reached a figure higher than in some months on both markets. The situation is undoubtedly firm, but a re-action in the near future would not be surprising as it is considered an easy matter to increase production of this metal. Consumption in Canada is somewhat better, and the market is firm at 7¾ cents.

LEAD.—The price in the U.S.A. advanced a further 15 points this week, but is slightly below the open market of $5.50 East St. Louis. There appears to be no cessation in demand for this metal, and the market is still firm. London is still quoted at around the £25 mark, but it is considered doubtful if this can be maintained in face of increased supplies. The market locally is steady, with demand fairly good and price unchanged at 7 cents.

ANTIMONY.—This metal is quiet and has not shared in the advance of other lines. Locally quotations are unchanged at 6¾ cts. for Chinese and 7½ cts. for high grade English.

ALUMINUM.—There is still little change in aluminum, it remaining quiet on all markets. Local quotations are unchanged at 24 cents.

Toronto Markets

TORONTO, June 1.—Numerous interesting developments are again recorded on the local hardware markets, several upward revisions featuring current quotation changes. An advance of two cents per lb. has been announced on brass and copper tubing, while brass sheets and copper rods are one cent per lb. higher. Galvanized sheets, blue annealed and black sheets all appear with increased quotations, these products having been exceptionally firm, with advanced levels recorded in southern markets also. Lower prices are recorded on wool packings, with a similar revision in the discount levels on American ammunition, affecting metallic and paper shot shells. Malleable fittings are now quoted under the new price list, effective June 1, with discounts of seventy and five per cent. The firmer price trend is evident on machine and carriage bolts and nuts, with reports of increased prices coming to hand from southern primary centres. The move towards higher prices on bar products is gaining momentum and local distributors are more or less inclined to revise their prices upward in keeping with other markets. Higher prices combined with a firmer tone are noted in scrap materials, certain grades such as copper and heavy melting steel being strongly held by dealers with higher asking levels. Interest in ingot metals also shows an increase, with higher quotations generally in effect on spelter and lead, due to the firm tone in primary circles. Tin and copper are slightly higher, this change being partially due to the increased sales tax, while antimony and aluminum remain quiet.

MOVE TOWARDS HIGHER PRICE ON BAR PRODUCTS

Toronto.

Underlying conditions in bar iron and steel conditions continue to show increasing strength, and certain domestic markets again record an upward tendency. This element is also apparent locally, although no price developments have been announced. It is stated, however, that distributors of bar products would welcome the higher levels, and in view of the increased sales tax and other cost elements, there is apparent a more or less general leaning towards advancing these lines five to fifteen cents per 100 lbs. Another factor illustrating the current firmness in the steel market, is the fact that bars are now quoted by producers for three to four weeks delivery. No change in the coal strike situation is reported from southern centers, the opinions being expressed by mine operators that some time will el-

apse before a settlement is reached. Meanwhile pig iron is reported to be imported from Britain at price levels almost equivalent to southern market quotations, thus offsetting further advances in this direction. The cut in freight rates recently ordered by the American Interstate Commerce Commission is only expected to be of slight benefit to steel consumers, as any such change along these lines merely serves to relieve the firm upward tendency. Producers claim that manufacturing costs have been climbing especially on such items as pig iron, coke, coal, and so on, therefore any relief in transportation costs will be welcome. While no development of this nature is immediately anticipated on domestic markets, it is pointed out that the extent of the southern primary steel centres is usually reflected in local conditions. Meanwhile the following price levels are still obtainable on the domestic market:

IRON AND STEEL—	
Mild steel bars, base	2 75
Mild steel bands, 3-16 in. base	3 25
Bar iron, base	2 75
Angle iron, base	2 85
Horseshoe iron	3 60
Tire steel	3 00
Spring steel	6 00
Sleigh shoe steel	2 85
Hoop steel	3 00
Norway iron	12 50
Toe caulk iron	4 00
Crucible cast sheet steel	28 00
Mining drill steel	18 50
Cast tool steel, high grade	30 00
Cast tool steel, medium	18 00

FIRM PRICE TREND ON BOLTS AND NUTS

Toronto.

Reflecting the firmer tone in many manufactured steel products is the recent report from Pittsburg that one large producer has announced a boost of between five and ten per cent. in prices on bolts and nuts. These advances particularly refer to carriage and machine bolts and nuts of all kinds. Other producers of these lines are expected to follow this lead and the new higher levels become generally adopted in the south. Whether this tendency will be reflected on domestic markets is stated as problematic, but any such change undoubtedly tends to firm up the current situation.

LOWER PRICES RECORDED ON WOOL PACKINGS

Toronto.

A reduction has been announced in wool packings, these products now being quoted at the following revised levels for the different grades.

Arrow, 24 cents per lb.; Axle, 20 cents, and Anvil, sixteen cents per lb.

NEW DISCOUNT LEVELS ON AMERICAN SHELLS

Toronto.

A revision has been announced in the discounts on certain makes of American ammunition, thus lowering the quotations on these lines. The new discount levels, applying to the American lists, are included on the current market quotation pages.

HIGHER PRICE ON BRASS AND COPPER TUBING

Toronto.

Advanced price levels are recorded on brass and copper tubing, the increase being two cents per lb., while an advance of one cent per lb. is announced on brass sheets and copper rods. Other finished products show no further variation in quotations, a firmer tendency however, having developed due to the recent trend in the primary copper markets where this metal has a stronger tone combined with certain price gains. The development in this direction was outlined in last week's issue of Hardware and Metal. Following are the revised quotations on copper and brass, rods, sheets and tubing:

BRASS—	
Sheets, base, per lb.	0 22
Tubing, base, per lb.	0 25
Rods, base, per lb.	0 19
COPPER—	
Rods, base, per lb.	0 28
Soft sheets, plain, 16 oz. and heavier, lb.	0 28
Do., plain tinned 16 oz. and heavier, per lb.	0 35
Do., polished and tinned 16 oz. and heavier, lb.	0 40
Tubing	0 29

FIRM TENDENCY IN TIN PLATE MARKETS

Toronto.

The tin plate market is still described as strong, although production is now rated at slightly lower than formerly. This movement on the part of producers, however, is stated to be generally attributed to the uncertainty of the coal strike's effect upon the future market trend. The interest in prospective prices is fairly strong, in view of the fact that production costs are said to be advancing. This difference, however, has resulted in the practical elimination of shading and prevailing price levels are reported firm, on both primary and domestic centres. Whether this situation will remain apparent, however, is described as dependent upon the current demand for these products, combined with the trend of virgin metal, which has lately been fluctuating.

PLATES, CANADA—	
Dull 60 sheets	5 30
Ordinary, 52 sheets	5 25
PLATES, COKE TIN—	
IC, 20 x 28, 112 sheets	12 50
IX, 20 x 28, 112 sheets	16 00
IX, 20 x 28, 56 sheets	8 50
PLATES, CHARCOAL TIN—	
IX, 20 x 28, 56 sheets	10 00
IXX, 20 x 28, 56 sheets	12 00
PLATES, TERNE—	
IC, 14 x 20, 112 sheets	11 50

ANOTHER INCREASE IN QUOTATIONS ON SHEETS

Toronto.

As pointed out in recent market reports contained in Hardware and Metal, the firm trend in sheet circles generally, indicated higher price levels in the near future. This change has now developed, local quotations being generally advanced another ten cents per 100 lbs. this week.

The current demand for galvanized sheets is well illustrated by the fact that producers are taking orders for six weeks delivery, and some commitments are reported for even later dates. Prices are exceptionally firm, and the tendency in this direction is noted in a recent report from American centres where a further advance has been announced in sheet quotations of from $2,000 to $3,000 per ton. This action is expcted to spread and become generally adopted in southern circles. While there continues to be apparent a brisk demand for steel items, the opinion is expressed that production by the mills is well ahead of actual consumption, although buyers are booking ahead and the ratio of output is increasing. Manufacturing consumers and other interests are gradually replenishing stocks. This condition in general has resulted in the steel market as a whole having gained sufficient momentum to carry it through the proverbial dull summer season with relatively improved prospects. Prevailing sheet quotations follow:

BLUE ANNEALED—		
10 gauge, base	3 60	4 10
12 gauge	3 65	4 15
13 gauge	3 70	4 20
16 gauge	3 75	4 25
BLACK—		
18-20 gauge	4 15	4 65
22-24 gauge	4 20	4 70
26 gauge	4 25	4 75
28 gauge	4 35	4 85

Charge of from 25c. per 100 lbs. is made for less than case lots. An extra 10c. per 100 lbs. is also charged on sheets 26 in. wide.

GALVANIZED—	Queen's Head	Fleur-de-lis.
28 gauge	7 50	7 00
26 gauge	7 25	6 75
24 gauge	6 85	6 35
22 gauge	6 40	5 90
18 and 20 gauge	6 25	5 75
	Premier and	Apollo
10¾ oz.	6 10	6 60
U. S. 28 base	5 70	6 20
U. S. 26 base	5 40	5 90
22 and 24	5 25	5 75
18 and 20	5 10	5 60
16	4 95	5 45
12 and 14	4 80	5 30

An extra 40c. per 100 lbs. is charged for Keystone and Premier bands copper-bearing sheets.

An extra is now charged on galvanized sheets, 10¾ oz. and 28 ga., when shipped out in sheets 3 feet wide. The extra charged over prices shown above is 20c. per 100 pounds.

FAIRLY GOOD SEASON RECORDED FOR CEMENT

Toronto.

A brisk demand for cement is now generally reported, with improvement having been noted for export requirements for this product. The domestic market records a moderate degree of activity, but lack of road making has tended to restrict what might otherwise have been an extensive call for cement. Heavy construction work requiring large quantities of cement is also more or less spasmodic. However, producers report a fairly active season, with production around fifty per cent of capacity, as compared with 40 per cent during the year 1921. Following are unchanged price levels:

CEMENT—Car load lots.	Toronto.
Per barrel	$3 70
Less Car Load Lots—	
Per barrel, f.o.b. yard	4 30
Per barrel, delivered	4 50

Single bags, $1.15 each; 4 bags to barrel.

Extra charge of $1.50 per load on less than 24 bag lots.

Rebate of 20 cents for empty bags.

NEW PIECE LIST ON MALLEABLE FITTINGS

Toronto.

As outlined in a previous issue, malleable fittings are now quoted at the new piece list with discounts, instead of at the pound list as formerly. The revived quotations are effective from June 1, and the discount is seventy-five per cent., as forecast in Hardware and Metal, when the announcement regarding this change was first made. The movement of these products is now stated to be on a more satisfactory volume, such activity being attributed to the current requirements of construction circles. Following is the list of prevailing quotations:

PIPE FITTINGS—

Cast iron fittings	30%
Plugs, cast iron	30%
Do. solid	30%
Do., countersink	30%
Bushings, small	32%
Bushings, cast	32%
Unions, ¼ in. to 2 in.	47%
Unions, ⅛ in., 2½ to 4 in.	47%
Flanged unions	30%
Flanged fittings	30%
Dart Unions, blk., ¼ to 2 in.	33½%
Do., ⅛ in., 2½ in. and larger	23%
Do., galv., add to black	30%
Nipples, blk., and galvd. ⅛ to 4 in., close and short	60%
Do., 4½ in. and larger	50%
Do., long, ⅛ in. to 4 in.	65%
Do., 4½ inch and larger	55%
Do., running thread	40%
Couplings, 4 in. and under	30%
Do., 4½ in. and larger	10%

MALLEABLE FITTINGS—

New piece list, adopted Jun el, 1922. Discounts 70 and 5 per cent.

LOOK FOR SETTLED CORRUGATED MARKET

Toronto

With the announcement of higher prices on flat galvanized sheets and the stronger tendency in steel markets generally, hope is still held out by distributors of corrugated sheets that the market in these products will now resume more settled conditions. A brisk demand is evident for the lighter gauge of corrugated at this season, while extra discounts are still being given according to the specifications for orders covering heavier gauges. While the nominal list remains unchanged, with the official discount at ten per cent. this condition has prevailed during the recent weeks. As stated above, however, distributors look for an evening up in the general situation consequent upon the improvement in the steel industry, combined with seasonal market activity, and the resumption of uniform levels is looked for. Following are current nominal quotations:

CORRUGATED SHEETS—	Per 100 Sq. ft.
No. 28 gauge	6 50
No. 26 gauge	7 00
No. 26 U. S. gauge	8 00
No. 24 gauge	9 00
No. 22 gauge	11 00
No. 20 gauge	12 50
No. 18 gauge	16 50

Less 10 per cent.

Lighter than 24 gauge and wider than 27 ins. 75 cents per sq. extra.

GRADUAL IMPROVEMENT IN MOVEMENT OF SOIL PIPE AND FITTINGS

Toronto.

Some gradual improvement during recent weeks is reported by manufacturers and distributors in the current movement of soil pipe and fittings. Conditions generally are beginning to "open up," as one dealer described the situation but it was further pointed out that there remains lots of rooms for betterment in this direction. There has been no change in quotations. The variation in discounts between local and eastern centres has now been practically eliminated. With the activity now apparent, a more uniform domestic basis is generally anticipated. Following are prevailing discounts on these products:

SOIL PIPE—

2 inch	40%
3 inch	40%
4-inch	40 and 5%
5 and 6 inch	40%
8 inch.	net

FITTINGS—

HIGHER PRICES AND FIRM TONE IN SCRAP

Toronto

In sympathy with primary scrap markets, copper scrap is being held strongly by dealers and producers alike and advanced price levels are noticeable. All grades with the single exception of heavy yellow, are advancing and dealers with any accumulation are now holding for higher prices. As high as 12.00c has been bid for copper wire. The white metal division has not shown any change worthy of note.

Cast iron is still advancing, in sympathy with the pig iron movement, and it is difficult to surmise where this movement will lead. Heavy melting steel also is strong, and there has been an advance in price. Borings and turnings are being freely exported.

Rubber scrap, however, still remains in precisely the same condition, with practically no business being done. Following are the local average quotations for fairly large quantities:

SCRAP MATERIALS—

Scrap Iron		
Heavy melting steel (Hamilton)	$13 00	$14 00
Borings and turnings	6 00	7 00
Rerolling rails	14 00	15 00
Scrap pipe	6 00	7 00
No. 1 railroad wrought	10 25	11 25
Steel turnings (Hamilton)	7 00	7 50
Agricultural malleable	11 00	12 00
Railroad malleable	12 00	13 00
Net tons—		
No. 1 cast	18 00	19 00
Stove plate	15 00	16 00
Grate bars	11 00	12 00
Standard car wheels	14 50	15 50
Scrap Metals		
Heavy copper and wire	10 50	11 50
Light copper	9 00	9 75
No. 1 composition	9 00	10 00
No. 1 comp. turnings	6 00	7 00
Light brass	3 00	3 50
Heavy yellow brass	5 50	6 50
Heavy lead	4 50	5 00
Tea lead	2 25	2 75
Scrap zinc	4 25	4 75
Scrap Rubber		
Boots and shoes	2 25	2 50
Lumbermen's rubber boots	1 50	1 75
Auto tires	0 50	0 60
Solid tires	0 75	1 25

INTEREST IN METAL NOW SHOWS INCREASE

Toronto.

The element of outstanding interest in the ingot metal markets is the firm trend in lead, with slightly more interest in copper and spelter. No price developments have been announced on domestic centres, however, the recent changes on southern primary markets generally being of a minor nature and not of sufficient extent to reflect locally. Tin consumption is on the increase but production of this metal renders current stocks a detriment. Copper is reported with slightly more interest, while recent purchasing of aluminum by the automotive industry has caused a momentary spurt in certain market quarters. The brisk call for galvanized products at this season naturally reflects in the demand for spelter, although commitments are moderate.

COPPER.—Recent buying of copper is reported to be less active, but the general tone of this metal is described as firm. Southern centres record a strong tendency with higher prices, but this development has not yet appeared on the domestic markets, current trading still being moderate, with the quotation of 17 cents available.

TIN.—Statistically this metal leaves much to be desired. The visible supply of tin is described as too extensive to formulate a healthy tone to the market, and while there is reported to be a noticeable increase in consumption, production also keeps merrily on. It is therefore calculated that consumption of tin will have to continue right along at the present level in order to absorb the current output, without reducing the stocks on hand. Local prices remain at 35 cents.

LEAD.—Lead is again the strongest metal in this group, with some price advances having been recorded in southern primary centres. The market tone is described as firm, with offerings limited in quantity. It is not yet apparent whether the general situation warrants higher prices, however, and domestic quotations continue to be in evidence at a previous level of $7.00.

SPELTER.—The spelter market has registered some degree of improvement, but not to the same extent which has characterized lead. Purchases are in small amounts, recent reports noting that galvanizers are conservative in their commitments, probably owing to the coal strike. The general market tone is firm, with domestic quotations remaining at $7.25.

ANTIMONY.—This metal is stated to be colorless and generally uninteresting. The undertone has recorded little variation, while prices are also unchanged. The previous range of 6 and 7 cents, remains the average local price level.

ALUMINUM.—The recent sale of more aluminum to the automotive interests in southern centres, naturally produced a brighter trend in these markets. The usual degree of improvement in aluminum at this season of the year is attributed to manufacturing requirements of the motor industry, but current prices have not changed, and there is no marked development in the average tendency. Domestic requirements are dull, with prices at 20 and 21 cents.

London Markets

LONDON, June 1.—A larger number of price reductions appear on the current hardware markets, such revisions including heavy coil door springs, square tower bolts, hammock hooks, and the Red Devil line of electrician's bits. Many of the Taylor-Forbes products also record new prices ranging from five to twenty per cent. lower, the list covering such lines as door pulls, drawer pulls, hat and coat hooks, door holders, harness hooks, chest handles, clothes line reels, saw sets and hog ringers. Current business in this district is reported exceptionally good, practically all summer goods being in brisk demand.

LOWER QUOTATIONS ON TAYLOR FORBES LINES

London, Ont.

A number of lines manufactured by Taylor Forbes Co., of Guelph, take new lower prices ranging from 5 to 20 per cent. The reduction is provided for by new lists, the discounts remaining as formerly.

The lines affected include some numbers of door pulls, drawer pulls, door holders, hat and coat hooks, harness hooks, quilt frame clamps, chest handles, hog ringers, clothes line reels, letter box plates, saw sets, etc.

RED DEVIL BITS ON REDUCED PRICE LEVEL

London, Ont.

The Red Devil line of electricians' bits now have revised lower quotations. New stocks are shown at the following reductions:

RED DEVIL BITS—

No. 2403 x 10-16, $9.00 doz. No. 2403 x 11-16, $9.50 doz. No. 2403 x 12-16, $10.25 doz.

EASIER QUOTATIONS ON SQUARE TOWER BOLTS

London, Ont.

Among the price announcements on the current hardware markets are square tower bolts, quotations on these goods being lowered to the following levels:

SQUARE TOWER BOLTS—

No. 305 by 6, $3.00 doz. No. 305 x 8, $4.25 doz. No. 305 x 10 $6.50 doz.

No. 307 x 6, $3.00 doz. No. 307 x 8, $4.25 doz. ..No. 307 x 10, $6.50 doz.

HAMMOCK HOOKS ALSO RECORD PRICE DECLINE

London, Ont.

Hammock hooks are reduced in price this week, these seasonable products having the following new quotations:

No. 128 With screw	75c doz.
No. 138 With Plate	90c doz.

FAIRLY BRISK DEMAND FOR LINSEED OIL

London, Ont.

Linseed oil continues to be in fairly brisk demand, although the total volume of business transacted was not so large as during the previous weeks. Prices remain at the higher level recorded last week, with a large number of inquiries evident.

LINSEED OIL—	Raw.	Boiled.
1 to 2 bbls., per gal.	1 15	1 18
3 to 5 bbls., per gal.	1 14	1 17
6 to 9 bbls., per gal.	1 12	1 15

Less barrels, add 15 cents gal.

HAMMOCK CHAINS NOW IN SEASONABLE DEMAND

London, Ont.

Hammock chains are also numbered among the various hardware products now experiencing a seasonal demand. Prices on these goods follow:

HAMMOCK CHAINS—

1-0 x 3 ft. $3.50 doz. pair; 1-0 x 4 ft. $4.00 doz. pair; 1-0 x 6 ft. $4.80 doz. pair.

TURPENTINE INCREASE CAUSED BY SHORTAGE

London, Ont.

With turpentine stocks locally reported to be at a very low level, distributing interests are in a firm position as regards asking prices and another advance of five cents per gallon has been announced. This places the gallon price for one barrel lots at $1.40. Such a condition, however, is described as temporary, fresh shipments being on the way which are expected to relieve the situation.

TURPENTINE—	Imp. Gal.
1 bbl. lots	1 40
2 to 4 bbl. lots	1 39
5 gal. lots	1 45

ACTIVE MOVEMENT NOW RECORDED IN NAILS

London, Ont.

A brisk seasonable sale is at present recorded in both wire and cut nails. being attributed to the brisk activity in building circles, coupled with some recent indications of slightly higher prices. Local quotations continue at the following levels:

NAILS	
Wire, base	3 65 per keg
Cut, do.,	4 35 per keg.

EARLY ACTIVITY IN RUBBER LAWN HOSE

London, Ont.

Rubber hose is included among the warm weather lines now experiencing moderate activity. Many dealers report that lawn hose is moving nicely for so early in the season. Following are quotations at present in effect:

RUBBER HOSE—

3 ply—½ in. 9½c per ft.; ⅝ in. 11 cents per ft.; ¾ in. 13 cents per ft.

4 ply—½ in. 10½c ft.; ⅝ in. 12c ft.; ¾ in. 14c per ft.

5 ply—½ in. 12c per ft.; ⅝ in. 13½c per ft.; ¾ in. 15½c per ft.

Corrugated—½ in. 13¼c ft.; ⅝ in. 15¼c per ft.; ¾ in. 18c per ft.

Less 5 per cent. for 500 ft. reels.

RUBBER HOSE FITTINGS START SEASONAL TRADE

London, Ont.

In conjunction with the sale of lawn hose, may be noted more activity in rubber hose fittings. These products are making an early start this year. Current prices follow:

HOSE FITINGS—

Galvanized Hose Bands—½ in. 35c doz.; ⅝ in. 38c doz.; ¾ in. 38c per doz.; 1 in. 70c per doz.; 1¼ in. $1.35 per doz.; 1½ in. $1.65 per doz.

Brass Hose Couplings—½ in. $1.60 per doz.; ⅝ in. $1.60 per doz.; ¾ in. $1.60; 1 in. $4.25.

Brass Hose Nozzles—

Canadian Gem	$ 7 75 doz.
American Gem	10 50 doz.

SCREEN DOORS AND WINDOWS IN DEMAND

London

Screen doors and windows are now selling in fairly active quantities, the brighter weather having contributed to the movement of these lines. Following are quotations on the Sanderson-Harold make of screen doors and windows:

SCREEN DOORS—	
No. 1, per doz.	$18 60
No. 2, per doz.	22 40
No. 21, per doz.	28 00
No. 21½, per doz.	29 20
No. 24, per doz.	29 20
No. 8, per doz.	32 80
No. 9, per doz.	36 90
No. 28, per doz.	32 50

WINDOWS—Per Dozen.

No. 12, $3.50; No. 12½ $3.90; No. 1, $3.40; No. 13, $3.85; No. $4.10; No. 14½, $4.35; No. 15, $4.70; No. 16, $6.50; No. 2, $4.50; No. 3, $4.95; No. 4, $5.30; No. 5, $5.80; No. 6, $6.25; No. 7, $6.70; No. 8, $7.30; No. 9, 7.90; No. 10, $9.80.

HEAVY COIL DOOR SPRINGS ALSO REDUCED

London, Ont.

Lower prices are announced this week on heavy coil door springs. The revised quotations on these products follow:

No. 161, $2.25 doz.
No. 162, $2.75 doz.

Winnipeg Markets

WINNIPEG, June 1.—Among the current hardware market developments are noted reduced prices on the Sovereign line of stove pipe dampers, new discount levels thus lowering quotations on Thermos products, easier prices on wood butter bowls, while Globelite batteries also appear with lower quotations. An advance has been recorded in prices on Lunkenheimer valves. Turpentine is reported with a firm market owing to low stocks, while linseed remains at the recent higher levels, although flax seed is noted somewhat easier.

FIRM TONE EVIDENT IN TURPENTINE MARKET

Winnipeg.

Local turpentine stocks are described by distributors as exxceptionally low, and these conditions culminate in the prevailing situation, which, it is stated, can hardly be relieved until new arrivals appear on a more extensive scale at primary and local centres. Trade is

very active and the heavier demand strengthens the undertone. The prevailing price is $1.45 per gallon in barrel lots.

NEW DISCOUNT ISSUED ON THERMOS PRODUCTS

Winnipeg.

Through a revision in discounts, the quotations on Thermos products are lower. Following are the new discounts.

THERMOS PRODUCTS—

Thermos Bottles, 25 and 10 per cent. Fillers for same, 25 and 10 per cent. Thermos Carafes, 25 and 10 per cent. Thermos carying cases, 25 and 10 per cent. Thermos Kits, 25 and 10 per cent.

EASIER QUOTATIONS ON WOOD BUTTER BOWLS

Winnipeg.

A reduction in prices is recorded on wood butter bowls. Following are the revised levels:

WOOD BUTTER BOWLS—

13 in., $6.95 per doz. 15 in., $10.40 per doz. 17 in., $17.40 per doz. 19 in., $26.00 per doz. 21 in., $34.80 per doz.

GLOBELITE BATTERIES SHOW PRICE REDUCTION

Winnipeg.

A revision of discounts on Globelite batteries renders the quotation a trifle lower. They are now quoted at 35 per cent. off list prices.

STOVE PIPE DAMPERS HAVE EASIER PRICES

Winnipeg.

A slight reduction in prices has been quoted this week on Sovereign stove pipe dampers. Following are the revised prices:

6 in. $1.70 a doz.; 7 in. $2.10 a doz.

HIGHER QUOTATIONS ON LUNKENHEIMER VALVES

Winnipeg.

Through a revision in discounts, Lunkenheimer valves are higher in price. Following are some of the revised discounts:

LUNKENHEIMER VALVES—

Renewo, Globe and Angle, 20 per cent. adv. Ferrenewo Globe and Angle, 20 per cent. off. Horizontal check, 9 per cent. off.

HIGHER PRICE REMAINS ON LINSEED OIL

Winnipeg.

The recent increase in linseed oil still remains firm and there is no indication of any further revision, although flax seed is a trifle easier. Unchanged prices are:

Raw, $1.20 per gal.

Boiled, 1.23 a gal in barrel lots.

STRONGER ELEMENT NOTED IN LEAD PRODUCTS

Winnipeg.

Although local prices have not changed on lead products, there are indications that a stronger tone is evident on primary metals utilized in the production of these goods. Current prices are as follows.

LEAD PRODUCTS—

Sheet lead, 10¼c lb. in full rolls. Bar lead, 8¼c per lb. Pig lead, 8c. per lb. Block lead, 8¼c per lb.

Distributors of turpentine report higher price levels, this revision being attributed to shortage of this product, both on the domestic and primary markets. With stock of a moderate nature, the increase in the consuming demand finds supplies inadequate, with the addition that shipments at present on the way are well booked ahead. Until fresh receipts at southern producing centres are on a more extensive scale and quotations consequently easier, the local market trend is expected to remain firm. On the other hand, this condition is generally looked upon as more or less of a temporary nature.

In sporting goods there has been a heavier spring sale than usual. This has not been on account of the lower prices in some lines but to greater activity in several of the local organizations. Retailers have had a good early spring trade in fishing tackle and kindred lines although weather conditions have not been any too favorable.

General activity is reported in paint cirles, the weather in the past few weeks being ideal for painting purposes. "Up to expectations," and "better than last season," are expressions given by dealers in describing present business. Mail and other rush orders are forming a good part of the present trade, such as was the case during the active period last year. Retailers actively supporting clean-up and paint-up campaigns, generally report commensurate results from educational efforts of this nature, backed up with forceful sales policies.

Hamilton Markets

HAMILTON, June 1.—The recent introduction of the budget shows a number of interesting tariff revisions under which reductions are made either in the British preferential or general tariffs, or in both, on such hardware lines as tool, wrought iron tubing, gasoline, enameled ware, certain hollow ware, harness, clothes wringers, and pump parts. In practically each case the changes have been along the line of encouraging British trade, this evidently being due to the fact that the great bulk of trading in such lines in the past has been with other countries.

Decidedly warmer weather experienced during the past few days has had the effect of inducing the movement of seasonal hardware lines. This includes such products as refrigerators, ice-cream freezers, lawn mowers and garden tools of all kinds. Spring activities which have been somewhat delayed by backward weather tendencies, are now in full swing, and retailers are reporting the effects thereof in improved sales activity. The building in the suburbs, which is keeping up steadily, has resulted in a brisk market for builders, hardware and other numerous household lines.

Ratio of Steel Consumption

An improvement in general business conditions is also noticeable, orders being larger and more numerous. Screen doors and windows, screen wire cloth, prepared paints, wire fence, poultry netting, are also numbered among the best selling seasonal lines. Keen competition is again evident in iron and steel, and there is still a variation in local quotations on such products, although a slight improvement in this direction has been recorded during recent weeks. Other lines such as corrugated sheets, wrought piping, bolts and nuts, eavestrough and conductor pipe, are reported as firm, with the advances being made in certain virgin metals, having apparently produced a strengthening effect on lead products generally.

The steel market still presents an appearance of great strength, yet there is some room for doubt whether this degree of prosperity will really continue. The average lines of steel consumption outside of freight car building, structural steel construction, automobile and truck manufacture, do not present the appearance of actually consuming at a similar ratio to which steel is now being produced, according to latest estimates by certain students of the industry. The obvious conclusion, therefore, is that certain buyers and distributors have been replenishing stocks and will not require as heavy deliveries of steel products later on in the season, unless the general ultimate consumption increases still further.

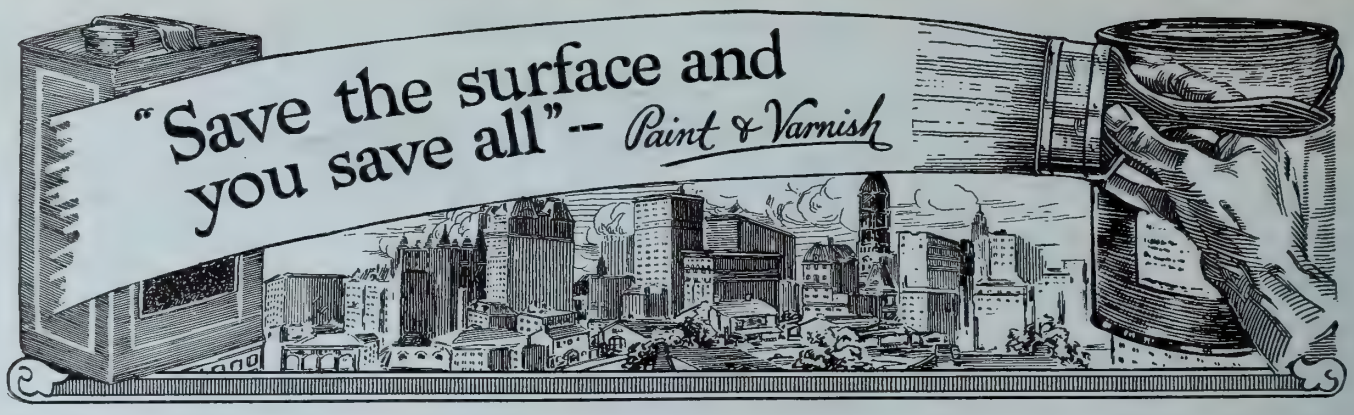
Pittsburg Markets

PITTSBURGH, June 1.—The steel market has grown still quieter in actual turnover, but has lost no strength, as producers are well sold up and are assured of as full operation as physical conditions will permit for a couple of months or longer.

Whether buyers would continue to purchase now, for later deliveries, if they had the opportunity, is an open question. The opportunity is lacking in most cases, for some mills have not opened their order books for third quarter business, having been deterred from doing so by uncertainties as to ability to produce if the coal strike continues beyond the next couple of months. They are also doubtful whether all the buying tendency at present rests upon the solid foundation of requirements. In other words, the mills are afraid of there being speculative buying, for consumers are now as anxious to buy as they were a few months ago to refrain from purchasing.

Steel ingot production is now running at about 38,000,000 gross tons a year, against 35,000,000 tons April 1, and 20,000,000 tons last December. The present rate is practically double the actual production in 1921, and falls only a few per cent. short of the production in 1920, when there was a strenuous demand for the major part of the year.

(Continued on page 60)



Important Pointers For Paint Salesman

Learning the Csutomer's Requirements Enables the Salesman to Recommend the Right Goods for the Purpose—Conditions Which Should Be Avoided to Secure Best Results in Painting—What Affects the Durability of Outside Paint

A SALESMAN should learn as much as possible about the condition of the surface and how the goods are to be applied and what the buyer expects before he makes his recommendations.

The buyer sometimes knows exactly what he wants, or thinks he does. The salesman should be an adviser and guide to the buyer wherever it is good policy to act in this way.

If the goods go wrong he will be blamed whether he advised or not, but he can avoid trouble by selling the right thing for the purpose. For example, don't sell oil paint for use over a surface that has ever been painted with an asphaltum or a tar paint, for it will not adhere satisfactorily. Sell the same kind that has gone on before—it will give better satisfaction and cost the buyer less.

Don't sell the paint to be used over rusty, greasy or wet surfaces; or where old paint is peeling, cracking, blistering or tacky, without warning the buyer of the likelihood of bad results and recommending that the surface be properly prepared.

Our entire course of instruction is for the purpose of teaching the salesman what to sell and how to sell and to put him in a position to know what causes trouble and how to avoid it.

What Affects the Durability of Outside Paint?

Many things affect the durability of paint and they are first, ingredients of the compound (for paint is a compound); second, the surface upon which it is applied; third, the manner of its application; fourth, the consistency; fifth, the exposure to which it is subjected, and sixth, the thickness of the paint film.

Although among manufacturers much thought has been given to the question of the proper ingredients of a paint, painters who distrust the prepared paint of even the most reputable of manufacturers and are careful to buy the best of material, are often strangely indifferent as to the quality of the driers they buy and it seems to be the rule among them to buy a cheap liquid drier and to use large quantities of it. The driers of this character consist of from 90 to 95 per cent benzine, the balance being resin and manganese. It follows that when a drier of this character is used the durability of the paint is seriously decreased.

"The Life of the Paint is the linseed oil it contains," is what we frequently hear about paint, and it is true. Except that of recent years, Chinese wood oil has been found valuable in some kinds of paint.

Anything also which will impair the ability of the oil to withstand the action of the elements and rob it of its power to bind together the particles of pigment incorporated in it must be avoided if possible.

There are many things which injure linseed oil that are of necessity combined with it.

One of the necessary evils is drier.

Linseed oil will dry naturally, but this occupies too much time to be practical under ordinary circumstances, therefore driers are added to hasten the operation. The drying of the oil is an oxidation of it. By the incorporation of a drying agent, the oxidation is carried on more rapidly.

Many drying agents continue their action long after apparent drying has ceased and a slow combustion is going on continuously which accounts for the gradual deterioration of the paint film.

Many of the pigments used to make paint are also injurious in their action on the oil. The most actively injurious paint pigment used in painting is red lead which is so powerful an oxidizer of oil that one pound of it will oxidize or dry a gallon of oil in 24 hours. As ordinarily used, 25 pounds of red lead is mixed with a gallon of oil which is enough lead to dry 25 gallons of oil satisfactorily. In view of this fact then we would suppose that the paint would be of no value whatever, if the oil is the life of the paint. But the fact is that red lead paint is a satisfactory paint for some purposes, particularly where it is in constant contact wtih water as on ships' bottoms, floating tanks and buoys. Why is this? It has been found that linseed oil is not a good water resistant and that if used by itself with such pigments that have no action on it, it becomes soft and porous under the continued action of the water. Therefore the action of red lead with linseed oil is not as objectionable as seems at first thought, for although it rapidly oxidizes the oil, it changes its character in such a way that it becomes, when combined with red lead, another article and the union of the two forms a lead cement, having, it is true, little or no elasticity, but on the other hand, extreme hardness which enhances its ability to withstand the contact and friction of the water.

On the other hand linseed oil and red lead do not make an ideal paint for atmospheric conditions because its inelasticity causes it to crack instead of accommodating itself to expansion and contractions of the surface to which it is applied for it is rarely used except on metal structures. The cracks allow moisture to penetrate to the steel and corrosion sets up. Then, too, its color is objectionable and it is usually covered with paint of some other color. There seems to be no advantage in using red lead except in places that are to be under water.

There are a number of objections to the use of red lead, to-wit:

It is difficult to apply satisfactorily, it does not go on uniformly, it settles very rapidly in the paint pot, it will not

SERVICE

CONFIDENCE

FAIR DEALING

LIKE EYELIDS, LIKE HANDS

Like feet, like the upper and lower teeth, we are made for co-operation. Just as elements, and things compounded of elements, are dependent upon each other, so, men and their creations are interdependent. Without the co-operation of sunshine and rain the flower and fruit must perish—as must man and his structures, deprived of the assistance of other men and their inventions.

Beginning with nature, and observed throughout every system in the universe, we find in co-operation the seeds of all that makes for an even, natural and healthy progress. A little thought will bear out this truth. Yet, the term is regarded by many as a hackneyed commercial phrase having no virtue in its application.

Misused, abused and misrepresented, there is all the more reason to respect it, for the greater the importance of a term the greater its popularity among the careful and careless alike. If you could but sense the wealth of possibilities contained in the *practice of co-operation*, and help your associates to grasp the significance—each, and the community at large, would, through compliance with a law of nature, harmoniously and mutually benefit.

This is not a sermon. It is the Advertisement of a Paint Manufactory whose signal success springs from a policy of basic business principles—among which *Co-operation*—from Porter to President—is pre-eminent.

IMPORTANT POINTERS FOR PAINT SALESMAN

(Continued from page 54)

"cover" well and it is a very expensive paint.

Certain pigments are more durable than others for painting purposes. This is owing to their being neutral in combination with linseed oil. Other things being equal, a pigment having no chemical action on oil is the best.

But to obtain the shades desired it is necessary to use some of these objectionable pigments. We have, therefore, sacrificed some of our durability in order to obtain beauty in color.

Having a paint composed of the proper ingredients combined in the best proportion to insure greatest durability, the next thing to consider is the kind of surface it is to be applied upon, for this will exert considerable effect upon the durability.

If we have an absorbent surface the liquid of the paint will be quickly absorbed, leaving the pigment on the surface without as much binder as it should have to insure greatest durability. Additional liquids should be added in paint to go on absorbent surfaces.

If, on the other hand, the surface is smooth sheet iron, clean and free from rust and millscale, the same kind of paint can be spread over a much larger area because there is no absorption of the liquid. Care, however, must be exercised to avoid spreading the paint out too thin or to leave it lay on the surface too thick. Some makers of paint for metal surfaces advertise the great spreading capacity of their goods and advise the spreading of one gallon over 1,000 to 1,200 square feet of surface. This may seem a good point to the consumer, but he must consider the probable durability of a paint film as thin as tissue paper. For greatest durability a paint film should be at least twice as thick as that and no attempt should be made to spread a gallon over 450 square feet of surface one coat.

To the unthinking a paint is valued at its cost per gallon. To those who can see a little further, a paint is valued not per gallon but by costs per square yard or the finished job. Those who inquire still further, look into the durability of the paint and realize that the paint that puts off for the longest time the necessity for repainting is the best and cheapest.

We wish to emphasize this point. A paint film can easily be too thin to afford maximum protection.

The usual limitations placed upon paint is that so long as it hides the surface satisfactorily, it can be spread as far as it can be brushed out. We think this is a great mistake for there are two classes of paints that cannot be so treated with best results from the standpoint of durability. First, there are those dark paints which possess such splendid hiding power that they can be brushed to the furthest limit. We will consider the second class a little later.

Let us take for example one of the red oxide or the graphite paints, which come in the first class. It is possible to spread them out so thin that the coat will be less in thickness than tissue paper and it is unreasonable to expect a paint film as thin as this to afford maximum protection. If four or five coats are applied of this thinness the results would be very satisfactory, but the labor cost would be too great to make this proposition one to be considered.

We are then brought back to the question, "How much surface to the gallon of paint?" and qualify it by adding "and to obtain greatest durability?" In our opinion for one coat work on metal or wood a gallon of paint should not be spread over 450 square feet per coat for maximum protection no matter what its color or body.

The second class referred to above are those colored paints that will not cover or hide the surface satisfactorily if spread as thin as the dark paints.

The tendency is to apply these paints as heavy as possible in order to hide the surface; this results in being impaled upon the other horn of the dilemma and we have a paint film too thick to dry satisfactorily and one that is sure to give trouble sooner or later in peeling, cracking, chalking or scaling. It makes an unsafe foundation for subsequent coats of paint and is altogether unsatisfactory.

No matter how deficient in power to hide, such a paint should be brushed out to as thin a film as those that hide perfectly with one coat and enough coats be applied to hide the surface to the satisfaction of the painter. It is unreasonable to expect a light colored paint to cover as well as a dark paint.

No one should yield to the temptation of attaining covering at the expense of durability by applying paints relatively poor in covering qualities in heavy coats nor on the other hand, should they apply paints relatively strong in covering power in coats too thin for durability.

There are limits then on either hand beyond which it is not safe to go, and care and judgment must be exercised by the painter to keep within bounds.

H. S. Van Scoyoc, Canada Cement Co., was elected president of the Montreal Publicity Ass'n. for the coming year at the annual meeting last week.

Turpentine Prices Highest of Season

Another Advance Recorded in Domestic Turpentine Quotations Adds to the Numerous Announcements of This Nature Recorded During Recent Weeks—Rise Attributed to General Shortage Combined With Increasing Consumers' Requirements.

RECENT repeated advances in turpentine quotations reflect the development of a more or less unusual situation in this product, which is evident in both southern and domestic centres. Reports from producing circles indicate that the present strong position of turpentine is the result of a combination of circumstances, included among which are such factors as increased foreign demand, similar insistent calls from consumers in practically all market centres, the uniform late crops and a distinct shortage of reserve supplies both in the hands of producers and distributors. Consequently turpentine on the domestic markets has recorded a number of price advances during the past few weeks, with the latest movement in this direction bringing prices to the highest level that has prevailed for some considerable time.

How long this condition will remain is problematical, but it evidently depends upon the consistency of consumer's current requirements, combined with the ratio of new receipts in production localities. At present, the demands are reported larger than the volume of fresh supplies, thus rendering the replenishment of stocks a difficult problem. Domestic distributors also record some delay in the arrival of recent shipments from the south, as supplies are experiencing a brisk call from various quarters. Shipments en route are therefore described as well booked ahead, a condition which is expected to be apparent until larger supplies of turpentine are available on southern markets.

It was confidently expected that the tone of the markets in general would have been somewhat easier by this time, and that prices would have slightly sagged consequent upon the arrival of the new crop in larger volume. On the contrary, however, southern quotations have registered further advances, which trend has been reflected in domestic price levels. While quotations a few cents lower than the average are still noticeable in certain quarters, the ability of distributors to supply prompt requirements is doubted, as it is a well-known fact that stocks are practically depleted.

Turpentine prices on southern producing centres have been fluctuating during the past few days, but as soon as any number of sales are consummated, the natural result is to move the prices upward. It is reported that current receipts are running at a higher level than at this period last year, but everything reaching the market is apparently badly needed by consumers, and with stocks failing to accumulate, the strength continues remarkably evident. With the heavier movement of the crop later on, it is stated that some temporary price developments are naturally looked for.

Stephens'
REGISTERED TRADE MARK

Product

Stephens' Shingle PAINT

REGISTERED TRADE MARK

Stephens' Shingle Paint has been specially formulated to meet what is actually and literally a long felt want—a satisfactory covering for *old* shingled surfaces.

For *new* shingles STAIN is the accepted and proper treatment, the one which should be applied. But when shingles become old and weather-worn, spongy and absorbent, stain is not so satisfactory. Painters find it impossible, even with two or three coats, to impart the sheen of a new job—nor can the color be changed.

Stephens' Shingle *Paint* is what is wanted for these old shingles. One coat does the work—imparts and holds any color—doesn't soak in. It overcomes the natural limitations of stain where *old shingled surfaces* are concerned. Not a stain but a true oil paint specially blended after exhaustive research to spread thinly, cover maximum surface, enhance the natural charm of shingles and give lasting protection.

JUST WHAT OLD SHINGLES HAVE BEEN LOOKING FOR

A cover that colors—goes on easy—looks well when done—and lasts!

As soon as your customers know about Shingle Paint, they'll ask for it.

Ample stocks for prompt shipment from Winnipeg, Calgary, or Edmonton.

Weekly Paint Markets

Montreal

MONTREAL, June 1—Turpentine again offers the feature of the paint markets, quotations registering a further advance of eight cents per gallon. Available stocks of this product are still very light, the shortage during the past week becoming more acute. Although partial relief from this situation was expected during the week, fresh supplies from the South have failed to make their appearance up to the present. Importers, however, state that supplies are on the way and some relief at least will be found within the next few days. It is still thought questionable whether earlier shipments will be ample to cover requirements. Stocks in the South are still light for the season, with receipts comparatively small for the present active demand. Linseed oil prices remain at former prices with the undertone of this market still in a strong position. Although flaxseed prices fluctuated slightly during the week, little or no effect was felt on oil, the present active demand said to be sufficient to offset any easier tendency from this direction. Shellac prices are increased in some quarters because of firms having to enter the market for fresh supplies. Other dealers are maintaining former quotations, thus a variation in prices again exists in local market. White lead in oil is seasonably active, with the market firm and in a more settled state than was more than evident a few weeks ago.

FURTHER ADVANCE IN TURPENTINE PRICES

Montreal.

Local turpentine stocks are still at a very low level, and the market is again featured this week by a further advance of eight cents per gallon, bringing present quotations to $1.35 in one barrel lots. It is noted that certain distributors are still off the market, because of no supplies on hand. The shortage has gradually become more acute, and at the present time other markets report inability to meet demands. Some relief, however, is said to be in sight and shipments from the South are expected within the next few days, after unexpected delay.

Although slight fluctuations have occurred during the week, the undertone of the market in the South is still reported firm with fresh supplies not coming in as readily as anticipated, and a brisk seasonable demand. The market at primary centres is also short of spot stocks, and for this reason it is thought questionable whether early arrivals to this market will be ample to meet the turpentine already sold. "In any case, there is every indication of firm prices for a few weeks to come," said one local importer. Following are revised quotations:

TURPENTINE—	Imp. Gal.
1 barrel lots	$ 1 35
2 to 4 barrel lots, per gal.	1 34
Broken lots	1 45

ACTIVE SEASONAL DEMAND FOR LINSEED OIL

Montreal

Changes in the linseed oil markets during the week have been few, quotations remaining unchanged, with a strong undertone still evident. Flax-seed quotations fluctuated slightly, following the trend of other grains, but little or none of the previous strength has been lost. It is felt that the linseed oil market is still strong, and will in all probability remains so while demand continues good. Underlying factors in the market are unchanged, and warehouse stocks are still being taxed with heavy shipments for present consumption. Local crushers report an active oil market, sales continuing in satisfactory seasonable proportions, and although a quotation of two cents lower is given, following are prices most generally quoted:

LINSEED OIL—	Raw.	Boiled.
8 to 5 barrel lots, per gal.	1 08	1 10
1 to 2 barrel lots, per gal.	1 10	1 12
Less barrels, add 10 cents per gallon.		

SATISFACTORY TRADE IN WHITE LEAD IN OIL

Montreal.

Corroders describe the movement of white lead in oil as active, in keeping with the present busy paint season. Sales in the past weeks have been particularly heavy, and stocks in some quarters have been taxed considerably. With favorable weather continuing for the next month or six weeks, a satisfactory season is anticipated favorably with last year. The undertone of the market remains firm owing to the strong disposition of lead in primary markets, and linseed oil. One manufacturer stated that higher quotations would, in all probability have been announced a few weeks ago if a certain amount of unsettlement among distributors had not existed. However, an improvement in this connection is now felt and a more settled feeling is expected during the remainder of the active season. Prevailing prices remain at $12.00 in five ton lots, $12.75 in one ton lots and $13.10 in less quantities.

VARIATION IN LOCAL SHELLAC QUOTATIONS

Montreal.

Local quotations on shellac again show a considerable variation, certain firms further advancing prices while others are maintaining former levels. The reason for this, as pointed out by a local distributor, is that quotations locally have remained at a lower level than was warranted by market conditions, because of stocks on hand. It was not necessary to enter the market, which has been very strong recently, and resale prices have remained unchanged. As demand is now seasonably active, stocks are becoming depleted in some quarters thus forcing dealers to buy at prevailing prices. There is an indication that a general price advance will be made in the near future, but following quotations are still given:

Orange shellac, in barrels	4 60
Do., in one gal. jugs	4 90
White, in 5 gal. jugs	5 10
Do., in one gal. jugs.	5 40

Toronto

TORONTO, June 1.—The apparent unsettlement of a further increase of five cents per gallon in turpentine prices, provide the feature events in the current paint market reports. Local glass price levels are nominally unchanged, but a discount off the box list is recorded in eastern markets, with the local tendency pointing in a similar direction, although many glass distributors point out that the bulk of outside buying for this portion of the season has already been done, and therefore quotations should be steady. Easier freight rates on imported window glass, combined with a weakening in the franc rate of exchange, are some of the elements contributing to this situation, which shows signs of spreading to other centres.

Turpentine occupies an unusually strong position, local stocks being exceptionally low, and a scarcity of the product being generally recorded on both primary and domestic markets. Producing centres record higher prices, consequent upon the brisk demand and the fact that fresh receipts are still behind the volume of requirements from domestic and outside markets. Local distributors state that fresh shipments are slow in arriving, and thus supplies are well booked ahead. Added to this situation is the rise in prices recorded at southern points, although some fluctuations were noted earlier in the week.

Muresco--The best wall finish.

Moore's House Paint—of pure linseed oil gives complete satisfaction.

Moore's Floor Paint—"Can't be beat for under feet."

The Moore Line

Tile-Like—A varnish and stain combined.

Mooramel—a perfect flooring enamel.

Sani-Flat — A non-poisonous flat oil paint.

Dealers say the Moore line sells readily because of its established popularity with the users. For the reputation largely established — and maintained — by Muresco, has been supported by the service rendered by the rest of the Moore products.

Muresco Brush—of Rubberset manufacture. In every way worthy of Muresco.

LINSEED TONE EASIER OWING TO SEED PRICES

Toronto

Linseed oil prices generally remain unchanged locally, with a fairly strong undertone owing to the current brisk trading in this product. While flax seed prices fluctuated during the past few days, and are now noticeably weaker, this move is described as not of sufficient extent to immediately affect oil quotations. It is noted however, that prices a few cents per gallon lower than the average are obtainable on both raw and boiled linseed, but such figures are not uniform. The flax seed market took a more or less sudden slump, but there was no apparent change in sentiment to account for this movement. Crushers are stated as not noticeably affected in their attitude towards the seed market, while the opinion is expressed that farmers may not be planting as much flax average this season. In conjunction there was recorded a slight falling off in the current demand for linseed oil, but distributors state that this is again fairly active and up to general expectations.

LINSEED OIL—	Per gallon Raw	Boiled
1 to 2 barrel lots	1 15	1 18
3 to 4 barrel lots	1 14	1 17
6 to 9 barrel lots	1 12	1 15

Less barrels, add 15 cents per gallon.

ANOTHER FIVE CENT ADVANCE IN TURPENTINE

Toronto.

Another increase of five cents per gallon in the local price on turpentine provides the feature of the current paint markets, as well as emphasizing the peculiar situation now evident in this product, both on southern and domestic markets. This change brings the average price to $1.45 per Imperial gallon in one barrel lots, with steel drum five cents lower. Prices a few cents less than this level have been recorded, but doubt is expressed as to whether any delivery could be made at the previous figures owing to scarcity of turpentine locally, a shortage which has not yet been relieved owing to the fact that shipments from the southern producing centres are delayed. The stocks at producing centres are still described as in a very low state for this season of the year, with current demands keeping well ahead of the fresh receipts. At this rate there is very little opportunity to secure stocks, and until the volume of the new crop shows a substantial increase, the firm market is expected to remain. Following are revised levels:

TURPENTINE—	Imp. gal.
1 barrel lots	1 45
2 to 4 barrel lots	1 44
5 gallon lots	1 60

Less than 1 barrel lots—15 cents per gallon extra.

Turpentine steel drums galvanized, 5c per gallon less than barrel price. Drums charged $10 each, returnable in 30 days, freight paid.

All quantities sold f.o.b. Toronto, Hamilton, London, Brantford, Collingwood, Guelph, Windsor, or Montreal but freight may be equalized from any of these points.

Car load lots of 70 bbls. Price on application.

PRICE VARIATION ON GLASS MARKETS

Toronto.

Keen competition for current business is one of the primary elements in the window glass markets, which has resulted in the recent announcement of discounts on the box glass list in certain quarters. Eastern centres lead the way in this respect, it being pointed out that the re-opening of navigation thus tending to lower transportation costs on importations of glass, has played a prominent part in this development. While local distributors of window glass state that the domestic market is firm, with previous price levels unchanged, it is noted that quotations are generally inclined to more or less follow the direction of other competitive centres. The tendency is attributed to the heavier importations of Belgian glass, and in conjunction with the element of transportation costs, is noted the weakening of the franc. The exchange rate however has not suffered to any marked extent. Therefore, such factors are not yet generally evident at points west of Kingston, and no announcement regarding a change has been forthcoming locally. The demand for plate glass is described as brisk, requirements in the city resulting from building activity being very good.

SHELLAC MARKETS NOW DESCRIBED AS EASIER

Toronto.

In the shellac market, stocks have been easier during the last few days. No variation in prices has been recorded, but it is stated that deliveries have been more prompt than was recently apparent. Reports from primary shellac centres indicate that the demand for immediate requirements has eased off somewhat, with the general situation slightly easier. Importers of shellac are still apparently confident regarding the strength of the markets, however, and indicate that an increased demand is expected to develop during the ensuing months. It is inferred that some large consumers are inclined to await future developments, in view of the speculative trend in the Calcutta markets. Following are the average unchanged local quotations:

SHELLAC	White	Orange
In bbls	5 35	4 85
Gal. jugs	5 65	5 15
Yellow brass		0 05½

BRISK TRADE EVIDENT IN PREPARED PAINTS

Toronto

Marked activity is reported in paint and varnish circles, the weather during the past few days having been more ideal for painting purposes. "Up to expectations," "Better than expected," and "exceptionally busy," are some of the phrases used by manufacturer and distributors of paint and the allied products when discussing current trade conditions. Present business in these lines is composed of many rush orders, clearly demonstrating that dealers only stocked a moderate amount of such goods at the beginning of the season, but that with the active period now at hand, repeat orders in larger volume are apparent. Retailers actively promoting Paint-up campaigns generally report commensureate results from educational efforts of this nature, backed up with forceful sales policies.

PITTSBURG MARKETS

(Continued from page 53)

An interesting thing about the steel position, is that there is a very strong market when production is at the rate of 38,000,000 tons of ingots a year, for this is only between 70 and 75 per cent. of capacity, which probably lies about half way between 50,000,000 and 55,000,000 tons. Before the war it was commonly held that a strong steel market, with prices stiffening, could not develop after a depression until production reached 85 or 90 per cent. at least. The difference between recent and pre-war conditions is that before the war the steel industry was always able to operate at capacity when it had the orders, while since 1916 which was a year of capacity production, there has been no time when there was a full demand that capacity operation was possible.

In 1917 and 1918 there was practically continuous shortage of coke, due to transportation difficulties, together with some shortage of labor. Late in 1919 there were in succession the iron and steel strike and the bituminous coal strike, and when the industry had gotten over these there came the outlaw railroad strike April 1, 1920. Now there is the bituminous coal strike.

Perhaps in a pinch the steel mills could produce considerably more than they are making, but evidently the buyers of steel do not think they could. They are acting as if there is a possibility of a shortage of steel, and there is practically no doubt that actual consumption at present is less than production and shipments. Consumption no doubt is increasing and may catch up, but to keep the steel market strong continuously in the future there must be considerably greater consumption or a continuous inability of the steel industry to function up to capacity. There must for instance, be a breakdown of the railroads after the coal strike has ceased limiting steel production, or some other trouble.

Bars, shapes and plates are now quotable at 1.60c as minimum, and it appears that there is some buying, for early deliveries, at premiums, probably involving no large tonnage. Nails continue to be quoted at $2.40 by the American Steel and Wire Co. and at $2.50 by the independents, but as the leading interest did not follow the advance made by the independents about the middle of April, it has been increasingly difficult for the independents to sell much tonnage at their higher price.

Hoops, bands and hot rolled strips are all quoted at 2.25c, chiefly, perhaps, because mills still have a considerable tonnage of old business on books, at less than 2.00c. Tubular goods are very firm at regular prices, the shading that was so pronounced a couple of months ago having disappeared.

A Brush With Every Order of Paint

Too frequently in the past have customers for paint been allowed to take home their cans of paint and varnish with never a thought for a brush and rather than take the time to return to the store or perhaps from ignorance of the importance of having the right brush for the purpose they have been content to proceed with any brush available.

An Increase in Business and Prestige

Meakins Brushes have for years created and maintained a reputation for lasting qualities—progressive dealers are profiting handsomely by stocking them.

A Valuable Impression

A pleasing impression upon customers is of value. You can create one and at the same time save your goods from damage by spreading sheets of TANGLEFOOT in your show windows, especially over Sunday.

TANGLEFOOT will then be at work for you and will not only catch the flies, but attract the attention of people who pass your store to your efforts to keep your stock clean and fresh. For 1922 TANGLEFOOT has been considerably reduced in price.

Remember TANGLEFOOT *catches the germ as well as the fly, and that poisons, traps or powders cannot do it.*

TINKER TOM'S TALKS.

TALK No. 361

HERE'S TO HIS GOOD HEALTH

The King's Birthday — and incidentally mine, too. Such a glad occasion deserves unusual consideration! Seriously King George 5th is a wonderful man and a hundred years from now the class in history will be styling him "George the Wise." He has ability, reliability, endurance and action and that's the measure of success. May he live long and prosper.

Sincerely,
TINKER TOM.

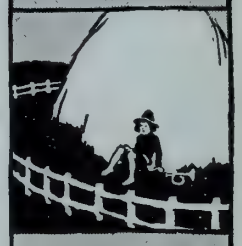
Rock-a-by Baby On the Tree top



Little Boy Blue come Blow your Horn

Going Big This Christmas!
VIKO Nursery Rhyme Toy Sets
—get your order in early

Little girls say "they're simply grand!" Shiny, handsome miniatures of the fine VIKO cooking utensils Mother uses in her kitchen.

VIKO NURSERY RHYME TOY SETS are carefully made—durable—can be used for cooking on girlie's little range.

Sets consist of from four to nineteen pieces. Packed in the wonder-picture-box, with "Mother Goose" Rhymes and illustrations done in five colors on it. The box, alone, would sell a toy set far inferior to this beautiful VIKO offering.

Not only a big Christmas offering but a year around staple. Get your order in early—*today!*

The Trade Mark
Behind the Hardware House
of Quality

The Largest
Wholesale Hardware Dealers
in Canada

HIGHEST GUARANTEED MILEAGE IN THE WORLD

K&S The Heavy Ribbed Tread is similar to the highest priced imported Cord Tires. It acts like a Cord Tire and looks like one. Costs the same as any plain tire, but gives miles more service.

The Rugged Tread is a sturdy, non-skid of remarkable wearing qualities for truck and commercial purposes.

The Cross Country Tread is designed to give the motorist hitherto unsuspected service, and to add to the beauty of his car.

The Supreme Cord is the final achievement of tire supremacy. "Made of mileage." "Ashdown's" offers you every convenience possible toward successful merchandising. Our chain of warehouses from Winnipeg to the Rocky Mountains is close to your hand. You have this swift, sure service available without need to wait for slow, uncertain service from distant points.

We carry complete stocks of the most reliable and salable hardware made. Our organization has set the pace in efficiency and service for over half a century; it is especially equipped to serve you effectively.

Look for the Diamond "A" trade mark. It's your guarantee of better quality, service and sales.

J. H. ASHDOWN HARDWARE CO., LTD.

COMBINATION NO. 319-G

Here is a Salesman—

that will bring more business to your store. Note the splendid facilities for display in the top section.

This attention compelling section is fitted with display doors that show the goods to advantage.

Back of these doors is ample shelf room to contain the goods in their original packages.

The base section is equipped with Cameron shelf boxes.

This is one of our many attractive combinations of shelving equipment, which are all built sectionally and can be added to at any time.

Ask us to solve your display and store fixture problems.

Barrett Roofings, Cements Industrial Paints etc.

IT is *repeat* sales, not *first* sales, that keep business going and growing. That's why successful dealers like to handle Barrett products. They know from experience that these products make satisfied customers and that satisfied customers make profits.

Plastic Elastigum Patching Cement

A tough, elastic, waterproof cement for general repair work and waterproofing purposes. Known as "The Plastic Cement of a thousand uses." Unequalled for patching holes in roofs, repairing flashings, gutters, etc., etc.

Comes ready for use in 1 lb. tins (24 to the case), 5-lb. packages (12 to the case), 25-lb. and 100-lb. packages, half barrels (about 300 lbs.) and barrels (about 600 lbs.)

Plastic Elastigum being applied to make a water-tight joint around a ventilation pipe. It sticks to any surface.

Everlastic "Rubber" Roofing

The fastest selling roll roofing on the Canadian market and the first choice of experienced buyers for all steep-roofed farm and factory buildings. Everlastic is a safe roofing for you to sell and a safe roofing for your customers to buy. It sells at a low price, is easy to lay, and gives unfailing satisfaction.

Everlastic "Rubber" Roofing comes in three weights; light (1-ply), medium (2-ply), heavy (3-ply). Rolls of 108 sq. ft. Nails and cement for laying are packed with each roll.

Everlastic Liquid Roofing Cement

The greatest material in the world for resurfacing worn-out prepared and "rubber" roofs. Comes all ready for use, is easy to apply and forms a smooth, durable, weather-proof coating which adds years of service to the old roofing, at very small cost.

Put up in all sized packages from 1-pint tins to barrels of 40 gallons.

Confessions of a She-Politician

"I MYSELF, am a victim of the vote for women," writes the anonymous author of this very frank article discussing "Women in Politics."

Rule by Oratory Is Ended

J. K. Munro's monthly feature discussing all phases of Canadian politics as he observes it from his eyry at Ottawa; without bias, without prejudice, and without any particular axe to grind.

This simply **had** to be an anonymous article because the writer is well known throughout several provinces of Canada for her activities in politics. This article is a startling admission from her pen of many things which the women of Canada may think, but few are able or honest enough to place on paper. The writer admits that the life of a woman in politics is not all "a bed of roses" and also is very candid in agreeing with some critics who say that women can never take as responsible a place in politics as men. This article also indulges in some rather severe strictures on the feminine sex, really amazingly penetrating criticism, and should be read with avid interest by every woman and most of the men in the Dominion. It is a human document, guaranteed authentic by the Editor.

WANT ADS

If you want a buyer, clerk, salesman, traveler, position, you can reach the best men in the trade through these columns.

If you wish to buy or sell a business, or dispose of overstocks, you can reach a larger number of hardware men through this page than in any other way.

Rates (payable in advance) 2 cents per word. An additional charge of 10 cents for each insertion is made when Box Number is required. Each figure counts as one word. When panels are desired a charge of $2.20 is made for a panel 1 inch deep by 2⅛ inches wide.

Address all advertisements for this section to HARDWARE AND METAL, 143-153 University Ave., Toronto, Can.

HELP WANTED

A REAL OPPORTUNITY.

There is an opening in the advertising department of Hardware & Metal for an experienced hardwareman, preferably one who has had retail, wholesale and road experience. Must be a man with thorough knowledge of hardware merchandising. Must also be a man of good appearance, and personality, who can discuss hardware merchandising, intelligently with manufacturers and advertising agencies. This position will require a man with initiative, and one who will be willing to make an exhaustive study of the various phases of advertising and merchandising. The right man will be given every opportunity to make good. He will attend trade conventions in various parts of Canada. He will have opportunities to attend sales, advertising and editorial conferences on many of the 15 MacLean publications. A good salary will be paid to start, and future renumeration will keep pace with the man's capacity to earn more money. Apply by letter only, giving complete details regarding qualifications to Manager Hardware & Metal, 153 University Ave., Toronto, Canada.

WANTED---EXPERIENCED HARDWAREMAN head clerk; must be good salesman and stockkeeper. Good opening for a hustler. Apply stating experience age, married or single, wages required, also send copies of refereneds, to The Geo. Taylor Hardware Ltd., New Liskeard, Ont.

SITUATIONS WANTED

YOUNG MAN WANTS POSITION IN RETAIL hardware, some experience, bookkeeping diploma, references, start at fifteen per week. Box 113 Hardwar and Metal.

WANTED

HARDWARE STORES WANTED, WOULD like to get in touch with parties in towns of three thousand and larger in Western Ontario, wishing to dispose of hardware business. Correspondence confidential. Prefer not to purchase buildings, but to lease on long term. Address J. W. Peart, St. Marys, Ont.

FOR SALE

HARDWARE BUSINESS IN ONE OF THE best Eastern towns. Good dairying section. Stock and fixtures about $11,000. Good reason for selling. Box 624, Hardware and Metal.

ONE CLEAT BRACE AND CORNER IRON bender, No. 1, capacity 4″ x ⅛″ or equivalent. Price $13.00. One circular shear, hand power 6″ to 48″ price $40.00. One former roller 36″ x 2½″ price $30.00. All Brown Boggs make and used very very little. Eight thousand tin cans (2-lb. size) soldered tops at ten dollars thousand. Write Canada Felting Co., St. Jacobs, Ont.

MANUFACTURERS' AGENTS

MANUFACTURER'S AGENT, LOCATED IN Vancouver, B.C., handling hardware lines only, has room for one or two more good Agencies. Splendid connections throughout B.C. Adrdess c/o Hardware and Metal, 198 Hastings St. West, Vancouver.

MISCELLANEOUS

NICKEL PLATING — ORDERS EXECUTED promptly. Prices on application. Communicate with F. W. Higginson, 173 William St., Montreal. Telephone Main 8144.

HARDWARE AND METAL is the logical medium to use if you have a message for the Canadian hardware trade.

Quick Results

If you want to buy or sell a business, dispose of overstocks, hire a clerk or manager, use the "Wanted" page of HARDWARE AND METAL. There is no other way in which you can get in touch, more quickly or thoroughly with the best prospects, than by using the "Wanted" page of HARDWARE AND METAL. Cost is only two cents per word, with 10c additional for Box Number.

Look through these you may find what you want

HARDWARE & METAL is the only weekly hardware paper in Canada and is read by practically every worthwhile buyer, both wholesale and retail, in Canada. HARDWARE & METAL is the logical medium to use if you have a message for the Canadian hardware trade.

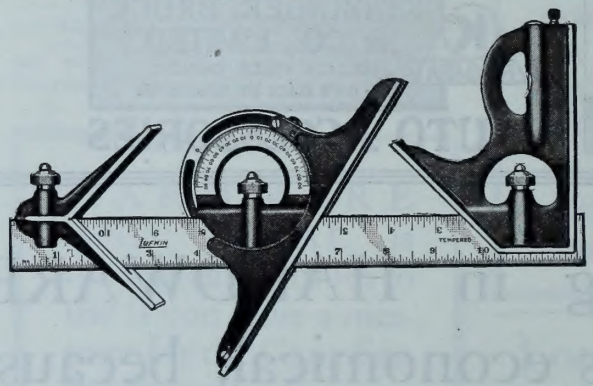
COMBINATION SQUARES



LUFKIN

BEVEL PROTRACTORS
COMBINATION SETS

JUST PUT THEM ON DISPLAY

At a glance every mechanic's eye will be caught by their nicety of design and finish, and their distinctive color.

On closer inspection he will see among other improvements that both legs of center head are exactly same length and ends formed, insuring accuracy on any circumference, large or small. That the double protractor is readily convertible into single protractor, serving perfectly for every sort of work.

B-H Agents Should Enter The "SAVE THE SURFACE" Window Display Competition

The "Save the Surface" Committee has announced a Window Display Competition open to any dealer or dealer's clerk in Canada. The "Save the Surface" window trim and slogan must be part of the display and preference will be given to those windows which illustrate to the best advantage the idea of protection and preservation as embodied in the "Save the Surface" idea.

Some dealers are going to win these prizes and B-H dealers have a wealth of display material to make an attractive display—handsome B-H window cards and cut-outs, B-H lithographed window trim, color cards and a beautiful display of B-H cans.

Decorate your window—win one of the prizes and in addition the window will help you sell more B-H paints and varnishes.

Write us for full particulars and a supply of window display material. We shall gladly offer you any suggestions you may require.

B-H Agents, too, should enter the Save the Surface Newspaper Competition. Ask us for particulars.
